Gen. Wayne built Ft. Wayne; signed peace with Indians at Fort Greenville.

Triple Alliance formed by Great Britain, Russia, and Austria, Sept. 28.

U. S. bought peace from Algiers and Tunis by paying \$800,000, supplying a frigate and annual tribute of \$25,000. Nov. 28.

1796

Washington's Farewell Address as President delivered Sept. 19. Gave strong warnings against permanent alliance with foreign powers, partiality toward favorite nation, big public debt, large military establishment and devices of "small artful, enterprising minority" to control or change government; praised reciprocal checks of Constitution; stressed need for enlightened public opinion; declared religion and morality lead to political prosperity.

Vaccination discovered by Edward Jenner May 14, announced 1798.

1797

U. S. frigate *United States* launched at Philadelphia, July 10; Constellation at Baltimore, Sept. 7; Constitution (Old Ironsides) at Boston, Sept. 20.

France ordered capture of all neutral ships carrying British cargoes.

1798

War with France threatened over French raids on U. S. shipping and rejection of U. S. diplomats. Congress voided all treaties with France, ordered Navy to capture French armed ships. Navy (45 ships) and 365 privateers captured 84 French U. S. Constellation took Fr. warship *Insurgente*, 1799. Napoleon, becoming First Consul, stopped French raids.

1801

Tripoli declared war, June 10, against U. S., which refused added tribute to commerce-raiding corsairs. U. S. frigate *Philadelphia* captured in Tripoli harbor Oct., 1803, burned by Stephen Decatur Feb. 16, 1804. Expedition under William Eaton forced Tripoli to conclude peace June 4, 1805.

1803

Robert Emmet convicted of treason by British in Ireland; executed in Dublin, Sept. 19.

Louisiana Purchase. President Jefferson sent James Monroe to Paris to join Robert R. Livingston, American minister, in offering up to \$10,000,000 for the sale of Orleans (New Orleans) and West Florida. Napoleon, who had recovered Louisiana from Spain by secret treaty, offered all of Louisiana for \$11,250,000 in bonds, plus \$3,750,000 indemnities to American citizens with claims against France. U. S. took title Dec. 20.

Robert Fulton operated experimental steamboat unsuccessfully on Seine, Paris, France.

1804

Lewis and Clark Expedition ordered by Pres. Jefferson to explore what is now northwest U. S. Started from St. Louis May 14; ended Sept. 23, 1806.

Alexander Hamilton (ex-Secretary of the Treasury) and Vice President Aaron Burr (former U. S. Senator from N. Y. State) but a native of Newark, N. J.), fought a duel, July 11, on the Hudson Palisades, Weehawken, N. J. Hamilton, who had fired in the air, was fatally shot.

Code Napoleon systematized French law under the auspices of Napoleon Bonaparte. It became a model for many countries.

John Stevens, Hoboken, operated experimental steamboat with twin-screw propellers, 9 mi.

1803

Napoleon, emperor since May 18, 1804, defeated Austrians at Ulm, Oct. 17; Russo-Austrians at Austerlitz ("masterpiece of battles") Dec. 2. Dissolved Holy Roman Empire. Made brothers Joseph, king of Naples, Louis, king of Holland.

Lord Nelson defeated French-Spanish fleet at Cape Trafalgar, Oct. 21; lost his own life.

1806

Napoleon defeated Prussians at Jena, Oct. 14. In 1807 he defeated Russians at Eylau; signed peace of Tilsit with Czar Alexander I. Made brother Jerome king of Westphalia; allotted Finland to Russia.

1807

Robert Fulton made first practical steamboat trip on Clermont (open boat, 140 by 13 ft., 7 ft. draft, side paddle wheels). Left New York Aug. 17, reached Albany, 150 mi., in 32 hrs.

Aaron Burr was arrested in Mississippi on a federal charge of treason and was put on trial in Richmond, Va., May 22, and was acquitted. Sept. 1. He was charged with having organized an expedition of 100 men, who embarked in flatboats on the Ohio River, and made their way to New Orleans, to establish an empire that was to comprise the Louisiana Territory, a large section of the Western States and Mexico.

1808-09

French occupied Madrid, March; Rome, April; Napoleon made brother Joseph king of Spain. French defeated in Spain and Portugal; Peninsular War begun by British. Napoleon defeated Austrians at Wagram, July 6, 1809. Annexed Papal States.

Phoenix, world's first ocean-going steamboat, built by John Stevens, left New York for Philadelphia, June 8, 1809.

War of 1812 between United States and Great Britain

The War of 1812 coming only 30 years after end of the Revolution, had 3 major causes: (1) Britain, blockading France, seized American ships trading with France; (2) Britain, refusing to recognize naturalized American sailors, seized 4,000 by 1810 and impressed two-thirds into British service; (3) British armed Indians who raided western border. H.M.S. Leopard attacked U. S. Chesapeake, 1807, killed 3 Americans, seized 4. Under President Jefferson U. S., 1807 and 1809, stopped trade with Europe, which ruined American ships. Under President Madison, 1810, trade with Britain only was stopped.

War might have been averted. The British raised the blockade for American ships June 16, 1812, but the news did not reach U. S. by June 18, when Congress by a small majority voted a declaration of war. Congress voted to raise Army from 11,744 to 44,500 and to use militia. The Navy had 20 major ships of 500 guns. The West favored war; New England opposed it. The British were handicapped by war with France.

WAR ON LAND

This was full of blunders caused by inefficient leaders and refusal of regulars to work with militia. U. S. lost Ft. Michilimackinac (Mich.) and Ft. Dearborn (Ill.). Brig. Gen. Wm. Hull surrendered Detroit Aug. 16, 1812, to Maj. Gen. Isaac Brock. Maj. Gen. Stephen van Rensselaer with 2,300 took Queenston Heights, Canada, Oct. 13, but retired when regulars did not support. Brig. Gen. Wm. H. Harrison had 1,000 casualties near Ft. Malden. Brig. Gen. Zebulon M. Pike (disc. Pike's Peak) took York, (Toronto), Apr. 27, 1813, killed in explosion. Brig. Gen. Jacob Brown May 27 repulsed Sir Geo. Prevost, Canadian Governor General. Gen. Henry Dearborn May 27 took Ft. George and Queenston Heights aided by amphibious assault led by Col. Winfield Scott and Comm. Oliver Hazard Perry. British defeated 2,000 Americans a few days later.

Battle of the Thames, Ontario, Can., Oct. 5, 1813. Harrison with 3,500 took Ft. Malden, pursued British 85 mi. Cavalry charge by Kentucky riflemen routed British and Indians, killing Shawnee chief, Tecumseh. Detroit frontier was safe for U. S. In the fall both Brig. Gen. Wade Hampton with 4,000 and Maj. Gen. Jas. Wilkinson, with 6,000 mismanaged attempts to invade Canada; Wilkinson was defeated at Ogdensburg. British recaptured Fts. George and Niagara, burned Buffalo; Americans burned Newark and Queenston.

Battle of Lundy's Lane. Brig. Gen. Winfield Scott (promoted) led fighting of Brown's army at Lundy's Lane, on road to Burlington, July 25, 1814; result a draw with heavy losses. Scott was wounded.

Burning of Washington. In August British landed 4,000 under Adm. Sir Geo. Cockburn and Maj.

1810

Napoleon annulled marriage with the Empress Josephine, who retired to Malmaison. Married Austrian Archduchess Maria Louisa, March. Son born Mar. 20, 1811, called King of Rome. As Duke of Reichstadt, he died in Vienna July 22, 1832. Called L'Aiglon (the Eagle) by French, he inspired Edmond Rostand's drama.

1811

William Henry Harrison, gov. of Indiana territory, defeated Indians under the Prophet, brother of Tecumseh in battle of Tippecanoe, Nov. 7.

1812

Napoleon invaded Russia with conscript army of 500,000; defeated Russians at Borodino, Sept. 7; took Moscow, Sept. 14. Russians burned 30,800 houses in Moscow. Napoleon ordered retreat Oct. 19, meeting huge losses from cold and guerrillas.

1813

Napoleon with 180,000 French decisively defeated at Leipzig by 200,000 allied Prussians, Austrians, Russians, under Austrian Gen. Schwarzenberg in Battle of the Nations, Oct. 16-19.

1814

Allies entered Paris, March 21; Napoleon abdicated, April 11; Louis XVIII restored to throne, May 3; Congress of Vienna opened, Nov. 3. Napoleon exiled to Elba.

1815

Napoleon re-entered France Mar. 1, assumed command, ruled 100 days, Mar. 20-June 22. Defeated at Waterloo, Belgium, June 18, by Duke of Wellington (British), Count von Blücher (Prussian) and allies. Deported to St. Helena Isl., died there May 5, 1821.

Holy Alliance, formed by Russia, Austria and Prussia; signed in Paris, Sept. 26; promulgated in Frankfurt, Feb. 2, 1816, and acceded to 1818 by the rulers of Great Britain and France.

Gen. Robt. Ross. At Bladensburg Aug. 24, 1814, Ross routed 5,000 ill-assorted U. S. troops, then burned Capitol and White House, Maryland militia defeated British Sept. 12 from reaching Baltimore, Ross was killed.

Battle of New Orleans. Maj. Gen. Andrew Jackson, who had defeated the Creek Indians at Horseshoe Bend on the Tallapoosa, Mar. 29, 1814, and captured British base at Pensacola, Fla., Nov. 8, 1814, engaged 2,000 British east of New Orleans, then retired to earthworks built with cotton bales. On Jan. 8, 1815, 5,300 British under Maj. Gen. Sir Edward Pakenham attacked American entrenchments at Chalmette. Jackson had 3,500, a reserve of 1,000, 20 guns and an armed schooner. British had over 2,000 casualties, Pakenham was killed; Americans lost 71. British routed an American battery on the West bank, but withdrew and left by sea Jan. 18. On Feb. 8 they took Mobile. Word came Feb. 14 that a treaty of peace had been signed at Ghent Dec. 24, 1814. U. S. ratified it Feb. 17, 1815.

WAR AT SEA

Brilliant American gunnery brought naval victories. US Essex captured Alert Aug. 13, 1812. US Constitution, 44 guns, Capt. Isaac Hull, destroyed Guerriere Aug. 19; thereafter nicknamed Old Ironsides. US Wasp took Frolic Oct. 18. US United States, Capt. Stephen Decatur, defeated Macedonian off Azores Oct. 25. Constitution took Java Dec. 29, 1812. US Chesapeake captured by Shannon, June 1, 1813; Capt. Jas. Lawrence, dying, called out: "Don't give up the ship!" US Enterprise took Boxer Sept. 5.

Battle of Lake Erie. Commodore Perry, using Lawrence's words as slogan defeated British fleet near Put-in-Bay Sept. 10, 1813. Perry, transferred from disabled flagship Lawrence to Niagara during battle, sent message to Harrison: "We have met the enemy and they are ours: 2 ships, 2 brigs, 1 schooner, 1 sloop."

Essex, Capt. David Porter, first US warship to sail around South America, was defeated off Valparaiso, Chile, Mar. 28, 1814.

Bombardment of Ft. McHenry, Baltimore, for 25 hours, Sept. 13-14, 1814, by British fleet failed. Francis Scott Key, on board ship, wrote words for Star Spangled Banner. See article.

Battle of Lake Champlain. Commodore Thos. Macdonough defeated fleet of Sir Geo. Prevost near Plattsburg, Sept. 11, 1814, while Brig. Gen. Thos. Macomb held 4,500 ready to oppose 11,000. British withdrew to Canada.

U. S. frigate President was captured Jan., 1815. Constitution captured Cyane and Levant, Feb. 20, 1815. Hornet captured Penguin, Mar. 23.

The War of 1812 was costly, but inspired national unity, gave recognition to men of the western border, made Andrew Jackson political power.

1817

Rush-Bagot treaty signed, April 28-29, limiting naval armaments of the United States and Canada on the Great Lakes.

First poems by John Keats.

1820

Henry Clay's Missouri Compromise bill passed by Congress, March 3. Slavery was allowed in Missouri, but not elsewhere west of the Mississippi river north of 36° 30' Latitude (the southern line of Missouri). Repealed 1854.

1822

Revolution in Portugal. Separation of Brazil which proclaimed independence Sept. 7. Dom Pedro was crowned emperor Dec. 1; he abdicated 1831; succeeded by his son; a republic proclaimed 1888.

Mexico separates from Spain, makes Iturbide emperor, May; forms republic, Oct., 1823.

1823

Monroe Doctrine declared, Dec. 2. Mississippi River first ascended by steamboat, the Virginia, as far as Fort Snelling, Minn., April 21-May 10, 729 miles.

Gas vacuum (internal combustion) engine operated successfully by Samuel Brown, London.

1824

Marquis de Lafayette, 67, visited each of the 24 states as guest of U.S.

Simon Bolivar, ruler of Venezuela, Colombia, Ecuador, Peru; broke Spanish power in South America (Died 1830).

1825

Trade unions allowed in Great Britain. First railroad to use steam locomotive (on level grade only) Stockton-Darlington Ry. opened in Eng., Sept. 27, with Stephenson's engine "Locomotion." First public railroad to use steam exclusively for passenger and freight traffic, Liverpool & Manchester, opened Sept. 15, 1830.

Erie Canal opened, first boat left Buffalo, Oct. 26, and reached New York City, Nov. 4.

First iron steamboat built in America, the Coderus, at York, Pa., by John Elgar.

1827

Slavery in New York State abolished July 4.

Steamship Curacao, first European built oceanic vessel to use steam power alone, crossed the Atlantic April from Antwerp to Paramaribo, Dutch Guiana. The Royal William launched in Montreal, April 29, 1831, left there Aug. 18, 1833, crossed to Europe in 25 days, using only steam.

1828

First passenger railroad in U. S., Baltimore & Ohio, was begun July 4, first 14 miles opened to horse-drawn, railcar traffic May 24, 1830.

1830

Mormon church organized by Joseph Smith, in Fayette, Seneca County, N. Y., Apr. 6.

Revolution in France. Charles X abdicated, Aug. 2, and was succeeded by the Duke of Orleans as Louis Philippe I. There were revolts in Brunswick, Saxony and Belgium. Belgium became independent kingdom.

First regularly scheduled passenger train service in U. S. using steam power opened at Charleston on South Carolina Railroad Dec. 25 with 3½-ton U. S.-built locomotive, Best Friend of Charleston.

1831

Nat Turner, a Negro slave from Virginia, led a band of men in a wild escape, killed 57 whites, Aug. Army called in, Turner caught and hanged.

1832

Black Hawk War (Ill.-Wis.) April-Sept., pushed Sac & Fox Indians across Mississippi.

Ordinance of nullification of the tariff passed by South Carolina convention Nov., 1832, declaring that if the Federal government attempted to enforce the law the state would consider itself no longer a member of the Union. Congress, Feb. 1833, passed a compromise tariff act, whereupon South Carolina repealed act.

First British Reform Bill: Middle class enfranchised; step toward political democracy.

1833

Slavery in British Empire outlawed Aug. 28 as of Aug. 1, 1834. About 700,000 were liberated at a cost of £20,000,000. Slavery was abolished in Britain June 22, 1772. Slave trade was suppressed 1807.

Oberlin College, first in U. S. to adopt co-education, 1835. Oberlin refused to bar students on account of race.

1835

Texas proclaimed independence of Mexico in convention Nov. 1. Provisional govt. formed. Stephen Austin and Sam Houston leaders.

Fire in New York City, Dec. 16-17, destroyed 674 buildings.

Gold discovered on Cherokee land in Georgia; Indians forced to cede lands for \$5,000,000 Dec. 20, and to cross Mississippi.

1836

Texans besieged in Alamo (San Antonio) by Mexicans under Santa Anna Feb. 23-Mar. 6, garrison

massacred, including W. B. Travis and David Crockett. At Goliad Mar. 27 Capt. Fannin and 371 Texans who had surrendered were massacred by Mexicans. At San Jacinto Apr. 21 Sam Houston and 800 Texans defeated 3,000 Mexicans. Santa Anna signed treaties ending hostilities, promised to recognize Texan independence, but Mexican congress repudiated treaties.

Marcus Whitman, H. B. Spaulding and wives reached Fort Walla Walla on Columbia River, Oregon. First white women to cross plains.

Seminole Indians in Florida under Ocoela attacked whites Nov. 1 in protest against removal. After massacres and battles, war ended Aug. 14, 1842, with Indian defeat.

1837

Victoria, 18, niece of William IV, became queen of England. Married her first cousin, German Prince Albert of Saxe-Coburg, 1840. He died 1861.

1838

The Great Western, a steamship, 236 ft. long, 450 horsepower, 1340 gross tons, left Bristol, England, Apr. 8, and arrived in New York City, Apr. 23. The Sirius, 178 ft. long, 703 tons, left Liverpool Mar. 28, and Queenstown, Apr. 4, and reached N. Y. C. Apr. 22, using only steam power.

1839

Belgium and the Kingdom of the Netherlands were separated by treaties signed by those two countries and by Great Britain, France, Austria, Prussia, and Russia, at London, April 19. To the treaties was annexed a document declaring Belgium independent and perpetually neutral.

Opium War broke out between China and Britain. China tried to prohibit opium trade in Canton. British resist and take Canton. War ended with Treaty of Nanking, Aug. 1842.

1840

Antarctic Continent found by Comdr. Charles Wilkes of First U. S. Exploring Expedition; named Wilkes Land, Jan.-Feb.

1841

First emigrant train for California, 47 persons, left Independence, Mo. May 1, reached Stanislaus River Nov. 4.

First passenger train on Erie R.R. June 30.

First use of anaesthetic (sulphuric ether gas) by Dr. Crawford W. Long, Jefferson, Ga. Dr. Wm. T. G. Morton, dentist, used ether for painless extraction of tooth, Sept. 30, 1846; administered ether in tumor operation, Oct. 16, 1846, at Mass. General Hospital, Boston.

1844

First message over first telegraph line (authorized 1843) sent from U. S. Supreme Court room in Capitol, May 24, to Baltimore by inventor S. F. B. Morse: "What hath God wrought!"

Jos. Smith, Mormon leader, and brother Hyrum killed in Carthage, Ill., jail by mob June 27.

1845

Texas voted for annexation to U. S. July 4. Congress admitted Texas as 28th state Dec. 29.

1846

Mexican War. President James K. Polk ordered Gen. Zachary Taylor to seize disputed Texan land settled by Mexicans. After border clash U. S. declared war, May 13; Mexico, May 23.

Bear flag of republic of California raised by American settlers at Sonoma June 14. Gen. J. C. Fremont took charge July 5. Commodore J. S. Sloat took Monterey July 7, declared California annexed to U. S. Commodore Robt. F. Stockton succeeded Sloat, was ordered to recognize Gen. Kearny as governor and commander in chief in California. Kearny was defeated by Mexicans Dec. 6, retreated to San Diego.

1858

First Atlantic cable completed by Cyrus W. Field Aug. 5. Queen Victoria and President Buchanan exchanged greetings but cable failed Sept. 1. Field tried again in 1865, succeeded in 1866.

Lincoln-Douglas debates, Ill., Aug. 21-Oct. 15, 1859

Dixie composed by Dan D. Emmett (1815-1904) minstrel.

First commercially productive oil well, 69½ ft., drilled near Titusville, Pa., by Edwin L. Drake, Aug. 27, started boom.

John Brown, abolitionist, with 21 men seized U. S. Army at Harpers Ferry (then Va.) Oct. 16. U. S. Marines under Lt. Col. R. E. Lee captured raiders, killing 11. Five civilians, one Marine also killed. Brown was hanged for treason by Virginia, Dec. 2, as were 5 of his band, at Charlestown (now Charles Town, West Va.).

Darwin's Origin of Species published. His theory of evolution caused revolution in scientific, intellectual and religious thinking.

1860

Abraham Lincoln, Republican, elected president by 1,866,452 popular and 180 electoral votes; Stephen A. Douglas had 1,375,157 and 12; John C. Breckinridge, 847,953 and 72; John Bell 590,631 and 39. Lincoln took office Mar. 4, 1861; Breckinridge and Bell supported secession.

First Pony Express between Sacramento, Calif., and St. Joseph, Mo., 1,980 miles apart, started from each place at 5 p.m., Apr. 3; 80 men each rode 75 miles on 429 horses changed every 10 miles. There were 190 relay stations. The service ended Oct. 24, 1861, when first transcontinental telegraph line was completed.

Giuseppe Garibaldi led 1,000 volunteers to Sicily, May, to unify Italy by force; deposed Francis II of Naples; hailed Victor Emmanuel of Sardinia as King of Italy.

1861-65—Civil War. See Article Pages 304-305

1861

Emancipation of Russian serfs by Czar Alexander II. Paved the way for later reforms by Alexander.

1863

Draft riots in N. Y. City killed an estimated 1,000 including Negroes who were hung by mobs, July 13-16. More than 50 buildings were burned.

1866

Ku Klux Klan formed secretly in South to terrorize Negroes who voted. Disbanded, 1869. Not to be confused with Ku Klux Klan, Inc., organized 1915.

First post of the Grand Army of the Republic formed at Decatur, Ill. April 6. First national encampment met Nov. 2 in Indianapolis, Ind. For years this Union veterans organization was a political force in the nation. Last encampment held Aug. 31, 1949, in Indianapolis; 6 of the 16 surviving veterans attended.

1867

Alaska sold to U. S. by Russia for \$7,200,000 (\$2 an acre) Mar. 30, through efforts of Sec. of State Wm. H. Seward and Sen. Charles Sumner.

Emperor Maximilian of Mexico executed by Juarez party, June 19. He was an Austrian archduke placed on throne Apr. 10, 1864, by French.

Dominion of Canada established July 1.

Abolition of the Shogunate and restoration of the Mikado marked beginning of Meiji reforms that industrialized and modernized Japan; feudalism abolished, 1871; Constitution promulgated, 1889.

1868

The World Almanac, a publication of the New York World newspaper, appeared for the first time.

Thomas D'Arcy McGee, a "Father of Confederation," shot in only Canadian political assassination.

President Andrew Johnson, blocked by Senate in attempt to remove Edwin M. Stanton, secretary of war for opposing his policies, was impeached for violation of tenure of office act by radical Senators, tried and acquitted. March-May, Stanton resigned.

Memorial Day first observed officially May 30 on order by Gen. John A. Logan, Commander G.A.R.

1869

Financial "Black Friday" in New York, Sept. 24; caused by gold corner.

Transcontinental railroad completed; golden spike driven at Promontory, Utah, May 10, marking the junction of Central Pacific and Union Pacific.

Woman's suffrage law passed in territory of Wyoming, Dec. 10.

1870

Franco-Prussian War. Napoleon III, French emperor, tricked into declaring war on Prussia by Bismarck, Prussian chancellor, over Spanish succession issue, surrendered with large army at Sedan, Sept. 4. Nationalists declared republic, Sept. 4.

For origins of the Civil War see Confederate States and Secession.

South Carolina, Georgia, Alabama, Mississippi, Louisiana and Florida formed the Confederate States of America Feb. 8, chose Jefferson Davis provisional president; were joined later by Texas, North Carolina, Arkansas and Virginia.

FIRST YEAR OF WAR—1861

South Carolina, through Gen. Beauregard demanded surrender of Ft. Sumter in Charleston harbor Apr. 11, Major Robert Anderson, USA, refused. Bombardment started at 4:30 a.m. April 12. Anderson surrendered Apr. 14.

President Lincoln called for 75,000 militia from states by quotas, April 15. New York state voted to enlist 30,000 militia for 2 years and \$3,000,000 for defense.

U. S. troops evacuated Harpers Ferry Apr. 18. On Apr. 19 the 6th Mass. Infantry en route to Washington was attacked in the streets of Baltimore; 4 soldiers were killed.

Col. Robert E. Lee resigned from the U. S. Army April 20, became commander of Virginia troops April 23, brigadier general May 14, full general of the Confederacy June 14.

Brig. Gen. Geo. B. McClellan, Dept. of the Ohio, made major general May 14, cleared western Virginia of Confederates. Made general in chief, USA, Nov. 1, on retirement of Gen. Winfield Scott.

In Missouri Brig. Gen. Nathaniel Lyon drove Confederates under Gen. Sterling Price out of Jefferson City and Boonville, June 17. Col. Franz Sigel was forced back at Carthage July 5. At Wilson's Creek Lyon was killed in losing battle with Price Aug. 10.

Battle of Bull Run or Manassas. Brig. General Irvin McDowell attacked Beauregard's forces on the Warrenton Road, July 21, pushed them back to Henry House hill, Confederates were based on Manassas Junction, Va. Gen. Jos. E. Johnston's army from Winchester, including forces commanded by Col. Thomas J. Jackson and Gen. E. Kirby Smith reinforced Confederates, and with help of Gen. Jubal Early's brigade routed Federals. Brig. Gen. B. E. Bee, CSA, said: "Look, there is Jackson standing like a stone wall!" McDowell had 28,455 troops, 18,500 engaged, 2,708 casualties; Confederates had 32,072 available, 18,000 engaged, 1,967 casualties. Congress July 22 authorized 500,000 for army.

EVENTS OF 1862

Forts Henry and Donelson—Maj. Gen. Henry W. Halleck, Western Dept., sent Brig. Gen. U. S. Grant with 17,000 on river craft of Flag Officer Andrew H. Foote vs. Ft. Henry on Tennessee River; it fell Feb. 6. Grant rushed troops across 10 mi. of bogs to Ft. Donelson on the Cumberland, sent his "unconditional surrender" message to Brig. Gen. Simon B. Buckner, CSA, who gave up with 11,500 Feb. 16. At Pea Ridge, Ark., Mar. 6-8 Gen. Saml. R. Curtis, USA, defeated Gens. Van Dorn and Price. Casualties: USA, 1,351; CSA, 1,300.

New Madrid, Mo., captured Mar. 14, by Gen. John Pope. Island No. 10 surrendered to Pope and Foote with 7,000 men Apr. 7.

Gen. Albert Sidney Johnston, CSA, 40,000 from Corinth, Miss., surprised Grant at Shiloh Church near Pittsburg Landing, Tenn. Apr. 6; Johnston was killed. Gen. Beauregard retreated Apr. 7 after Brig. Gen. Don Carlos Buell reinforced Grant with about 20,000. U. S. had 44,895 engaged, with 1,734 killed out of 13,047 casualties; CSA, 1,728 killed out of 10,699 casualties.

Fighting ships and gunboats under Flag Officer David G. Farragut, Comm. D. D. Porter, in Mississippi silenced Chalmette batteries; with Gen. Benj. F. Butler took forts; New Orleans surrendered Apr. 25 to Farragut who turned it over to Butler May 1.

Leon Gambetta, bitter-ender, escaped from Paris in balloon Oct. 7 to carry on war.

The troops of Victor Emmanuel II, under Gen. Cadorna, took possession of Rome, Sept. 20, in the name of the Kingdom of Italy. Rome and the rest of the Papal States then were annexed by a plebiscite, taken Oct. 2.

1871

Court of Arbitration awarded United States damages of \$15,500,000 gold against Britain because British equipped Alabama and 12 other Confederate raiders. After sinking 65 U. S. ships Alabama was destroyed by Kearsarge off Cherbourg, 1864.

Major Events of Civil War, 1861-1865;

Farragut made rear admiral, July.

Monitor and Merrimack—Confederates rebuilt scuttled US frigate Merrimack into ironclad Virginia. Sank Cumberland, USN, destroyed Congress, USN, at Hampton Roads, Va., Mar. 8. Three other US ships ran aground, including Minnesota. Monitor, flat-decked ironclad, 900 tons, 172 ft. long, with revolving turret and 2 11-in. guns, built by John Ericsson at \$275,000 cost; Lt. John L. Worden commander, crew of 58, badly damaged Virginia. Mar. 9, which withdrew. Monitor did not resume fighting. After Federals took Virginia's base Confederates scuttled ship May 11.

Peninsular Campaign—McClellan moved Army of the Potomac by sea to Fort Monroe, Va., 70 mi. from Richmond. Confederates sent Stonewall Jackson up Shenandoah Valley to divert Federals; Jackson lost at Kernstown, Va., but routed Federals at McDowell, Front Royal, Winchester, Cross Keys, Fort Republic, Mar. 23-June 9. McClellan's advance troops clashed with Maj. Gen. James Longstreet at Williamsburg May 5. On May 25 2 US corps crossed to south side of Chickahominy leaving 3 on north side. Gen. Jos. E. Johnston attacked south side May 30, Battle of Fair Oaks or Seven Pines, was repulsed. Johnston was wounded and Lee took over Army of Northern Virginia. Gen. J. E. B. Stuart, CSA, June 13-15, led his cavalry on scout around McClellan.

Gen. Lee started **Seven Days' Battles** at Mechanicsville June 26. McClellan withdrew to Gaines Mill (1st Cold Harbor) where Lee with 57,000 assaulted Brig. Gen. Fitz John Porter's 34,000 June 27. McClellan held off Lee at Savage Station June 29, Frayser's Farm or Glendale June 30; stopped Stonewall Jackson at White Oak Swamp June 30. At Malvern Hill July 1 Confederates had 5,000 casualties from U. S. guns. Despite this success McClellan withdrew army to Harrison's Landing. With over 115,000 available against Confederates' 95,000, McClellan from June 25-July 1 had 1,734 killed, 8,062 wounded, 6,053 missing; CSA had 3,478 killed, 18,261 wounded, 875 missing. In July Halleck became general in chief. McClellan was succeeded by Maj. Gen. John Pope.

Second Bull Run (Manassas). Stonewall Jackson and Maj. Gen. A. P. Hill, CSA, attacked Maj. Gen. Nath. P. Banks (part of Maj. Gen. John Pope's Army of Virginia) at Cedar Mountain, Va., Aug. 9. Jackson destroyed Pope's supplies at Manassas Aug. 26. Major battle was fought Aug. 30. Pope, checked by Jackson and Longstreet, withdrew; was relieved.

Antietam (Sharpsburg). Lee with 50,000 crossed Potomac Sept. 4 to Frederick, Md., moved across South Mountain to Hagerstown, Md. McClellan, after finding Lee's orders fought Longstreet and D. H. Hill at South Mountain, Sept. 14. Lee dropped back to Antietam creek near Sharpsburg, Md., Sept. 15; Jackson took Harpers Ferry, where only 1,300 cavalry of 12,000 USA escaped. McClellan attacked Sept. 17; stopped Lee, but failed to use reserve and let Lee withdraw across Potomac. USA had 70,000 engaged, 13,000 casualties; CSA had 50,000 engaged, 13,000 cas. Maj. Gen. Stuart, CSA cavalry raided Chambersburg, Pa., Oct. 10. **Fredericksburg, Va.** Lincoln relieved McClellan, gave Army of the Potomac to Maj. Gen. Ambrose E. Burnside. Burnside crossed Rappahannock, made frontal attacks on Marye's Heights above Fredericksburg Dec. 13. Lee, Longstreet and Jackson with 75,000 repulsed him. USA lost 12,653; CSA 5,377.

In Tennessee Maj. Gen. Wm. S. Rosecrans, USA, pushed back Gen. Braxton Bragg at battle of Stones River-Murfreesboro Dec. 31-Jan. 3. US 12,000 casualties; CSA 11,000.

Preliminary proclamation, Sept. 22, by President Lincoln announced that Jan. 1, 1863, slaves would be declared free in territory then in rebellion.

Tuileries palace, executed 67 hostages. Communards overcome by French army; deaths est. 20,000.

Treaty of Frankfurt, May 23, ended Franco-Prussian War. France ceded Alsace, most of Lorraine, paid 5 billion francs indemnity.

The Law of Guarantees, passed by the Italian Parliament May 13, granted the Pope and his successors possession of the Vatican, the Lateran and the villa of Castel Gandolfo and a yearly allowance of 3,225,000 lire, or about \$645,000. The money was not claimed.

Great fire destroyed heart of Chicago, Oct. 8-11; loss est. \$196,000,000. Started in Mrs. O'Leary's barn, 559 De Koven St. by cow kicking over lantern according to legend.

Henry M. Stanley, sent by James Gordon Bennett, owner of New York Herald, to find David

Livingstone, missionary, greeted him Nov. 10 at Ujiji, in Central Africa, now Tanzania, with "Dr. Livingstone, I presume?"

First U. S. postal card issued, May 1.

1872

Col. James Fisk, Jr., shot in New York City by Edward S. Stokes, Jan. 6; he died two days later; Stokes got four years in prison.

1873

Panic in New York City began with bank failures, Sept. 20.

Charley Ross, 4, kidnapped in Germantown, Pa., July 1, caused national sensation.

"Boss" W. M. Tweed in New York City, convicted of fraud, Nov. 19, and sentenced to 12 years

Emancipation and Lincoln's Assassination

EVENTS OF 1863

Lincoln's Emancipation Proclamation, Jan. 1, declared free forever the slaves in Arkansas, Texas, Louisiana (certain parishes already occupied excepted); Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia (West Virginia and other portions excepted). About 3,000,000 slaves were thus declared free.

Chancellorsville, Va.—Maj. Gen. Jos. E. Hooker succeeded Burnside and with 90,000 available, attempted to envelop Lee May 2. Jackson led 32,000 around US Army, drove in right of Maj. Gen. O. O. Howard. Jackson wounded by own troops May 2, died May 10; succeeded by Maj. Gen. J. E. B. Stuart. Shell stunned Hooker May 3. Maj. Gen. John Sedgwick forced Confederates out of Marye's Heights; was pushed back May 4. Against consensus Hooker withdrew across Rappahannock. US casualties 17,197; CSA 13,000. Lincoln called for 100,000 for 6 mos. June 15.

Gettysburg—Lee with 76,224 and 272 guns, invaded Penn. Army of the Potomac had 115,256, about 90,000 effective, 362 guns. Maj. Gen. Jubal A. Early, CSA, levied on York, Pa. for \$100,000 supplies June 27. Lincoln gave Maj. Gen. Geo. G. Meade top command June 28. 1st US Cavalry (Buford) pushed back at Gettysburg by Lt. Gen. A. P. Hill, CSA, July 1. Lt. Gen. Richard S. Ewell, CSA, forced US back to Cemetery Hill; Maj. Gen. Reynolds, USA, killed. US took Culp's Hill, extended line to Round Top, with Maj. Gens. Hancock, Sickles, Sedgwick, Howard, Slocum and Pleasanton (cavalry). Lee's attacks checked July 2. On July 3 Maj. Gen. Geo. E. Pickett, Maj. Gen. Isaac Trimble and Brig. Gen. Jas. J. Pettigrew with 12,400 made assault on foot from Seminary Ridge vs. US center (Hancock); were repulsed with 4,500 casualties. Lee retreated into Virginia; Meade did not pursue. Losses: US, 3,155 killed, 14,529 wounded, 5,365 missing; CSA, 3,903 killed, 12,709 wounded, 5,425 missing. Many of the missing were prisoners. Total casualties estimated at 23,049 USA, 20,451 CSA, or over 43,000.

Vicksburg—Gen. Wm. T. Sherman took Jackson, Miss., May 14, held back Jos. E. Johnston, CSA. Lt. Gen. John C. Pemberton, CSA, commanding 30,000, was defeated at Champion's Hill and Black River Bridge, shut up in Vicksburg. He surrendered July 4; Grant paroled prisoners. Gen. Banks with 15,000 captured Port Hudson July 8, giving US control of Mississippi River.

Tennessee—Maj. Gen. Wm. S. Rosecrans took Chattanooga Sept. 9. Braxton Bragg, CSA, drove him back to Chickamauga, but Maj. Gen. Geo. H. Thomas checked Bragg, Sept. 18-20; was called "Rock of Chickamauga." Grant made commander of all armies there; Sherman of Grant's Army of the Tennessee; Thomas replaced Rosecrans. Longstreet reinforced Bragg; Hooker supported Thomas. Hooker took Lookout Mt., fought Battle Above the Clouds, Nov. 24. Sherman and Thomas dislodged Bragg at Missionary Ridge, Nov. 25. Bragg retreated to Georgia.

Brig. Gen. John H. Morgan, CSA, raided Indiana and Ohio; captured at New Lisbon, O., escaped from prison at Columbus, Nov. 27. Killed at Greenville, Tenn., Sept. 4, 1864.

EVENTS OF 1864

Grant made lieutenant general Mar. 1, gen. in chief Mar. 12. Sherman succeeded him in West. Halleck made chief of staff. Draft for 500,000 to serve 3 yrs. or duration begun Mar. 10; 200,000 more Mar. 14.

Rear Adm. David G. Farragut won naval battle, Mobile Bay, Aug. 5.

Wilderness; Spotsylvania—Bloody battles followed when Grant crossed the Rapidan and was attacked by Lee at Wilderness, May 5. Longstreet was wounded by his own men. Grant attacked Lee at Spotsylvania Court House May 10 (2nd Wil-

derness). Maj. Gen. Franklin G. Barlow took Spotsylvania salient, including Bloody Angle, May 12 (3rd Wilderness). Maj. Gen. Sedgwick killed. US killed and wounded May 5-12 est. 26,813; missing 4,183. Maj. Gen. Sheridan's cavalry defeated Maj. Gen. J. E. B. Stuart at Yellow Tavern, Va., May 11; Stuart was fatally wounded, died May 12 in Richmond.

Cold Harbor—Lee took strong position near the Chickahominy. Grant made frontal attacks June 3, lost 7,000 casualties in 30 minutes, 11,000 June 1-3. US S. Kearns, Capt. John A. Winslow, defeated CSS Alabama, Capt. Rafael Semmes, off Cherbourg, France, June 19; Alabama surrendered and sank.

Siege of Petersburg—Grant assaulted Confederate positions June 15-18 with 7,851 casualties. Exploded a mine under Confederate works July 30; during fight in crater US lost 898 killed, 660 wounded, 3,110 missing; CSA 400 killed, 600 wounded, 200 missing.

Early vs. Sheridan—Lee sent Maj. Gen. Jubal A. Early to hold Shenandoah Valley. Early went through Maryland to outskirts of Fort Stevens near Washington, July 11. Sheridan defeated Early at Winchester Sept. 19. Fisher's Hill, Sept. 22. Early surprised Wright at Cedar Creek Oct. 19; Sheridan's famous ride from Winchester rallied troops, brought victory.

Sherman's Campaign for Atlanta—Sherman defeated Johnston at Resaca, Ga., May 14-15. Hooker repulsed at New Hope Church, Ga., May 25. Johnston repulsed Sherman at Kennesaw Mtn., June 27 (US casualties 3,000, CSA 600), evacuated post, was superseded by Gen. J. B. Hood, CSA, July 17. Lt. Gen. Wm. J. Hardee, CSA, defeated at Peach Tree Creek, July 20. Hardee defeated in battle of Atlanta, July 22, by Gen. J. B. McPherson, who was killed. Sherman occupied Atlanta Sept. 2, burned it Nov. 15, started March to the Sea, reached Savannah Dec. 21. Thomas defeated Hood at Nashville, Tenn.

Gen. Nathan B. Forrest, CSA, captured Fort Pillow, Tenn., Apr. 12, inflicting heavy loss on U. S. Negro troops.

EVENTS OF 1865

Confederates evacuated Columbia, S. C., and Charleston, S. C., Feb. 17. Cape Fear River forts captured Feb. 20-21. Brig. Gen. Geo. A. Custer defeated Early at Waynesboro, Va., Mar. 2. Confederates evacuated Petersburg and Richmond Apr. 2-3. Lee surrendered 27,805 to Grant at Appomattox Court House, Va., Apr. 9. Johnston surrendered 31,243 to Sherman at Durham Sta., N.C., Apr. 18.

MURDER OF LINCOLN

Lincoln was shot by John Wilkes Booth, an actor, in Ford's Theatre, in Washington, April 14, died, April 15; Booth was shot to death in the pursuit, April 26, at a burning barn, on a farm near Port Royal, Va. Those hanged for complicity were Mrs. Mary E. Surratt, David E. Herold, George A. Atzerodt and Lewis Payne (Powell), July 7. Also convicted of conspiracy were Dr. Samuel A. Mudd, who set Booth's broken ankle, Samuel Arnold, Michael O'Laughlin, and Edward Spangler. All were sentenced to life imprisonment except Spangler, who received a 6-year sentence. They were sent to Dry Tortugas Prison, off Key West, where O'Laughlin died during an 1867 outbreak of yellow fever. Dr. Mudd's unselfish services as a physician during the outbreak won him a pardon; Arnold and Spangler were freed from Dr. Mudd in 1869. John H. Surratt, son of Mary E., fled to Europe, was brought back, tried and freed. Booth's body was buried under the stone floor of a naval prison in Washington, later reburied in the Booth family plot in Baltimore.

Slavery was abolished by adoption of the 13th amendment to the Constitution, Dec. 18.

in prison; the court released him from Blackwells Island prison June, 1875, on a technicality; he was committed to Ludlow St. jail in a civil suit; escaped, Dec. 4, 1875, and went to Cuba, then to Spain, bringing back to New York City, Nov. 1876; he died in Ludlow St. jail, April 12, 1878.

1876

Samuel J. Tilden, Democrat, received majority of 250,000 popular votes for President over Rutherford B. Hayes, Republican, and had 184 electoral votes against 163, with returns from South Carolina, Florida, Louisiana and Oregon, 22 electoral votes, in dispute. Bitter contest for delegates with charges of corruption, left issue to Congress, which appointed electoral commission, 8 Republicans, 7 Democrats. Hayes given Presidency by strict party vote.

Gen. George A. Custer and 264 soldiers of the Seventh Cavalry killed June 25 in Battle of the Little Big Horn, Mont., in Sioux Indian war; massacred by Indian tribes united by Sitting Bull, prophet; fighting led by Chiefs Gall and Crazy Horse.

Great blizzard in eastern U. S. Mar. 11-14. Roscoe Conkling, victim of exposure, died April 18.

1888

Crown Prince Rudolf of Austria and Baroness Maria Vetsera found slain in his hunting lodge, Mayerling, near Vienna, Jan. 29.

Johnstown, Pa., flood, May 31; 2,200 lives lost. Universal Exhibition in Paris, May 6 through Nov. 6. Eiffel Tower (984.25 ft.) opened. (Height with TV antenna 1,052 ft.) First automobile exhibited, a Benz.

Dom Pedro II, emperor of Brazil, forced off throne by plotters after he freed slaves. Died in Paris, 1891, last emperor on American soil.

1890

First execution by electrocution; Wm. Kemmler, Aug. 6 at Auburn prison, Auburn, N. Y., for murder.

Castle Garden closed as immigration depot and Ellis Island opened Dec. 31 (Closed 1954).

1891

Park Place disaster, New York City, 64 killed, Aug. 22, by the collapse of upper floor.

1892

Homestead, Pa., strike at Carnegie steel mills, near Pittsburgh; conflict between 300 Pinkerton guards and strikers; seven guards and 11 strikers and spectators shot to death, many wounded July 6. Henry C. Frick, ch., wounded in Pittsburgh, July 23, by Alexander Berkman, anarchist.

1893

Ford's Theater building, Washington, where Lincoln was shot, used by Pension Bureau, collapsed June 9, killing 22.

1894

Chinese-Japanese War began, July 25. Battle of Yalu, Sept. 17, treaty of Shimonoseki, April 17, 1895, gave Japan Liaotung Peninsula, Formosa and the Pescadores.

Jacob S. Coxey led 20,000 unemployed from the Mid-West into Washington, April 29. Coxey died May 18, 1951, aged 97.

Strike of employees of Pullman Co., South Chicago, Ill., June, led Eugene V. Debs to call sympathetic strike of American Railway Union. President Cleveland called out Federal troops over protest of Gov. Altgeld (Illinois). Debs and 3 others were imprisoned 6 mos. for contempt of court. Strike called off Aug. 7.

Thomas A. Edison's Kinetoscope given first public showing at 1155 Broadway, New York, April 14. Was patented 1891 for U. S. only.

Capt. Alfred Dreyfus found guilty of betraying French army secrets Dec. 22, in sensational frame-up; real culprit, Major Esterhazy, acquitted; Dreyfus condemned to Devil's Island, off French Guiana. Recalled for second trial by efforts of Emile Zola and Clemenceau, again condemned Sept. 9, 1899. Public clamor led to pardon, Sept. 19. Further proofs of innocence led to complete rehabilitation, 1906, with rank of major. He served as lieutenant in World War I.

1895

Cuban Revolution resumed Feb. 20; Gen. Antonio Maceo, leader of the insurrection, was killed in action, Dec. 7, 1896.

X-rays discovered by Wilhelm Konrad Roentgen, a German physicist; Nobel prize winner, 1901.

1896

President Cleveland intervened in boundary dispute between Venezuela and British Guiana on basis of Monroe Doctrine; appointed arbitration commission, which settled it Feb. 2, 1897.

Guglielmo Marconi received first wireless patent from Britain June 2.

William Jennings Bryan delivered "Cross of Gold" speech at Democratic National Convention in Chicago, July 8. Bryan nominated for president but defeated by Republican Wm. McKinley.

1897

Eugene V. Debs formed Social Democratic party.

1898

Radium discovered by Pierre Curie, Mme. Curie and G. Bemont, Paris.

1898—Spanish-American War.

See Article Page 307

1899

South African (Boer) war began Oct. 11; Ladysmith relieved Feb. 28, 1900; Pretoria fell June 5, 1900; war ended, May 31, 1902, with loss of independence of Boer republics, Transvaal and Orange Free State, now in Union of South Africa. British losses: 5,773 killed; 16,171 died of wounds or disease; 22,829 wounded. Boers engaged est. 65,000, losses unknown.

Filipino insurgents (est. 12,000 under arms) unable to get recognition of independence from

U. S. A., started guerrilla war, Feb. 4. Crushed with capture, Mar. 23, 1901, of leader, Emilio Aguinaldo, by Brig. Gen. Frederick Funston.

Open Door Policy of U. S. Secy. of State John Hay, supported by 6 nations. Policy was to make China an open market for international commerce and to preserve its integrity as a nation. Boxer anti-foreign uprising started in China; missionaries and Christian Chinese murdered.

1900

Carry Nation, Kansas anti-saloon agitator, began raiding with hatchet. Died June 9, 1901. Boxers in China killed German minister June 20. Foreigners besieged in Peking legations. Relief expedition of 18,000 American, British, French, Japanese and Russian troops took Tientsin July 13; Peking Aug. 14. U. S. had 2,500 under Maj. Gen. A. R. Chaffee, including two infantry regts., one troop of cavalry, one light battery, two batts. of Marines. Germans arrived and Field Marshal Count Alfred von Waldersee led army of occupation. Russia refused to yield parts of Manchuria. Ravager Empress of Russia 28th allied terms Sept., 1901. All except U. S. exacted large concessions and indemnity of \$333,000,000, payable in 39 years. U. S. accepted \$25,000,000, returned half in 1908 to provide student exchange fund.

Campaign begun, June 26, by Drs. Walter Reed, Aristides Agramonte, Jesse Lazear and James Carroll to wipe out yellow fever in Cuba.

Galveston hurricane and tidal wave, Sept. 8; 5,000 lives estimated lost.

1901

President Wm. McKinley was shot at the Pan-American Exposition in Buffalo, N. Y., Sept. 6, by Leon Czolgosz, an anarchist; died Sept. 14. Theodore Roosevelt, vice pres., became 26th President. Czolgosz was executed. McKinley tomb in Canton, Ohio. Marconi signalled letter "S" across Atlantic from Cornwall, Eng., to Newfoundland, Dec. 12.

1902

Anglo-Japanese alliance formed Jan. 30 to protect Japan against encroaching Russians.

Cuban Republic inaugurated. American occupation under Gen. Leonard Wood, ended May 20.

First International Arbitration Court opened in The Hague, Holland, October.

1903

First automobile trip across U. S., San Francisco to New York, May 23-Aug. 1.

Henry Ford, having withdrawn from the Detroit Automobile Co. in 1901, organized Ford Motor Co. Treaty between U. S. and Colombia to have U. S. dig Panama Canal signed Jan. 22, 1903, rejected by Colombia. Panama declared independence Nov. 3, recognized by President Theodore Roosevelt Nov. 6. See *Canal Zone and Panama*.

First successful flight in heavier-than-air mechanically propelled airplane, by Orville Wright (1871-1948) on Dec. 17, 1903, rising from base of Kill Devil hill, four miles south of Kitty Hawk, N. C., 120 ft. in 12 secs., in 27 mph wind. Fourth

flight, same day by Wilbur Wright (1867-1912) 852 ft., in 59 secs. Plane patented May 22, 1906.

Fire killed 602 in Iroquois Theater, Chicago, Dec. 30. Many were trampled to death.

1904

Russo-Japanese War began, Feb. 6. Port Arthur surrendered to Japanese, Jan. 2, 1905. Peace treaty signed in U. S. Navy Yard, Portsmouth, N.H., Sept. 5, 1905. See *Marine Disasters*.

New York subway opened, Oct. 27. Steamer Gen. Slocum burned, Hell Gate, N. Y., June 15; 1,030 dead.

1905

Russian Revolution crushed by Czar Nicholas II. Resulted in creation of Duma (parliament) to placate liberals. First meeting of Duma, May 10; dissolved July.

Norway dissolved union with Sweden.

1906

San Francisco earthquake and fire, April 18-19. Dead: 452. Loss: \$350,000,000.

Harry K. Thaw, Pittsburgh millionaire, shot and killed Stanford White, famous architect, on the roof of Madison Square Garden (26th and Madison, N. Y.) June 25, on ground of avenging honor of wife, Evelyn Nesbit. Prosecuted by Wm. Travers Jerome, D. A., he was committed to Matteawan State hospital, 1907. Escaped 1913. Declared sane and freed, he was indicted, 1917, for kidnapping; pronounced insane; declared sane, 1924. Died, Miami, Feb. 22, 1947.

1907

Financial panic in the United States. Standard Oil of Indiana fined \$29,240,000 by Judge K. M. Landis in U. S. Court, Chicago, for accepting freight rebates Apr. 3. Set aside July 22, 1908. Railroads found guilty of giving rebates. First round-world cruise of U. S. Fleet; 16 battleships, Adm. Robley D. Evans, 12,000 men.

1908

In fire and panic at Collinwood, Ohio, 174 children and two teachers in Lake View School lost their lives Mar. 4.

Chelsea (Mass.) destroyed by fire; loss more than \$6,000,000, April 12.

1909

Admiral Robert E. Peary reached North Pole April 6 on sixth attempt, accompanied by Matthew Henson, Negro, and 4 Eskimos.

Louis Bleriot flew across the English Channel, Calais to Dover, 31 mi. in 37 min., July 25.

Budget in Britain: "Soak the Rich" taxation financed social security measures.

1910

Boy Scouts of America incorporated Feb. 8 following visit to England by Wm. D. Boyce, Chicago publisher; while there he met Sir Robert Baden-Powell, founder of the Scouting movement, and was inspired to take the lead in transplanting the idea to the United States.

Glenn H. Curtiss won \$10,000 offered by the World, N. Y., for first continuous flight, Albany to

Spanish-American War of 1898; United States Becomes Naval Power

Spanish misrule in Cuba led to repeated attempts by Cuban patriots to gain rights of citizenship, abolition of slavery, and finally independence. When South America broke from Europe in the 1820s pro-slavery influence in the U. S. blocked movements to free Cuba and Puerto Rico. But in 1852 President Fillmore refused to join Great Britain and France in guaranteeing Spanish authority in Cuba. In 1854 the Ostend Manifesto written largely by Jas. Buchanan, urged the U. S. to buy Cuba or seize it to abolish oppression. Grant's administration offered to buy Cuba, but Spain refused.

In Cuba revolts led by Marciso Lopez and Joaquin de Aguiro, 1848-1851, were suppressed and the leaders executed. In 1868 a major revolt led by Carlos de Cespedes and Manuel de Quesada lasted 10 years. In 1873 the Virginus expedition, flying the American flag, was seized by the Spaniards and Americans and Cubans aboard were shot. This did not stop supplying of arms from the U. S. In 1895 the insurrection had spread so widely under Generals Calixto Garcia, Maximo Gomez and Antonio Maceo that Spain landed 150,000 troops, but by 1896 over half of the island was in the hands of the patriots. The U. S. offered to mediate but was repulsed. The country was laid waste by Spanish troops and the accounts of suffering increased sentiment in the U. S. in favor of Cuba.

The battleship Maine, Capt. C. D. Sigbee, sent to Havana in January on goodwill tour, was blown up Feb. 15, 1898; 264 men, 2 officers killed. U. S. inquiry, Capt. Wm. T. Sampson ch., blamed external explosion Mar. 21. Spanish inquiry Mar. 28 blamed internal explosion. Congress Mar. 9 voted \$50,000,000 for defense. President McKinley Mar. 27 demanded Spain grant armistice for negotiation with Cuba via U. S., and reconcentration. Spain Mar. 31 offered to arbitrate Maine, end reconcentration, but wanted Cubans to ask for armistice. After appeal by foreign ministers Spain

granted armistice Apr. 9. President Apr. 11 asked Congress for authority to intervene in Cuba. Congress Apr. 20-25 debated joint resolution recognizing independence of Cuba, asked Spain to withdraw and empowered President to enforce it; adopted it with statement war existed since Apr. 21. Spain had declared war Apr. 24.

Commodore Geo. Dewey, with 6 warships, 1 revenue cutter, destroyed the Spanish fleet (10 ships) in Manila Bay May 1, occupied Cavite, Spain, 167 dead; U. S., 7 wounded. Spanish Admiral Cervera with 4 cruisers, 3 torpedo boats reached Santiago without interference May 19. Battleship Oregon made 16,000 mi. trip around Cape Horn, joined squadron of Acting Rear Adm. Sampson May 26. Collier Merrimac ineffectively sunk at mouth of Santiago harbor by Lieut. Richard H. Henson May 31. Marines landed at Guantanamo May 11. Maj. Gen. Wm. R. Shafter landed 10,000 men at Daiquiri and Siboney, including 1st U. S. Volunteer Cavalry (Rough Riders) recruited by Lt. Col. Theodore Roosevelt, commanded by Col. Leonard Wood. Brig. Gen. H. W. Lawton, Brig. Gen. Adna R. Chaffee with 6,654 men attacked El Caney, defended by 500 Spaniards, July 1. Maj. Gen. Jos. Wheeler, Brig. Gen. J. R. Kent carried San Juan hill with 8,336, same day.

Admiral Cervera's fleet left Santiago harbor July 3, was destroyed by ships of Acting Rear Adm. Sampson and Commodore Winfield S. Schley; 353 Spaniards killed, 151 wounded; 1 American killed. Santiago surrendered July 17. Maj. Gen. Nelson A. Miles took Puerto Rico July 25-28. Armistice signed, Aug. 12. Peace treaty signed in Paris Dec. 10, eliminated Spain from lands discovered by Columbus. U. S. acquired Puerto Rico, Guam and Philippines, paying \$20,000,000 for all Spanish claims in latter; guaranteed Cuban independence. (Ratified Feb. 6, 1899.) U. S. had treaty rights in Cuba until 1934; granted Philippine independence July 4, 1946.

New York, 137 mi., 152 min., May 29.

Dynama explosion at Los Angeles Times Oct. 1 caused fire, killing 21. Aiding contractors, in labor strife with structural iron workers, hired William J. Burns to find perpetrators. In sensational trial J. B. and J. J. McNamara pleaded guilty through Clarence Darrow, defense attorney, and were sentenced to San Quentin. Darrow tried twice for suborning juror, juries disagreed. Lincoln Steffens, "muckraking" journalist, conciliator.

1911

Italian-Turkish War began, Sept. 29.

First transcontinental airplane flight (interrupted by landings) by C. P. Rodgers, New York to Pasadena, Sept. 17-Nov. 5; time in air 82 hrs., 4 mins.

Capt. Roald Amundsen, Norwegian explorer, reached South Pole, Dec. 14.

Mexican Revolution. Porfirio Diaz, president of Mexico since 1877 (except 1880-1884), resigned May 25, after successful revolt by Francisco L. Madero, who succeeded him. People living in poverty wanted restoration of communal lands (ejidos), better conditions. In 1912 Madero, supported by Gen. Huerta, put down revolts by Gens. Orozco, Reyes and Felix Diaz. In Feb., 1913, Reyes was killed; Huerta helped depose Madero. Madero, his brother and Vice President Suarez were murdered. President Wilson refused recognition to Huerta and "government by assassination." Venustiano Carranza, rallying Maderos, was opposed by Gen. Francisco (Pancho) Villa in north. When American sailors were arrested at Tampico, April 9, 1914, U. S. sent Atlantic fleet to Vera Cruz. Marines landed and snipers killed 19. Brig. Gen. Frederick Funston was sent Apr. 27. Huerta resigned July 14, 1914. Carranza occupied Mexico City Aug. 20. Villa, supported by Zapata, forced Carranza to leave for Vera Cruz. U. S. recognized Carranza, Oct. 19, 1915, placed embargo on arms to other generals. Villa raided Santa Isabel, Jan. 10, killing 18; Columbus, N. M., Mar. 9, 1916, killing 17. Gen. John J. Pershing with 12,000 sent into Mexico, May 15. Fight at Cuernavaca, Durango, April 12. Carranza's troops attacked June 21. U. S. troops withdrawn Feb. 4, 1917. Carranza called constitutional convention. Feb. 15, 1917, became legal president May 1, 1917. He restored some of the land, nationalized coal and oil, expropriated some foreign holdings. Discontent caused new rising and he was ambushed and killed. Oregon became president Dec. 1, 1920. Villa was killed in ambush at Parral, July 18, 1923.

Chinese Revolution led by Sun Yat-sen overthrew Manchu dynasty. Republic formed Feb. 12, 1912; Yuan shih-K'ai elected president, Feb. 15. **Parliament Act of 1911** reduced the power of British House of Lords to a suspensory veto, to delay but not deny bills.

1912

Capt. Robert F. Scott and 4 companions reached South Pole Jan. 17; died on return journey.

White Star liner Titanic wrecked on maiden trip, from Southampton to New York, by iceberg off Newfoundland, April 14-15; U. S. reported 1,517 lost; British Board of Trade reported 1,503 lost. Passengers and crew were 2,207. The ship was 882½ ft. long, and cost \$7,500,000.

Herman Rosenthal, gambler, killed in New York. Four thugs convicted, executed at Sing Sing Apr. 13, 1914. **Police Lieut. Chas. Becker,** convicted of complicity, executed July 30, 1915.

War in Balkans, against Turkey by Montenegro, Bulgaria, Serbia and Greece, Oct. 8-Dec. 3.

1913

Sixteenth Amendment proclaimed in effect Feb. 25, empowering Congress to levy and collect income taxes.

Act creating Federal Reserve System became law Dec. 23.

1914

Ford Motor Co. raised basic wage rates from \$2.40 for 9-hr. day to \$5 for 8-hr. day, Jan. 5.

First ship passed through Panama Canal, Aug. 15.

Second International; Brussels meeting of International Socialist Bureau July. Members included five men later heads of government: Lenin (Russia); Ebert (German Republic); Stauning (Denmark); Branting (Sweden); MacDonald (Britain).

Principal Events of World War I, 1914-1918;

ORIGINS. Since the defeat of France by Prussia in 1870-71 major powers of Europe had kept peace by diplomatic negotiations and a balance of power. Triple Alliance, of Germany, Austria and Italy was defensive, with reservations; Triple Entente was an understanding between Britain, France and Russia. Nationalist aspirations in the Balkans had resulted in several wasteful wars and Italy had fought with Turkey and Ethiopia. Austria annexed Bosnia, Herzegovina, former Turkish Balkan provinces, 1908. Russia backed Serbia's efforts to get a port on the Adriatic. Germany's industrial expansion led to building of powerful navy, which Britain matched two for one for its own security. Germany's universal military service led France to adopt three-year training.

On June 28, 1914, Archduke Francis Ferdinand, heir to Austrian throne, was assassinated, with his wife, by Gavrillo Princip, Bosnian Serb terrorist, in Sarajevo, Bosnia. Austria-Hungary, through Count Berchtold, Austrian foreign minister, made 10 demands on Serbia for suppression of anti-Austrian agitation. Serbia conceded all but two, which called for Austrian enforcement police inside Serbia. It asked reference to The Hague peace tribunal. Austria demanded all or nothing.

Russia warned Austrian action was aimed at Russia, supported Serbia. Germany, allied with Austria, backed Austria. Britain, France, Italy proposed mediation. Sir Edward Grey, Br. foreign minister, July 26 proposed conference of four major powers; Germany refused to join.

Austria declared war on Serbia July 28. Germany, citing Russian mobilization, declared war on Russia Aug. 1; on France, Aug. 3. Germans entered Belgium in violation of treaty, of which Britain was cosigner. Britain asked Germany to guarantee neutrality of Belgium by midnight Aug. 4; Germany refused; British declared war Aug. 4. Italy, declaring German aggression made Triple Alliance inoperative, proclaimed neutrality. Japan declared war on Germany Aug. 23 because of Anglo-Japanese treaty on Far East. Turkey joined Central Powers Nov. 23.

Lord Kitchener became British secy. for war. Belgian forts at Liege stopped Germans until Aug. 7, delayed Ger. schedule. Germans entered Brussels Aug. 20; pushed back British Expeditionary Force (Sir John French) at Mons Aug. 23-24; burned most of Louvain Aug. 25. Von Hindenburg and Ludendorff defeated Russians at Tannenberg, East Prussia, Aug. 26-31; at Masurian Lakes Sept. 5-10.

In first Battle of the Marne, Sept. 5-10, French

under Joffre, Foch and Gallieni, stopped German advance of Von Kluck and Von Bulow, toward Paris, forced them back to Aisne, where trench warfare began. British repulsed Germans at Ypres, Oct. 16-Nov. 24. Belgians lost Antwerp Oct. 9. Russians forced Austrians back in Galicia. Austrians took and lost Belgrade Dec. 2-15.

British bombarded Dardanelles forts Nov. 3; declared war on Turkey, annexed Cyprus Nov. 5. Japan took Tsingtau Nov. 6.

Of many warships and merchantmen sunk, only major events are listed here. For others see Marine Disasters.

1915—SUBMARINE WAR BEGINS

In 1915 the war became a desperate battle of attrition on land and sea. British sank Ger. cruiser Bluecher Jan. 24. Germany ordered submarine blockade of Britain to start Feb. 18. U. S. held Germany to "strict accountability" for American losses. Germans used liquid fire in Vosges Mar. 3. Roving cruiser Dresden sunk in Pacific Mar. 15. Three Br.-Fr. battleships sunk at Dardanelles Mar. 18. Ger. sank Falaba Mar. 28, 1 American lost. Turks sank Br. battleship Lord Nelson Apr. 6. Ger. introduced poison gas at Ypres, Apr. 22. Canadians saved the line. Allies landed at Gallipoli, Apr. 25. Ger. torpedoed Gulfight, U. S. tanker, Apr. 30, 2 Americans lost.

German sub sank Cunard liner Lusitania off Old Head of Kinsale, Ireland, May 7, of 1,959 aboard, including 702 crew, 1,198, including 124 Americans, died. This started a series of protests by U. S. to Germany. W. J. Bryan, secy. of state, resigned June 8; considered Wilson's Lusitania note too severe. After sinking Arabic Aug. 19 Ger. agreed not to sink liners without warning, but U. S. considered promises inadequate. U. S. dismissed Austrian ambassador Dumba and Germans Boy-Ed and Von Papen for illegal activities.

South Africans under Gen. Botha captured German S. W. Africa. Italy declared war on Austria-Hungary May 23, on Turkey Aug. 20, on Germany Aug. 27. Bulgaria declared war on Serbia Oct. 14; Allies against Bulgaria Oct. 15-19. Germans occupied Russian Baltic ports, took Vilna, with Austrians occupied Serbia. Allies landed at Salonika Oct. 5. Edith Cavell, Br. nurse, executed by Germans in Brussels Oct. 12 for aiding escapes. Sir John French replaced by Sir Douglas Haig on British front Dec. 15. Allies began evacuation of Gallipoli (Dardanelles) Dec. 19.

1916—GREAT BATTLES

Germany announced Feb. 10 that armed merchant ships would be considered warships and

1915

First telephone talk, New York to San Francisco, Jan. 25, by Alexander Graham Bell and Thomas A. Watson.

First successful wireless from moving Lackawanna train to station, Feb. 7.

Twenty-one Demands presented by Japan to China. Demands asked for almost complete control of China.

1916

Gregory Rasputin, confessor to Czarina, killed in Petrograd (Leningrad) December.

Bomb exploded during San Francisco Preparedness Day Parade, July 22, killing 10, wounding 40. Thomas J. Mooney, 33, labor organizer; Mrs. Mooney, Warren K. Billings, shoe worker; Israel Weinberg and Edward D. Nolan were charged with murder. Mooney was sentenced to death, Billings to life imprisonment; others went free. President Wilson interceded for Mooney, who got life, 1918. Mooney was pardoned by Gov. C. L. Olson, Jan. 7, 1939. Billings freed Oct. 16, 1939.

Black Tom explosion at munitions docks, Jersey City, N. J., July 30; 2 killed, \$40,000,000 damages. Traced to German saboteurs.

1917

The 18th (Prohibition) Amendment to the Constitution was submitted to the States by Congress, Dec. 18. The first State (Mississippi) ratified it Jan. 8, 1918, and Jan. 16, 1919, the 36th State (Nebraska) ratified it, whereupon, by proclamation of the Secretary of State, Jan. 23, 1919, it became effective one year from that date, Jan. 16, 1920. By Feb. 25, 1919, the Legislatures of 45 States had ratified it; the 46th State, New Jersey ratified it March 9, 1922. It was not ratified by Connecticut and Rhode Island. The Volstead (Prohibition Enforcement) Act was passed by Congress Oct., 1919, vetoed by President Wilson, passed over his veto, in effect Jan. 17, 1920. New York, Montana and Wisconsin cancelled their enforcement acts by 1929. Franklin D. Roosevelt, presidential candidate, 1932, endorsed repeal; 21st amendment, re-

pealing 18th, but guaranteeing dry states against liquor importation, became law, Dec. 5, 1933.

Balfour Declaration, Nov. 2, favored establishment of a national homeland in Palestine for Jewish people.

1918

Romanovs killed. Czar Nicholas of Russia, the Empress Alexandra; the daughters, Olga, Tatiana, Marie, Anastasia; the son, Alexis; Prince Dolgorokoff, Dr. Botkin, a lady-in-waiting and a nurse were shot by Bolshevik orders in Ekaterinburg, July 16; in Perm, also, July 12, the Bolsheviks assassinated the Czar's brother, Grand Duke Michael, and in Alapalevsky north of Ekaterinburg, they killed the Grand Dukes Sergius Mikhailovitch, Igor Constantinovich and Ivan Konstantinovich.

Influenza epidemic killed estimated 20,000,000 throughout world, 548,000 in U. S. and American armed forces.

Malbone St., Tunnel subway wreck (Brighton line, Brooklyn): 97 killed, 100 hurt, Nov. 2.

1919

Rosa Luxemburg and Karl Liebknecht, leading German Communists and founders of the Spartacus Party, shot and killed Jan., by soldiers who were taking them to prison.

Peace conference opened in Paris, Jan. 18; treaty signed in palace at Versailles June 28, between German representatives and Allied powers and U. S. President Wilson submitted treaty to Senate July 10. Ratified by Germany July 10, Britain, July 26, Italy, Oct. 7, France, Oct. 13, Japan, Oct. 27. Not signed by China. Rejected by U. S. Senate, Nov. 19, which considered American sovereignty not properly safeguarded in League of Nations. Never ratified by U. S.

In Amritsar, India, Gen. Dyer led a group of Gurkha soldiers to the entrance of a walled-in garden where a crowd was listening to anti-British speeches. Dyer had soldiers fire into crowd, killing 379 and wounding 1,208.

Three U. S. Navy seaplanes left Trepassy, Newfoundland, May 16; one, the N-C 4, reached

Why United States Intervened

sunk without warning. U. S. retorted Feb. 15 international law permitted self-defense of commercial ships. Ger. made huge effort vs. Verdun Feb. 21, took Ft. Douaumont Feb. 25. Ger. declared war on Portugal Mar. 8. Russians invaded Persia, Mar. 10. Channel str. Sussex torpedoed, 80 casualties, Mar. 24. Wilson threatened Apr. 18-19 to break relations unless Germany revised sub warfare; Ger. met most of U. S. demands.

Rising in Ireland Apr. 24-May 1. Patrick Pearse et al. executed; Sir Roger Casement hanged Aug. 3. Br. adopted conscription May 24. Jutland naval battle, May 31-June 1. Admirals Jellicoe and Beatty, Br., lost 5 major cruisers, 8 destroyers, 6,091 men; Admirals Scheer and von Hipper, Ger., lost 2 major ships, also cruisers & destroyers, 2,545 men, 3rd battle of Ypres, June 2. Lord Kitchener drowned when Hampshire sunk off Orkneys June 5. Battle of the Somme, July 1-10; second battle, July 11-Aug. 3. Rumania joined Allies Aug. 16, was defeated by January, 1917. U. S. Nov. 29 protested deportation of Belgian workers into Germany.

On Dec. 12, 1916, Germany and its allies called for peace negotiations, to halt bloodshed. Germany told the Vatican it was fighting for the integrity of its frontiers and development in peaceful competition. On Dec. 13, 1916, President Wilson asked the belligerents to state their aims and terms; in order to end rival leagues he asked formation of a league of nations and protection of "weak peoples." The Allies called the German offer "empty and insincere." They also told President Wilson they wanted "restorations, reparations, indemnities."

1917—U. S. ENTERS WAR

When Germany began unrestricted submarine war United States Feb. 3 broke relations, refused negotiations until order was rescinded. Wilson Feb. 26 asked Congress to order arming of merchant ships; when Senate refused Wilson armed them by executive order Mar. 12. Intercepted note of Ger. foreign secy. Zimmerman to Ger. minister in Mexico suggested Mexico be asked to enter war to recover U. S. Southwest, Feb. 28. U. S. declared war on Germany Apr. 6, adopted selective conscription May 18, registered men aged 21-30 June 5. First of American Expeditionary Force (AEF) landed in France June 26; Gen. John J. Pershing, c.-in-c., Adm. Wm. S. Sims, chief Naval Operations, Europe. U. S. declared war on Austria-Hungary Dec. 7.

Collapse of Russian Empire. When Navy and Army revolted Mar. 11-15 Czar Nicholas II abdicated. Provisional govt. made Kerensky premier

July 20. Offensive in Galicia failed. Aug. Germans moved Lenin and associates from Switzerland to Russia via Sweden to disrupt war. Bolsheviks overthrew Kerensky Nov. 7, formed socialist republic of workers and peasants with Lenin president of Council of Commissars. Armistice Dec. 15, made peace with Germany, Austria-Hungary, Bulgaria and Turkey at Brest-Litovsk Mar. 3, 1918, withdrawing from Lithuania, Estonia, Latvia, Ukraine, Poland, Finland, Aland Isls., Erivan, Kars, Batum.

Other Fronts. Huge losses by Allies at Vimy, Arras, Cambrai, Passchendaele, Verdun. Petain succeeded Nivelle as French c.-in-c. British took Jaffa, Baghdad, Jerusalem. Germans forced back Italians to Piave, Brenta; sank many ships.

1918—VICTORY FOR U. S. & ALLIES

German submarine war, Feb. 1, 1917-Feb. 1, 1918, cost U. S. 69 ships (171,061 tons); U. S. seized 686,494 German-Austrian tonnage. British lost 1,169 ships. Allies & neutrals lost 6,617,000 tons.

President Wilson presented his 14 points for peace to Congress Jan. 8. Asked open diplomacy; freedom of seas; restoration of Alsace-Lorraine to France; independence for Poland and Austrian minorities; "a general association of nations" to guarantee political and economic independence.

Collapse of Russian front released German troops for powerful thrusts on West front. Battle of the Somme, Mar. 21-Apr. 6. Gen. Ferdinand Foch made supreme commander Mar. 26. Battle of the Aisne, May 27-June 5; AEF took Cantigny, May 28. Germans reached Marne, AEF fought at Chateau Thierry, Belleau Woods. Ger. retreat began July 19. AEF took St. Mihiel salient, Sept. 12-20, fought at Meuse-Argonne, Sept. 20-Nov. 11. British broke Hindenburg line Sept. 27.

Bulgaria gave up Sept. 30, Czar Ferdinand abdicated. Turkish armistice, Oct. 30. Italians defeated Austrians at Vittorio Veneto; Austria and Hungary formed separate republics Nov. 1, Austria surrendered Nov. 4.

Germans accepted President Wilson's terms and recalled submarines, Oct. 20; United States troops reached Sedan, Nov. 7; revolution in Kiel and Hamburg, Nov. 7; Bavaria proclaimed a republic, Nov. 8; Kaiser abdicated, Nov. 9, fled to Holland. Armistice signed in Marshal Foch's railway coach, near Compiègne, France, Nov. 11; bugles sounded "cease firing" at 11 a.m. German fleet surrendered to British, Nov. 21; AEF entered Mainz, Dec. 6; crossed Rhine, Dec. 13.

See Casualties, World War I.

the Azores, May 17; Lisbon, May 27; Plymouth, England, May 31; Harry G. Hawker and McKenna Grieve fell in mid-ocean on an attempted flight, May 18, from Newfoundland to Ireland, but were rescued; John Alcock and A. W. Brown made, June 14-15, a non-stop air flight from Newfoundland to Ireland; a British dirigible balloon, R-34, left Scotland, July 2, and descended in Mineola, N. Y., July 6. It left for England, July 10, and arrived there July 13. A round-trip transcontinental air race, New York to San Francisco, was won by Lt. W. B. Maynard and Lt. Alex Pearson, Oct. 8-18.

1920

League of Nations began at Geneva, Switzerland, Jan. 10; dissolved Jan. 19, 1946.

Nicola Sacco, 29, shoe factory employee and philosophical anarchist and Bartolomeo Vanzetti, 32, fish peddler and radical agitator, accused of killing two men in payroll holdup at Braintree, Mass., Apr. 15. Found guilty 1921, they became objects of six-year campaign for release on grounds of want of conclusive evidence and prejudice of court. Sensational appeals failing, they were executed at Charlestown, Mass., prison Aug. 22, 1927. Trial sharply criticized by Wickersham Commission on law procedure.

Wall St., New York City, bomb explosion, killed 30; injured 100; did \$2,000,000 damage. Sept. 16, 1921.

Joint Congressional resolution declaring peace with Germany and Austria signed July 2 by President Harding. Treaty signed Aug. 25 in Berlin, ratified by Senate Oct. 18.

Limitation of Armaments Conference met in Washington, Nov. 12, 1921-Feb. 6, 1922. U. S., Britain, France, Italy, Japan agreed to curtail naval construction. Nine powers outlawed poison gas and restricted submarine attack on merchantmen. U. S., Britain, France, Japan agreed on integrity of China. Ratified Aug. 5, 1925.

1922

Roof of Knickerbocker (movie) Theatre collapsed in Washington, D. C., Jan. 28; 98 dead.

Violence during coal-mine strike at Herrin, Ill., June 22-23; cost 36 lives, 21 non-union miners.

Fascist march in Rome, Oct. 30: Mussolini's power in Italy began.

1923

Occupation of Ruhr by French and Belgian troops to enforce reparations began Jan. 11.

First sound-on-film talking pictures (vaudeville shorts) shown by Lee de Forest at Rivoli Theatre, New York, N. Y., beginning April.

Beer Hall Putsch in Munich, led by Gen. Ludendorff and Adolf Hitler, Nov. 8-9. Several supporters killed in street clashes. Ludendorff was arrested and paroled; Hitler was wounded. He was arrested Nov. 12 and imprisoned at Landsberg, where he wrote Mein Kampf.

1924

Dawes Reparation Plan accepted by Allies and Germany, in Agreement of London, Aug. 16; Owen D. Young put in charge. French troops began evacuation of the Ruhr Aug. 18.

Nellie Tayloe Ross elected Governor of Wyoming Nov. 9 after death of her husband Oct. 2; installed Jan. 5, 1925; first woman so honored. Miriam (Ma) Ferguson elected Governor of Texas Nov. 9; installed Jan. 20, 1925.

1925

Floyd Collins unable to extricate himself from Sand Cave, near Cave City, Ky., which he discovered, died within 300 ft. of entrance, Feb.

John T. Scopes, in court in Dayton, Tenn., was found guilty of having taught evolution in the local high school and was fined \$100 and costs, July 24. William Jennings Bryan, chief counsel for the prosecution, died in Dayton July 26. Clarence Darrow, chief defense counsel, died March 13, 1938.

Pickwick Club, Boston night club, collapsed July 4, killing 44.

By treaty of Locarno, Oct. 16, Germany agreed to demilitarization of Rhineland and security of Franco-German and Belgo-German frontiers.

1926

Dr. Robert H. Goddard demonstrated the practicality of rockets Mar. 16 at Auburn, Mass., with the first liquid fuel rocket flight; the rocket traveled 184 feet in 2.5 seconds.

General strike paralyzed Britain May 3 to 12. Parliament passed act making general strike criminal conspiracy against nation.

Germany admitted to the League of Nations Sept. 8. Locarno treaties with Germany (1925) went into effect, Sept. 14.

1927

S. bombers attacked installations. First assault troops landed 6:30 a.m. on beaches along line Carentan-Bayeux-Caen; U. S. on West, British-Canadians on East. Total Allied strength available 2,876,439, including 17 British divisions of which 3 Canadian; 20 U. S. divisions, 1 French, 1 Polish. Also available 5,049 fighter planes, 3,467 heavy bombers, 1,645 light and medium bombers, 2,316 transport aircraft, 2,591 gliders, 698 others; 835 L.C.T., 233 L.S.T. Beachhead 60 mi. long, 10 mi. deep.

Gen. Dwight D. Eisenhower was Supreme Commander of Allied Expeditionary Forces; Gen. Sir Bernard L. Montgomery commander of Allied assault troops; Sir Bertram Ramsay of Allied naval units (4,000 ships of all kinds); Air Marshal Trafford Leigh-Mallory of Air Forces; Lt. Gen. Omar N. Bradley of U. S. troops in field. Germans had available 65 divisions, including reserves extending back to Germany. Marshal Gunther von Kluge was German commander in France.

British took Bayeux June 7; Carentan fell June 13; U. S. took Cherbourg June 27; British-Canadians took Caen July 9 after desperate fighting. Lt. Gen. George S. Patton Jr. with 3rd U. S. Army attacked south and west of St. Lo. August. Canadians took Falaise Aug. 17. The Argentan gap was closed by the 3rd Army in terrible fighting. Germans lost 12 to 14 divisions in the Falaise pocket, many taken prisoner.

Aug. 14-15, 1944, Allies invaded France east of the mouth of the Rhone with 1,000 ships (641 U. S., 316 British). On Aug. 25 the 2nd French armored division and token force of U. S. Army entered Paris.

The Ardennes Bulge was a violent counter-attack by 15 German divisions under Gen. von Model (Gen. von Rundstedt C. in C.) launched Dec. 16, 1944. By Dec. 19 the 1st U. S. Army was pushed out of Germany and the Germans penetrated 60 mi. west of Celles. Lt. Gen. Patton's 3rd U. S. Army rescued besieged Americans at Bastogne Dec. 21 and Nazi drive was stopped by Dec. 25. Allies wiped out the Bulge by Jan. 31, 1945. Near Malmédy Germans cut down captured American soldiers with machine guns and left them dead on the field. U. S. losses estimated at 40,000; Germans lost 220,000 in dead and prisoners.

Rhine Crossing—On Mar. 7, 1945, the 9th Armored Div., 3rd Corps, First Army, found Ludendorff bridge at Remagen on the Rhine intact; Gen. Eisenhower ordered Gen. Omar N. Bradley to put 5 divisions across; on 5th day Army ceased using bridge, used Treadway floating bridge, built in 10 hrs., 11 min.; Remagen bridge collapsed Mar. 17.

Iwo Jima was invaded by U. S. joint expeditionary force Feb. 19, 1945, with land action by U. S. Marines; invasion used 495 ships, including 17 aircraft carriers and 1,170 planes. U. S. troops engaged, 111,308, of which 75,144 were assault troops. Island was conquered by Mar. 16. U. S. lost 4,590 killed; Japanese deaths est. over 20,000.

Okinawa, principal Japanese base in the Ryukyu group, was invaded Apr. 1, 1945 in the final land campaign of the war. The troops needed 1,300 vessels, including airplane carriers. After 83 days of fighting the end was signaled by the formal suicide of the two Japanese generals. U. S. men engaged up to June 30, 1945 reached 176,491 army, 88,500 Marines, 18,000 Navy. Japanese strength at start was 77,199. U. S. losses were 49,151, of which 12,520 were killed or missing, 36,631 wounded. The Japanese lost 110,071 and 7,400 taken prisoner.

U. S. lost 763 aircraft; Japan lost 7,830 of which 1,020 were destroyed on the ground. U. S. had 36 ships sunk, 369 damaged; Japan had 16 sunk, including the Yamato, world's largest battleship, full load displacement 72,809 tons, 861 ft. long, 9 18-in. guns, 3,333 personnel. Hit by over 10 aerial torpedoes at Kyushu; 300 survived.

V-E Day—German armies began surrendering May 4, 1945. Unconditional surrender was signed May 7 at 2:41 a.m. in Rheims Hq. (May 6, 8:41 p.m., EWT), designating cessation of operations May 9 at 12:01 a.m. (May 8, 6:01 p.m.). Surrender also signed in Berlin.

Atomic Bombs—First atomic bomb ever used in war was dropped by U. S. plane Aug. 6, 1945, on Hiroshima, Japan (pop. 343,969). Second U. S. bomb dropped on Nagasaki (pop. 252,630) Aug. 9, 1945. Estimates of dead from bombs and radiation exposure vary: Hiroshima, 80,000 to over 200,000; Nagasaki, 39,000 to 74,000. Japan surrendered Aug. 14. Formal surrender aboard U.S.S. Missouri Sept. 2, 1945, Far Eastern Time, celebrated as V-J Day.

Radar beam reached the moon Jan. 10, U. S. Army announced Jan. 24.

League of Nations, Geneva, Switzerland, closed its work, gave physical assets to the United Nations April 13.

Gen. Draja Mikhailovitch, leader of the Chetniks, was executed by a firing squad in Belgrade, Yugoslavia, July 17, for alleged treason.

Philippine independence granted by U. S., July 4. Manuel Roxas elected first president of new Republic.

Twenty-two Nazi leaders convicted of war crimes Sept. 30 by International Tribunal in Nuremberg. Eleven Nazis were sentenced to death by hanging, Oct. 1. No. 2 Nazi Hermann Goering committed suicide by poison in Nuremberg Prison, two hours before he was scheduled to be hanged, Oct. 15. The 10 other top Nazis were hanged individually. They were: Hans Frank, Wilhelm Frick, Col. Gen. Alfred Jodl, Gestapo Chief Ernst Kaltenbrunner, Field Marshal Wilhelm Keitel, Alfred Rosenberg, Fritz Sauckel, Arthur Seyss-Inquart, Julius Streicher and Foreign Minister Joachim von Ribbentrop.

Others sentenced for war crimes: Gen. Anton Dostler, Nazi, hanged in Rome, Dec. 1, 1945, for shooting 15 U. S. soldiers without trial; Jos. Kramer, "Beast of Belsen" and 10 others hanged Dec. 14, 1945, by British for atrocities at Belsen and Oswiecim concentration camps; Gen. T. Yamashita, Japanese commander in Philippines, hanged Feb. 23, 1946; Lt. Gen. Homma, who ordered Bataan death march, shot near Manila, Apr. 3, 1946; Marshal Ion Antonescu, dictator of Rumania, hanged June 1, 1946; Karl Hermann Frank, Nazi ruler in Czechoslovakia, hanged in Prague May 22 for ordering massacre of Lidice; 48 Nazi officers and guards hanged by the U. S. Army at Landsberg, Germany, May, 1947, for mass murders at Mauthausen camp.

Archbishop Aloysius Stepinac, Roman Catholic Primate of Yugoslavia, was sentenced to 16 years at hard labor for alleged collaboration with Nazis, Oct. 1. He was released, Dec. 1951; made a Cardinal, Jan. 12, 1952; died Feb. 10, 1960.

John L. Lewis called out 400,000 soft coal miners in strike against the U. S. government, Nov. 20, ignoring strike cancellation order by Federal Judge T. Alan Goldsborough in Washington. Found guilty of contempt of court, Lewis was fined \$10,000, the United Mine Workers \$3,500,000. Supreme Court, Mar. 6, 1947, affirmed Lewis' fine, reduced union's fine to \$700,000, provided it cancelled strike notice. Strike Mar. 15, 1948. Apr. 22, 1948, for guaranteed \$100-a-month pension for retired mine workers resulted in Lewis being fined \$20,000 and the union \$1,400,000, Apr. 20, 1948.

Peace treaties for Hitler's European satellites, imposing \$1.33 billion in reparations, drafted at a 5-week meeting of Big Four Foreign Ministers that ended in New York City Dec. 12. The treaties were signed, Feb. 10, 1947.

President Truman proclaimed the cessation of hostilities of World War II, Dec. 31.

1947

British Labor government took possession of coal mines, cables and wireless communications, Jan. 1.

Truman Doctrine. President Truman asked Congress to appropriate \$400,000,000 for economic and military aid to Greece and Turkey to combat communism, Mar. 12. Approved, May 15.

The United Nations Security Council voted unanimously to place under U. S. trusteeship the Pacific Islands formerly mandated to Japan April 2.

The Senate approved the Taft-Hartley Labor Act, 68 to 24, May 13. The house concurred, June 4, by a vote of 320 to 79. The measure was vetoed by President Truman, June 20, but the House overrode the veto, 331 to 83, on the same day. The Senate overrode the veto, 68-25, June 23.

Proposals known later as the Marshall Plan, under which the U. S. would extend financial aid to any European countries "willing to assist in the task of recovery," were made by Secy. of State George C. Marshall in speech Jan. 5 at Harvard University. Congress authorized the spending in the next 3½ years of some \$12 billion on Marshall Plan aid, which was credited with restoring economic health to free Europe and halting the march of Communism in those countries cooperating in the plan. The Marshall proposals set the pattern for the vast U. S. post-war program of foreign aid.

Hindu India and Moslem Pakistan, formerly part of India, gained independence from England, Aug. 15. Lord Louis Mountbatten was the last British Viceroy of India.

1948

British Labor govt. nationalized railways, Jan. 1. Mohandas K. Gandhi, Hindu spiritual leader and champion of freedom for India, was shot and killed by a Hindu fanatic in New Delhi, Jan. 30. Communal rioting took the lives of nearly 100 leaders and members of the Mahasabha, politico-religious group to which Gandhi's assassin belonged, Jan. 30-Feb. 2.

Czechoslovakia joined the Communist bloc in Eastern Europe after President Benes yielded Feb. 25 to a Communist ultimatum to install a pro-

Soviet Cabinet. He resigned, June 7, and was succeeded by Klement Gottwald, Communist. Benes died Sept. 3. Communists reported Jan. Masaryk, Foreland mine, committed suicide Mar. 10. A land blockade of Berlin's Allied sectors was started Apr. 1 by the Soviet Military Govt., which refused to permit U. S. and British supply trains to pass through the Soviet zone of Germany. This blockade and a Western counter-blockade were lifted Sept. 30, 1949, after British and U. S. planes had airlifted 2,343,315 tons of food and coal into West Berlin.

Charter of the Organization of American States signed Apr. 30 at 9th International Conference of American States at Bogota, Colombia. The conference had been interrupted for a week by rioting following the assassination of Jorge Eliecer Gaitanar.

The Free State of Israel was proclaimed in Tel Aviv, May 14, as the British evacuated Palestine. First de facto recognition came from the United States, May 14, and Soviet Russia, May 17. Chaim Weizmann was elected first president by the Constituent Assembly, Feb. 14, 1949.

The Cominform (Communist Information Bureau), at a Prague meeting June 28, denounced Marshal Tito and other leaders of the Yugoslav Communist party as deserters from the Marxist-Leninist doctrine.

Alger Hiss, former State Department official, was indicted in New York City, Dec. 15, on two perjury charges after he had denied passing secret documents to Whittaker Chambers, a former magazine editor, for transmission to a Communist spy ring. A jury failed to reach an agreement, July 8, 1949. His second trial, Nov. 17, 1949-Jan. 21, 1950, ended with conviction on 2 counts and a sentence of 5 years in a Federal prison. Appeals to higher courts were rejected, and Hiss began his sentence Mar. 22, 1951. He denied all charges. He petitioned Federal Court, New York, for retrial on basis of new evidence of "forgery by typewriter," Jan. 24, 1952. Judge H. W. Goddard denied it, July 22, 1952. Supreme Court on Apr. 27, 1953. He was released Nov. 27, 1954.

Former Premier Hideki Tojo and six other Japanese war leaders were hanged in Tokyo, Dec. 23, as war criminals.

Joseph Cardinal Mindszenty, Roman Catholic primate of Hungary, arrested by Communist government in Budapest on charges of treason, espionage and black market dealings, Dec. 27, 1949. All persons taking part in the Cardinal's prosecution were excommunicated by Pope Plus XII. Mindszenty freed Oct. 31, 1956.

1949

Mildred E. (Axis Sally) Gillars was convicted by a Federal jury in New York City Mar. 16 of treason in broadcasting Nazi propaganda during war. She received 10 to 30 years in prison. Freed 1961.

North Atlantic Treaty adopted Mar. 18 by U. S., Canada and 10 Western European nations, agreeing that "an armed attack against one or more of them in Europe and North America shall be considered an attack against all." Signed April 4, ratified by Senate, July 21.

Ireland severed last ties with Britain by leaving Commonwealth, April 18.

End of U. S. A-bomb monopoly signaled by President Truman's announcement Sept. 23 that an atomic explosion had occurred in the USSR.

Mrs. Toguri D'Aquino, Tokyo Rose of Japanese wartime broadcasts, was sentenced in San Francisco Oct. 7 to 10 years in prison for treason. Paroled Jan. 28, 1956.

Eleven leaders of U. S. Communist party convicted Oct. 14, after 9-month trial in New York City of advocating violent overthrow of U. S. Government. Federal Judge Harold R. Medina, Oct. 21, sentenced 10 defendants to five years in prison each and the 11th, a war veteran, to 3 years. U. S. Court of Appeals upheld conviction June 1, 1950. Supreme Court upheld the convictions Aug. 4, 1951. Seven surrendered July 2, 1951; of the other 4, hunted as fugitives, one, Gus Hall, was captured Oct. 8, 1951, and given 3 additional years. Robert G. Thompson was captured Aug. 27, 1953. Five defense lawyers, cited for contempt during the trial, received sentences ranging from 1 to 6 months. Apr. 24, 1952, Supreme Court upheld sentences Mar. 10, 1952.

Angus Ward, U. S. Consul General in Mukden, Manchuria, and four consular employees were arrested by Communists Oct. 24, on charges of having beaten Chinese employee. Ward and others were sentenced to jail terms of three to six months, Nov. 22, but were released, Nov. 25, ordered to leave country after U. S. had appealed to 30 other nations to join in a protest.

Nationalist China's government fled to Formosa Dec. 7. Chinese Communists took Yunnan and Kunming as Nationalists deserted.

1950

Protesting arrest of Robert A. Vogeler, U. S. businessman, on charge of spying, U. S. Jan. 2 ordered Hungary to close its consulates in N. Y. and Cleveland. Hungary released Vogeler Apr. 28,

1951 when U. S. agreed to let consulates reopen.

Great Britain recognized Communist China Jan. 6, one day after breaking diplomatic relations with Chiang Kai-Shek's Nationalist Chinese regime.

U. S. Jan. 14 recalled all consular officials from Communist China after the latter seized the American consulate general in Peiping.

Masked bandits robbed Brink's, Inc., Boston express office, Jan. 17 of \$2,775,395.12, of which \$1,218,211.29 was in cash. Solution announced 1956 by FBI; 8 men sentenced to life.

President Truman Jan. 31 authorized AEC to produce the hydrogen bomb (H-bomb).

Dr. Klaus J. E. Fuchs, German-born atomic research physicist at Harwell, Eng., pleaded guilty Mar. 1 to violating the Official Secrets Act and received 14 years in prison. He had communicated valuable atomic information to Russian agents since 1942. At one time he worked at Los Alamos, N. M. Released June 23, 1959, went to East Germany, became citizen.

Judith Coplon, 28, former political analyst in Dept. of Justice, Washington, D. C., and Valentin A. Gubichev, 33, Russian engineer employed by United Nations, were found guilty of espionage Mar. 7 in New York and sentenced to 15 years. Gubichev's sentence was suspended when he agreed to leave the country. Miss Coplon also had been sentenced to 40 months to 10 years after 1949 Washington trial for stealing secret documents. The New York convictions were reversed by the U. S. Circuit Court of Appeals, N. Y., Dec. 5 because the FBI made the arrests without a warrant and the Government failed to show that its evidence was not obtained through wire-tapping. The indictment stood. U. S. Court of Appeals, D. C., upheld the Washington conviction June 1, 1951, but ruled the case should be retried because the Government used illegal wire-tap evidence. Miss Coplon won the right to a new trial Jan. 28, 1952, when the Supreme Court refused to review decisions on 3 appeals from lower court rulings. New trial never held. All charges dropped Jan. 6, 1967.

The Army seized all railroads Aug. 27, on orders of President Truman, to prevent a general strike after unions had rejected terms of an 18c an hour raise for yardmen but none for trainmen. Roads returned to owners May 23, 1952, after signing of new labor contract.

In an attempt to kill President Truman, two Puerto Rican fanatics, members of a nationalist movement, tried to shoot their way into the President's house, Washington, Nov. 1. Guards killed Grisello Torresola, New York; wounded Oscar

Collazo, 36, New York pocketbook frame polisher, Pvt. Leslie Coffelt, a guard, was fatally shot; 2 other guards were seriously injured. Collazo was convicted of murder Mar. 7, 1951, and sentenced to death. President Truman commuted sentence to life imprisonment, July 24, 1952.

U. S. Dec. 8 banned shipments to Communist China and to Asiatic ports trading with it. Supreme Court ruled Dec. 11, that under the 5th amendment no one could be forced to testify against himself.

1951

Ise Koch was sentenced to life imprisonment by a German court in Frankfurt Jan. 15, for inciting the murder of a Buchenwald prisoner.

William W. Remington, Commerce Dept. employe, was convicted of perjury in New York Feb. 7, and sentenced to 5 years and fined \$2,000. U. S. Court of Appeals reversed decision Aug. 23, sent case back for retrial. Remington was convicted Jan. 27, 1953 on 2 counts of a new 5-count perjury indictment, and sentenced Feb. 4, 1953 to 3 years. Conviction upheld by Court of Appeals. He died in prison Nov. 24, 1954, after a beating by convicts.

With Sen. Estes Kefauver (D-Tenn.) as chairman, the Senate Committee to Investigate Organized Crime in Interstate Commerce, exposed nation-wide criminal organizations that reaped huge illegal profits, used these funds to enter legitimate businesses, influenced politicians and bought protection. Preliminary report, Feb. 28, said gambling took over \$20 billion a year.

Julius Rosenberg; his wife, Ethel, and Morton Sobell, all U. S. citizens, were found guilty Mar. 29, of conspiracy to commit wartime sabotage. Rosenbergs sentenced to death. Sobell to 30 years. Appeals denied. David Greenglass, brother of Mrs. Rosenberg and a state witness, received 15 years in prison, Rosenbergs executed at Sing Sing prison, Ossining, N. Y., June 19, 1953.

President Truman relieved Gen. Douglas MacArthur of his command in the Far East Apr. 11. See Korean War.

William N. Oatis, Associated Press correspondent in Prague, was arrested April 26 as spy by Czechoslovakia, tried and sentenced July 4 to 10 years in prison. U. S. denounced "mock trial," defended legitimate news gathering, enacted economic reprisals. Oatis was freed May 16, 1953.

European Coal and Steel Plan proposed by French Foreign Minister Robert Schuman, May 8. British Labor Government rejected plan but six other nations, France, West Germany, Italy, Belgium, Netherlands, and Luxembourg, agreed to

Korean War and United States Intervention

Republic of Korea was invaded June 25, 1950 (June 24, EST) by over 60,000 North Korean troops spear-headed by over 100 Russian-built tanks. U. N. Security Council demanded cessation of hostilities and withdrawal to 38th parallel. On June 27 it asked U. N. members to help carry out its demand. President Truman, June 27, ordered Gen. of the Army Douglas MacArthur to aid South Korea and the 7th U. S. fleet to protect Formosa against possible aggression and keep the Chinese nationalist forces from attacking the mainland. Requested by the UN to name a commander, the President designated Gen. MacArthur July 8, 1950.

North Korean forces took Seoul, South Korean capital, June 29. U. S. ground forces entered the conflict June 30. The President termed the intervention a "police action."

The war had three phases: (1) The North Korean drive was checked by U. S. and associated troops, with help of a brilliant landing by U. S. Marines at Inchon Sept. 15. Pyongyang, North Korean capital was taken Oct. 20. U. S. 7th Division reached Manchurian border Nov. 20.

(2) Counter-attack by 200,000 Chinese Communist "volunteers," who crossed Yalu river Nov. 26, forced evacuation of 105,000 UN troops and 91,000 Korean civilians at Hungnam Dec. 24. The Chinese pushed across 38th parallel, drove 70 mi. into South Korea. The UN General Assembly, Feb. 1, named Communist China the aggressor in Korea. UN troops pushed Chinese back across parallel Apr. 3, stopped offensive by 600,000 Chinese Apr. 22-30.

(3) Removal of Gen. MacArthur from command Apr. 11, 1951 and start of negotiations for truce along 38th parallel July 10, 1951.

President Truman removed Gen. MacArthur from all Far East commands and replaced him with Gen. Matthew B. Ridgway, commander of 8th Army. MacArthur had wished to pursue Chinese across Yalu to their air depots in Manchuria and on Mar. 25 had threatened Communist China with air and naval attack. He had been warned to clear all announcements of policy through Washington.

The President opposed his views. A Senate inquiry May 3-June 27, 1951, found that MacArthur was not charged with insubordination, but had disregarded the President's order to clear policy statements through the Defense Dept.

Cease fire and Armistice talks began July 1951 and dragged on with numerous break-downs until July 27, 1953 (July 26, EST) when armistice was signed; fighting ended 12 hrs. later. A military armistice commission supervised truce; 10 joint UN-Communist teams policed demilitarized zone; Neutral Nations Supervisory Commission watched military movements in ports; voluntary repatriation of prisoners was provided and Communists had privilege of interviewing prisoners refusing repatriation. India furnished 6,000 troops as guards.

Prisoner repatriation began Aug. 6, 1953, at Panmunjon, ended Sept. 6, 1953. UN turned over 75,799 prisoners (70,159 North Koreans and 5,640 Chinese). Communists released 12,760, including 7,850 South Koreans, 3,597 Americans, 945 Britons and 228 Turks. Maj. Gen. Dean was released Sept. 4.

The troops from India departed in February, 1954. The Supervisory Commission, made up of members from Czechoslovakia, Poland, Sweden and Switzerland, was reduced one-half in Sept., 1955, on repeated complaints that the Communist members were spying in South Korea. Repeated reports indicated that the North Koreans had violated many terms of the armistice, built numerous airfields and received naval vessels. The UN Command expelled the commission from South Korea in June, 1956, on grounds that its Czech and Polish members and the North Korean government had frustrated the operation of the armistice agreement. The UN Command announced in June, 1957, that it could no longer be bound by armistice provisions controlling importation of military equipment into Korea, but would modernize UN forces "to restore the relative balance of military strength that the armistice was intended to preserve."

conference. Treaty ratified, June 16, 1952.

U.N. General Assembly voted arms embargo against Communist China May 18.

Tariff concessions by the U. S. to the Soviet Union, Communist China and all Communist-dominated lands were suspended Aug. 1.

Transcontinental television inaugurated Sept. 4, with President Truman's address at the Japanese Peace Treaty Conference in San Francisco.

Japanese Peace Treaty signed in San Francisco Sept. 8, by U.S. and 48 other nations.

War between Germany and the U.S. formally ended Oct. 19. Great Britain and France ended war with Germany July 9.

1952

Queen Elizabeth II of Britain proclaimed Queen of Canada Feb. 6, marking first time monarch was specifically enthroned in name of Canada.

U. S. seizure of nation's steel mills was ordered by President Truman Apr. 8 to avert a strike by 600,000 CIO United Steelworkers. Seizure was ruled illegal by the Supreme Court June 2; strike followed June 3, was settled July 24.

First jetliner passenger service opened May 2, British De Havilland Comet, London to Johannesburg, South Africa, 6,724 mi. in less than 24 hrs.

Peace contract between West Germany, U.S., Great Britain and France was signed in Bonn. May 26. Allied high commissions abolished.

Puerto Rico became an "associated free state" or commonwealth of the U. S., July 25, after Pres. Truman gave approval to a new constitution.

West Germany agreed Sept. 10, to pay Israel \$822,000,000 over 12 to 14 years as indemnity for Nazi and anti-Semitic acts.

Britain successfully completed its first atomic test off northwest Australia Oct. 3, detonating a bomb aboard a navy vessel.

First hydrogen device explosion Nov. 1 at AEC Eniwetok proving grounds in Pacific reported by witnesses but not officially confirmed for more than a year. President Eisenhower told Congress Feb. 2, 1954, that the 1952 test was "the first full-scale thermonuclear explosion in history . . . the first step in the hydrogen weapon program of the United States."

Vladimir Clementis, Rudolf Slansky and 9 other purged Communists were hanged in Prague Dec. 3 for espionage and treason.

Alan Nunn May, British scientist who gave atom secrets to the U.S.S.R., was released from prison Dec. 29, after serving 6 yrs. 8 mos. of his 10-yr. term.

1953

Joseph Stalin died, March 5. By 1955, Nikita S. Khrushchev emerged as dominant political leader of Soviet Union.

Mau Mau or "Hidden Ones" of Kenya's Kikuyu tribe, formed to force whites from Kenya and to regain ancestral lands from gov't, climaxed sporadic violence Mar. 26, by murdering 71 and wounding 100 fellow Kikuyus who remained loyal to colonial gov't. 500 arrests made, 17 sentenced to death. Jomo Kenyatta, tribal leader, found guilty Apr. 8 of organizing Mau Mau, sentenced to 7 years. Dec. 12, 1963 Kenya became independent and Jomo Kenyatta became Prime Minister; and on Dec. 12, 1964, President.

Mount Everest was conquered May 29, by Edmund P. Hillary of New Zealand and Tensing Norkey. Nepalese living in India. Expedition was under Col. Henry C. J. Hunt, Britain.

Demonstration by workers in East Berlin against increased work quotas June 16, erupted into an anti-Communist riot by 20,000 to 50,000 people June 17, and became a general strike involving 200,000 in East Germany. Soviet troops quelled disturbances killing 16.

Lavrenti P. Beria, chief of Soviet secret police, was dismissed July 10, as an enemy of the people. He was executed Dec. 23, along with 6 of his aides. Purge extended to Georgia, the Ukraine, Byelorussia and other Soviet states.

First U.S. announcement of H-bomb explosion Aug. 20. AEC reported explosion occurred in USSR Aug. 12.

1954

Nautilus, first atomic-powered submarine, was launched at Groton, Conn., Jan. 21.

Five members of Congress were wounded in the House of Representatives, Mar. 1, by 4 Puerto Ricans, one a woman, who fired pistols at random from a spectators' gallery, shouting for Puerto Rican independence. Representatives recovered. Attackers were sentenced to prison.

Bien Phu, French military outpost in northwest Vietnam, fell to the Vietminh army of Ho Chi Minh, May.

Geneva Conference on Far Eastern Affairs, Apr. 26-July 21, by foreign ministers of 19 nations, including Communist China. Free elections in Korea founded on Communist objections to U. N. supervision. Armistice, effective Aug. 11, ended 7½ years of war in Indo-China, with French withdrawal, Vietnam won 62,000 sq. mi. and 13,000,000 pop. in North Vietnam. Cambodia and Laos became independent countries.

Racial segregation in public schools was ruled

unconstitutional in a unanimous decision of the Supreme Court, May 17.

Southeast Asia Treaty Organization (SEATO), formed by collective defense pact signed in Manila, Sept. 8 by the U. S., Britain, France, Australia, New Zealand, Philippines, Pakistan and Thailand. Agreement signed in Paris, Oct. 23, provided for West German sovereignty, rearmament, and entrance into NATO and the Western European Union.

Condemnation of Sen. Jos. R. McCarthy (R.-Wis.) voted by Senate, 67-22, Dec. 2 for contempt of a Senate elections subcommittee, for abuse of its members and for insults to the Senate during investigation, Apr. 22-June 17, of charges brought by the Dept. of the Army vs. Sen. McCarthy, growing out of the Senator's investigation of alleged subversive activities.

1955

Afro-Asian conference of 29 nations met in Bandung, Indonesia, April. Conference gave expression to new nationalism of developing nations.

Federal Republic of West Germany became a sovereign state May 5 when ratifications were deposited in Bonn. U.S. completed ratification Apr. 21. President Eisenhower signed an order ending U. S. occupation but troops remained on a contractual basis.

The Warsaw Pact, a 20-yr. mutual defense treaty, was signed at Warsaw May 14 by USSR, Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Rumania and East Germany.

The U. S. Supreme Court May 31 reaffirmed the principle of public education without racial discrimination and said all provisions of Federal, state and local law must honor this principle. It gave local authorities the task of integrating schools.

A meeting of heads of state "at the summit" proposed by U.S., Great Britain and France, to the USSR, took place July 18-23 in Geneva, Switzerland, with President Eisenhower top negotiator for the U.S. It was followed by a meeting of the Foreign Ministers, Oct. 27-Nov. 16, with Secy. of State Dulles acting for U. S.

Juan D. Peron, president and dictator of Argentina, was deposed Sept. 19 after a military revolt began June 16 by naval and marine corps units. Maj. Gen. Eduardo Lonardi became provisional pres. Sept. 23, was displaced Nov. 13 by a military junta, which chose Maj. Gen. Pedro Aramburu prov. pres.

Merger of America's two largest labor organizations was effected Dec. 5, under the name American Federation of Labor and Congress of Industrial Organizations. Geo. Meany became pres., Walter Reuther became vice pres. in charge of the industrial dept. The merged AFL-CIO had a membership estimated at 15,000,000.

1956

At 20th Congress of Soviet Communist party in Moscow, Feb. 14-25, party chief Nikita S. Khrushchev and other leaders denounced Joseph Stalin, repudiated cruelties of Stalinism, and proclaimed a policy of peaceful co-existence with the West. New party line helped to alienate Chinese communists and hasten Sino-Soviet split. U. S. State Dept. June 4 published text of Khrushchev's 7-hr. secret speech.

Dr. Jesus de Galindez, Columbia U. lecturer, disappeared in New York City Mar. 12. Dominican officials denied he had been murdered by agents of Trujillo regime which he opposed.

Six U.S. Marine recruits drowned Apr. 8 in march through stream at Parris Island, S. C.

Workers in Poznan, Poland, revolted June 28 against Communist rule; uprising crushed with 44 killed, hundreds wounded.

Principles of Organization of American States outlined in Panama Declaration signed in Panama City July 22 by President Eisenhower and heads of 18 other Western Hemisphere states.

Egypt seized Suez Canal July 26 under nationalization decree after Pres. Gamal Abdel Nasser denounced Western withdrawal of proposed Aswan dam financing.

Army H21 helicopter landed in Washington D.C., Aug. 24 after first non-stop transcontinental helicopter flight—2,610 mi. in 37 hrs.

First trans-Atlantic telephone cable system went into use Sept. 25 between Clarenville, Newfoundland, and Oban, Scotland.

Polish Communist leaders Oct. 19-21 defied Kremlin leadership and elected Wladyslaw Gomulka to head more independent government.

Hungarian revolt against Soviet-dominated regime began Oct. 23, was crushed Nov. 4 by Soviet armed forces.

Israel invaded Egypt's Sinai peninsula Oct. 29. When Egypt rejected demand for cease-fire made by France and Britain, the two nations bombed Egypt by air Oct. 31, landed forces Nov. 5-6. U. S. condemned attack, supported cease-fire demand by UN. Egypt and Israel accepted cease-fire. Britain and France followed, fighting stopped Nov. 7.

UN Nov. 5 established first international police force to supervise truce in Middle East.

1957

Britain set off its first hydrogen bomb in Pacific test May 15.

Soviet Union announced Aug. 26 that it had successfully tested an intercontinental ballistic missile.

Sen. Strom Thurmond (D.-S.C.) held Senate floor for 24 hrs. 18 mins. Aug. 28-29, eclipsing record filibuster of 22 hrs. 26 mins. set by Sen. Wayne Morse (D.-Ore.) in 1953.

First underground nuclear explosion set off by Atomic Energy Commission in Nevada Sept. 19.

A Federal-state controversy over admission of Negroes to the previously all-white Central High School in Little Rock, Ark., reached a showdown Sept. 4 when National Guardsmen ordered out by Gov. Orval Faubus (D.) barred 9 Negro students from entering the school. A conference between Faubus and President Eisenhower brought no tangible result but Faubus complied Sept. 21 with a Federal Court order to remove the National Guardsmen. The Negroes entered school Sept. 23 but were ordered to withdraw by local authorities because of fear of mob violence. President Eisenhower sent Federal troops to Little Rock Sept. 24 to enforce the Federal Court's order and the school began operation on an integrated basis.

First man-made satellite, Sputnik I, was launched by Soviet scientists Oct. 4. The 184-lb. sphere circled the earth about every 1½ hours in an elliptical orbit at altitudes ranging from some 140 miles to 560 miles above the earth. The Russians Nov. 3 launched Sputnik II, weighing 1,120 lbs., carrying a live dog, Laika, as the world's first space passenger and orbiting the earth about every 103.7 minutes at altitudes ranging from some 160 mi. to about 1,060 miles. Soviet authorities announced the dog's death Nov. 10. Sputnik I disintegrated Jan. 4, 1958, and Sputnik II Apr. 14, 1958.

1958

First U. S. earth satellite to go into orbit, Explorer I, launched by Army Jan. 31, Cape Canaveral, Fla.

Gen. Charles de Gaulle became French Premier July 1, averting threatened civil war. De Gaulle constitution, increasing power of executive, overwhelmingly adopted Sept. 28. De Gaulle elected Dec. 21 as first president of 5th Republic.

Arab nationalist rebels seized Iraqi government July 14, killed King Faisal II and Premier Nuri as-Said, proclaimed republic. President Eisenhower sent U. S. Marines to Lebanon July 15, at Lebanese government's request, to forestall alleged effort by Soviet Union and United Arab Republic to engineer overthrow of Lebanon regime. Withdrawal of U. S. troops began Aug. 12 after calm was restored.

First airliner passenger service across Atlantic was opened Oct. 4 by British Overseas Airways Corp.

First domestic jet airline passenger service in U. S. opened by National Airlines Dec. 10 between New York and Miami.

1959

Fidel Castro assumed power in Cuba following collapse of Fulgencio Batista's government Jan. 1. Lunik I was launched by Soviet scientists Jan. 4, went into orbit around the sun as first man-made planet.

St. Lawrence Seaway opened Apr. 25; was dedicated June 26 by President Eisenhower and Queen Elizabeth II.

George Washington, first U.S. ballistic-missile submarine, launched at Groton, Conn., June 9.

N.S. Savannah, world's first atomic-powered merchant ship, launched July 21 at Camden, N. J. Lunik II hit the moon Sept. 13, about 35 hours after launching by Soviet scientists.

Soviet Premier Khrushchev paid unprecedented visit to U.S. Sept. 15-27, made transcontinental tour, conferred with President Eisenhower.

Lunik III launched Oct. 4 by Soviet scientists, circled moon and radioed to earth photographs of moon's other side.

1960

First French nuclear test explosion occurred Feb. 13 in Sahara Desert.

Caryl Chessman, who had won 3 stays of execution since his 1948 conviction on robbery, kidnapping and attempted rape charges, was put to death May 2 in the gas chamber at San Quentin Prison, near San Francisco.

A U-2 reconnaissance plane of the U. S., piloted by Francis Gary Powers, was shot down in the Soviet Union May 1. Soviet Premier Khrushchev refused to participate in the Paris summit conference scheduled for May 16 unless President Eisenhower apologized for U-2 flights over the USSR; the Big Four leaders went to Paris but the conference did not take place. Powers was convicted of espionage in Moscow Aug. 19 and sentenced to a 10-year term. Freed Feb. 10, 1962, in exchange for convicted Soviet spy Rudolf Abel, who was serving a 30-yr. term imposed by U. S. in 1957.

Adolf Eichmann's capture in Argentina by Israeli agents announced May 22; former Nazi SS general, accused of playing a major role in killing of mil-

lions of Jews. After 4-month trial in Jerusalem, sentenced by Israeli court Dec. 15, 1961, hanged for crimes against humanity May 31, 1962.

1961

The United States severed diplomatic and consular relations with Cuba Jan. 3.

Patrice Lumumba, ousted Premier of the Republic of the Congo, was murdered in the Congo's secessionist province of Katanga Jan. 17.

Maj. Yuri Gagarin of the Soviet Union became Apr. 12 the first human space traveler; he was launched into orbit from Siberia in a spacecraft called Vostok I and returned to earth safely after one circuit of the globe. A second Soviet astronaut, Maj. Gherman S. Titov, made 17 orbits of the earth Aug. 6-7 in spacecraft Vostok II and landed safely.

An invasion of Cuba Apr. 17 by Cuban exiles attempting to overthrow the regime of Premier Fidel Castro was crushed.

Commander Alan B. Shepard, Jr., was rocketed from Cape Canaveral, Fla., 116.5 miles above the earth in a Mercury capsule May 5 in the first U. S. manned sub-orbital space flight; he landed safely in the Atlantic 302 miles away. Capt. Virgil I. (Gus) Grissom made a similar flight from Cape Canaveral July 21; he landed safely but his Mercury capsule sank and was lost after a hatch opened prematurely.

East Germans closed the border between East and West Berlin Aug. 12-13 to stop the exodus of East Germans to the West; the East Germans built a wall dividing the city.

Dag Hammarskjöld, Secy. Gen. of the United Nations, was killed in a plane crash near Ndola, Northern Rhodesia, Sept. 18 while on a mission seeking a cease-fire between UN and Katanga forces in the Congo. U Thant of Burma was elected Acting Secy. Gen. Nov. 3.

Nuclear blasts of 25 megatons and over 50 megatons, largest man-made explosions to date, were set off by the Soviet Union Oct. 23 and Oct. 30, respectively, despite world protests.

1962

Lt. Col. John H. Glenn, Jr., became the first American in orbit Feb. 20 when he circled the earth 3 times in the Mercury capsule Friendship 7. Lt. Comdr. M. Scott Carpenter made a 3-orbit flight May 24 in the Mercury capsule Aurora 7. Comdr. Walter M. Schirra, Jr., orbited the earth 6 times Oct. 3 in the Mercury capsule Sigma 7.

A truce agreement Mar. 18 ended the 7-yr. Moslem revolt against French rule in Algeria. Algerians cast an overwhelming vote for independence in a referendum July 1 and French President Charles de Gaulle declared the country independent July 3.

The U. S. Supreme Court ruled in a 6-1 decision June 25 that the reciting of an official prayer in the public schools of New York State was unconstitutional.

The third Soviet astronaut was sent into orbit Aug. 11 and the fourth followed him into a nearly identical orbit Aug. 12, both descending to earth safely Aug. 15. They were Maj. Andrian G. Nikolayev, who made a record 64 orbits of the earth, and Lt. Col. Pavel R. Popovich, who made 48 orbits. They had they were close enough at times to see each other.

The largest cash robbery to date in U. S. history occurred Aug. 14 when a gang held up a U. S. mail truck near Plymouth, Mass., and stole \$1,551,277.

A Soviet offensive buildup in Cuba was revealed to the American people Oct. 22 by President Kennedy, who ordered a naval and air quarantine on shipment of offensive military equipment to the island. President Kennedy and Soviet Premier Khrushchev reached agreement Oct. 28 on a formula to end the crisis and the President said Nov. 2 that Soviet missile bases in Cuba were being dismantled.

1963

U. S. Air Force Maj. Leroy Gordon Cooper orbited the earth 22 times May 15-16 in the final and longest flight of Project Mercury. Because of failure of automatic equipment, Cooper had to control the craft manually in the closing minutes of the flight.

Lt. Col. Valery F. Bykovsky was launched into orbit in Vostok V June 14, the 5th Soviet astronaut to enter space. While Bykovsky was still circling the earth, the first woman space traveler, Soviet Jr. Lt. Valentina V. Tereshkova, was launched into orbit in Vostok VI June 16. Both landed safely by parachute June 19, the man after 81 orbits and the woman after 48.

The U. S. Supreme Court ruled, 8-1, June 17 that state and local regulations requiring recitation of the Lord's Prayer or Bible verses in public schools were unconstitutional.

A limited nuclear test-ban treaty was agreed upon July 25 by the United States, the Soviet Union and Britain, barring all nuclear tests except those conducted underground. It became formally effective Oct. 10.

Dr. Stephen Ward, British osteopath, was convicted in London July 31 of living off the earnings of prostitution by Christine Keeler and Marilyn Rice-Davies. The case grew out of the scandal involving John Profumo, former Secy. of State for War, which had rocked the government of British Prime Minister Harold Macmillan. A few hours before the verdict, Ward was found in a coma from an overdose of drugs. His death Aug. 3 was ruled a suicide.

The biggest robbery to date occurred Aug. 8 when an armed holdup gang stole more than \$7,000,000 (£2,500,000) in currency from a mail train near Cheddington, England. Some of the money was recovered and a dozen men were sentenced to long prison terms.

Washington demonstration by 200,000 persons Aug. 28 in support of Negro demands for equal rights. Highlight was speech in which Dr. Martin Luther King said: "I have a dream that this nation will rise up and live out the true meaning of its creed, 'We hold these truths to be self evident: that all men are created equal.'"

Quintuplets, all boys, were born Sept. 7 to Mr. and Mrs. Efrén Lubin Prieto in Maracaibo, Venezuela. Quintuplets, 4 girls and a boy, were born Sept. 14 to Mr. and Mrs. Andrew Fischer in Aberdeen, S. D. Only two sets of quintuplets born previously in the Western Hemisphere had survived infancy—the Diones born in Canada in 1934, and the Dilgentis, born in Argentina in 1943.

The South Vietnamese government of President Ngo Dinh Diem was overthrown Nov. 1-2 in a coup by the armed forces. Diem and his brother, secret police chief Ngo Dinh Nhu, were captured and killed.

John F. Kennedy, 35th President of the United States, was shot and fatally wounded by an assassin Nov. 22 as he rode in a motorcade through downtown Dallas, Texas. Gov. John B. Connally, Jr., riding in the same car, was also shot but not fatally injured. Vice President Lyndon B. Johnson was inaugurated President shortly afterward in Dallas. Lee Harvey Oswald, 24, was arrested and charged with the murder of the President. Oswald was shot and fatally wounded Nov. 24 by Jack Ruby, 52, a Dallas night club owner, who was convicted of murder Mar. 14, 1964, and was sentenced to death. The murder conviction was reversed by the Texas Court of Criminal Appeals. Ruby died of natural causes Jan. 3, 1967, while awaiting re-trial.

1964

Pope Paul VI toured the Holy Land Jan. 4-6, the first pope to visit there since the birth of Christianity, the first pope to travel by air, and the first to leave Italy in over 150 years.

Three civil rights workers were reported missing in Mississippi June 22. The bodies of Michael Schwerner, Andrew Goodman and James E. Chaney were found buried near Philadelphia, Miss., Aug. 4. Twenty-one white men were arrested. On Oct. 20, 1967, an all-white Federal jury convicted 7 who took part in the Ku Klux Klan conspiracy to murder the 3 young men.

U. S. spacecraft Ranger 7 relayed thousands of close-up pictures of the moon back to earth July 31 before crashing on the lunar surface.

U. S. planes bombed North Vietnamese bases and sank or damaged 25 North Vietnamese patrol boats Aug. 4 in retaliation against North Vietnamese attacks on U. S. destroyers in the Gulf of Tonkin.

The Warren Commission released Sept. 27 a report containing the conclusion that Lee Harvey Oswald was solely responsible for the killing of President Kennedy.

A spacecraft carrying 3 men was launched by the Soviet Union Oct. 12, the first spacecraft occupied by more than one person. The Voskhod (Sunrise) returned to earth safely Oct. 13 after 16 orbits of the earth. Its passengers were Col. V. M. Komarov, a cosmonaut; Dr. B. B. Yegorov, a space physician; and K. P. Feoktistov, a scientist.

Soviet Premier Khrushchev was ousted as premier and Soviet Communist party chief Oct. 14-15. Aleksei N. Kosygin replaced him as premier and Leonid I. Brezhnev took over the party leadership.

Communist China conducted a successful test explosion of its first atomic bomb Oct. 16.

1965

U. S. bombed North Vietnam, Feb. 7, after Vietcong guerrillas attacked American installations at Pleiku, Feb. 6.

Lt. Col. Aleksei A. Leonov, stepping out of Soviet spaceship Voskhod 2, became the first man to "walk in space" March 18. Maj. Edward H. White, in U. S. spaceship Gemini 4, repeated the Russian feat and remained outside the ship for 20 minutes, June 3. On Dec. 4, Air Force Lt. Col. Frank Borman and Navy Comdr. James A. Lovell, Jr., orbited in Gemini 7, stayed aloft 14 days and participated in first manned space rendezvous Dec. 15 when Gemini 6, with Navy Capt. Walter M. Schirra, Jr., and Air Force Maj. Thomas P. Stafford, came within 10 ft. of Gemini 7.

A Selma to Montgomery, Ala., civil rights march was led by Dr. Martin Luther King, March 21-25. The marchers, starting with 3,200 and swelling to 25,000, were guarded along the way by 4,000 troops dispatched by President Johnson.

U. S. armed forces sent to Dominican Republic to protect U. S. citizens and prevent a Communist revolution, Apr. 28. Later, May 23, the Organization of American States set up a peace-keeping force to maintain order.

Los Angeles riot by discontented Negroes living in the Watts area resulted in the death of 35 persons and property damage estimated at \$200,000,000, Aug. 11-16.

Pope Paul VI visited N. Y. City Oct. 4 and delivered a personal appeal for peace to the UN. It was the first time a Pope had come to America.

Massive electric power failure blacked out most of Northeastern U. S. plus parts of 2 Canadian provinces the night of Nov. 9-10. Approximately 80,000 sq. miles with a population of 30,000,000 were affected. In N. Y. City, over 800,000 were trapped in the subways for hours.

Independence proclaimed in Rhodesia by minority white regime, Nov. 11. Britain promptly declared the action illegal and announced the application of economic sanctions.

1966

First soft landing on surface of moon by an unmanned spacecraft Feb. 3, USSR Luna 9. U. S. achieved similar feat June 2 with Surveyor 1.

Kwame Nkrumah, president of Ghana since independence in 1957, was overthrown Feb. 24.

France withdrew all its armed forces from the integrated NATO military alliance July 1.

Medicare, government program to pay part of the medical expenses of citizens over 65, went into effect July 1.

Eight student nurses were slain in a Chicago apartment building July 14. Richard Speck, 24, was convicted of the killings Apr. 15, 1967.

A sniper atop the University of Texas tower in Austin, Tex., shot 44 persons Aug. 1, killing 14 of them including an unborn child. Shot to death by police, the sniper was identified as Charles J. Whitman, 25, an honor student at the university. Police later found the bodies of his wife and his mother, whom he apparently had slain the night before.

U. S. spacecraft Gemini 11 docked with a 26-foot Agena-D target vehicle Sept. 12.

President Johnson met with the leaders of 6 U. S. allies at the Manila Conference, Philippines, Oct. 24-25 to discuss the war in Vietnam.

Edward Brooke (R., Mass.) elected Nov. 8 as first Negro U. S. Senator in 85 years.

1967

Fire aboard spacecraft Apollo 1 on the ground at Cape Kennedy, Fla., Jan. 27 killed Virgil I. Grissom, 40, one of first 7 Mercury astronauts; Edward H. White, 2d, 36, first American to "walk" in space; and Roger B. Chaffee, 31. First U. S. astronauts killed in space tests.

Natl. Student Assn. disclosed Feb. 13 it had secretly received over \$3,000,000 from Central Intelligence Agency, 1952-1966, for use in exchange and other overseas programs. State Dept. admitted Feb. 14 CIA support of NSA designed to counter Communist student activities.

Rep. Adam Clayton Powell (D., N. Y.) was denied Mar. 1 his seat in 90th Congress because House of Representatives charged him with misuse of Govt. funds and nepotism. He won Apr. 11 special election to fill vacancy despite not campaigning in Harlem, where he faced possible arrest in a civil suit, but did not take seat.

In 6-day Israeli-Arab war June 5-10, Israel smashed armed forces of United Arab Republic, Syria and Jordan; Israel conquered territory 4 times its own size.

Sen. Thomas J. Dodd (D., Conn.) censured by Senate June 23 by 92-5 vote for using campaign and testimonial funds "for his personal benefit."

President Johnson and Soviet Premier Aleksei N. Kosygin met June 23 and 25 for 10 hrs. of talks at Glassboro State College in N. J. Although neither changed opposing positions on Israeli-Arab crisis, Vietnam or nuclear weapons, both agreed not to let any crisis push them into nuclear war.

Racial riots in Newark, N. J., July 12-17 killed some 26, injured 1,500, over 1,000 arrested. In Detroit, Mich., July 23-30 at least 40 died, 2,000 injured and 5,000 left homeless by rioting, looting and burning in city's Negro ghetto. Quelled by 4,700 Federal paratroopers and 8,000 National Guardsmen.

Thurgood Marshall sworn in Oct. 2; first Negro U. S. Supreme Court Justice. Nov. 7: Carl B. Stokes (D., Cleveland) and Richard H. Hatcher (D., Gary, Ind.) elected first Negro mayors of major U. S. cities. Robert G. Clark first Negro elected to Mississippi Legislature since Reconstruction.

Vietnam war protested Oct. 21-22 by some 35,000 in Washington, D. C., peace march. At least 647 arrested, most when attempting to enter Pentagon.

For Events of 1968 see Chronology

EDUCATION

AMERICAN COLLEGES AND UNIVERSITIES

STUDENT AND FACULTY FIGURES FOR SPRING TERM, 1938

Source: World Almanac questionnaires and U. S. Office of Education

See Page 345 for typical tuition fees

All coeducational unless name followed by: (M) for men only, or (W) for women only. Even though marked (M) or (W), some are coeducational at graduate level and in evening and summer divisions. (Med) has medical school; (T) has teachers' college or education department. Asterisk (*) denotes land-grant college.

Governing official is president unless otherwise designated. Year is that of founding. The word college is part of the name listed unless another designation is given.

Control: C-county; D-religious denomination; Di-district; F-federal; I-interdenominational; Mu-municipal; P-private; Pr-proprietary; S-state; T-territorial govt.; Y-YMCA.

Each institution listed has an enrollment of at least 100 students of college grade. Number of teachers is the total number of individuals on teaching staff. Enrollment and faculty figures in italics include all branches and campuses.

Many Words Rarely Used

Despite the fact that English is the richest language in the world with some 800,000 words, the speaking vocabulary of well-educated Americans is about 5,000 words. Experts doubt if any one person has an active vocabulary of 60,000 words—a mere 7½% of the entire English language.

Junior Colleges

American College Fraternities, Sororities and Societies

Source: World Almanac Questionnaire

American college fraternal organizations include the fraternities and sororities that organize the social life of their members, and the honor and recognition societies that elect members primarily for their achievement in some field of education. Among the fraternities and sororities, there is a distinction between the so-called social college fraternities that draw their membership mainly from the undergraduate student body, and the professional fraternities that confine their membership to a specific field of professional education.

The oldest American college Greek letter fraternity is Phi Beta Kappa, organized Dec. 5, 1776 at William and Mary College, Williamsburg, Va. It was not continuously active. Originally founded as a secret fraternity, Phi Beta Kappa was reorganized in 1883 as an honor society and students with the highest standing on graduation are nominated for membership by college authorities. Kappa Alpha Society, founded Nov. 26, 1825 at Union College, Schenectady, N. Y., is the oldest of all Greek letter fraternities to have maintained a continuous existence.

NATIONAL INTERFRATERNITY ORGANIZATIONS

National Interfraternity Conference: 271 Madison Ave., New York, N. Y. 10016.

Professional Intrafraternity Conference: Sec., W. E. Koch, Jr., 29 N. Gore Ave., Webster Groves, Mo.

¹Excludes payments for services rendered to the Federal Government. ²Includes Indian education and Economic Opportunity Act programs. ³Includes Titles III (part) and X of NDEA and Titles II, III, and V of ESEA. ⁴Includes District of Columbia, Canal Zone, national parks and territories, Cuban refugee education, etc. ⁵Includes construction at Howard University and Gallaudet College, Washington, D.C., Higher Education Facilities Act, AEC and NSF grants. ⁶Includes AEC, NSF, and PHS grants, language and area centers, land-grant colleges, and support of Howard University, Gallaudet College, East-West Center for Cultural and Technical Interchange, and State merchant marine schools. ⁷Includes Veterans education and work-study programs. ⁸Includes college, health professions, nursing and Cuban refugee programs. ⁹Includes college housing and Higher Education Facilities Act programs. ¹⁰Includes payments for services rendered to the Federal Government and education and related activities excluded above. ¹¹Estimated actual value of surplus real and personal property at time of transfer for education use.

Science Service Popularizes Science

Science Service, Inc., 1719 N St., N.W., Washington, D. C., Edward G. Sherburne, Jr., director, the institution for the popularization of science, was organized as a non-profit corporation, with trustees nominated by the National Academy of Sciences, the National Research Council, the American Association for the Advancement of Science, the journalistic profession and the Edward W. Scripps Trust.

Through its services to newspapers, Science Service has been since 1921 telling the public about science and technology. It covers the broad fields of science—physics, chemistry, medicine, biology, astronomy, anthropology, archaeology, psychology, mathematics, atomics, electronics, etc.—by a specialized science writing staff. It publishes the weekly SCIENCE NEWS and produces monthly the unique THINGS of science experimental kits.

More than a million boys and girls participate annually in Science Service's International Science Youth Program, doing projects and making exhibits shown in science fairs. Some 25,000 science teachers and other science youth leaders, mostly in secondary schools, upon request are sent without charge "know-how" literature and material for inspiring and instructing science students. The International Science Youth Program consists of Science Clubs of America, International Science Fair and the Science Talent Search for the Westinghouse Science Scholarships and awards.

Average Tuition Fee at Selected Colleges and Universities

Source: World Almanac Questionnaire

Fees for tuition charged per year by colleges and universities for courses, use of libraries, laboratories and other facilities, are a major part of student expenses. Tuition varies considerably, depending on the type of institution, its control and location. The lowest tuition fees are those of state-controlled or other public-controlled institutions for residents of their state, city, etc. Students from other states or areas have to pay more. In the following list, such state or other public institutions are shown with two figures. The lower one is the tuition fee for residents, the higher one the tuition fee for students from other states or areas.

It should be noted that the tuition fee does not cover room, board, and other personal expenses.

For location of College or University see pages 319-338

American Field Service (AFS) International Scholarship Program

The American Field Service is a privately-sponsored, non-profit, non-sectarian, non-political organization which operates the world's largest international scholarship program for high school students.

The AFS was founded in 1914 as a volunteer ambulance service with the French Armies. Between the two World Wars, it sponsored a "Fellowships for French Universities" program, and in 1939, re-organized its ambulance corps with the Allied Armies. In 1946 it established its present international scholarship programs on the teenage level when it brought 52 students from 10 countries to the United States.

During 1967, AFS brought more than 3,000 high school students (ages 16-18) to the U.S.A. from 60 countries to participate wholeheartedly in the life of an American community where they attend a secondary school and live in carefully selected homes as members of their host families. During the same period more than 1,300 American students were sent overseas to 44 countries for a similar experience. Since 1947, some 42,712

students in 78 countries have participated in the AFS Scholarship programs.

A grass-roots organization, AFS is operated principally by volunteers worldwide, including 4,300 host families and 20,000 bus stop families who open their homes to students during the cross country trip at the end of the year. In each of the participating countries, there is a far-flung structure involving in-toto thousands of volunteers.

Many organizations as well as individuals contribute to the AFS scholarship programs. Schools have waived non-resident tuition, and other fees and host families welcome students without pay. Local chapters contribute approximately 50% of the funds to administer the AFS. Approximately 32% of the budget comes from the natural families whose payments are adjusted according to their financial resources. The balance of AFS support is dependent upon general fund raising in the United States and abroad.

Arthur Howe, Jr., is president of AFS, which has its international headquarters at 313 East 43rd Street, New York, N. Y. 10017.

Government Publications and How to Get Them

The United States Government, through the Government Printing Office, issues a vast number of pamphlets, books and reports of studies and research conducted by departments and agencies. It has 335 periodicals or subscription services, with more than 1,231,000 subscribers. It sells about 72,000,000 publications annually and distributes many more to libraries and offices. Receipts are more than \$16,000,000 and more than \$7,000,000 is turned over annually to the U. S. Treasury.

Catalogues and price lists are available to the public. Pamphlets dealing with every conceivable subject related to human living—the farm, the home, child care, education, business, fiscal matters—are published regularly. A list of selected publications, issued biweekly, can be had free on request. In addition to free price lists, the Monthly Catalogue of Publications is sold by subscription, \$6, foreign \$7. Address the Supt. of Documents, Government Printing Office, Washington, D. C. 20402.

Scholarships, Fellowships, and Other Financial Aid

Rising costs of higher tuition of colleges and universities have led more and more students to finance their education by summer jobs, part-time work on and off campus, loans, scholarships and fellowships.

Scholarships are usually outright grants to undergraduates, while fellowships are awarded to graduate students. Scholarships which may range from as little as \$10 to as much as \$3,000 annually are usually given to students of proven talent and need. Scholarship donors as a rule require applicants to answer questionnaires and to take talent tests.

To help assure that the available scholarships will go to those who deserve and need them, the College Scholarship Service was created 15 years ago as an agency of the College Entrance Examination Board. More than 1,450 of the nation's colleges and universities are served by this agency. The College Scholarship Service, Box 592, Princeton, N. J., and for residents of the Western states Box 1025, Berkeley, Calif. 94701, requires parents to answer a confidential questionnaire on finances.

National Defense Student Loan Program—Is a program of long-term low-interest student loans, administered by the participating colleges. The Federal Government contributes 90% of the total amount of each institutional loan fund. Eligibility is based upon the financial needs of the student although preference is given to students with superior academic backgrounds. The amount of the loan cannot exceed \$1,000 for any one undergraduate academic year (up to \$5,000), or \$2,500 for any graduate academic year (up to \$10,000). Repayment of the loan must begin 9 months after the borrower is graduated or leaves the school, and may be extended over a 10-year period, except that the institution may require a repayment of no less than \$15 a month. An interest charge of 3% is in effect during the repaying period. No repayment is required during those periods when the borrower is serving in the Armed Forces, the Peace Corps, or as a Volunteer in Service to America (VISTA), providing such periods do not exceed 3 years. If a borrower should become a full-time teacher, as much as half of the loan may be forgiven at the rate of 10% for each year of teaching service. Borrowers who elect to teach in certain eligible schools located in areas of primarily low-income families or who teach handicapped children may qualify for cancellation of their entire obligation at the rate of 15% per year. A student should address his inquiry concerning the program to the appropriate official (usually the Director of Admissions) of the institution in which he expects to enroll.

The Guaranteed Student Loan Programs—Banks, savings and loan associations, insurance companies, credit unions and similar supervised lending institutions may be lenders under this program. The program may vary from state to state but generally the maximum amount borrowed will range from \$1,000 to \$1,500. The Federal Government pays the lender the total interest while the student is in school, and 3 percent on the unpaid balance during the repayment period after the student has withdrawn or graduated. The program is designed to make it possible for students to borrow money for educational expenses in college or in nursing, business, trade, technical or other vocational schools. The loans are guaranteed by State or private nonprofit agencies, or in some states by the Federal government. Students should contact the financial aid officer at their schools for further details.

The College Work-Study Program—Is designed to help students, particularly those from low income families, who need jobs to meet college expenses. Students may work up to 15 hours weekly while attending classes full time and 40 hours weekly during summer and vacation periods. Work may be for the institution or for an approved off-campus agency. To be eligible, a student must be enrolled and be in good standing, or be accepted for enrollment as a full-time student, at a college which participates in the program.

The Educational Opportunity Grants Program—Colleges participating in this program select the

recipients of this program and also determine the amount of the grant. Grants range from \$200 to \$800 for each year of undergraduate study, but can be no more than one-half of the total assistance given the student. As an academic incentive to students, an additional award of \$200 may be given to those students who were in the upper half of their college class during the preceding academic year.

National Merit Scholarship Program—The Natl. Merit Scholarship Corp., estab. in 1955 with grants from the Ford Foundation and the Carnegie Corp. of N. Y., awards over 2,400 scholarships annually to students who demonstrate extraordinary ability to benefit from a college education. Students may participate in the Natl. Merit Scholarship Program through their high schools. They become eligible by taking the Qualifying Test. Top scorers take a second examination, the Scholastic Aptitude Test of the College Entrance Examination Board and have to submit biographical and financial information. Scholarships range from \$100 to \$1,500 a year, depending on needs.

General Motors Scholarship Plan—Another contributor of a large number of scholarships is the General Motors Corp. Under the General Motors Scholarship plan, about 300 4-year undergraduate scholarships for any field of study are awarded annually to entering freshmen by over 200 participating institutions throughout the nation. Scholarships range from \$200 to \$2,000 per year depending upon need. Applications are made through the directors of admission of participating colleges.

Fulbright-Hays Scholarships—As part of an international educational exchange program, the U. S. Government, under the Fulbright-Hays Act provides scholarships for graduate study, research, lecturing and teaching abroad. There are full grants that cover transportation, tuition, books, living expenses and other costs, and there are grants which cover travel costs, with tuition and other expenses fully or partly paid by foreign governments, universities, and other institutions.

Detailed information on these exchange grants may be obtained from the Fulbright Program Adviser at college and university campuses. Persons not currently enrolled at an institution of higher learning should contact one of the following agencies:

- For graduate study and pre-doctoral research—Institute of International Education, 809 United Nations Plaza, New York, N. Y. 10017.
- For teaching in elementary and secondary schools—U. S. Office of Education, Bureau of International Education, Dept. of Health, Education & Welfare, Washington, D. C. 20202.
- For university lecturing and post-doctoral research—Conference Board of Associated Research Councils, Committee on Intl. Exchange of Persons, 2101 Constitution Ave., Washington D. C. 20418.

Rhodes Scholarships for Study at Oxford—Thirty-two qualified American students, regardless of race or religion, are chosen every year to receive Rhodes Scholarships for a minimum of two years of study at Oxford University. Rhodes Scholarships, estab. under the will of Cecil John Rhodes, carry a stipend of approximately \$1,500 a year. At Oxford work may be done in any field of study for which the university awards a degree. Applicants must be male, unmarried U. S. citizens, 18 to 24 years of age at the time of application, and with at least junior standing at a recognized degree-granting college or university at time of application. Information may be obtained from President Courtney Smith, American Secretary of the Rhodes Scholarships, Swarthmore College, Swarthmore, Pa. 19081.

American Academy in Rome Prize Fellowships—The American Academy in Rome, estab. 1894, chartered 1905 by Act of Congress, offers a limited number of fellowships to young American artists and scholars capable of doing independent creative work or research in architecture, landscape architecture, musical composition, painting, sculpture, history of art and classical studies. Fellowships are awarded for one year with a possibility of renewal. A fellowship consists of a grant of \$3,650 a year, studio or study, and residence at the Academy. Information may be obtained from the American Academy in Rome, 101 Park Avenue, New York, N. Y. 10017.

¹Full-time and Part-time Classroom Teachers. ²Data for fall 1966.

Air Force Library Service

The Air Force library program is designed to support all the missions of the Air Force. This includes not only providing opportunity for the constructive use of leisure time, but also support for education and training programs and scientific and technical research requirements. Library service is worldwide. There are 224 main libraries and service centers. A total of 667 service units, including main libraries, branches and field collections are required to serve all Air Force personnel, whether on large Air Force bases or at small, remote or isolated sites. Over 6,095,568 volumes are in Air Force library collections. Annual book circulation is over 16,203,545. Reader services for \$33,682 reference and bibliographic requests are provided each year. An annual library publicity contest is conducted.

Cobwebs and Spider Webs

There is a popular but erroneous belief that cobwebs are merely dust. The fact is that cobweb means spider web, cob being an old English word for spider. Most cobwebs are the work of a little house spider whose handiwork usually goes unnoticed until it becomes covered with dust.

The Principal Languages of the World

Total number of speakers of languages spoken by at least one million persons (Midyear 1968)

Hebrew	3	Panjabi (see Punjabi)		Yoruba (W. Africa)	5
		Pashto (see Pushtu)		Zulu (S. Africa)	4

(1) One of the fourteen languages of the Constitution of India. (2) Here considered a group of dialects. (3) See Mandarin, Cantonese, Wu, Min, and Hakka. The "national language" (kuo-yu) is a standardized form of Mandarin as spoken in the area of Peking. (4) Hindi and Urdu are essentially the same language, Hindustani. As the official language of India it is written in the Devanagari script and called Hindi. As one of the two official languages of Pakistan (the other is Bengali), it is written in a modified Arabic script and called Urdu. (5) Yiddish is usually considered a variant of German, though it has its own standard grammar, dictionaries, a highly developed literature, and is written in Hebrew characters. Speakers number about 3,000,000.

National Spelling Bee Champions

The National Spelling Bee, conducted by Scripps-Howard Newspapers and other newspapers since 1939, was instituted by the Louisville (Ky.) Courier-Journal in 1925. Children under 16 years of age sponsored by participating newspapers are eligible to compete for the cash prizes and prize trips. Recent winners are:

1966—1, Robert A. Wake, 13, Houston, Tex. (Houston Chronicle); 2, Beth Sherrill, 14, Millington, Tenn. (Memphis Press-Scimitar); 3, Sonya Gilliam, 13, Lubbock, Tex. (Lubbock Avalanche-Journal).

1967—1, Jennifer Reinke, 14, Deshler, Neb. (The Omaha World-Herald); 2, Anne Clark, 14, Hunt-

ington, W. Va. (The Herald-Dispatch); 3, Milene Henley, 14, Houston, Tex. (The Houston Chronicle).

1968—1, Robert L. Walters, 14, Russell, Kan. (Topeka Daily Capital); 2, Ann Johnson, 13, Richfield, Minn. (Minneapolis Tribune); 3, Stephen Bacher, 14, Middle Village, Queens, N. Y. (N. Y. Daily News).

How to Obtain Birth, Marriage, Death Records

The United States Government has published a series of inexpensive booklets entitled Where to Write for Birth & Death Records; Where to Write for Marriage Records; Where to Write for Divorce Records; Where to Write for Birth and Death Records of U. S. Citizens who were born or died outside of the U. S. and birth certificates for alien children adopted by U. S. citizens; How to obtain death certificates in each state; How to obtain birth certificates; table showing where to apply for birth certificates in each State; Marriage and divorce registration; You May Save Time Proving Your Age and Other Birth Facts. They tell where to write to get a certified copy of or original vital record. Supt. of Documents, Government Printing Office, Washington, D. C. 20402.

Forms of Address for Persons of Rank and Public Office

In these examples John Smith is used as a representative American name. The salutation Dear Sir is always permissible when addressing a person not known to the writer.

PRESIDENT OF THE UNITED STATES

Address: The President, The White House, Washington, D. C. Also, The President and Mrs. —.

Salutation: Dear Sir or Mr. President or Dear Mr. President. More intimately: My dear Mr. President. Also: Dear Mr. President and Mrs.

The Vice President takes the same forms as President.

CABINET OFFICERS

Address: Mr. John Smith, Secretary of State, Washington, D. C., or The Hon. John Smith. Similar addresses for other members of the Cabinet. Also: Secretary and Mrs. John Smith.

Salutation: Dear Sir, or Dear Mr. Secretary. Also: Dear Mr. and Mrs. Smith.

THE BENCH

Address: The Hon. John Smith, Chief Justice of the United States. The Hon. John Smith, Associate Justice of the Supreme Court of the United States. The Hon. John Smith, Associate Judge, U. S. District Court.

Salutations: Dear Sir or Dear Mr. Chief Justice. Dear Mr. Justice. Dear Judge Smith.

MEMBERS OF CONGRESS

Address: The Hon. John Smith, United States Senate, Washington, D. C. Or Sen. John Smith, etc. Also The Hon. John Smith, House of Representatives, Washington, D. C. Or Rep. John Smith, etc. Salutation: Dear Mr. Senator. Dear Mr. Representative, or more generally, Dear Mr. Colloquially as Congressman.

OFFICERS OF ARMY AND NAVY

Address: Careful attention should be given to the precise rank, thus: General of the Army Douglas MacArthur; Fleet Admiral Chester W. Nimitz. Also Brigadier General John Smith, United States Army, or abbreviated, Brig. General John Smith, USA, or Captain (Capt.) John Smith, USN. If he is retired, Rtd. is added.

Salutation: Dear Sir, or Dear General. All general officers, whatever rank, are entitled to be addressed as generals. Likewise a lieutenant colonel is addressed as colonel and first and second lieutenants are addressed as lieutenant.

Warrant officers and flight officers are addressed as Mister. Chaplains are addressed as Chaplain. A Catholic chaplain may be addressed as Father. Cadets of the United States Military Academy and Air Force Academy are addressed as Cadet. Noncommissioned officers are addressed by their titles. In the U. S. Navy all men from midshipman at Annapolis up to and including Lieut. Commander are addressed as Mister.

AMBASSADOR, GOVERNOR, MAYOR

Address: The Hon. John Smith, followed by his title. He can be addressed either at his embassy, or at the Department of State, Washington, D. C. A foreign ambassador is His Excellency.

Salutation: Dear Mr. Ambassador. A foreign ambassador is Your Excellency.

Governors and Mayors are often addressed as The Hon. John Smith, Governor of ————, or The Hon. John Smith, Mayor of ————; also Governor John Smith, State House, Albany, N. Y., or Mayor John Smith, City Hall, Erie, Pa.

THE CLERGY

Address: His Holiness, the Pope, or His Holiness Pope (name), State of Vatican City, Italy. Salutation: Your Holiness or Most Holy Father.

Also: His Eminence, John, Cardinal Smith; salutation: Your Eminence. An archbishop or a bishop is addressed The Most Reverend, and the salutation is Your Excellency. A monsignor who is a papal chamberlain is The Very Reverend Monsignor and saluted as Very Reverend Monsignor; a monsignor who is a domestic prelate is The Right Reverend Monsignor and salutation is Right Reverend Monsignor. A priest is addressed Reverend John Smith, and saluted as Reverend Father, or Dear Reverend Father. A Brother of an order is addressed Brother ————, and saluted Dear Brother ————. A Sister takes the same form.

A bishop of the Protestant Episcopal Church is The Right Reverend John Smith; salutation is Right Reverend Sir, or Dear Bishop Smith. If a clergyman is a Doctor of Divinity, he is addressed: The Reverend John Smith, D. D., and the salutation is Reverend Sir, or Dear Dr. Smith. When a clergyman does not have the degree the salutation is Dear Mr. Smith.

A bishop of the Methodist Church is addressed Bishop John Smith with titles following, and saluted as Dear Bishop Smith.

ROYALTY AND NOBILITY

An Emperor is to be addressed in a letter as Sir, or Your Imperial Majesty.

A King or Queen is addressed as His Majesty (Name), King of (Name), or Her Majesty (Name), Queen of (Name). Salutation: Sir, or Madam, or May it please Your Majesty.

Princes and Princesses and other persons of royal blood are addressed as His (or Her) Royal Highness, and saluted with May it please Your Royal Highness.

A Duke or Marquis is My Lord Duke (or Marquis), a Duke is His (or Your) Grace.

Wives of any peer may be addressed as Madam, with the further alternative of Your Ladyship, or Your Grace, if she is of high rank.

Vocational Education

Source: United States Office of Education

All Federal funds expended for vocational education are matched by state and local funds. This does not include expenditures for plant and equipment for vocational schools, for which Federal funds cannot be used.

Breaking the Sound Barrier; Speed of Sound

The prefix Mach is used to describe supersonic speed. It derives from Ernst Mach, a Czech-born German physicist, who contributed to the study of sound. When a plane moves at the speed of sound it is Mach 1. When twice the speed of sound it is Mach 2. When it is near but below the speed of sound its speed can be designated at less than Mach 1, for example, Mach .10. Mach is defined as "in jet propulsion, the ratio of the velocity of a rocket or a jet to the velocity of sound in the medium being considered."

When a plane passes the sound barrier—flying faster than sound travels—listeners in the area hear thunderclaps, but pilots do not hear them.

Sound is produced by vibrations of an object and is transmitted by alternate increase and decrease in pressures that radiate outward through a material media of molecules—somewhat like waves spreading out on a pond after a rock has been tossed.

The frequency of sound is determined by the number of times the vibrating waves undulate per second, and is measured in cycles per second. The slower the cycle of waves, the lower the sound. As the frequencies increase, the sound rises

higher.

Sound is audible to human beings only if the frequency falls within a certain range. The human ear is usually not sensitive to frequencies of less than 20 vibrations per second, or more than about 20,000 vibrations per second—although this range varies among individuals. Anything at a pitch higher than the human ear can hear is termed ultrasonic.

Intensity or loudness is the strength of the pressure of these radiating waves, and is measured in decibels. The human ear responds to intensity in a range from zero to 120 decibels. Any sound with pressure over 120 decibels is painful.

The speed of sound is generally placed at 1088 ft. per second at sea level at 32° F. It varies in other temperatures and in different media. Sound travels faster in water than in air, and even faster in iron and steel. If in air it travels a mile in 5 seconds, it does a mile under water in 1 second, and through iron in $\frac{1}{3}$ of a second. It travels through ice-cold vapor at approximately 4,708 ft. per sec., ice-cold water, 4,938; granite, 12,960; hard wood, 12,620; brick, 11,960; glass, 16,410 to 19,690; silver, 8,658; gold, 5,717.

Colors of the Spectrum

Color, an electromagnetic wave phenomenon, is a sensation produced through the excitation of the retina of the eye by rays of light. The colors of the spectrum may be produced by viewing a light beam refracted by passage through a prism, which breaks the light into its wave lengths.

Customarily, the primary colors of the spectrum are thought of as those six monochromatic colors which occupy relatively large areas of the spectrum: red, orange, yellow, green, blue and violet. However, Sir Isaac Newton named a seventh, indigo, situated between blue and violet on the spectrum. Aubert estimated (1865) the solar spectrum to contain approximately 1,000 distinguishable hues of which according to Reed (1881) 2,000,000 tints and shades can be distinguished. Luckiesh stated (1915) that 55 distinctly different hues have been seen in a single spectrum.

By many physicists only three primary colors are recognized: red, yellow and blue (Mayer, 1775); red, green and violet (Thomas Young, 1801); red, green and blue (Clerk Maxwell, 1860).

The color sensation of black is due to complete lack of stimulation of the retina, that of white to complete stimulation. The infra-red and ultra-violet rays, below the red (long) end of the spectrum and the violet end (short end) respectively, are invisible. Heat is the principal effect of the infra-red rays and chemical action that of the ultra-violet rays.

U. S. Daily Newspapers of Large Circulation

Source: Publishers' statements to Audit Bureau of Circulations of total average paid circulation for 6 months ending Sept. 30, 1967.

As of Feb. 1, 1968 there were 1,749 English language daily newspapers in the U.S. (311 morning; 1,422 evening; 16 "all day") with a combined circulation of 61,560,952. Sunday newspapers numbered 573 with a total circulation of 49,224,125.

STATES OF THE UNION

Their Resources, Histories, Industries, Agricultural and Mineral Products, Tourist Attractions, Nicknames, State Symbols

Areas of the states are total land and water areas reported by the Geography Division, Bureau of the Census; agricultural figures are based on reports of the Dept. of Agriculture and state agencies; mineral statistics are those reported by the Bureau of Mines.

For maps and for descriptive articles on great cities, see Index.

Alabama

Heart of Dixie, Cotton State

CAPITAL: Montgomery. **AREA:** 51,609 sq. mi., rank, 29th. **POPULATION:** (1960 Census), 3,266,740, rank, 19th. **MOTTO:** We Dare Defend Our Rights. **FLOWER:** Camellia. **BIRD:** Yellowhammer. **FISH:** Tarpon. **TREE:** Southern (Longleaf) Pine. **SONG:** Alabama. **ADMISSION:** 22nd.

Alabama lies in the cotton belt of the Old South but introduction of new and diversified industries has given the state a more balanced economy. Natural wealth includes coal, which underlies about 7,000 sq. mi. in the northern Appalachian region, iron, bauxite and timber.

Cheaha Mtn., 2,407 ft., is the state's highest point. Est. pop. July 1, 1967, was 3,540,000.

Abundant water for hydroelectric power and river shipping has contributed to the growth of Alabama's economy. Three Tennessee Valley Authority dams are in the northern part of the state. Historic sites, fishing and hunting are among its attractions.

Agriculture remains a vital part of the economy despite the growth of manufacturing. Cotton, long king among Alabama's crops, dropped to 3rd place behind corn and soybeans in 1967, mainly because of poor growing weather. Among the states, Alabama was 4th in production of pecans and 5th in peanuts. Also important are potatoes, watermelons, tobacco and sugarcane.

Livestock, especially poultry, has grown in importance; Alabama moved up to 6th place in number of chickens in 1968. Farm receipts for livestock and livestock products totaled \$435,410,000 in 1967; for crops, the total was \$167,014,000.

Alabama ranks 2nd in the nation in pulpwood production; lumber and furniture are important; the output of wood products is valued at over \$550,000,000 a year, providing 100,000 jobs.

Industrial growth in 1966 saw \$320,289,000 invested in 330 new or expanded plants, providing 24,441 additional jobs; the rate of growth was not quite up to previous records. Largest industries in terms of value added by manufacture are iron and steel, chemicals, textiles, food processing, paper, clothing, fabricated metals, transportation equipment (including aircraft). Birmingham, center of the steel industry, is known as "the Pittsburgh of the South." Value added by manufacture totals over \$2.3 billion a year.

Alabama ranks 2d behind Arkansas in production of bauxite and is the 3rd largest producer of asphalt, mica and pyrites. But bituminous coal accounts for 40% of the value of its total mineral production, which in 1967 reached a record \$249,828,000. Also important are cement, stone and petroleum.

At Huntsville is the George C. Marshall Space Flight Center of NASA.

Total employment in the state showed gains in both 1966 and 1967.

Educational institutions include the Univ. of Alabama, Univ. of South Alabama, Auburn Univ., Alabama College and Tuskegee Institute.

Alabama, first explored by De Narvaez, Spanish, 1528, is rich in historical markers and sites. Andrew Jackson defeated the Creek Indians at Talladega and Horseshoe Bend. The Confederate States were organized at Montgomery, Feb. 4, 1861, and Jefferson Davis took oath as president at State Capitol there Feb. 18. Davis' "first White House" now is a state shrine; others include the house in Tusculum where Helen Keller was born June 27, 1880; statue of Vulcan near Birmingham.

The state was organized as a Territory Mar. 3, 1817, and became a state Dec. 14, 1819.

Mobile, colonized by French, 1699, ceded by Spain, 1799, but not turned over till 1813, is the state's principal seaport; shipments to foreign countries are valued at \$328,000,000 a year. Its carnival dates from 1704. Azalea Trail (February-March) and tarpon fishing are tourist attractions.

At Russell Cave National Monument, near

Bridgeport, may be seen a detailed record of occupancy by humans from about 7000 B.C. to 1650 A.D., including tools, weapons and pottery. The exhibit is free.

The George Washington Carver Museum at Tuskegee Institute, Tuskegee, contains records of the famous scientist's contributions to agronomy and dioramas of achievements by Negroes.

The University of Alabama Museum of Natural History, in University, displays Alabama fossils, shells and aboriginal materials and collections of native and foreign beetles, birds, batrachians and reptiles. Mound State Monument, Moundville, an adjunct of the museum, shows aboriginal burials.

(See also Index for Birmingham.)

Alaska

No official nickname

CAPITAL: Juneau. **AREA:** 586,412 sq. mi., rank, 1st. **POPULATION** (1960 Census), 226,167, rank 50th. **FLOWER:** Forget-me-not. **BIRD:** Willow Ptarmigan. **TREE:** Sitka Spruce. **SONG:** Alaska's Flag. **FISH:** King Salmon. **ADMISSION:** 49th.

Alaska became the 49th state Jan. 3, 1959. Largest political division of the U. S., it is two and one-fifth times the size of Texas. Alaska occupies the NW part of North America, separated from the rest of the continental U. S. by Canada's British Columbia. Alaska's general coastline runs 6,640 mi.; including all its islands, 33,904 mi. It has mountain ranges, volcanoes, fjords and glaciers; 98% of the total land is owned by the Federal Government.

Est. pop. July 1, 1967, was 273,000. About one-sixth of the pop. are Eskimos and Indians.

Pt. Barrow in Arctic Alaska is the northernmost point of the state. The Yukon River flows E to W 1,200 mi. through Central Alaska, from the Canadian border to the Bering Sea. In South Central Alaska stands Mt. McKinley, 20,320 ft., highest point in North America; also in McKinley National Park is Mt. Wrangell, 14,163 ft., a steaming volcano.

In West Central Alaska, off the tip of the Seward Peninsula, lies Little Diomedes Is., only 2.4 mi. from Big Diomedes Is., owned by the USSR. The Alaska Peninsula and the Aleutian Islands, into which it tapers, extend SW and W for 1,200 mi., with numerous volcanoes; at the SE base of the peninsula is Katmai National Monument, containing the Valley of 10,000 Smokes, scene of a 1912 eruption.

Alaska's Panhandle stretches SE; it is a narrow strip of mainland and islands, with fjords and Glacier Bay National Monument (containing the Muir Glacier, 2 mi. wide and 250 ft. high), facing the Pacific W of British Columbia.

History. Vitus Bering, a Dane employed by Russia, discovered Bering Strait, separating Asia and North America, in 1728, but may not have found Alaska until his second voyage in 1741, when he explored Alaska's coast. Other early visits were made by Spanish explorers (1775, 1788); by the British Cook (1776), Vancouver (1791-94) and Mackenzie (1793); by the French La Perouse (1786); and by the U. S. Capts. Robert Gray and John Kendrick (1788). Alexander Baranov, first Russian governor of Alaska, set up headquarters at New Archangel, near present Sitka, 1799.

William H. Seward, as Secy. of State under President Andrew Johnson, bought Alaska from Czarist Russia for \$7,200,000, a transaction some labeled at the time "Seward's Folly." The treaty was signed Mar. 30, 1867, the transfer of territory took place Oct. 18, 1867. Alaska was a District until Aug. 24, 1912, and an Organized Territory until becoming a state in 1959.

The "Gold Rush" began when gold was discovered near the Klondike River in Canada, Aug. 16, 1896. Out of 100,000 prospectors, 1897-1899, many died of exposure, others took up trading and farming. On the south coast of Seward Peninsula

lies Nome, where gold-bearing sands were worked by placer mining.

Resources and Industries. The Good Friday, Mar. 27, 1964, earthquake, the most powerful ever recorded in North America, caused a temporary setback to the economic development of Southwestern Alaska, but reconstruction was speedily completed. Anchorage, Seward, Valdez and Kodiak benefited with new facilities.

Principal income is from fisheries, minerals (esp. oil), timber and wood products, and furs. Salmon, halibut, herring, cod and shellfish are frozen or canned; Alaska is the top state in value of its commercial catch, \$80,677,000 in 1966.

Processing of fish and other foods is the largest manufacturing industry, followed by lumber and wood products. Total value added by manufacture in 1963 was an est. \$89,311,000.

Spruce, yellow cedar and hemlock are plentiful; there also are red cedar and birch. Commercial timberland of Alaska's vast forest totals 28,000,000 acres. The forest products industry in SE is expanding as pulp mills increase. There are also hardwood forests in the interior.

Furs produced are those of the seal, sable, ermine, wolverine, land otter, muskrat, beaver, mink, red fox, blue fox, lynx, marten. The black fox and white fox are less frequent. Wild life includes the gray wolf, moose, caribou, and 5 kinds of bear: black, grizzly, Polar, Kodiak and glacier. There are plenty of sea fowl, but whales, walrus, sea lion and sea otter have diminished.

The seal herd on the Pribilof islands is owned by the Government and protected by the U. S. Fish & Wildlife Service. Reindeer herds are multiplying and their meat is marketed.

Oil and natural gas have long since taken over from gold as the mainstay of mineral production.

Oil production, boosted by new offshore fields in Cook Inlet, almost doubled in value in 1967, reaching \$94,644,000 compared to \$44,007,000 in 1966, and accounting for some 65% of the value of the total mineral output, est. at \$129,897,000. New oil discoveries were made along the Arctic coast.

Gold production was valued at \$910,000 in 1967, continuing an annual decline. Alaska remained the leading platinum-producing state and was 2nd to Colorado in tin. It also has considerable copper, coal, mercury and uranium.

Principal ports are in the Panhandle where Juneau, the capital, is on the mainland shore; N of it is Skagway, historic entry to Klondike gold fields via Chilkoot Pass and White Pass. Sitka, Wrangell and Ketchikan (center of salmon industry), are on islands of the Alexander group.

At the head of Cook Inlet, in S Central Alaska, is the state's largest city, Anchorage. Seward, S of Anchorage, is terminus for the govt.-owned Alaska Railroad, which runs N to Fairbanks.

Twelve domestic airlines serve Alaska. International lines flying via Arctic routes make stops.

Ships transport 90% of the goods and foods to and from Alaska with the Alaska Steamship Co. linking some 50 Alaskan ports with Seattle, etc.

An est. 100,000 tourists visit Alaska annually, spending over \$25,000,000.

There are now two motor routes to Alaska. The newer is by way of Marine Highway, a 450-mile ferry route from Prince Rupert, B. C., to Haines, Alaska. Motorists leaving one of the three ferries at Haines have 785 mi. of paved highway to Anchorage, 662 mi. to Fairbanks. The older route is Alaska Highway, which starts at Dawson Creek, B. C., and ends via Richardson Highway in Fairbanks, 1,523 mi. away. The system also links Anchorage, Homer, Kodiak, Valdez and Cordova. Fairbanks, largest city in Central Alaska, has the northernmost airport on the continent. Nearby are Fort Wainwright and Eielson AFB.

Higher education is provided by Univ. of Alaska, near Fairbanks, with 5 junior colleges in other cities; Alaska Methodist Univ., Anchorage; Sheldon Jackson Junior College, Sitka.

The Alaska State Museum in Juneau features Eskimo and Indian exhibits, mounted wildlife specimens, rocks and minerals and historical exhibits.

The University of Alaska Museum, in College, near Fairbanks, maintains cultural and natural history collections for research and for the public.

Arizona

Grand Canyon State

CAPITAL: Phoenix. **AREA:** 113,909 sq. mi., rank, 6th. **POPULATION:** (1960 Census), 1,302,161, rank, 35th. **MOTTO:** Ditat Deus, God Enriches. **FLOWER:** Giant Cactus or Saguaro. **BIRD:** Cactus Wren. **TREE:** Paloverde. **SONG:** Arizona. **ADMISSION:** 48th.

Arizona leads the nation in copper production with 55% of the total U. S. output, and ranks high among cotton-growing states, but its rapidly-growing manufacturing industries, such as machinery, aerospace and electronics, form the largest source of income. Mining, agriculture and tourism follow in that order.

Loads of sunshine and a wealth of scenic attractions give Arizona a steadily mounting tourist business. est. at \$450,000,000 for 1966. Est. pop. July 1, 1967, was 1,635,000.

The climate is dry in southern regions and the northern plateau, but high mountains and forests in central areas have heavy snows in winter. Highest point is Humphreys Peak, 12,633 ft. Over 44% of the land is Federally owned.

The only point in the U. S. at which 4 states meet is the juncture of Arizona, Utah, Colorado and New Mexico.

Arizona is noted for the Grand Canyon of the Colorado, an immense, vari-colored fissure 217 mi. long, 4 to 18 mi. wide at brim, 4,000 to 5,500 ft. deep. It also has one of man's greatest water barriers, Hoover Dam (formerly Boulder) in Black Canyon of the Colorado, 726 ft. high, 660 ft. wide at base, 1,244 ft. long at top, creating Lake Mead.

Nature has given Arizona the Painted Desert, extending for 30 mi. along U. S. 66; the Petrified Forest; Canyon Diablo, 225 ft. deep, 500 ft. wide, and Meteor Crater, 4,150 ft. across, 570 ft. deep, made by a prehistoric meteor, near U. S. 66. The state has 15 national monuments, 2 national parks. Rodeos and historic sites of Indian and Spanish eras are other attractions.

Manufacturing production rose 7% in 1967.

Copper is king among Arizona's many minerals, and Arizona normally produces 51% of the nation's copper output. A prolonged copper strike in 1967 trimmed the value of the yield to \$380,369,000 which was 81% of the state's total mineral production, valued at \$465,449,000. Arizona also ranks 1st in pumice, 3rd in silver, molybdenum and asphalt, and 4th in gold. Also important are uranium, helium, mercury and vanadium.

Cotton is the major crop; Arizona's harvest ranks 5th among the states although it fell off from 515,000 bales in 1966 to 460,000 in 1967. Receipts for all crops rose slightly in 1967, reaching \$272,820,000, as did receipts for livestock and livestock products, \$233,882,000. The state ranks 14th in number of sheep. Important produce includes lettuce, alfalfa, melons, oranges, grapefruit, lemons and tangerines.

Federal spending on defense contracts, construction projects, air bases, etc., is an important factor in Arizona's economy.

Schools include the Univ. of Arizona at Tucson, Arizona State Univ. at Tempe and Northern Arizona Univ. at Flagstaff. The new observatory of the National Science Foundation is located on Kitt Peak near Tucson. Taliesin West is the Frank Lloyd Wright architectural school near Phoenix.

Originally part of the Territory of New Mexico, which was ceded in 1848 by Mexico with the Gadsden Purchase added in 1853, Arizona became a Territory itself in 1863 and a state Feb. 14, 1912.

Museums include Arizona State Museum, Tucson, which stresses the archeology and ethnology of the Southwest with exhibits on Hohokam prehistory, early elephant hunters, tree-ring dating of prehistoric cultures and Pima and Apache ethnology. The Museum of Northern Arizona, 3 mi. N of Flagstaff, has exhibits illustrating the geology and paleontology of the area, and the culture of prehistoric and modern Indians, with a Navajo rug display and a Hopi kiva.

The Southwestern Arboretum, on U. S. 60 and 70 near Superior, has over 6,000 plants and trees from arid regions of the world, from lowly cactus to lofty baobab tree.

The Arizona-Sonora Desert Museum, near Tucson, displays animals and plants of the desert.

England's historic London Bridge, purchased in 1968 for \$2,460,000, was to be re-erected as a tourist attraction at Lake Havasu City, 150 mi. NW of Tucson.

(See also Phoenix in Index.)

Arkansas

Land of Opportunity

CAPITAL: Little Rock. **AREA:** 53,104 sq. mi., rank, 27th. **POPULATION** (1960 Census), 1,786,272, rank, 31st. **MOTTO:** Regnat Populus. Let the People Rule. **FLOWER:** Apple Blossom. **BIRD:** Mockingbird. **TREE:** Pine. **SONG:** Arkansas. **ADMISSION:** 25th.

Arkansas is an important agricultural state with growing industries, has large oil production, valuable thermal springs and is popular with sportsmen. Highest point is Magazine Mtn., 2,753 ft.

Arkansas became a state June 15, 1836; it seceded in 1861 and was readmitted to the Union in 1868. Est. pop. July 1, 1967, was 1,969,000.

Manufacturing is growing in importance with an 86% increase in employees from 1955 to 1968. Per capita income in Arkansas increased 2.5 times between 1950 and 1967. Lumber, bauxite and cotton are major products.

The \$1.2 billion Arkansas River program, involving navigation, flood control and power developments and construction of 17 dams and locks in Arkansas and Oklahoma, is scheduled for completion in 1970. It is expected to provide a great boost to the area's economy.

The state has 20,052,000 acres of oak, hickory, gum, cypress and pine, and mechanization has increased output of lumber products. Cotton accounts for 48% of farm income and Arkansas ranked 4th in cotton production in the U. S. in 1967 with 520,000 bales. It is 3rd in rice. It was 3rd in number of chickens as of Jan. 1, 1968.

Arkansas accounts for 96% of the bauxite (aluminum ore) produced in the U. S. It also has the only diamond field in the U. S., near Murfreesboro, where visitors may keep any diamond they find up to 5 carats.

Oil is the state's main mineral product; 1967 output was valued at \$57,262,000, that of bauxite was \$18,200,000. Total value of mineral production was \$182,131,000.

Arkansas has 23 institutions of higher learning—13 colleges and universities, one professional school, two teachers' colleges and a number of junior colleges. It has 11 vocational-technical schools, and a technical institute.

Fresh-water fishing, duck-hunting in southeast lowlands, and recreation areas in 14 state parks and two national forests attract visitors. There are several reservoir-recreation areas, as at Norfolk, Bull Shoals, Nimrod and Dardanelle, and others are being created. There are 47 hot springs in government-owned and operated Hot Springs National Park, which entirely surrounds the city of Hot Springs, about 50 mi. SW of Little Rock. Spring water ranges from 95° to 147° F. and is piped in insulated conduits for baths and drinking. The state has 83 airports.

Little Rock is served by 3 major railroads, 5 airlines and 31 motor carriers. Hot Springs has 2 main railroads, 3 airlines and 10 truck lines.

Historic attractions in Little Rock include the Territorial Capital Restoration, a block of 13 original frame and brick buildings, furnished as in 1820-36, including the governor's home and the first print shop of the Arkansas Gazette, oldest newspaper west of the Mississippi. The Old State House in Little Rock was the state capitol 1836-1912; it houses many historical exhibits and a library of 100,000 vols.

The Arkansas Museum of Natural History and Antiquities in Little Rock occupies the building where Gen. Douglas MacArthur was born; also in MacArthur Park is the Arkansas Museum of Fine Arts.

California

Golden State

CAPITAL: Sacramento. **AREA:** 158,693 sq. mi., rank, 3rd. **POPULATION** (1960 Census), 15,717,294, rank 2nd (see text below). **MOTTO:** Eureka. I Have Found It. **FLOWER:** California Poppy. **BIRD:** Valley Quail. **TREE:** Redwood. **SONG:** I Love You, California. **ADMISSION:** 31st.

California is the leading agricultural state and is 2nd only to New York in manufacturing.

Third largest in area, California also has, within only 85 mi. of each other, the highest and lowest points in the conterminous 48 states, Mt. Whitney, 14,494 ft., and Death Valley, 282 ft. below sea level. The U. S. Bureau of the Census estimated Cali-

fornia's population, as of July 1, 1964, at 18,084,000 and New York's at 17,915,000, giving California 1st place; New York had been in 1st place from 1820 through the Census of 1960. (See N. Y. article for further figures.) Est. pop. July 1, 1967, was 19,163,800. It also has the most dogs and cats—an est. 50,000,000.

Among scenic regions are the Yosemite Valley, Lassen and Sequoia-Kings Canyon national parks, Lake Tahoe, the Mohave and Colorado deserts, San Francisco Bay and Monterey Peninsula. National forests cover one-fifth of the state.

Oldest living things on earth are believed to be a stand of bristlecone pine in the Inyo National Forest, est. to be 4,500 years old.

The world's tallest tree, the Howard Libbey redwood, 367.6 ft. with a girth of 44 ft., stands on Redwood Creek, Humboldt County.

California's huge fruit and vegetable production is fed by large irrigation systems. Receipts from crops in 1967 totaled \$2.4 billion (tops in U. S.); from livestock, \$1.5 billion (2nd to Iowa); total receipts were \$3.9 billion (most in U. S.).

The state ranked 1st in numbers of chickens and turkeys, 3rd in sheep, 5th in cattle, as of Jan. 1, 1968.

California produces the most apricots, avocados, grapes and raisins, peaches, persimmons, pomegranates, plums, prunes, lemons, nectarines, olives, dates, almonds, walnuts and sugarbeets. Its total vegetable crop is the largest; it ranks 2nd to Florida in oranges and 3rd in potatoes.

It is 2nd to Alaska in commercial fishing, with a catch valued at \$55,446,000 in 1966.

The state's giant aerospace industries employ a third of all its manufacturing employees, est. at 1,565,000 in 1966. Value added by manufacture was \$18.9 billion in 1965: transportation equipment, esp. aircraft and missiles, led; food products, particularly frozen and canned foods, were 2nd; electrical machinery, including electronic components, was 3rd, followed by other machinery, metal products.

California received \$6.16 billions in defense and aerospace prime contracts in 1966, or 17.2% of the national total.

Gold, discovered at Sutter's sawmill Jan. 24, 1848, set off the historic Gold Rush and gave initial impetus to California's development, but petroleum is the leading mineral product today.

Oil output in 1967 was valued at \$845,387,000, almost half the state's total mineral production value, \$1.7 billion (3rd highest in the U. S.). Ranking 3rd among the states in oil production, California leads in output of asbestos, boron, cement, diatomite, mercury, rare-earth metals, sand and gravel, sodium sulfate, sulphur ore and tungsten.

The Oroville Dam, main unit in the world's largest water project—the \$2.8 billion Feather River Project—was dedicated May 4, 1968, N of Sacramento; electric power and water for irrigation were flowing even before completion.

Some 7,229,000 out-of-state visitors spent \$1.33 billion in California in 1965.

There were, in 1965, 252 institutions of higher learning in California, 77 public junior colleges, 20 state colleges, 8 campuses of the Univ. of California, and 147 independent colleges and universities. During the 1964-65 school year, 39,711 baccalaureate degrees, 10,859 masters degrees, and 2,992 doctorates were conferred.

Three of the world's largest observatories are located on Palomar Mtn., Mt. Hamilton and Mt. Wilson.

The Tournament of Roses and the Rose Bowl football game at Pasadena are held annually, Jan. 1. Winter sports are featured in many mountain areas.

Vandenberg AFB, 170 mi. NW of Los Angeles, is center of an interservice missile range extending from San Nicholas Island to Point Sur.

California, named by Spanish explorers, was Alta (Upper) California under Spain. Mexico took over, 1822, ceded it 1848. California Republic (Bear Flag) at Sonoma, June 14, 1846, was led by Gen. William B. Ide. Commander John D. Sloat raised U. S. flag at Monterey July 7, 1846. The state was admitted to the Union Sept. 9, 1850.

Among museums the Pasadena Art Museum has collections of modern German painting, American painting, Oriental art and prints. The Santa Barbara Museum of Art has exhibits of Greek and Roman sculpture, Oriental art, old master and modern paintings, primitive arts, American paintings and old and modern European drawings. The

Santa Barbara Historical Society Museum displays and interprets objects of state and local history, owns several historic houses and operates the Ghedlin Library for historical research. In Sacramento, the Crocker Art Gallery has collections of paintings, drawings, prints, sculpture and crafts representing all European schools from early Renaissance, American glass and a cross section of pottery from 5th Century B.C. to contemporary American.

SPANISH MISSIONS. Twenty-one churches built by Franciscans of the Roman Catholic Church, 1769-1823, have been restored, rebuilt or are in ruins. They are located on or near El Camino Real, the Royal Highway, U. S. 101. Father Junipero Serra led a missionary expedition from Mexico City and founded 9 churches between 1769 and his death, 1784. The missions converted Indians and raised livestock and grain. Mexico secularized and sold the missions in the 1830s. After the Mexican War the U. S. returned the missions to the church. The buildings suffered from fire, earthquake, military and secular use; some have been entirely rebuilt.

San Diego de Alcalá, near San Diego. Restored. **San Luis Rey de Francia**, near Oceanside. Seminary for priests.

San Juan Capistrano, 30 mi. from San Luis Rey. Famous for tradition that swallows arrive on St. Joseph's Day, Mar. 19, depart on St. John's Day, Oct. 23.

San Buenaventura, Ventura. Restored.

Santa Barbara, Los Olivos St., Santa Barbara. Enlarged, restored since 1925 earthquake.

San Gabriel Arcangel, near Los Angeles.

San Fernando Rey de Espana, San Fernando. Oblate fathers. A museum.

Santa Ines, Solvang. Parish church.

La Purisima Concepcion, near Lompoc. State monument, rebuilt by CCC, 1935.

San Luis Obispo de Tolosa, San Luis Obispo.

San Miguel Arcangel, San Miguel.

San Antonio de Padua, 20 mi. SW of King City. Restored and rebuilt.

Nuestra Señora de la Soledad, Soledad. In course of restoration.

San Carlos de Borromeo de Carmelo, ■■■■ Carmel. Tomb of Father Junipero Serra.

San Juan Bautista, 18 mi. N of Salinas.

Santa Cruz, Santa Cruz. New church, 1858.

Santa Clara, Santa Clara. On campus of Univ.

San Jose, 15 mi. N of San Jose. Original destroyed; wooden church since 1891.

Mission Dolores (San Francisco de Asis) 16th and Dolores Sts., San Francisco. Restored chapel.

San Rafael Arcangel, A. and Fifth Sts., San Rafael. New church, 1917.

San Francisco de Solano, Sonoma. Owned by state; chapel museum. Stands on plaza where Bear Flag was raised June 14, 1846.

Not one of the original 21 missions is **San Antonio de Pala**, originally a dependency of San Luis Rey de Francia, erected 1810, abandoned 1846, restored 1959.

(See also Index for Los Angeles, Oakland, Sacramento, San Diego, San Francisco, San Jose.)

Colorado

Centennial State

CAPITAL: Denver. **AREA:** 104,247 sq. mi., rank, 8th. **POPULATION:** (1960 Census), 1,753,947, rank 33rd. **MOTTO:** Nil Sine Numine. Nothing Without Deity. **FLOWER:** Columbine. **BIRD:** Lark Bunting. **TREE:** Colorado Blue Spruce. **ANIMAL:** Big Horn Sheep. **SONG:** Where the Columbines Grow. **ADMISSION:** 38th.

Once primarily a mining and grazing state, Colorado now draws the largest segment of its income from manufacturing, with livestock and crops 2nd, mining 3rd. Its snow-capped peaks, ski centers, ghost towns and health spas make it a popular vacation-recreation area.

Colorado was organized as a Territory Feb. 28, 1861, and was admitted to the Union Aug. 1, 1876, 100 years after the Declaration of Independence; hence its nickname, the Centennial State. Est. pop. July 1, 1967, was 1,975,000.

Total of value added by Colorado's varied manufacturing industries is over \$1.2 billion yearly. Processing of meat, dairy and other food products ranks 1st, followed by stone-clay-glass products, chemicals and electrical machinery.

Farm receipts in 1967 totaled \$807,524,000, 75% from livestock products. Colorado was 4th among the states in number of sheep, 1,384,000 in 1968; 12th in cattle, 3,021,000. Its sugarbeet crop is 3rd

in the U. S.; other large crops are wheat, corn, barley, alfalfa, potatoes, apples, peaches, pears. Large areas are irrigated.

Gold was found on the Platte, 1858, and at Leadville, 1860. Climax, near Leadville, now produces 72% of the world's molybdenum; 1967 output was valued at \$76,408,000. Colorado is also 1st among the states in production of tin and vanadium, 2nd in tungsten and carbon dioxide, 3rd in uranium, 4th in lead, zinc and pyrites. Total 1967 mineral output was valued at \$352,347,000, with petroleum the biggest money-producer at \$99,445,000.

With Utah and Wyoming, Colorado shares the world's richest oil shale deposits, still to be developed.

Colorado is the highest state in the Union, with an average altitude of 6,800 ft. It has 52 of the nation's highest mountains and 1,500 peaks over 10,000 ft. Pikes Peak, 14,110 ft., was found by Lt. Zebulon M. Pike, 1806. Highest is Mt. Elbert, 14,433. Frozen Lake, altitude 12,940 ft., is the highest lake in the 48 conterminous states.

The Continental Divide, which forms the crest of the continent and separates watersheds of the Pacific Ocean and the Gulf of Mexico, runs through the west-central part in a general N-S direction.

Six major rivers—the Colorado, Rio Grande, Arkansas, North Platte, South Platte and Republican—rise in Colorado, supply water to 19 states. The western rivers have cut great canyons: the Black Canyon of the Gunnison and the Royal Gorge of the Arkansas, 1,000 to 1,500 ft. deep. One of the world's highest bridges crosses the Arkansas 1,053 ft. above the river at Royal Gorge.

The Federal government owns 36.4% of the land, including two National Parks, 6 Monuments, one Recreation Area, 12 Forests, one Indian reservation, 7 major military reservations.

Colorado has 9 state colleges and universities, 12 junior colleges and 5 private colleges.

Colorado was the 1st of several states which in 1966 liberalized their abortion laws.

Tourist attractions include Rocky Mountain National Park, Garden of the Gods, Great Sand Dunes and Dinosaur National Monuments, Pikes Peak and Mt. Evans Highways, Mesa Verde National Park (pre-historic cliff dwellings). The Grand Mesa tableland comprises Grand Mesa Forest, 659,584 acres, with 200 lakes stocked with trout. Other attractions include the U. S. Air Force Academy near Colorado Springs, Denver Western Stock Show, Colorado State Fair, horse, dog and auto races, rodeos and pioneer celebrations. Twenty ski areas operate from November to May.

Aspen and Central City, old mining towns, are also cultural centers.

Big game include deer, bear, elk, mountain lion, gray wolf, coyote. There are thousands of miles of trout streams and 2,000 fishing lakes.

Museums include the Colorado Springs Fine Arts Center which has paintings, prints and drawings by contemporary artists, exhibits of the cultural history of the SW and Latin America, and the John F. Huckel collection of 112 Navajo sand painting reproductions. The University of Colorado Museum, in Boulder, has more than a million objects in its exhibits of rocks, plants and early peoples as well as an art gallery.

(See also Index for Denver.)

Connecticut

Nutmeg State, Constitution State

CAPITAL: Hartford. **AREA:** 5,009 sq. mi., rank, 48th. **POPULATION:** (1960 Census), 2,535,234, rank, 25th. **MOTTO:** Qui Transtulit, Sustinet. He Who Transplanted, Sustains. **FLOWER:** Mountain Laurel. **BIRD:** American Robin. **TREE:** White Oak. Fifth of the Original 13 States to ratify Constitution.

Connecticut's heavily industrialized cities are in sharp contrast to its picturesque New England villages and scenic countryside. Despite its small size, the state has large and diverse manufacturing industries, mainly of high-value specialty products. Est. pop. July 1, 1967, was 2,925,000.

It is a leading maker of jet engines, helicopters, nuclear subs, pins and needles, silverware, hardware, clocks, typewriters, cutlery, and ball bearings. Ranking 48th in area, it is 13th in value added by manufacturing, a total of over \$4.8 billion annually. Its factories employ 43% of the working force. Hartford is headquarters for many of the nation's largest insurance companies.

Poultry and dairy products account for the large-

est part of farm receipts, which totaled \$159,722,600 in 1967. Much of the soil is stony, but tobacco, potatoes, fruits and vegetables are grown.

The vacation-recreation industry is important. Attractions include historic sites, charming villages, the American Shakespeare Festival in Stratford, Mystic Seaport and Marine Museum, trolley museums, skiing, boating on Long Island Sound. There are 83 state parks, recreation areas and historic sites, covering 22,237 acres.

Tourism brings Connecticut over \$200,000,000 a year from out-of-state vacationers.

Mineral production is mostly of sand, stone and gravel, feldspar and clays. Total value for 1967 output was est. at \$20,725,000.

Adriaen Block, Dutch, explored the Connecticut R., 1614. English from Massachusetts settled in 1630s. First practical constitution was the Fundamental Orders, adopted by Wethersfield, Windsor and Hartford, 1639; gave superior powers to legislature. The royal charter of 1662 was exceptionally liberal; when Gov. Edmund Andros tried to seize it, 1687, it was hidden in the Hartford Oak, commemorated in Charter Oak Place.

Free public schools were established in New Haven, 1642, Hartford, 1643. Compulsory education in elementary and Latin grammar schools was established in 1650.

Of 33 major colleges and universities, Yale Univ. (estab. 1701, named 1718) is the largest privately endowed. The public education system is topped by 4 state colleges and the Univ. of Connecticut, Trinity (Hartford), Wesleyan (Middletown), and Univ. of Hartford are well known; Connecticut College, for women, and U. S. Coast Guard Academy are at New London. Preparatory schools include Taft (Watertown), Choate (Wallingford), Hotchkiss (Lakeville), Kent (Kent) and Loomis (Windsor).

Museums include the P. T. Barnum Museum, Bridgeport; American Clock and Watch Museum, Bristol; Trolley Museums, East Haven and Warehouse Point; Hill-Stead Museum, a country house with paintings by famous Impressionists; Farmington; Museum of American Art, New Britain; Old Lighthouse, Stonington; Lyman Allyn Museum, New London; Bruce Museum, Greenwich.

In New Haven museums include the Winchester Gun Museum, with 5,000 items from the 15th Century to present. The Yale University Art Gallery's collections illustrate the ancient civilizations of Greece, Rome, Egypt, Mesopotamia; far east and Italian Renaissance art; European and American painting and sculpture, African and pre-Columbian arts. The Peabody Museum at Yale has collections in paleontology, mineralogy, zoology, archeology and a leading collection of dinosaurs.

Mystic Seaport, Mystic, is a recreated 19th Century village, including smithy, chapel and schoolhouse. At the docks lie the wooden whaleship Charles W. Morgan, the squarerigger Joseph Conrad; the Gloucester fishing schooner L. A. Dunton.

(See also Index for Hartford.)

Delaware

First State, Diamond State

CAPITAL: Dover. **AREA:** 2,057 sq. mi., rank, 49th. **POPULATION:** (1960 Census), 446,282, rank, 46th. **MOTTO:** Liberty and Independence. **FLOWER:** Peach Blossom. **BIRD:** Blue Hen Chicken. **TREE:** American Holly. **SONG:** Our Delaware. **First of Original 13 States to ratify Constitution.**

Delaware occupies part of the Delmarva Peninsula, so-called because Delaware and parts of Maryland and Virginia share the peninsula separating Delaware and Chesapeake Bays. Delaware is 96 mi. long and from 9 to 35 mi. wide. The land slopes from rolling hills (442 ft. highest elevation) in the N to a near sea-level plain.

Second smallest of the states in area, Delaware has a high level of income, with large chemical and other industries, the hqs. of many large corporations, prosperous farms and important shellfish production. A special Federal Census, Sept. 1967, showed the pop. at 526,414.

Chemicals are by far the largest industry, accounting for \$181,965,000 of the total est. value added by manufacture, \$666,245,000 in 1963. Frozen and canned foods, dairy and poultry products and grain milling were 2nd, \$56,143,000. Also important are apparel, rubber and plastics, metal products, leather, textiles.

Broiler chickens are the largest item of farm

income; farm receipts for 1966 were \$132,676,000. Fruit and vegetables are the most important crops. Mineral production is mainly sand, gravel, stone, clays, gem stones, valued at \$1,937,000 for 1966. Delaware ranks 6th among the states in value of its commercial fishing catch.

The state has several famed beaches, racing at Delaware Park, numerous historic sites. The Atlantic terminal of the Air Transport Command is at Dover Air Force Base. Wilmington is the largest city.

Delaware Bay was reported in 1609 by Henry Hudson, under Dutch commission, and in 1610 by Samuel Argall, in Virginia service. The latter called the estuary after his Governor, Thomas West, Lord de la Warr, a name soon extended to the river and its lower western shore, and later adopted by the state.

An attempted Dutch settlement at Zwaanendael (Lewes) in 1631, failed. Swedish colonization began at Fort Christina (Wilmington) in 1638. New Sweden fell to Dutch forces in 1655. English conquered the area in 1664 under the Duke of York, who in 1682 transferred the Counties on Delaware to William Penn. Though in his proprietorship to 1776, they were separately governed from 1704 and fought during the Revolution as a state. On Dec. 7, 1787, Delaware became the first state to ratify the Federal Constitution.

Fort Christina Monument marks the site of founding of New Sweden in 1638. Holy Trinity (Old Swedes) Church erected 1698 is the oldest Protestant Church in the U. S. still in use. Center New Castle comprises a unique survival of a colonial capital nearly in its late 18th century form. The home of John Dickinson, "Penman of the Revolution," and drafter of the Articles of Confederation, has been restored near Dover.

Museums include the Delaware Art Center in Wilmington which has collections of Pre-Raphaelite English paintings, American paintings and manuscripts and drawings. The Henry Francis du Pont Winterthur Museum, at Winterthur near Wilmington, has 100 American period rooms from 17th to early 19th Centuries (reservations are required to visit some of them). The Hagley Museum at Wilmington includes many of the old du Pont powder mills and other exhibits illustrating the development of American industry.

The Delaware State Museum at Dover includes a collection of early "talking machines."

WILMINGTON

Wilmington had 85,690 pop. (1967 Special Census); and 366,298 in the standard metropolitan area. Laid out near Fort Christina, 1730-1736, by Thomas Willing and others, it was chartered in 1739 as Wilmington. Early a milling, shipping and manufacturing center, its business has remained varied. Notable current industries include vulcanized fibre, glazed kid and morocco leather, the largest braided hose plant, and the largest single cotton dyeing and finishing works. It is a world chemical center, with the home office and central laboratories of the Atlas, du Pont and Hercules companies.

The E. I. du Pont de Nemours Co., makers of over 1,400 products including many synthetics, maintains its executive department and a number of its research laboratories in Wilmington. In 1802, Eleuthere Irenee du Pont established a powder works on the Brandywine, the forerunner of the present corporation. Its original nylon plant is at Seaford, Del.

Florida

Sunshine State

CAPITAL: Tallahassee. **AREA:** 58,560 sq. mi., rank, 22nd. **POPULATION:** (1960 Census), 4,951,560, rank, 10th. **MOTTO:** In God We Trust. **FLOWER:** Orange Blossom. **BIRD:** Mockingbird. **TREE:** Sabal Palm. **SONG:** The Swanee River. **ADMISSION:** 27th.

Florida's many miles of beaches and other resort areas offer fun in the sun to millions of vacationers, and its semi-tropical climate provides a pleasant retirement haven for thousands of oldsters. But the state also has a tremendous agricultural output, producing 80% of the nation's citrus fruits and ranking 2nd only to California in production of vegetables. And, its growing and diversified manufacturing industries provide even more income than its agriculture.

The Florida peninsula juts southward 500 mi. between the Atlantic and the Gulf of Mexico; Cuba

is only 90 mi. from its southern tip. It has some 30,000 lakes; Okeechobee, covering 700 sq. mi., is the 4th largest natural lake inside the U. S. Highest elevation in the state is 345 ft., in the NW.

Florida was discovered by Ponce de Leon 1513; acquired from Spain 1819 by treaty ratified 1821. It was organized as a Territory Mar. 30, 1822, and admitted to the Union Mar. 3, 1845. It seceded 1861 and was readmitted 1868.

Tourism is a major industry; about 18,000,000 visitors spend some \$4.3 billion annually in Florida. It offers a wide variety of tourist attractions in addition to climate, resorts and water sports.

Many of the tourists become permanent residents. The state's population has boomed from 4,951,560 in the 1960 Census to 5,996,000 in the official July 1, 1967, est.

Major tourist objectives are metropolitan Miami, with the nation's greatest concentration of luxury hotels at Miami Beach; Palm Beach; St. Augustine, founded 1565 and oldest city in U. S.; Daytona Beach, Fort Lauderdale, all on the E coast; Sarasota, Tampa, Key West, St. Petersburg on the W; Panama City on N Gulf Coast.

Everglades National Park, 1,258,670 acres of land and water, preserves the beauty of the vast Everglades swamp. Castillo de San Marcos (St. Augustine), Fort Mantanzas, Fort Jefferson (Dry Tortugas), De Soto National Memorial (Bradenton), and Fort Caroline (Jacksonville) are national monuments.

The USAF Missile Test Center is at Cape Kennedy, formerly Canaveral. From it the nation's first earth satellite was launched Jan. 31, 1958, first U. S. manned space flight, May 5, 1961, and the first manned orbital flight, Feb. 20, 1962, by Col. John H. Glenn.

Key West became the 1st U. S. city to get its fresh water from the sea when a desalting plant, capable of producing 2,620,000 gallons a day, was opened in 1967.

Florida produces most of the nation's oranges and grapefruit; 1967 output was 4,428,000 tons of oranges (almost 5 times California output) and 1,381,000 tons of grapefruit (almost 10 times California's). It is also 1st in watermelons and is 2nd to California in fresh vegetables. It also produces limes, tangerines, sugarcane, peanuts, cotton, tobacco. Citrus fruits are the most valuable, followed by livestock and vegetables.

The cattle industry is important; on Jan. 1, 1968, Florida had 1,788,000 hd. Farm receipts for 1967 were \$1.03 billion.

Manufacturing has made great gains and accounts for twice as much total personal income as agriculture. Leading industries, in terms of value added by manufacturing, are food processing, chemicals, paper and products, printing and publishing, stone-clay-glass, transportation, in that order.

Florida leads the U. S. in production of phosphate rock, is 2nd to New York in titanium and 3rd in rare-earth metals. Total mineral production in 1967 was valued at a record high of \$299,624,000.

The commercial catch of fish and shellfish is worth over \$34,000,000 a year; ranking 6th among the states. It includes a large portion of the nation's mullet, shrimp and blue crab.

Florida has 21 airports with scheduled service, 36 scheduled airlines and 7 major railroads. There are 14 deepwater ports which handle domestic and foreign trade valued at \$1.24 billion a year.

Construction of the Cross-Florida Barge Canal, linking the Atlantic just N of Jacksonville with the Gulf of Mexico at Yankeetown, 90 mi. N of Tampa, is to be completed in 1972. The canal will be open to pleasure and fishing craft, as well as commercial traffic.

There are 28 4-year colleges and 32 junior colleges, including Univ. of Florida (Gainesville); Univ. of Miami (Coral Gables); Univ. of Tampa (Tampa); John B. Stetson Univ. (Deland); Rollins College (Winter Park); Florida State Univ. (Tallahassee); Univ. of South Florida (Tampa); New College (Sarasota); Univ. of West Florida (Pensacola) and Florida Tech Univ. (Orlando).

Florida has no state income tax and no bonded debt. Its excise taxes (beverage, tobacco, parimutuel), sales and other taxes account for 69% of total state revenue.

Museums include the Florida State Museum in Gainesville, which does field work in natural and social sciences in the southeast U. S. and Caribbean area, displays exhibits in archeology, ethnology, paleontology, ornithology, history and industry. Castillo de San Marcos in St. Augustine is a well-

preserved Spanish fort built 1672-1696 which is now a national monument. Marineland of Florida, 18 mi. S of St. Augustine, has some 2,500 marine specimens ranging from sharks and porpoises to tiny tropical fish living in oceanarium tanks; visitors may view and photograph them through portholes; trained porpoises and pilot whales perform in shows. Miami's Seagarium has similar shows.

At Pensacola is the Naval Aviation Museum with exhibits tracing flight development into the space age; also several forts, including Fort Pickens, built 1829, where Geronimo was imprisoned; the T. T. Wentworth Museum, with exhibits of local historical interest; the Pensacola Historical Museum and Spanish Village Museum.

In Sarasota, the John and Mable Ringling Museum of Art, willed to the state, contains works by Rembrandt, Rubens, Hals, Tiepolo, Velasquez, Murillo, Gainsborough, Reynolds and other masters. The Ringling Museum of the Circus includes elaborately decorated wagons, costumes and printed bills showing performers at fairs and circuses from the 16th to 20th centuries; the Asolo Theater presents plays and operas.

Also in Sarasota, the Circus Hall of Fame gives circus acts and puppet shows, displays mementos such as a coach given Tom Thumb by Queen Victoria, a sleigh P. T. Barnum gave Jenny Lind, costumes, rigging and circus equipment.

(See also Index for Miami, Orlando, St. Petersburg, Tampa.)

Georgia

Empire State of the South, Peach State

CAPITAL: Atlanta. **AREA:** 58,876 sq. mi., rank, 21st. **POPULATION:** (1960 Census), 3,943,115, rank, 16th. **MOTTO:** Wisdom, Justice, Moderation. **FLOWER:** Cherokee Rose. **BIRD:** Brown Thrasher. **TREE:** Live Oak. **SONG:** Georgia. Fourth of the Original 13 States to ratify Constitution.

Largest in area of the states east of the Mississippi, Georgia is rich in a number of natural resources and in its growing, diversified industries.

There are large deposits of marble in the mountainous N, along with fertile plains and industry centers in the NW. The Central Georgia Piedmont plateau boasts rich farmlands and a flourishing textile industry. The SE Coastal Plain produces pecans and peanuts and its forests yield a wealth of pulpwood and turpentine. Off its 100-mi. Atlantic coast lie its famed Sea Islands. The state also has large deposits of clay, limestone and bauxite, bases for important industries.

Okefenokee in the SE is one of the largest swamps in the U. S., a wetland wilderness and peat bog covering 660 sq. mi. A large part of it is a National Wildlife Refuge, a home for wild birds, alligators, bear, deer, otter, etc.

Highest point in the state is Brasstown Bald in the NE, 4,784 ft.; Stone Mtn., near Atlanta, is 1,686 ft. Est. pop. July 1, 1967, was 4,511,000.

Manufacturing production in Georgia has increased about 9 times in value since the start of World War II, a rate twice the national average. The textile industry is Georgia's oldest and largest.

Georgia is by far the nation's largest producer of peanuts, harvesting 487,560 tons in 1967, almost 3 times as many as the next largest producer, North Carolina. It is 2nd in pecans and in chickens, and 4th among the states in tobacco. Total farm receipts for 1967 were \$1.03 billion, up from 1966; the increase in crop receipts more than offset a decline in livestock income.

Georgia ranks high in lumber production and its output of pulpwood is tops in the U. S. The state produces more than half the world's turpentine.

It is 1st in the U. S. in production of china clays; 2nd in zirconium; 3rd in bauxite, barite and kyanite. Value of total mineral production in 1967 was \$145,633,000, a drop of 2% from the record 1966 figure.

Leading manufacturing industries in 1965, in order of importance, were textiles, transportation equipment, food products, paper products, apparel, chemicals. The largest private employer is Lockheed-Georgia, producing large transport planes, etc.

There are 49 institutions of higher learning, including the Univ. of Georgia. The state is served by 5 major railroads and 9 airlines. Savannah and Brunswick are its main ports.

About 28,000,000 vacation travelers spent an est. \$429,900,000 in Georgia in 1966.

Notable among attractions are Warm Springs Memorial and Little White House where President Franklin D. Roosevelt died April 12, 1945, the

Roosevelt Museum and nearby Ida Cason Callaway Gardens and Roosevelt State Park; Stone Mtn. and Jekyll Island State Park.

Andersonville Prison Park and National Cemetery are on the site of the Confederate prison camp in which a total of 50,000 Union soldiers were confined, Feb. 1864 to Apr. 1865, in conditions so infamous that over 900 died in each of the 13 months the camp existed. Park and cemetery are administered by the U. S. Army Department.

Georgia was visited by DeSoto, 1540. It was a part of land granted to the lords proprietors of Carolina, 1663 and 1685; became an independent colony by charter of 1732 with first permanent settlement under James Oglethorpe, 1733. Georgia ratified the Confederate constitution, Mar. 1861, was readmitted to the Union, July, 1870.

(See also Index for Atlanta.)

Hawaii

Aloha State

CAPITAL: Honolulu. **AREA:** 6,450 sq. mi., rank, 47th. **POPULATION:** (1960 Census), 632,772, rank, 43rd. **MOTTO:** The Life of the Land is Perpetuated in Righteousness. **FLOWER:** Hibiscus. **BIRD:** Nene (Hawaiian Goose). **TREE:** Kukui (Candlenut). **OFFICIAL SONG:** Hawaii Ponoī. **ADMISSION:** 50th.

Hawaii, prosperous paradise of the Pacific, became the 50th state Aug. 21, 1959, and the 50-star U. S. flag became official the following July 4.

The Hawaiian Islands lie in the North Pacific, 2,395 mi. from San Francisco (5 hrs. by commercial jet). They consist of 8 major islands (7 inhabited) and 114 minor islands (4 inhabited). The principal islands are Hawaii (4,021 sq. mi.); Oahu (595 sq. mi.), on which are Honolulu and Pearl Harbor; Lanai, Maui, Molokai, Kauai, Ni'ihau and Kahoolawe (uninhabited).

The islands are volcanic. Highest point is Mauna Kea, on Hawaii, an extinct volcano 13,796 ft. above sea level. Its twin is Mauna Loa, 13,680 ft., largest active volcano in the world. Average annual rainfall is 22 inches at Honolulu Airport, 140 inches in Hilo, and 472 inches atop Waialeale, a mountain on Kauai. Honolulu is subtropical (all-time range, 56° to 88°) but Mauna Kea is often snow capped.

Lake Waiau, at 13,020 ft. near the summit of Mauna Kea, is the highest lake in the U. S.

Ka Lae, or South Cape, on the island of Hawaii, is the southernmost point in the 50 states.

The islands were settled by Polynesians, probably about 700-750 A.D. These Polynesians sailed to Hawaii from Tahiti, over 2,000 mi. to the south, in large outrigger canoes.

Hawaii was visited 1778 by British Capt. James Cook who called the group the Sandwich Islands. It was a kingdom until Jan. 17, 1893, when Queen Liliuokalani was deposed and annexation to the United States asked. President Cleveland blocked this on the ground of American collusion. Hawaii organized a republic, 1894, with Sanford B. Dole as president. Congress voted annexation July 7, 1898 under President McKinley. The Territory was established June 14, 1900.

Hawaii, among the states, has the most heterogeneous of populations, with Americans of Polynesian, Asian, European and African extraction living together with a notable lack of racial tensions.

Many of the Polynesians intermarried with the other racial groups, which arrived mainly in the 19th century.

The 1960 Census gave as racial origins: Japanese 32.2%, Caucasian 32%, part-Hawaiian 14.5%, Filipino 10.8%, Chinese 6%, Hawaiian 1.7%, Negro 0.8%, American Indian 0.1%. It has since been unofficially est. that the Caucasian-descent category slightly outnumbered those of Japanese descent. Total est. pop., July 1, 1967, was 741,000.

Tourism is Hawaii's 2nd largest industry, next to national defense and ahead of sugar, 3rd, and pineapples, 4th. Total visitors in 1966 were est. at 710,000, with an average of 21,866 present daily.

In 1966 gross state product was \$2.7 billion, construction completed was \$392,400,000 and bank assets (Jan. 1, 1967) totaled \$1.2 billion, all up.

Most mineral output is for local consumption; continued heavy demand for construction materials, such as cement and stone, kept total mineral production, 1966, above \$20,000,000 for the 2nd consecutive year. Volcanic cinder is used in roads, salt is obtained from sea water by evaporation, scuba divers get black coral for gems off Maui,

lime is used to clarify cane juice and cut acidity in pineapple juice, basalt and limestone are used for building.

More than 1,800 ships put into Honolulu each year. Honolulu International Airport has an average of 790 arrivals and departures daily.

(See also Index for Honolulu.)

Idaho

Gem State

CAPITAL: Boise. **AREA:** 83,557 sq. mi., rank, 13th. **POPULATION:** (1960 Census), 667,191, rank, 42nd. **MOTTO:** Esto Perpetua. Exist Forever. **FLOWER:** Lewis Mock Orange (Syringa). **BIRD:** Mountain Bluebird. **TREE:** Western White Pine. **SONG:** Here We Have Idaho. **GEM:** Star Garnet. **ADMISSION:** 43rd.

A land of rugged grandeur, Idaho nevertheless ranks high in agricultural production.

Exploration of Idaho began with the visits of the Lewis & Clark Expedition, 1805-6. Fur traders and missionaries followed and the area became part of Oregon Territory, 1848; Idaho Territory, Mar. 3, 1863, and a state July 3, 1890.

Est. pop. July 1, 1967, was 699,000.

Idaho was chiefly a farming, grazing, timber and mineral state for many years, but manufacturing has recently become second in importance to agriculture. There are rugged mountains, beautiful valleys, plateau regions, and extensive lava fields. Mt. Borah, in the Sawtooth Mts., is the highest peak, 12,662 ft. The Snake River, runs through Hells Canyon, which averages 5,510 ft. in depth for 40 mi., at one point 7,900 ft., exceeding Grand Canyon, and is 10 mi. from rim to rim at widest point. The Snake has several noted waterfalls, among them Shoshone, Twin and American.

Idaho is the nation's leading potato producer, with 63,900,000 cwt. in 1967, far ahead of the next state, Maine. It is 2nd in sugarbeets and 5th in barley, and has large crops of wheat, hay and apples. It ranks high in wool production and was 9th in number of sheep in 1968 with 834,000, more than one per person. Total farm receipts in 1967 were \$537,224,000, more from crops than from livestock.

Manufacturing's gains were mainly in processing of potatoes and other foods, phosphates, paper, etc. Total value added by manufacturing was an est. \$520,000,000 in 1967.

Discovery of silver in 1894 at Coeur d'Alene caused a stampede, and Idaho still leads the nation in production of that metal.

It also ranks 1st among the states in antimony, 2nd in lead, cobalt, garnet, phosphate rock and vanadium, 3rd in zinc and mercury. Total mineral production in 1967 was valued at \$106,187,000.

With 39% of its area in forests, Idaho produces much lumber, with the world's largest white pine lumber mill at Lewiston. Yellow pine, Douglas fir, white spruce, larch, hemlock abound; the Roosevelt Grove has cedars 1,000 years old.

Total value of forest products in 1967 was \$190,000,000.

Hells Canyon, Brownlee and Oxbow Dams, 3 recent hydroelectric projects on the Snake River, are in operation. The National Reactor Testing Station of the AEC on Upper Snake River Plains has 21 reactors in operation, more building.

Tourism brought in an est. \$202,000,000 from 6,100,000 visitors in 1967, ranking it 3rd to agriculture and manufacturing, and ahead of forest products and mining.

The state offers excellent hunting and fishing and Lake Pend Oreille, which has a 500-mile shoreline, is home of the world's largest trout, Kamloco rainbow.

Craters of the Moon National Monument, 18 mi. W of Arco, is a jagged landscape. Lava covers the land and subterranean explosions have created multitudes of caves.

The State Historical Museum in Boise has displays of early Idaho Indians, the fur trade, mining, farm and household gear of the pioneers.

Illinois

Prairie State

CAPITAL: Springfield. **AREA:** 56,400 sq. mi., rank, 24th. **POPULATION:** (1960 Census), 10,081,158, rank 4th. **MOTTO:** State Sovereignty, National Union. **FLOWER:** Native Violet. **BIRD:** Cardinal. **TREE:** Bur Oak. **SONG:** Illinois. **SLOGAN:** Land of Lincoln. **ADMISSION:** 21st.

Illinois ranks high among the states as both an

agricultural and industrial empire. It is rich in coal and oil reserves and boasts highly developed rail, water and air transportation facilities.

The soil is rich and level, with the high point, Charles Mound near the Wisconsin line, only 1,235 ft.

Est. pop. July 1, 1967, was 10,894,000.

In 1967 Illinois ranked 2nd among the states in income from crops, 4th for livestock products and 3rd in total agricultural receipts, \$2.6 billion. It was the nation's largest producer of corn and soybeans, 6th in winter wheat, 7th in oats. It was 2nd to Iowa in number of hogs, 6,772,000, and 11th in cattle.

Manufacturing employment in 1964 averaged 1,233,800, with payrolls est. at over \$8 billion. Non-agricultural employment was 4,132,900, a new high. Major manufacturing lines are food products (especially grain, beverages, candy, meat) and machinery (particularly construction and farm), each accounting for about \$2 billion annually in value added by manufacturing. Electrical machinery, primary metals (mainly iron and steel), printing-publishing, chemicals and fabricated metals each account for over \$1 billion in value added. Rockford is the nation's 2nd largest machine-tool center; Peoria is a distilling center.

Illinois has the largest coal reserves, an est. 137 billion tons, in the U. S.

In 1967 coal output was 65,500,000 tons, 4th highest in the nation and up 3% over 1966. Large oil deposits underlie much of the state; petroleum production in 1967 was valued at \$181,255,000. Illinois ranks 1st in fluorspar and tripoli, 2nd in stone, 3rd in peat. Total 1967 mineral production was valued at \$638,098,000.

A major research and development installation of the Atomic Energy Commission is the Argonne National Laboratory, Lemont, Ill., directed by the Univ. of Chicago, which also operates the Argonne Cancer Research Hospital in Chicago. Dresden Nuclear Power Station, using a boiling water type of reactor, has been built for Commonwealth Edison Co. and the seven other companies in Nuclear Power Group, Inc., near Joliet, Ill. It has a capacity of 180,000 kilowatts.

Illinois has 130 public and private colleges and universities, including Univ. of Illinois with campuses in Champaign-Urbana and Chicago and an enrollment of 37,164 in 1966. It has medical facilities in Chicago as do Northwestern Univ. and the Univ. of Chicago.

The Illinois State Fair is held annually in August in Springfield. A total of 35,000 entries compete for more than \$1,000,000 in cash awards. Annual attendance is about 1,000,000.

State forests, parks and conservation areas cover 100,000 acres. Some are associated with the history of the Middle West, including Lincoln's home and tomb in Springfield; the restored Fort de Chartres, seat of French 18th Century authority; old settlements, such as Kaskaskia. Illinois was part of the territory taken from the British by George Rogers Clark. It became a state 1818.

The Illinois State Museum in Springfield has large collections of local art and archeology; art and architecture of the ancient Near East, and antique clocks, glass, china and furniture.

Located in Springfield is a state memorial including Abraham Lincoln's tomb and the Lincoln home which the family occupied for 17 years beginning in 1844.

New Salem State Park, 20 mi. NW of Springfield, contains the restored pioneer village of New Salem where Lincoln lived as storekeeper, surveyor and postmaster, 1831-37. Annual performances are staged of Robert Sherwood's Abe Lincoln in Illinois.

(See also Index for Chicago.)

Indiana

Hoosier State

CAPITAL: Indianapolis. **AREA:** 36,291 sq. mi., rank, 38th. **POPULATION:** (1960 Census), 4,662,498, rank, 11th. **MOTTO:** Cross-roads of America. **FLOWER:** Peony. **BIRD:** Cardinal. **TREE:** Tulip (Yellow Poplar). **SONG:** On the Banks of the Wabash. **ADMISSION:** 19th.

Indiana is heavily industrialized, yet also ranks high as an agricultural state. It is 3rd among the states in output of both steel and corn; it quarries most of the building limestone used in the U. S. and also ranks high in coal production.

It was explored by LaSalle, 1679; French trading posts grew during the 18th Century. Vincennes,

the 1st permanent settlement, was taken over by the British, 1763, and its capture by George Rogers Clark in 1779 led to the opening of the old Northwest Territories to the U. S. Indiana became a Territory July 4, 1800, and a state Dec. 11, 1816.

Est. pop. July 1, 1967, was 4,999,000.

There are sand dunes and lakes in the N, a level plain through most of the central area, and hills in the S. Highest point is 1,257 ft. in Wayne Co., in the east central area.

The Calumet region in the state's NW corner, including Gary, Hammond, East Chicago and Whiting, has one of the world's greatest concentrations of heavy industry, especially steel, cement and oil refining plants. Gary was a sand dune in 1905 when U. S. Steel located mills there. In 1960 it had a pop. of 177,913. Inland Steel and Youngstown have large plants in East Chicago. Another vast steel complex is rising further E on Lake Michigan where a \$92,000,000 port is being planned at Burns Harbor in the famed Dunes area; Midland Steel Div. of the National Steel Corp. has erected a plant nearby and Bethlehem Steel Corp. is building a \$250,000,000 group of facilities.

While steel and other metal industries are responsible for \$1.4 billion of the \$7.6 billion in value added annually by manufacturing, electrical machinery, including television sets and household appliances, is a close 2nd with \$1.14 billion. Auto parts, aircraft and other transportation equipment is next, with \$1.1 billion, followed by industrial, farm and other machinery, 4th; chemicals, 5th; farm products, 6th.

Corn is the principal crop (447,804,000 bu. in 1967) and much of it goes to fatten the hogs (4,111,000 on farms Jan. 1, 1968). Indiana ranks 1st in popcorn, 3rd in grain corn, 4th in hogs and soybeans, 8th in chickens. Total farm receipts in 1967 were \$1.4 billion.

Coal accounted for a quarter of the total value of mineral production, est. at \$241,196,000 in 1967; petroleum output was about a seventh of the total. Cement, limestone, clay and gypsum are also important.

Indiana limestone, from vast quarries in the southern part of the state, sheaths tens of thousands of buildings, including the Empire State, Rockefeller Center, the United Nations, the Pentagon, the National Cathedral, many Federal buildings and many state capitols.

Indiana has 21 state parks and recreation areas, including Dunes State Park on Lake Michigan and prehistoric Indian mounds at Mounds State Park; over 1,000 lakes; French Lick and other mineral spas; Wyandotte Cave, 3rd largest in the U. S., and other caverns, and the famous postoffice, Santa Claus.

Lincoln's boyhood home in Spencer County and the grave of his mother, Nancy Hanks Lincoln, are part of the Lincoln Boyhood National Memorial. State memorials commemorate the capture of Vincennes by George Rogers Clark in the Revolution, the defeat of Tecumseh's Indians at Tippecanoe, and the Rappite and Robert Owen communities at New Harmony.

Spring Mill Village, 3 mi. E of Mitchell, is a restored pioneer settlement, with grist mill, general store, apothecary's shop, tavern, distillery and sawmill.

The Evansville Museum of Arts and Science has collections including paintings, sculpture, textiles, ceramics, period rooms and anthropology.

Among 38 institutions of higher education are Indiana Univ., Purdue Univ., Ball State Univ., Indiana State Univ., Notre Dame Univ., Indiana Central College, Valparaiso Univ., De Pauw Univ., Wabash College.

(See also Index for Indianapolis.)

Iowa

Hawkeye State

CAPITAL: Des Moines. **AREA:** 56,290 sq. mi., rank, 25th. **POPULATION:** (1960 Census), 2,757,537, rank, 24th. **MOTTO:** Our Liberties We Prize and Our Rights We Will Maintain. **FLOWER:** Wild Rose. **BIRD:** Eastern Goldfinch. **TREE:** Oak. **SONG:** Iowa. **ADMISSION:** 29th.

Iowa, the heart of the rich Midwest farm belt, is one of the nation's leading agricultural states, but its industrial buildup has been so great that in 1967 the value of its manufacturing output passed \$10.2 billion while the market value of its agricultural products was \$3.4 billion.

Many industries process farm products or produce farm implements. However, the fast-growing industrial economy includes a wide variety of manufacturing plants, with electronics items, washing machines, tires, railway equipment, furnaces, automobile accessories, chemicals and fertilizers, vending machines, office furniture, and gypsum wallboard among the diversified products. Iowa developed the pearl button industry from Mississippi River clamshells.

Iowa's broad plains contain much of the finest soil in the world. Its huge harvests support the nation's largest livestock industry. Iowa has by far the most hogs, 13,740,000 on Jan. 1, 1968, more than twice the number in Illinois, the next largest raiser. In cattle, with 7,183,000, Iowa was 2nd only to Texas.

Receipts for livestock and livestock products in 1967 totaled \$2.5 billion, \$1 billion more than Texas, the next-ranking state. Iowa stood 4th in receipts for crops, \$897,491,000. Its total farm receipts were \$3.4 billion, 2nd only to California.

In field crops, Iowa ranked 1st in popcorn, 2nd in soybeans and grain corn, 4th in oats and alfalfa. Mineral production was valued at \$114,775,000 for 1967. Products, in order of value, were cement, limestone, sand and gravel, gypsum and coal.

Highest point in the state is Ochevedan Mound, 1,675 ft., in the NW.

Est. pop. July 1, 1967, was 2,753,000. More than 12,000,000 travelers from other states visit Iowa annually, adding nearly \$250,000,000 to the state's economy.

Tourist attractions include the Herbert Hoover birthplace and library near West Branch, tulip festivals at Pella and Orange City in May, Iowa State Fair at Des Moines in August, several rodeos. The Little Brown Church in the Vale, near Nashua, inspired a well-known hymn and draws about 100,000 visitors annually. There are 90 state parks and other recreation areas. Effigy Mounds National Monument at Marquette is a prehistoric Indian burial site.

The Davenport Municipal Art Gallery has a collection of paintings and memorabilia of the Iowa painter Grant Wood, as well as other American, Mexican and European paintings. Old masters include Breughel, Constable, Reynolds. The Davenport Public Museum displays the history of the area from pre-historic Indians to the steamboat and modern eras; archeology and ethnology of Egypt, Greece, Rome, Europe, South America and Asia; extensive collections of birds, mammals, insects, fossils, minerals and a herbarium of 20,000 plants.

In Decorah, the Norwegian-American Museum preserves homes, household utensils, etc., of pioneers who came from Norway.

Waterloo's Museum of History and Science has exhibits on Iowa history, pioneer life, Indian lore and earth sciences and a planetarium.

Iowa's institutions of higher learning include 27 colleges, 24 junior colleges and 3 state universities. Best known are the Univ. of Iowa, Iowa City; Iowa State University, Ames; Univ. of Northern Iowa, Cedar Falls; Coe College, Cedar Rapids; Drake Univ., Des Moines; Grinnell College, Grinnell.

The first Europeans to visit the Iowa area were the French explorers, Father Jacques Marquette and Louis Jolliet, in 1673. It formed part of the Louisiana Purchase in 1803 and became a state Dec. 28, 1846.

(See also Index for Des Moines.)

Kansas

Sunflower State

CAPITAL: Topeka. **AREA:** 82,264 sq. mi., rank, 14th. **POPULATION:** (1960 Census), 2,178,611, rank, 28th. **MOTTO:** Ad Astra per Aspera. To the Stars Through Difficulties. **FLOWER:** Sunflower. **BIRD:** Western Meadow Lark. **TREE:** Cottonwood. **ANIMAL:** Buffalo. **SONG:** Home on the Range. **ADMISSION:** 34th.

Rolling fields of wheat, clusters of oil well derricks, great herds of cattle and towering grain storage elevators feature the landscape of Kansas, the geographical center of the 48 conterminous states. The land rises from broad plains in the E, 680 ft. above sea level, to Mt. Sunflower, 4,039 ft., in the W.

Manufacturing, farming and mining (especially petroleum and natural gas) are major factors in Kansas' economy. Growing industries include food products, paper, printing, chemicals, fabricated

metals, machinery and transportation equipment.

Farms cover 50,000,000 acres, 95% of the land area. They produce a sixth of the nation's wheat crop. The 1967 Kansas output was 221,620,000 bu. of winter wheat, almost twice that of Washington, next largest producer. Total farm income was \$1.5 billion in 1967, ranking 7th. It was 4th in number of cattle, 5,564,000 on Jan. 1, 1968.

Kansas City, Kan., borders on Kansas City, Mo., but is a separate city. It has huge stockyards and packing plants.

Wichita is the nation's 3rd largest aircraft center in employment; ranks 1st in production of personal aircraft. Major producers are Boeing, Beech, Cessna, Lear.

Kansas ranks high in petroleum production and has large reserves of natural gas and helium. The world's largest helium production plant was opened in Otis, Kan., in 1966. Kansas ranks 1st among the states in helium production.

Oil output in 1967 was valued at \$305,244,000, more than half the total mineral production value, \$579,964,000.

Est. pop. July 1, 1967, was 2,275,000.

Coronado in 1541 headed a Spanish troop in a vain search for wealth in the area. France claimed all territory drained by the Mississippi through LaSalle's explorations, 1682. France ceded the vast area to Spain, 1763, and received it back, 1800. In 1803 the U. S. obtained the land through the Louisiana Purchase. The Kansas part of it became a Territory May 30, 1854; a state Jan. 29, 1861.

During the fight over statehood Kansas was rent between free-state and pro-slavery forces. Kansas furnished one-fifth of her men for Union armies in the Civil War. Frontier posts were at Fort Leavenworth, now site of the U. S. Army Command and General Staff College; Fort Riley, Fort Scott, Fort Larned, Fort Hays, and other sites.

The boyhood home of President Eisenhower in Abilene is now a shrine and adjoins the Eisenhower Museum and the Eisenhower Presidential Library. Pioneer days are reproduced in Old Abilene Town.

The Agricultural Hall of Fame and National Center, 14 mi. W of Kansas City, Kan., displays farm equipment of the past such as a wooden-wheeled corn planter, anvil, wheat drills, etc.

The Wichita Art Museum has works by Bellows, Eakins, Copley, Sargent, Cassatt, Hopper, Ryder, Grosz, Marin, Andrew Wyeth, Stuart Davis, LaChaise, De Creeft, Zorach. The Kansas State Historical Society in Topeka has displays and period rooms of Midwest history and a library with newspaper and manuscript collections.

In Lawrence, the Univ. of Kansas has a Museum of Natural History which presents a panorama of North American mammals from the Arctic to the tropics; a Museum of Art, with European and American painting and sculpture and European and Oriental decorative arts; and the Snow Entomological Museum, with over 2,000,000 insects.

There are 6 state colleges, 1 municipal university and many private colleges.

Kansas has developed an extensive system of recreation around its federal reservoirs, lakes and roadside parks. The Interstate System and Kansas Turnpike are part of a large highway system.

(See also Index for Kansas City.)

Kentucky

Blue Grass State

CAPITAL: Frankfort. **AREA:** 40,395 sq. mi., rank, 37th. **POPULATION:** (1960 Census), 3,038,156, rank, 22nd. **MOTTO:** United We Stand, Divided We Fall. **FLOWER:** Goldenrod. **BIRD:** Cardinal. **SONG:** My Old Kentucky Home. **TREE:** Tuliptree. **ADMISSION:** 15th.

Kentucky was the first area W of the Allegheny Mtns. settled by American pioneers, and one of the first of them to arrive was Daniel Boone, 1769. The first permanent settlement was that of James Harrod at Harrodsburg in 1774; the following year Boone blazed the Wilderness Trail and founded Boonesboro. Originally part of Fincastle Co., Va., the area became Kentucky Co., Va., in 1776, and an independent state in 1792.

Kentucky rises from an elevation of less than 260 ft., at the Mississippi, to over 4,000 ft. in the Cumberland and Pine mountains. Over 45% of the state is forested, and lumbering, particularly of hardwoods, is an important industry.

Agriculture is Kentucky's largest single industry. Tobacco is the principal crop; with 418,959,000 lbs. in 1967, the output was 2nd to North Carolina's.

Corn, soybeans, wheat, fruit, cattle and hogs are also important. Farm receipts in 1967 totaled \$385,662,000 from crops, \$377,804,000 from livestock.

Kentucky ranked 3rd among the states in 1967 in production of coal, with 99,500,000 tons, up 7% from the record year, 1966. It ranked 2nd in the U. S. in fluorspar. Also important are petroleum, natural gas and clay. Total mineral production was valued at \$517,876,000 for 1967, up 4% from 1966.

Manufacturing is gaining, mainly of food and tobacco products, apparel, machinery, metals, wood products and furniture, chemicals. Value added by manufacture is over \$2.62 billion per yr.

Tourists bring in an est. \$425,000,000 a year. There are 40 state and national parks and shrines.

In 1966 Kentucky enacted a law requiring surface and strip miners of coal to restore and regrade earth removed by their operations.

Also adopted were a broad civil rights law and legislation to develop water resources and regulate water and air pollution.

Est. pop. July 1, 1967, was 3,191,000.

Two of the largest man-made lakes in the world, Kentucky Lake and Lake Barkley, parallel each other in Western Kentucky, creating a 170,000-acre isthmus called the Land Between the Lakes National Recreation Area, being developed by the Tennessee Valley Authority. Two major vacation resort parks, Kentucky Dam Village and Kenlake, are on the west shore of Kentucky Lake. Approximately 4,000,000 people visited this area in 1965. TVA estimates that this will increase to 10,000,000 yearly by 1970.

Lexington, heart of the Bluegrass country, is seat of Univ. of Kentucky and Transylvania, oldest college west of Alleghenies (1780), has a large tobacco market and holds annual trotting and running races and a horse show. Near Lexington are farms famous for blooded horses, including the Calumet, Castleton, Spendthrift, Walnut Hall, Greentree. It is also a manufacturing center.

Fort Knox, repository of the nation's gold reserve, also contains the George S. Patton, Jr., Military Museum of World War II equipment.

Mammoth Cave, 40 mi. from Bowling Green, is in a national park. Discovered 1799, it has 150 mi. of passageways, rooms with 200-ft. ceilings, gypsum flowers, blind fish and an Echo River 360 ft. below ground.

Old Fort Harrod State Park, Harrodsburg, contains the reconstructed fort with stockade, block-houses and cabins; the log cabin in which Thomas Lincoln and Nancy Hanks, Abraham Lincoln's parents, were married, and a museum with relics of Shakertown, Ky.

Abraham Lincoln Birthplace National Historic Site, 3 mi. from Hodgenville, contains the original Thomas Lincoln farm and the traditional Lincoln Birthplace cabin.

My Old Kentucky Home, 1 mi. E of Bardstown, was the home of John Rowan, senator and state chief justice. Stephen Foster, a relative, visited the Rowan family in 1852 and is said to have written My Old Kentucky Home on a desk preserved in the house.

(See also Index for Louisville.)

Louisiana

Pelican State

CAPITAL: Baton Rouge. **AREA:** 48,523 sq. mi., rank, 31st. **POPULATION:** (1960 Census), 3,257,022, rank, 26th. **MOTTO:** Union, Justice, Confidence. **FLOWER:** Southern Magnolia. **BIRD:** Eastern Brown Pelican. **SONG:** Song of Louisiana. **TREE:** Bald Cypress. **ADMISSION:** 18th.

Louisiana blends a wealth of historic charm, rich natural resources and giant modern industries. Fertile soil, huge mineral deposits and over 7,000 mi. of navigable waterways linking the nation's heart with deepsea ports are factors basic to the state's wealth.

Mardi Gras and other festivals, the beat of Dixieland jazz in the land of its origin, and the nostalgic relics of the days of French and Spanish rule and the prosperous pre-Civil War era are among the attractions which bring Louisiana an est. \$1 billion a year in tourist revenues.

In total value of its 1967 mineral output, \$3.4 billion, Louisiana was 2nd only to Texas among the 50 states. It was 1st in value of its sulphur and salt production, and 2nd to Texas in petroleum and natural gas output. Much of the oil and sulphur is from offshore deposits.

The lush Louisiana land produces the nation's

largest crop of sweet potatoes; the state is also 1st in output of sugarcane syrup. It is 2nd to Texas in rice. Also important are perique tobacco, cotton and corn.

Farm receipts for 1967 totaled \$602,182,000, up about 9% from 1966.

Total value added by manufacture is over \$2.22 billion annually.

Leading industry is chemicals and allied products, with nearly a half-billion dollars in value added annually by manufacturing. Other products, in order of value added, are food, petroleum and coal products, paper, transportation equipment, stone-clay-glass, metals.

With 7,409 sq. mi. under water, Louisiana marshes supply most of the nation's muskrat fur; nutria has become the state's leading fur; there are also opossum, raccoon, mink, otter, and large numbers of game birds. The annual catch of fresh and salt water fish, shrimp and oyster is valued at over \$39,000,000. Lake Pontchartrain covers 630 sq. mi., is the 5th largest wholly within the U. S.

Much of the land is a rich alluvial plain; there are also rolling hills, bluffs on the Mississippi and coastal marshes. The elevation ranges from 5 ft. below sea level, protected by vast levees, to 535 above.

Louisiana is rich in historical relics and traditions, with Spanish-French backgrounds, pirate lore, fashionable French society in the 18th Century, picturesque customs today. Early explorers were Pineda, 1519, de Vaca, 1528, De Soto, 1541, LaSalle, 1682. New Orleans was founded 1718. Louisiana became a French crown colony under Louis XV, 1731; was ceded to Spain, 1763, returned to France, 1801; sold by Napoleon to U. S. Dec. 20, 1803 (with large territory to N and NW). It became a U. S. Territory Mar. 26, 1804, effective Oct. 1. State was admitted to the Union, Apr. 30, 1812; seceded Jan. 26, 1861, and joined Confederacy; readmitted June 25, 1868.

The Louisiana State Exhibit Museum in Shreveport features dioramas depicting the state's agricultural and mineral resources; there are also art shows, and exhibits of antique china, ceramics and Indian relics.

Louisiana Creoles are descendants of early French and/or Spanish settlers. About 4,000 Acadians, French settlers in Nova Scotia, Canada, were forcibly transported by the British to Louisiana in 1755 (an event commemorated in Longfellow's Evangeline) and settled near Bayou Teche; their descendants became known as Cajuns. Another group, the Islenos, were descendants of Canary Islanders brought to Louisiana by a Spanish governor in 1770. Traces of Spanish and French survive in local dialects.

Est. pop. July 1, 1967, was 3,660,000.

(See also Index for New Orleans.)

Maine

Pine Tree State

CAPITAL: Augusta. **AREA:** 33,215 sq. mi., rank, 39th. **POPULATION:** (1960 Census), 969,255, rank, 36th. **MOTTO:** Dirigo. **I Direct.** **FLOWER:** Pine Cone and Tassel. **BIRD:** Chickadee. **TREE:** Eastern White Pine. **SONG:** State of Maine Song. **ADMISSION:** 23rd.

Maine is noted for its scenic and vacation attractions, lobsters, potatoes, poultry and forest products, fishing and hunting.

Largest of the 6 New England states, it is the farthest NE and borders on only one other state, New Hampshire. Its rugged coast, because of deep indentations, measures 3,478 mi. Tides are often high; in Passamaquoddy Bay they average 20 ft.

Mt. Cadillac, on Mt. Desert Is., 1,532 ft., is the highest Atlantic seacoast point N of Brazil; West Quoddy Head, Long. 66° 57', W, is the farthest east point on the U. S. Atlantic coast. Lubec is the most easterly town on the U. S. mainland.

John Cabot and his son, Sebastian, are believed to have visited the Maine coast in 1498. Long governed as a part of Massachusetts, Maine became a state in 1820.

Est. pop. July 1, 1967, was 973,000.

Maine's coastal waters produce an annual 20,000,000 lbs. of lobsters, 75% of the nation's total, and 30% of its soft shell clams. The state packs over 120,000,000 cans of sardines a year. The fish and shellfish catch is valued at over \$24,000,000 annually.

Maine grows about 8% of the nation's potatoes, second to Idaho, and is the leading supplier of

potato seed. It produces 90% of the nation's low bush blueberries and cans a third of this crop. Also grown are apples, sweet corn, peas, beans. Farm income totals about \$250,000,000 a year, with poultry and eggs the largest item.

With 87% of its area forested, Maine turns out wood products from boats to toothpicks, paper, lumber and Christmas trees. Over 98% of forest land is privately owned. The wood products industry is the largest in the state, employing 26% of all wage-earners. Spruce, white pine and birch are the most important species. Est. value of finished products is \$697,000,000 a year. Processed food, shoes and textiles rank next in factory products. It ranks 4th in shoe production.

Granite, cement and feldspar account for much of the total value of mineral products, est. at \$16,785,000 in 1967.

Maine's scenic seacoast, beaches, lakes, mountains and resorts make it a popular vacationland; tourism is a \$348,000,000-a-year industry. There are 20 state parks, including Baxter, where Mt. Katahdin, tallest of the state's 10 mountains over 4,000 ft., rises 3,268 ft. Maine has over 2,500 lakes, 1,300 wooded islands and 5,000 streams. Moosehead Lake is 40 mi. long and 2 to 10 mi. wide. Deer, grouse, black bear abound; game fish include salmon, bluefish, tuna, trout, bass. There are over 65 public skiing facilities. Acadia National Park and the famed resort of Bar Harbor are on Mt. Desert Island.

Museums include the Bowdoin College Museum of Fine Arts, Brunswick, which has portraits by Gilbert Stuart, Smibert, Peke, Blackburn, Copley, Winslow Homer, Cassatt, etc.; also Assyrian, Greek and Roman sculpture.

The Colby College Art Museum, Waterville, has paintings by classic and contemporary Europeans and by Americans—Hassam, Homer, Denn, Inness, Moran, Poor, Sterne, Andrew Wyeth.

The Farnsworth Library and Museum, Rockland, has 19th and 20th Century American paintings, drawings, prints and sculpture.

The Portland Museum of Art comprises the Sweat Museum of American art and the Sweat Mansion, a Federal-style house built in 1800. Other historic homes in Portland are the Tate House, 1755, and the Victoria Mansion, 1859.

Colleges and universities include the Univ. of Maine, Bowdoin (1794), Colby and Bates.

Maine has no state individual property, state income, corporate income or corporate excise taxes.

Maryland

Old Line State, Free State

CAPITAL: Annapolis. **AREA:** 10,577 sq. mi., rank, 42nd. **POPULATION:** 3,100,689 (1960 Census), rank, 21st. **MOTTO:** Fatti Maschii, Parole Femine, Manly Deeds, Womanly Words; and Scuto B-nae Voluntatis Tuae Coronasti Nos, With the Shield of Thy Good-will Thou Hast Covered Us. **FLOWER:** Black-eyed Susan. **BIRD:** Baltimore Oriole. **TREE:** White Oak. **SONG:** Maryland, My Maryland. Seventh of the Original 13 States to ratify Constitution.

Maryland stretches from the Atlantic Ocean to the Allegheny Mountains with 2 major interruptions, Chesapeake Bay and the District of Columbia. Both contribute importantly to the state's economy.

The bay cuts off the low coastal plain of the Eastern Shore from the rest of the state, provides both commercial and sports fishing and leads to the port of Baltimore, which handles some \$1.6 billion in imports and exports a year. The 7.11-mi. Chesapeake Bay Highway Bridge spans the bay near Annapolis, S of Baltimore.

The National Capital area provides a market for much of Maryland's produce as well as adding to the crowds which enjoy the state's many recreational facilities.

Backbone Mtn. in the far W part of the state is its highest point, 3,360 ft.

First settled was St. Clements Island, Mar. 25, 1634, by Leonard Calvert, brother of Cecilus Calvert, who moved to St. Mary's on mainland and formally established the colony. Settlement was Catholic, but Maryland in 1649 guaranteed religious tolerance to all.

Est. pop. July 1, 1967, was 3,685,000.

Gross state product in 1965 was \$12.4 billion, up 5.1%; unemployment was 3.4%, below national average. Industries are diversified, producing primary metals, food products and beverages, transportation equipment, chemicals, missiles, nuclear equipment, scientific instruments, electric tools and electronic products. Boat building is important.

Total value added by manufacture is over \$2.9 billion annually.

Almost half of the land area is covered with forests. About 50% of timber cut is softwood. Cement is the leading mineral product; there is some coal mining and coke production.

Seafood is an important industry. In a typical year fish and shellfish will reach 83,000,000 lbs. and be worth over \$14,000,000 to the fishermen. Striped bass is the chief contributor to fin fish revenues, oysters lead shellfish, but soft-shell clams have been gaining. Frozen, canned and cured fish have been increasing in production, but the industry is subject to variations.

Maryland has a large tomato crop and also produces tobacco, sweet potatoes, melons and vegetables. Commercial broilers are the largest agricultural revenue provider.

The 1st U. S. steam locomotive, Peter Cooper's Tom Thumb, was built in Baltimore and made its 1st run on the tracks of the Baltimore & Ohio R.R., 1830.

The University of Maryland (1807) has the Glenn L. Martin Institute of Technology. Other educational institutions: Johns Hopkins Univ. (estab. 1876), St. John's (1696), Goucher College (1885), U. S. Naval Academy (1845).

Famous racing events include Preakness, at Pimlico track, Baltimore; Grand National Steeplechase at Butler; the International at Laurel Race Course, and John B. Campbell Handicap at Bowie. Gibson Island is a center for yacht races.

Famous historic sites include Fort McHenry, Baltimore, restored, where in 1814 waved the flag that inspired Francis Scott Key to write the Star-Spangled Banner; Antietam Battlefield near Hagerstown (1862); South Mountain (1862); Edgar Allan Poe house, Baltimore. The State House, Annapolis (1772), is the oldest in the U. S.

The Chesapeake Bay Maritime Museum in St. Michael's exhibits typical bay boats, including the last surviving oyster sloop, a cottage-type light-house and models of Baltimore clippers, log canoes, bugeyes and skipjacks.

(See also Index for Baltimore, Washington, D. C.)

Massachusetts

Bay State, Old Colony

CAPITAL: Boston. **AREA:** 8,257 sq. mi., rank 45th. **POPULATION:** (1960 Census), 5,149,834, rank, 9th. **MOTTO:** Ense Petit Placidam Sub Libertate Quietem. By the Sword We Seek Peace, but Peace Only Under Liberty. **FLOWER:** Mayflower. **BIRD:** Chickadee. **TREE:** American Elm. **SONG:** (unofficial) Massachusetts. Sixth of the Original 13 States to ratify Constitution.

Massachusetts has played important roles in the political, intellectual and economic development of the U. S. Here the Pilgrims, seeking religious freedom, founded Plymouth Colony in 1620.

As Massachusetts grew, it became a leader in resisting British oppression. Its citizens staged the Boston Tea Party in 1773 to protest unjust taxation. The Minutemen battled British troops at Lexington and Concord, Apr. 19, 1775, launching the American Revolution.

The state became the home of great universities such as Harvard and Massachusetts Institute of Technology. In the 19th Century its authors were giants among the nation's men of letters. The state was also a hotbed of abolitionism.

In Massachusetts ports a great shipping industry, including the famed China trade, developed, along with vast whaling and fishing interests. Abundant waterpower helped create a variety of manufacturing industries.

While the Puritans demanded religious freedom for themselves, their leaders denied it to others; but some among them protested this, and the loudest protesters, Roger Williams, Anne Hutchinson and others were banished and settled Rhode Island in the 1630s as a haven for religious liberty. Meanwhile, in Massachusetts, Quakers and Baptists were persecuted and in Salem the infamous witchcraft trials and hangings were staged in 1692.

Eventually, religious freedom was achieved. In 1867, Mary Baker Eddy founded Christian Science in Lynn. Heavy immigration of Irish, Italians, Poles, Czechs and French Canadians brought many Catholics to the state.

Est. pop. July 1, 1967, was 5,421,000.

In addition to Harvard (founded 1636) and M.I.T., other respected institutes of higher learning include Amherst, Andover Theological, Boston College, Boston Univ., Brandeis, Clark, Hebrew

Teachers, Holy Cross, Lowell Technological, Mt. Holyoke, Northeastern, Radcliffe, Simmons, Smith, Tufts, Univ. of Mass., Wellesley, Williams and Worcester Polytechnic.

The state had the first tax to support free schools and its first school at Dedham, 1649, and a uniform system in 1840.

Commercial fishing, in the rich waters off Massachusetts and the Grand Banks off Newfoundland, was one of the area's earliest industries. Whalers sailed the oceans around the world. Modern trawlers with huge nets help bring in a catch valued at over \$49,000,000 a year, ranking 3rd behind Alaska and California.

Massachusetts pioneered in shoes, textiles and tools for them. The Bay State is 2nd to Pennsylvania in shoe production. Haverhill, Boston, Brockton, Lawrence, Lowell and Lynn are shoe centers. Francis Cabot Lowell perfected a power loom, 1822, started cotton manufacture at Lowell. Electrical machinery, including electronics and communications equipment, has become the state's leading product. Total value added by manufacture is over \$7.3 billion per yr. About 42% of all workers are employed in manufacturing.

Massachusetts' cranberry crop is the nation's largest, 560,000 bbl. in 1967. Also important are dairy and poultry products, cigar wrapper tobacco, apples, peaches, maple syrup. Farm receipts totaled \$159,157,000 in 1967. Mineral production for that year was valued at a record \$39,111,000, mostly stone, gravel and lime.

Cape Cod has summer theaters, sports and an artists' colony at Provincetown. Tanglewood, in the Berkshires, has the summer concerts of Boston Symphony Orchestra, and Jacobs' Pillow is a ballet center.

In New Bedford the Old Dartmouth Historical Society and Whaling Museum has a large and unique collection of whaling implements, scrimshaw and log-books as well as furniture, costumes, firearms, etc.

In Old Deerfield are Deerfield Memorial Hall (1799), Hall Tavern (1765), Parson Ashley House (1732) and other old buildings.

In Pittsfield, the Berkshire Athenaeum has memorabilia of Herman Melville, who lived there while writing *Moby Dick*, a scrimshaw and whaling collection and a large library. The Berkshire Museum, Pittsfield, has paintings by Rubens, Van Dyck, Reynolds, Murillo, the Hudson River artists, etc.; mineral and animal rooms; one of the sledges with which Robert E. Peary reached the North Pole.

In Plymouth, Pilgrim Hall contains relics of the Mayflower Pilgrims, including swords of Myles Standish, Bibles of Gov. William Bradford and John Alden, and the cradle of Peregrine White, first child born in the colony.

Old Sturbridge Village, in Sturbridge, is a recreated early New England village of 35 authentic homes and shops, shown functioning.

The Sterling and Francine Clark Art Institute, Williamstown, displays 14th-17th Century European paintings, a large collection of Impressionists, sculpture, silver and drawings.

The Worcester Art Museum presents a survey of art through 50 centuries, stressing early American painting, pre-Columbian and contemporary arts. Also in Worcester, the John W. Higgins Armory displays medieval armor, and the American Antiquarian Society has a collection of early printing, including newspapers and almanacs.

(See also Index for Boston.)

Michigan

Wolverine State

CAPITAL: Lansing. **AREA:** 58,216 sq. mi., rank, 23rd. **POPULATION:** 7,823,194 (1960 Census), rank 7th. **MOTTO:** Si Quæris Peninsulam Amœnam Circumspice. **IF YOU SEEK A PLEASANT PENINSULA, LOOK ABOUT YOU.** **FLOWER:** Apple Blossom. **BIRD:** Robin. **TREE:** White Pine. **SONG:** (unofficial) Michigan, My Michigan. **ADMISSION:** 26th.

Bordering on 4 of the 5 Great Lakes, Michigan is divided into an Upper and Lower Peninsula by the Straits of Mackinac, which link Lakes Michigan and Huron. The 2 parts of the state are connected by the Mackinac Bridge, which has the 3rd largest suspension span in the U. S. To the N, separating Michigan from Canada, is the Sault Ste. Marie (Soo) Ship Canal, one of the world's most heavily used waterways.

Michigan is the world's largest auto producer; its rich orchards near the shores of Lake Michigan

grow huge fruit crops; the Upper Peninsula produces important amounts of iron and copper, and the state's lakes and forests make it a highly popular vacationland. Highest point is Mt. Curwood, 1,980 ft., in the Upper Peninsula.

Est. pop. July 1, 1967, was 8,584,000.

It ranks 1st in the world in production of motor vehicles and parts, cereal preparations, machine tools, hardware, steel springs, public office furniture, padding and upholstering, industrial patterns, nonferrous castings, industrial leather belts, paperboard mills and gray iron foundries. It ranks 2nd in U. S. in average weekly earnings of production workers. Value added by manufacturing is over \$13 billion annually; \$4.9 billion of it in motor vehicles and equipment. Also important are paper, chemicals, lumber.

Tourist attractions are many and spending by tourists was est. at over \$1 billion for 1967. The state has 36,000 mi. of streams, over 11,000 lakes and the longest freshwater shoreline (facing 4 of the Great Lakes). Water sports, music festivals, skiing, winter carnivals, trout fishing and deer hunting are among attractions. Isle Royale in Lake Superior is a national park with 539,339 acres. There are 5 national forests, 73 state parks and recreational areas and numerous canoe trails.

Farm receipts in 1967 totaled \$382,144,000, more than half from livestock products. Among the states, it ranks 1st in tart cherries and dried beans, 3rd in sweet cherries and apples, 4th in pears, 5th in grapes. Fruit output totals over 850,000 tons a year.

Iron ore production, source of a quarter of Michigan's income from minerals, continued to increase in 1967, thanks to greater output of taconite pellets from low-grade ores.

Total mineral production for the year was valued at \$599,384,000. Michigan was 2nd only to Minnesota in value of iron ore output, \$159,000,000. It ranked 1st among the states in gypsum, peat, iodine, bromine and magnesium compounds; 2nd in lime and gravel; 4th in cement.

There are some 88 institutions of higher learning, headed by Michigan State Univ., East Lansing, and Univ. of Michigan, Ann Arbor. Also important are Univ. of Detroit and Wayne, Western Michigan, Eastern Michigan, Central Michigan and Michigan Technological Univs.

The Grand Rapids Art Museum, in addition to its permanent collections, holds special monthly and traveling exhibits and art classes conducted for adults by the Univ. of Michigan.

The state was originally explored by the French and many names (Detroit, Sault Ste. Marie) are of French origin. Etienne Brul  (1618), Jean Nicolet (1634), P re Allou  (1666), P re Marquette (1668) and Louis Jolliet (1669) were early visitors. France was ousted by Britain, 1763. Under the Ordinance of 1787 Michigan Terr. embraced parts of other western states. It was organized as a separate territory 1805, admitted to the Union Jan. 26, 1837.

(See also Index for Detroit.)

Minnesota

North Star State, Gopher State

CAPITAL: St. Paul. **AREA:** 84,068 sq. mi., rank, 12th. **POPULATION:** (1960 Census), 3,413,864, rank, 18th. **MOTTO:** L'Etoile du Nord, Star of the North. **FLOWER:** Showy Lady's-slipper. **BIRD:** Loon. **TREE:** Red (Norway) Pine. **SONG:** Hail! Minnesota. **ADMISSION:** 32nd.

Minnesota is a land rich in natural resources. Its fertile prairies support large crops and an important dairy industry. Its mines yield most of the iron ore produced in the U. S., its forests produce mountains of pulpwood, its manufacturing is varied and vigorous, its thousands of lakes and other attractions lure millions of sportsmen and vacationers.

The headwaters of 3 great water systems lie within Minnesota; the Mississippi, leading to the Gulf of Mexico, with its source at Lake Itasca; the Red River of the North, which flows into Canada's Lake Winnipeg, draining into Hudson Bay; the St. Louis and other rivers draining into Lake Superior and thence through the Great Lakes and the St. Lawrence to the Atlantic.

Known as the "land of 10,000 lakes," Minnesota actually has 15,291 larger than 10 acres. Two-thirds of the state is rolling prairie. Highest point is Eagle Mt. in the NE, 2,301 ft. Fishing, hunting and water sports attract close to 4,000,000 vaca-

tioners who spend over a half billion dollars annually.

The multiplicity of lakes has resulted in 99 being named Long, 91 Mud, 76 Rice, 43 Bass, 40 Twin, 39 Round, 36 Clear, 32 Sandy.

Est. pop. July 1, 1967, was 3,582,000.

Minnesota produces 60% of the iron ore mined in the U. S., despite depletion of the high-grade ore in the famed Mesabi and other ranges in the NE part of the state. Lost production from the huge open pit and underground mines is being replaced by high-grade pellets refined from low-grade taconite iron ore. Total iron ore production in 1967 was valued at \$467,000,000. Total mineral production was valued at \$518,794,000. Shipments of taconite pellets comprised 48% of total iron ore tonnage, up from 39% the previous year.

Manufacturing has shown steady growth and value added by manufacture in 1968 was est. at \$4.5 billion. Top industry is food processing, followed by machinery.

Much of the land is richly fertile. With \$1.8 billion in farm receipts for 1967, Minnesota ranked 5th among the states. Two-thirds of that income was from livestock products, the rest from crops. Minnesota was 1st among the states in butter, 2nd to Wisconsin in milk cows, 2nd to California in turkeys, 5th in hogs.

Minnesota's farms grew the most oats and sweet corn, were 3rd in rye, 4th in barley, 5th in soybeans, 6th in potatoes.

Forest products have a yearly est. value of over \$328,000,000, most of it in pulpwood.

Nationally known is the Mayo Clinic at Rochester, founded by Drs. Wm. J. and Charles H. Mayo. There are 27 private colleges, 6 state colleges, the Univ. of Minnesota and 14 junior colleges.

The Minneapolis Symphony Orchestra, Tyrone Guthrie Theater in Minneapolis and St. Olaf college choir in Northfield are highly regarded.

There are 85 state parks and many recreational facilities; Minnehaha Falls (54 ft.), in Minneapolis, was celebrated by Longfellow.

French traders and missionaries first penetrated Minnesota. Father Hennepin, 1680, named St. Anthony Falls, a 50-ft drop in the Mississippi in present-day Minneapolis. France ceded the land E of the Mississippi to Great Britain, 1763; Britain to U.S., 1783. It became part of Northwest Terr. The land W of the Mississippi was part of Louisiana Purchase, 1803. Henry R. Schoolcraft found source of Mississippi in Lake Itasca, July 13, 1832. Organized as a Territory in 1849, it became a state May 11, 1858.

(See also Index for Minneapolis, St. Paul.)

Mississippi

Magnolia State

CAPITAL: Jackson. **AREA:** 47,716 sq. mi., rank, 32nd. **POPULATION:** (1960 Census), 2,178,141, rank, 29th. **MOTTO:** Virtute et Armis. **By Valor and Arms.** **FLOWER:** Magnolia. **TREE:** Magnolia. **BIRD:** Mockingbird. **SONG:** Go, Mississippi! **ADMISSION:** 20th.

Cotton is king in Mississippi and the state is 2nd only to Texas in the amount produced, but other crops, livestock, forest products, petroleum and expanding factories are increasingly important.

The land slopes from the NE hills, where the high point is Woodall Mt. (806 ft.), to the Delta, a cotton-producing alluvial plain in the W and NW lying between the Yazoo River and the Mississippi, which flows along the state's western border.

The land also slopes to the S where the sandy beaches on the Gulf of Mexico have created a popular vacationland.

Indian tribes, including the Chickasaw, Choctaw and Natchez, inhabited the Mississippi area when the 1st Europeans, under Spain's Hernando de Soto, passed through in 1540. The first permanent settlement by Europeans was by a French group under Pierre le Moine, Sieur d'Iberville, in 1699, at Fort Maurepas near present-day Biloxi.

Great Britain took over the area in 1763 after the French and Indian War, ceding it to the U. S. in 1783 after the Revolution. Spain also claimed the land and did not relinquish it until 1798.

The population grew steadily and Mississippi became a state Dec. 10, 1817. It was the 2nd state to join the Confederacy, 1861, and was readmitted to the Union in 1870.

Est. pop. July 1, 1967, was 2,348,000.

Cotton has long been the mainstay of Mississippi agriculture; production in 1967 was 1,100,000 bales. But the state ranks 4th in the U. S. in sweet po-

tatoes and sugarcane syrup, 5th in rice, 6th in pecans and 7th in soybeans.

Biloxi has a large seafood canning industry, operating deep-sea trawlers for shrimp and oysters. Value of the commercial catch in 1966 was \$9,-502,000.

With 70% of the land classified as forest, timber products yield more than \$500,000,000 annually.

The state produces the most hardwood pulp wood, much hardwood lumber and slapsline products, including fibre board, kraft paper, newsprint.

Petroleum, natural gas and natural gas products represented 85% of the total value of mineral production, \$213,740,000 in 1967.

Industrial expansion in 1967 provided 12,237 new jobs, with new capital investment totaling \$218,-148,000, much of it for food processing and chemical plants. Factory employment reached 167,000.

A \$250,000,000 center for static testing of space rockets was put in operation by the National Aeronautics and Space Administration in 1967 in Hancock County.

Mississippi became the last state to abandon prohibition, adopting a local-option liquor law May 21, 1966. The state had adopted prohibition in 1908.

Tourism is of growing economic importance. About 17,600,000 out-of-state tourists spent an est. \$160,000,000 in Mississippi in 1967.

Gulftort holds an annual yacht regatta and a mackerel rodeo in July. Biloxi has a Mardi Gras in February, and Pass Christian, a tarpon rodeo. Natchez is famous for its formal antebellum houses, open in March and April. The mile-long Iberville Memorial bridge at Biloxi Bay and Vicksburg National Military park are of interest to tourists.

The Old Court House Museum in Vicksburg, built in 1858 by slave labor, has a museum with relics of the siege of Vicksburg, including flags, documents, newspapers printed on the back of wallpaper, guns, swords, etc., and exhibits of the ante-bellum South.

The Lauren Rogers Library and Museum of Art in Laurel contains works of 19th and early 20th Century Americans and Europeans, local artifacts and an unusual basket collection (about half of them Indian).

Missouri

Show Me State

CAPITAL: Jefferson City. **AREA:** 69,686 sq. mi., rank, 19th. **POPULATION:** (1960 Census), 4,319,-813, rank, 13th. **MOTTO:** Salus Populi Suprema Lex Esto. **The Welfare of the People Shall Be the Supreme Law.** **FLOWER:** Hawthorn. **BIRD:** Eastern Bluebird. **TREE:** Dogwood. **SONG:** Missouri Waltz. **ADMISSION:** 24th.

The gateway through which the pioneers passed on their way West, Missouri today is a leading manufacturing state, with aerospace and a wide variety of other industries; it is the nation's largest producer of lead; it ranks 10th among the states in agricultural products; its areas of scenic and historic interest attract some 20,000,000 vacationers each year.

Gently rolling hills in the N and W produce large crops and support cattle, sheep and hogs. The Ozark highlands in the S are famed for fishing, hunting and rugged scenery, including numerous caves and springs. The "delta" area in the SE produces long staple cotton and melons.

The Mississippi forms the state's boundary on the E; the Missouri forms part of the boundary in the W, then flows across the state to join the Mississippi above St. Louis. Highest point in the state is Taum Sauk Mt., 1,772 ft., in the E central area.

Missouri has endeared itself to generations of Americans with its river lore, folk tales and especially the writings of Mark Twain (Samuel L. Clemens). Statues of two of his creations, Tom Sawyer and Huckleberry Finn, stand in Hannibal, his boyhood home. His birthplace near Florida, Mo., has been enshrined in Mark Twain State Park.

The farm birthplace of notorious bandit Jesse James (1847-1882) is near Excelsior Springs. A log cabin built by U. S. Grant is near St. Louis. The farm where George Washington Carver, agricultural scientist, was born near Diamond is now a National Monument. The Harry S. Truman Library, near Independence, contains Presidential papers and memorabilia.

Est. pop. July 1, 1967, was 4,605,000.

Manufacturing, paced by the state's large aéro-

space industries, is the top income producer and employs more persons than any other segment of the economy. Value added by manufacture is over \$4.4 billion yearly. Transportation equipment, including space capsules, rocket engines, aircraft and auto assemblies, ranks 1st, followed by food processing, esp. meat packing, grain milling, beer and other beverages. Also important are chemicals, printing, metal products, machinery, shoes. Corn-cob pipes are a well-known product.

Agriculture ranks 2nd among income producers. Farm receipts in 1967 totaled \$1.4 billion, two-thirds from livestock products. Missouri ranks 3rd among the states in hogs, 5th in turkeys, 6th in cattle. It is 4th in soybeans, 7th in corn. Other crops are winter wheat, tobacco, apples, peaches, alfalfa, popcorn, rye.

Tourism, the 3rd largest industry, produced \$721,706,000 in 1966. Some 20,033,500 out-of-state auto tourists visited Missouri that year; 11,606,021 persons visited its 37 state parks, which cover 77,326 acres. There is a wide variety of vacation facilities; large resort areas include Lake of the Ozarks, Lake Taneycomo and Table Rock Lake.

Missouri is rich in minerals. Its output of lead, largest in the U. S., was valued at \$41,941,000 for 1967; total mineral production was worth a record \$234,642,000. It was also 1st in barite and 4th in lime. Other products are coal, iron ore, cement, asphalt, copper, zinc.

There are 59 institutions of higher learning. The Univ. of Missouri has campuses at Columbia, Rolla, Kansas City and St. Louis. The Univ. of Missouri at Rolla was formerly the Missouri School of Mines & Metallurgy. The Univ. of Missouri at Columbia has the country's first School of Journalism, founded 1908 by Walter Williams.

De Soto visited the Missouri area in 1541. French fur traders founded Ste. Genevieve about 1735, St. Louis 1764. It was part of the Louisiana Territory purchased by U. S. from France in 1803. Missouri was organized as a separate territory, 1812; admitted to the Union, Aug. 10, 1821.

The St. Joseph Museum in St. Joseph stresses the natural history and wildlife of the region and has exhibits on Indian tribes from Alaska to Florida. Also in St. Joseph is the Pony Express Museum.

(See also Index for Kansas City and St. Louis.)

Montana

Treasure State

CAPITAL: Helena. **AREA:** 147,138 sq. mi., rank, 4th. **POPULATION:** (1960 Census), 674,767, rank, 41st. **MOTTO:** Oro y Plata. **Gold and Silver.** **FLOWER:** Bitterroot. **TREE:** Ponderosa Pine. **BIRD:** Western Meadow Lark. **SONG:** Montana. **ADMISSION:** 41st.

The Rocky Mountains, with snow-capped peaks, forested slopes, broad valleys and many lakes, cover the western 40% of Montana; the rest is High Plains country devoted to grazing and farming. Montana is rich in minerals, hydroelectric power and impressive scenery. Highest mountain is Granite Peak, 12,799 ft. Est. pop. July 1, 1967, was 701,000.

Agriculture is the largest contributor to Montana's economy, followed by manufacturing, mining, and tourism and recreation.

Oceans of grain cover much of Montana's plains; it ranks 3rd among the states in wheat and barley output. Also grown are rye, oats, flaxseed, sugarbeets and potatoes. Montana ranks 5th in sheep and 13th in cattle. Farm receipts totaled just over a half billion dollars in 1967, more than half from livestock.

Manufacturing plays a growing role in the state's economy. Value added by manufacture reached \$284,809,000 in 1965. Processing of forest products is most important, followed by primary metal industries and food products. Wood products account for \$100,000,000 annually and include pulp, plywood and lumber. The state ships more than 3,000,000 Christmas trees annually.

Copper is normally king among Montana's minerals, but a nationwide strike cut production in 1967. Montana ranked 3rd among the states in copper and fluorspar, 1st in manganese and vermiculite. Petroleum produced the most income in 1967, \$83,960,000. Total mineral production, including zinc, gold, silver, coal, natural gas and others, was valued at \$186,182,000.

The tourist industry was valued at \$127,000,000 annually.

Tourist attractions include hunting, fishing, skiing, dude ranching. Montana has the nation's first luge course; luge is a sport similar to bobsledding.

Hunters annually take about 100,000 deer, 18,000 antelope, 10,000 elk, 1,100 black bear, 500 moose, 350 mountain goats.

Glacier National Park, on the Continental Divide, is a scenic and recreational wonderland, with 60 glaciers, 200 lakes and many streams with good trout fishing.

Flathead Lake, in the NW, covers 189 sq. mi. and is the largest natural body of fresh water within a single state W of the Mississippi in continuous U. S. Port Peck Reservoir, in the NE, covers 382.8 sq. mi., is 2nd largest (after North Dakota's Garrison Reservoir) man-made lake in U. S.

Important historical site is Custer Battlefield National Cemetery, in Big Horn County (near Hardin), site of defeat of Custer by Sioux, June 25, 1876. First visited by the French Verendryes, father and sons, 1743; Lewis and Clark, 1805. It became a Territory, 1864, and a state Nov. 8, 1889.

There are 7 Indian reservations, covering over 5,000,000 acres; tribes are Blackfeet, Crow, Confederated Salish & Kootenai, Assiniboine, Gros Ventre, Sioux, Northern Cheyenne, Chippewa, Cree. Population approx. 25,500.

The Museum of the Plains Indian, on the Blackfeet Res. near Browning, features exhibits of historic and contemporary arts and crafts of the Northern Plains Indians and an Indian craft shop; the museum is administered by the U. S. Interior Dept.

The Historical Society of Montana, in Helena, has paintings, dioramas and other exhibits of Montana's Indian and buffalo days, mining camps, frontier settlements, cattle roundups. Outstanding is the collection of nearly 100 Charles M. Russell paintings.

There are nine colleges and universities and two junior colleges. Great Falls is the largest city, with population (1960) 55,357.

Nebraska

Beef State, Cornhusker State

CAPITAL: Lincoln. **AREA:** 77,227 sq. mi., rank, 15th. **POPULATION:** (1960 Census), 1,411,330, rank, 34th. **MOTTO:** Equality Before the Law. **FLOWER:** Goldenrod. **TREE:** American Elm. **BIRD:** Western Meadow Lark. **ADMISSION:** 37th.

Fields of corn, rye and sorghum cover the Nebraska plain, sloping gently toward the Missouri River, the eastern border of the state; vast herds of cattle roam the grassy sandhills which rise to the W. ending in the broken table lands which mark the foothills of the Rockies. Highest point, 5,426 ft., is in the far SW corner.

With 22,000,000 acres under cultivation, Nebraska is an important grain and livestock producer; agriculture is the primary source of income and provides the most jobs. Oil and natural gas are also important products.

New chemical fertilizer, meatpacking and food processing plants have contributed to the growth of manufacturing in recent years. Est. pop. July 1, 1967, was 1,435,000.

Nebraska ranked 6th among the states in farm receipts in 1967, \$1.7 billion, two-thirds of it from livestock products. Its cattle herds ranked 3rd in size behind those of Texas and Iowa, 6,475,000 in 1968, a 2% increase over 1967. It was 6th in hogs, 2,738,000. Its crop yield ranked it 3rd in sorghum, 4th in winter wheat and rye, 5th in corn and alfalfa.

Mineral production continued declining in 1967, totaling \$75,846,000, a decline of \$2,700,000 from 1966, mainly because of depletion of older oil and natural gas fields. Oil was still the main product, valued at \$36,520,000. Also important are cement, pumice, sand and gravel.

Manufacturing has shown steady growth. During 1967, 53 industries announced new plants and 84 announced plant expansions; these were expected to create 4,800 new jobs.

Nebraska has a unicameral or one-house legislature with 49 members elected on a nonpartisan ballot. All electric power facilities are state or municipally owned.

The state university has campuses at Lincoln and Omaha; there are two sectarian universities and numerous colleges.

Arbor Lodge State Park at Nebraska City is a memorial to J. Sterling Morton, founder of Arbor

Day, which is observed as a legal holiday on his birthday, Apr. 22. Boys Town is 11 mi. W. of Omaha.

The Sheldon Memorial Art Gallery at the Univ. of Nebraska, Lincoln, housed in a building designed by Philip Johnson, has works by Bellows, Stuart Davis, Eakins, Gauguin, Homer, Hopper, Muro, O'Keeffe, Picasso, Ryder, Calder, Lachaise, Henry Moore, Rodin, Zorach, etc.

The Joslyn Art Museum, Omaha, has works by Titian, El Greco, Rembrandt, Goya, Renoir, etc.; exhibits of furniture, the early West, fur trade, Indian art, etc.

Pioneer Village, Minden, has some 30,000 items of Americana displayed in a rural schoolhouse, depot, general store, fort, fire house, school house, Pony Express station, etc., plus old locomotives, tractors, a steam-powered merry-go-round.

The House of Yesterday, Hastings, has exhibits of pioneer days and natural science and the J. M. McDonald Planetarium.

French fur traders visited the Nebraska area about 1700. It was part of the Louisiana Purchase, 1803, and was visited by Lewis & Clark, 1804-06. The Union Pacific began its transcontinental railroad at Omaha in 1865 (completed 1869). The Territory of Nebraska was created by the Kansas-Nebraska Act, 1854; it became a state Mar. 1, 1867.

OMAHA

Omaha, incorporated 1857, lies on the W bank of the Missouri River. It had more than 300,000 people in 1960 and an estimated 375,000 in 1967. It is the nation's largest livestock and meatpacking center. About 55% of its industry is food processing; it distributes more than \$1 billion worth of foodstuffs annually including frozen dinners.

Omaha has 4 colleges and universities. It is the site of the Strategic Air Command at Offutt AFB, and hq of the Naval Reserve Training Command. It is served by 9 trunk railroads and 5 airlines.

Nevada

Sagebrush State, Silver State

CAPITAL: Carson City. **AREA:** 110,540 sq. mi., rank, 7th. **POPULATION:** (1960 Census), 285,278, rank, 49th. **MOTTO:** All for Our Country. **FLOWER:** Sagebrush. **BIRD:** Mountain Bluebird. **TREE:** Single-leaf Piñon. **SONG:** Home Means Nevada. **ADMISSION:** 36th.

Nevada lies mostly in the Great Basin, a rugged plateau region broken by mountain chains running N-S. It is enclosed on the E by the Rockies and the Wasatch Range in Utah, and on the W by California's Sierra Nevada and Cascade Ranges which rob the clouds of moisture, making Nevada's climate extremely dry. Boundary Peak, near the SW border with California, is the state's highest point, 13,140 ft.

One of the smallest states in population, Nevada has attracted large numbers of outsiders, starting with the famed rush to the Comstock Lode (discovered 1859) and other fabulous gold and silver mines. Today, the attractions are legalized gambling, highly-developed entertainment and recreation facilities, and lenient divorce laws requiring only 6-weeks residence. Est. pop. July 1, 1967, was 444,000.

Spending by visitors is the biggest factor in Nevada's economy. Over 20,000,000 visitors (about 45 times the state's population) spent some \$713,647,000 in Nevada in 1967.

Tourist-connected industries—hotels, casinos, amusement and recreation facilities—make up the largest employment category.

State taxes and fees from casino entertainment were \$22,108,640 in 1966-67, up \$4,859,961 from the previous fiscal year and providing 35% of the state's revenue. Gross gambling revenues were \$358,000,000 for 1966-67.

There are big resort areas, with nearby skiing as well as sunbathing, near Lake Tahoe, Reno, Las Vegas and elsewhere. Ghost towns, rodeos, trout fishing and deer hunting are other attractions. There are 9 state parks, and recreation areas include those at Pyramid Lake, wholly within the state; Lake Tahoe, partly in California; Lake Mead, formed by Hoover Dam, and Lake Mohave, by Davis Dam, both in Lake Mead National Recreation Area, shared with Arizona.

Income from mineral production fell off during 1967, mainly because of a nationwide copper strike which also affected Nevada's normal output of lead and zinc. Of the total 1967 mineral production value, \$85,876,000, copper still accounted for \$35,-

394,000. The state ranked 2nd in the U. S. in mercury, antimony and lithium, 3rd in gold and barite.

Nevada is the largest manufacturer of gaming devices. Also important are electronic devices, chemicals, forest products, suntan lotion, stone-clay-glass products. About \$112,000,000 is the est. value added annually by growing manufacturing industries.

Farm receipts totaled \$63,864,000 in 1967, 82% of that from livestock; the dry climate makes much of the state more suitable for grazing than for crops, although large-scale irrigation has expanded growing areas.

The Nevada Test Site, NW of Las Vegas, is a proving ground for various atomic devices.

The Univ. of Nevada is at Reno and Nevada Southern Univ. at Las Vegas.

Trappers and traders entered the Nevada area in the 1820s, including Jedediah Smith and Peter Skene Ogden. It became U. S. territory at the end of the Mexican War. It became a state Oct. 31, 1864.

The Nevada State Museum, Carson City, occupies a former U. S. Mint, and exhibits coins, habitat groups of mammals and birds of the Great Basin area, Indian baskets, full-scale replicas of underground mining operations and thousands of arrowheads.

LAS VEGAS

Las Vegas (The Meadows), in southern Nevada, is the state's largest city and seat of Clark County; 1966 pop. was 144,000 and total in county 253,000. Over 13,000,000 visitors in 1965 spent \$350,000,000 in this resort and gambling mecca. Gross gaming revenues totaled \$168,111,179. The city has 16 major resort hotels, 280 motels, 35 other hotels, with a total of 25,000 rooms. It is served by 7 airlines which brought 1,700,000 passengers to McCarran Field in 1964, and the Union Pacific. There is a convention hall seating 8,500. Nearby are Valley of Fire Park, Lakes Mead and Mohave; Nellis and Indian Springs Air Force Bases, Las Vegas Air Force Station; Mt. Charleston Recreation Area.

New Hampshire

Granite State

CAPITAL: Concord. **AREA:** 9,304 sq. mi., rank, 44th. **POPULATION:** (1960 Census), 606,921, rank, 45th. **MOTTO:** Live Free or Die. **FLOWER:** Common Lilac. **BIRD:** Purple Finch. **TREE:** Paper (White) Birch. **SONG:** Old New Hampshire. Ninth of the Original 13 States to ratify Constitution.

One of the 6 New England states, New Hampshire is a land of impressive mountains, picturesque lakes, swift rivers and thick forests. Mountain slopes provide excellent ski trails. Numerous lakes and streams afford fishing for trout, bass, pickerel, perch, whitefish.

Abundant water power early turned New Hampshire into an industrial state, with manufacturing the principal source of income. Soil and climate have curtailed agricultural growth, but scenic and recreation resources have been developed and the tourist-vacation business, over \$200,000,000 a year, ranks 2nd in its contribution to the state's economy.

Est. pop. July 1, 1967, was 685,000.

In 1964, to raise funds to support education, the state ran the 1st legal sweepstakes lottery in the U. S. since 1894 (in that year, a lottery in Louisiana was outlawed). Profits from the state lottery are turned over to local school districts.

Most important industrial products are shoes and boots, followed by electrical and other machinery, wool and other textiles, and paper. Most factories are concentrated along the Merrimack River which furnishes hydroelectric power. More than 85,000 are employed in manufacturing. Value added by manufacture is over \$650,000,000 a year.

Farm receipts for 1967 totaled \$54,895,000, four-fifths from dairy and poultry products. Crops include apples, peaches, maple sugar and syrup, hay.

Mineral products, mainly sand and gravel, stone, clay, feldspar and gem stones, were valued at \$7,922,000 for 1967.

Recreation and vacation attractions include Lake Winnepesaukee, largest of 1,300 lakes and ponds; the White Mountains, with skiing and scenic beauty; beaches on the Atlantic Coast and numerous historic sites.

One-third of the state is over 2,000 ft. above sea level. Highest land in Northeast U. S. is the Presidential range of the White Mountains, with Mt. Washington, 6,288 ft. (First cog ry. in world opened 1869); Mt. Jefferson, 5,717 ft.; Mt. Adams, 5,789 ft. National forests cover 677,559 acres; 142

state forests and parks, 63,805 acres. State-owned are Crawford Notch, Dixville Notch and Franconia Notch the last near Profile, or Cannon Mtn., 4,077 ft. (with Hawthorne's Great Stone Face); Whiteface, 3,935 ft.

Portsmouth is the state's only port. Manchester is the largest city; pop. (1960 Census) 88,262.

New Hampshire was visited by Samuel Champlain in 1605. Under an English land grant, Capt. John Mason in 1623 sent two groups to establish a fishing colony at the mouth of the Piscataqua River. One group settled Little Harbor of Pannaway (now town of Rye); the other set up fishing stages at Northam, later named Dover. The colony was called after Hampshire, 1629. It declared its independence Jan. 5, 1776, and contributed to the victories at Bennington and Saratoga, entering the Union June 21, 1788.

New Hampshire shared the educational pioneering of Massachusetts Bay from 1642; established first free public library at Dublin, 1822. It has a Univ. of N. H., Durham; Dartmouth (1769), Phillips Exeter (1781), St. Paul's, Colby Junior College and others. The MacDowell Colony at Peterborough, estab. 1908 in honor of Edward MacDowell, is a summer haven for writers.

The Currier Gallery of Art, Manchester, exhibits silver by Paul Revere and others, textiles, hooked rugs, pewter and glass and a rich collection of works by Tintoretto, Ruissild, Monet, Copley, Constable, Picasso, Roualt, Copley, Stuart, Trumbull, Sargent, Homer, Wyeth, Marin, etc.

The New Hampshire Historical Society, Concord, has a museum displaying New Hampshire furniture, silver, pewter, glass, china, quilts, costumes, weapons, kitchen woodenware, etc.

New Jersey

Garden State

CAPITAL: Trenton. **AREA:** 7,836 sq. mi., rank, 46th. **POPULATION:** (1960 Census), 6,066,782, rank, 8th. **MOTTO:** Liberty and Prosperity. **FLOWER:** Purple Violet. **BIRD:** Eastern Goldfinch. **TREE:** Red Oak. Third of the Original 13 States to ratify Constitution.

Smallest of the Middle Atlantic states, New Jersey was settled by the Dutch early in the 17th Century and was the scene of much action during the American Revolution. Today it has the heaviest pop. per sq. mi. of the 50 states, ranks near the top in manufacturing, is rich in poultry and vegetable production, and has a flourishing resort industry.

There are vast shipping facilities and New Jersey divides authority over airports, harbors, tunnels and bridges with the Port of New York Authority and the states of Delaware and Pennsylvania.

Much of the tonnage total of the Port of New York is loaded or unloaded at piers on the New Jersey side of the harbor.

About 71% of the state's land area is in farms and forests. Highest point is High Point, Sussex County, 1,803 ft.

Small in area, New Jersey has a heavy concentration of factories, highways, railroads and farms, and is a leader in many fields. It also has the greatest pop. density (based on the July 1, 1965, Census est. pop. of 6,774,000), reaching 891.1 per sq. mi. and passing Rhode Island's corresponding figure, 869.1. Est. pop. July 1, 1967, was 7,004,000.

The state stands 7th in the U. S. in value added by manufacture. It ranks 1st in value of chemical products; 3rd in apparel; 4th in instruments, rubber and plastic products, petroleum and coal products; 5th in electrical machinery; 6th in food products, stone-clay-glass products; 7th in printing-publishing, fabricated metals; 8th in textiles; 9th in paper, leather, machinery, transportation equipment; 10th in primary metals. It has a heavy concentration of pharmaceutical plants and research installations.

New Jersey is 1st in gross income per farm acre. Chief crops are tomatoes, corn, asparagus, apples, cranberries, peaches, spinach. It holds high rank in poultry, dairying and processing of vegetables, especially tomatoes. The first dairy cattle artificial insemination project was launched in Hunterdon County; also the common-carrier shipment of day-old baby chicks.

Total farm receipts for 1967 were \$253,267,000. Mineral production dropped 3% in 1967, a decline mainly attributable to the cessation of iron mining, an important industry since colonial days. Of the total value, \$73,482,000, gravel and stone (including traprock, granite and marble) accounted for the largest part. Zinc is also important.

Seven refineries, processing oil from out of state, have a total crude capacity of 529,950 bbl. a day.

Among New Jersey's institutions of higher learning are Princeton and Rutgers (the state university); the Institute for Advanced Study; 3 other universities; 18 colleges, 11 junior colleges, 7 professional and technological colleges.

Atlantic City, Ocean City, Cape May, Asbury Park, Ocean Grove, Wildwood are among more than 100 resorts. The resort industry generates over \$2 billion in business annually. There are 36 state parks with 37,150 acres. The 11 state forests comprise 166,435 acres. There are many historic sites, mainly Revolutionary.

In Camden, the Walt Whitman House, home of the poet from 1884 until his death, Mar. 26, 1922, contains books, mementos and furnishings used by Whitman. The U. S. Army Signal Corps Museum, Fort Monmouth, contains communications equipment from the earliest visual methods to modern satellites.

The Montclair Art Museum exhibits art of many periods and lands, emphasizing the American. The Newark Museum is a museum of art, science and industry, including American paintings and sculpture; Chinese, Japanese and Tibetan art; collections of economic botany, birds, insects, minerals, shells, glass, ceramics and jewelry. The New Jersey Historical Society Museum, Newark, has old New Jersey rooms and collections of New Jersey furniture, paintings, china, silver, glass, costumes, etc.

The Garden State Arts Center, an amphitheater for concerts and stage shows, was opened at Telegraph Hill Park in 1968.

The Johnston Historical Museum, adjacent to the national hq. of the Boy Scouts of America, New Brunswick, depicts Scouting history, has a registered weather station, a ham radio station (K2BFW) and a 22-acre Outdoor Museum of Nature and Conservation.

The Edison National Historic Site, West Orange, displays in buildings set up by Thomas Alva Edison his chemical laboratory, machine shop and library; a reproduction of the "Black Maria," Edison's 1st movie studio; originals or replicas of his phonograph, incandescent lamp and movie camera. In South Orange, the New Jersey Fire Museum displays 19th Century hand-pumpers, hose carts, helmets, etc.

In Trenton, the New Jersey State Museum displays the state's achievements in the arts, sciences, history, technology and industry, and has a planetarium.

Extensive research projects in 1966 were aimed at eliminating pollution of shellfish areas and protecting beaches from erosion. To combat the prolonged northeast U. S. drought, construction was completed on Round Valley Reservoir (expected to reach full capacity of 55 billion gal. in 1968); Spruce Run Reservoir, also in Hunterdon Co., reached full level of 11 billion gal.

The state's network of modern highways gives New Jersey more miles of roads per sq. mi. of area than any other state. A new ferry between Cape May and Lewes, Del., opened in 1964. The Port of N. Y. Authority says its Newark Union Truck Terminal is the world's largest.

There are 13 airlines and 19 railroads. New Jersey has the most concentrated trackage per sq. mi. in the U. S.

New Mexico

Land of Enchantment

CAPITAL: Santa Fe. **AREA:** 121,666 sq. mi., rank, 5th. **POPULATION:** (1960 Census), 951,023, rank, 37th. **MOTTO:** Crescit Eundo, It Grows as It Goes. **FLOWER:** Yucca. **BIRD:** Road Runner. **TREE:** Piñon (Nut Pine). **SONG:** O, Fair New Mexico. **ADMISSION:** 47th.

New Mexico is a land of contrasts, presenting remnants of old Indian and Spanish cultures along with nuclear and space research centers; mountains over 13,000 ft. and a cavern 829 ft. below ground; ski slopes and desert resorts.

Vast areas are made fertile by irrigation via dams and reservoirs on the Rio Grande, San Juan, Pecos, Canadian, Cimarron, Gila, San Francisco Rivers. Wheeler Peak, 13,161 ft., is highest point.

Est. pop. July 1, 1967, was 1,003,000. The climate is dry and invigorating; annual rainfall is 7" to 18"; mean temperature is 50°, reaching 100° on plains in summer.

National forests cover 13,281 sq. mi. Douglas fir, Ponderosa pine and spruce are cut for timber. Over 34% of the land is Federally owned.

Minerals are New Mexico's richest natural re-

source and the state leads the U. S. in uranium output and produces 90% of the nation's potash.

Mineral production reached a record value of \$867,194,000 in 1967. Petroleum output was at a new high, valued at \$363,234,000, and natural gas brought \$139,149,000, also up. Also important are copper, helium, manganese, zinc, lead, gold, silver, molybdenum, gypsum, coal. New Mexico ranks 1st among the states in uranium, carbon dioxide and perlite production.

Farm receipts brought in \$286,989,000 in 1967, two-thirds of it from livestock products. Cotton, hay and sorghum account for 80% of the value of field crops. Also grown are corn, pecans, peanuts, beans, onions and lettuce.

Manufacturing production gained about 10.6% in 1966 and employment was up 8.1%. Principal lines are food products, chemicals, ordnance and transportation equipment, lumber, electrical machinery, stone-clay-glass products. Value added by manufacturing is over \$170,000,000 annually.

Federal government activities, especially nuclear and space research and testing, have played a large role in New Mexico's economic growth. Nuclear and space centers are at Los Alamos, White Sands, Holloman, Kirtland and Sandia.

New Mexico's most awe-inspiring natural wonder, Carlsbad Caverns, has more than a half-million visitors annually. A national park, the caverns are on 3 levels and have the largest natural cave "room" in the world, 1,500 by 300 ft., 300 ft. high.

There are 4 large Indian reservations and 18 inhabited pueblos, including Acoma, the "sky city," built atop a 357-ft. mesa. There are numerous pueblo ruins from 1000 A.D. in Chaco Canyon.

Skiiing, hunting, fishing, ghost towns and dude ranches help tourism show steady gains. Visitors spent about \$108,000,000 in the state in 1967.

Spaniards seeking gold explored New Mexico in the early 16th Century; the area was labeled New Mexico on a 1583 map. It was colonized 1598, with the 1st church at San Juan pueblo. The land remained under Spain until 1821, then under Mexico till U. S. troops occupied it in 1846.

It was formally ceded by Mexico to the U. S. in 1848, was made a Territory in 1850, was separated in 1863 from the part which was to become Arizona. New Mexico became a state in 1912.

There are 9 universities and 4-year colleges. Santa Fe (1610) is the 2nd oldest city in the U. S. It and Taos have large artist colonies. Albuquerque (1706) is the state's largest city, pop. 331,684 (1967).

The Museum of Navaho Ceremonial Art, Santa Fe, housed in a modernized version of a ceremonial hogan, contains over 600 sandpaintings, recordings of some 2,000 Navaho chants, books, manuscripts, baskets, blankets, silver, etc.

The Museum of New Mexico, Santa Fe, maintains the oldest public building in the U. S., the Palace of the Governors (built 1610), a hall of modern Indian culture, collected works of artists of the SW, international folk art exhibits.

The Roswell Museum and Art Center, Roswell, has 19th and 20th Century art collections, archeology and geology exhibits, the Robert H. Goddard rocket collection.

New York

Empire State

CAPITAL: Albany. **AREA:** 49,576 sq. mi., rank, 38th. **POPULATION:** (1960 Census), 16,782,304, rank, 1st (see text below). **MOTTO:** Excelsior. **Ever Upward.** **FLOWER:** Rose. **BIRD:** Bluebird (unofficial). **TREE:** Sugar Maple. Eleventh of the Original 13 States to ratify Constitution.

New York is the nation's leading manufacturing state and within its borders are the financial capital of the nation, the largest city and port, the United Nations hq., the head offices of many of the greatest national corporations and insurance companies and a variety of industries.

New York's manufacturing industries outrank those of all other states in number, employees, payrolls and value added by manufacture (\$22.7 billion annually). Value added by manufacture in New York exceeded that of every other state in apparel (\$2.6 billion), printing and publishing (\$2.9 billion), instruments (\$1.6 billion), paper and paper products (\$700,000,000), and in the miscellaneous group, which includes jewelry, silverware, toys and sporting goods, office supplies, musical instruments, pens and pencils, etc. (\$800,000,000), according to the 1965 Survey of Manufactures.

The state produces 69% by value of the nation's photographic equipment, 54% of the periodicals, 50% of leather gloves, 39% of books and 31% of apparel.

Average employment for 1967 was 7,715,000. Over \$42 billion in wages and salaries were paid in 1966.

The bi-state Port of New York (New York and New Jersey) handled 27.8% of the nation's foreign trade by value in 1967; 28.8% in 1966, by U. S. Commerce Dept. figures. The 3 customs districts (New York, Buffalo and Ogdensburg) handled 35.6% of U. S. exports and imports by value in 1967.

One of every 4 domestic air passengers in the U. S. lands or takes off from Port of New York Authority airports; Kennedy International Airport in N. Y. City handles about 54% of the nation's overseas air travel and is the world's largest air cargo center, handling 64% of export-import tonnage by value.

The State Barge Canal System is 800 mi. long. There are 36 railroads and 384 landing fields, including 27 seaplane bases and 28 heliports. The Verrazano-Narrows Bridge is the world's longest suspension bridge.

The Dewey Thruway runs from N. Y. City to the Pennsylvania border on Lake Erie, 559 mi.; most of the state's 1,226-mi. portion of the Interstate Highway System was completed in 1967. The Northway, which links the Thruway with the Canadian border, was completed in 1967.

Tourism and business travel provide \$3.2 billion a year to businesses in the state. Major vacation areas include the Adirondack and Catskill Mtns., Finger Lakes, Great Lakes, Thousand Islands, Long Island, N. Y. City and Niagara Falls.

Rich, rolling farmlands support a large agricultural output. It ranks 1st among the states in clover and timothy, buckwheat, maple syrup and ice cream; is 2nd to Washington in apples, 2nd to California in grapes (It has large wine and grape juice industries), 2nd to Wisconsin in milk production; 2nd to Michigan in tart cherries; 5th in vegetables and melons, sweet cherries, pears, potatoes. Also important are corn, oats, wheat, peaches, peas, beans, beets, cabbages. Farm production also supports a large food-canning, freezing and processing industry.

Farm receipts for 1967 totaled \$1.01 billion, up over 1% from 1966, more than two-thirds of the total from livestock and dairy products.

The state also has a rich mineral industry, ranking 1st in the U. S. in talc, titanium, emery, abrasive garnet and wollastonite; 2nd in zinc; 4th in salt, iron, sand and gravel. Other products include lead, petroleum, silver, gypsum. Total value for 1967 was \$299,871,000.

Highest point in the state is Mt. Marcy in the Adirondacks, 5,344 ft. The 88 state parks are visited annually by over 35,000,000 persons.

There are 207 institutions of higher learning, providing instruction to 645,000 students.

In 1967, a state lottery, with proceeds to be used for education, went into operation. In Nov. 1967, New York State voters approved a \$2.5-billion transportation bond issue to modernize the state's transportation system to meet the needs of an estimated 20,000,000 citizens in 1975.

New York was the nation's most populous state from 1820 through 1964. As of July 1, 1964, the U. S. Census Bureau estimated California's pop. reached 18,084,000, New York's 17,915,000 (including Armed Forces stationed in the 2 states; without them, New York still led 17,870,000 to 17,749,000). By July 1, 1965, the Bureau est. California led in both categories. Total New York pop. July 1, 1967, was est. at 18,335,000; total California, 19,163,000.

Giovanni da Verrazano, Italian-born navigator sailing for France, probably saw what is now New York Bay in 1524. Henry Hudson, an Englishman sailing for the Dutch, reached the bay in 1609.

Sunnyside, the home of Washington Irving, "as full of angles and corners as an old cocked hat," is in Tarrytown. The Dutch Church of Sleepy Hollow (1697), North Tarrytown, overlooks a bridge commemorating Irving's story of the "headless horseman"; Irving is buried close by in Sleepy Hollow Cemetery. Also in Tarrytown is Lyndhurst, 19th Century mansion of Jay Gould, maintained by the National Trust for Historic Preservation.

The Franklin D. Roosevelt National Historic Site, in Hyde Park, includes the graves of President and Mrs. Roosevelt, the home occupied by the Roosevelt family since 1867, greenhouse, etc. The Roosevelt Library has historic papers, trophies

and ship models.

Philipsburg Manor, in North Tarrytown, a trading center of the early 1700s, includes the restored Frederick Philips home, a dam and grist mill. Van Cortlandt Manor, Croton-on-Hudson, has the restored Van Cortlandt home and ferry house.

In Kingston, the Senate House, seat of the 1st Senate of the state, exhibits early historical objects; its Museum has works by John Vanderlyn, local historical painter. In Newburgh, Washington's Hq., the Jonathan Hasbrouck House, has Revolutionary relics.

The Suffolk Museum and Carriage House, Stony Brook, L. I., has early American paintings and furniture, apothecary shop, tavern, Wells Fargo stage, Conestoga and gypsy wagons, etc.

In Cooperstown are the National Baseball Hall of Fame and Museum with a wide collection of mementos of the national game; nearby is Abner Doubleday Field, said to be where baseball originated in 1839. Near Cooperstown are Fenimore House, hq. of the State Historical Society, with collections including James Fenimore Cooper memorabilia and an art gallery; the Farmer's Museum, with craft demonstrations, and the Village Crossroads, with blacksmith shop, country store, etc.; the Carriage and Harness Museum preserves the stables and vehicles of the early 20th Century.

The restored Fort Ticonderoga, overlooking the waters connecting Lakes George and Champlain, has a museum of relics of the French and Indian War and the Revolution, in which the fort played important roles.

The New York State Museum in Albany has exhibits of natural resources, Indian life, Louis Agassiz Puertres' paintings of birds, colonial houseware, etc.

The Corning Glass Center, Corning, has a museum and the Steuben factory, where visitors may see crystal glass formed and engraved. Also in the Finger Lakes area are the Curtiss Museum of aviation and the Wine Museum at Hammondsport and several wineries which offer tours to visitors. In Binghamton, the Roberson Center for the Arts and Sciences has art and historical collections.

In Utica, the Munson-Williams-Proctor Institute has a museum of 19th and 20th Century art and Fountain Elms, a restored mid-19th Century home.

The Remington Art Memorial Museum, Ogdensburg, has paintings and bronzes by Frederic Remington (1861-1909), who was born in nearby Canton.

(See also Index for N. Y. City, Buffalo, Rochester, Syracuse.)

North Carolina

Tar Heel State, Old North State

CAPITAL: Raleigh. **AREA:** 52,586 sq. mi., rank, 28th. **POPULATION:** (1960 Census), 4,556,155, rank, 12th. **MOTTO:** *Esse Quam Videri, To Be, Rather Than To Seem.* **FLOWER:** Dogwood. **BIRD:** Cardinal. **TREE:** Pine. **SONG:** *The Old North State.* Twelfth of the Original 13 States to ratify Constitution.

From a low coastal plain, with Capes Hatteras, Lookout and Fear jutting into the Atlantic, North Carolina rises to a central Piedmont plateau region and, in the W, to the scenic Blue Ridge and Great Smoky Mountains. Mt. Mitchell, 6,684 ft., is the highest peak E of the Mississippi.

Modernization of production methods has brought North Carolina increasing prosperity from its factories, farms and mines in recent years.

The state leads the U. S. in production of textiles, brick, and household furniture, and in both tobacco grown and cigarettes made. Tourism is an important industry. Est. pop. July 1, 1967, was 5,027,000.

In 1967, 130 new industrial plants opened and 338 expanded their facilities, creating 24,774 new jobs through an added investment of \$661,957,000.

About 665,000 are employed in factories. The textile industry is the state's largest with production valued at over \$3 billion annually.

North Carolina ranks 1st in tobacco production; in 1967 it totaled 842,530,000 lbs. It was 2nd to Louisiana in sweet potatoes and 2nd to Georgia in peanuts. Other large crops are cotton, corn and soybeans; also grown are wheat, oats, barley, peaches, apples. In field crop receipts the state ranked 5th in 1967 with \$845,069,000; livestock production receipts totaled \$454,134,000.

There is a large commercial broiler business; the state ranked 4th in chickens in 1968. It was also 4th in turkeys and 12th in hogs.

Mineral production was up 5% to a record high value of \$75,294,000 in 1967. North Carolina ranked 1st in mica, feldspar and lithium; 3rd in talc, 4th in asbestos.

Tourism is a large industry; in 1967 travelers spent \$647,000,000 in the state. There are 635,000 acres of game refuges, with bear, deer, opossum, raccoon, quail and rabbit, as well as wild ducks and geese.

Among attractions are the Great Smoky Mtns. (half in Tennessee), the Blue Ridge Parkway (partly in Virginia) and the Cape Hatteras and Cape Lookout National Seashores.

Other attractions include the restored Fort Raleigh National Historic Site, Roanoke Is., where Virginia Dare, 1st child of English parents in the New World, was born Aug. 18, 1587; Wright Brothers National Memorial, near Kitty Hawk, has aviation exhibits and a reproduction of the plane in which Wilbur and Orville Wright made their 1st flights, 1903; Guilford Court House and Moore's Creek parks, sites of Revolutionary battles. The Battleship North Carolina, a war memorial, is berthed at Wilmington.

In Asheville is one of the world's largest rayon plants as well as Biltmore Industries, native craft plants set up by Mrs. George W. Vanderbilt in 1901 to continue handweaving traditions of the area. Just S of Asheville is the 19th Century Biltmore mansion of the Vanderbilts, which has a large collection of paintings, antiques and Ming china. Also in Asheville, the Thomas Wolfe Memorial was the home of the author.

Bennett Place, 6 mi. NW of Durham, is the site where Gen. Joseph E. Johnston surrendered the last Confederate army to Gen. William Tecumseh Sherman.

The Mint Museum of Art, Charlotte, has collections of painting, sculpture and ceramics. The North Carolina Museum of Art, Raleigh, exhibits American and European paintings, sculpture and decorative art. Tryon Palace, New Bern, is the reconstructed colonial capital of 1770-1794, furnished with antiques.

Old Salem, in Winston-Salem, includes buildings erected by the Moravians from 1766 on. The R. J. Reynolds Tobacco Co. welcomes visitors at its plant and warehouses.

More than 120,000 students are enrolled in 70 senior and junior colleges and universities, 28 of them state-supported with enrollment of over 73,000; among them are Duke Univ. of N. C., Wake Forest, N. C. State Univ., and Campbell College.

Verrazano, 1524, touched the coast. DeSoto went into the Great Smoky Mts. in 1540. Sir Walter Raleigh sent an expedition to Roanoke Is., 1584; colony was settled 1585, 1587; this, the Lost Colony, disappeared. Albemarle was the first permanent settlement, 1660. Revolutionary battles were fought in the state. North Carolina seceded from the Union May 20, 1861; revoked secession, 1865; was readmitted 1868.

North Dakota

Sioux State, Flickertail State

CAPITAL: Bismarck. **AREA:** 70,665 sq. mi., rank, 17th. **POPULATION:** (1960 Census), 632,446, rank, 44th. **MOTTO:** *Liberty and Union, Now and Forever, One and Inseparable.* **FLOWER:** Wild Prairie Rose. **BIRD:** Western Meadow Lark. **TREE:** American Elm. **SONG:** *North Dakota Hymn.* **ADMISSION:** 39th or 40th, with South Dakota.

The eastern plains of North Dakota are rich in vast fields of grain and support large numbers of livestock, in sharp contrast to the rough, colorful Badlands in the W which have elements of scenic beauty and include Theodore Roosevelt National Memorial Park. Highest point is White Butte, 3,506 ft., in the SW.

North Dakota's economy is based on agriculture and mining; manufacturing, especially food processing, is gaining. Agriculture is the principal industry, with 93% of the land in farms or ranches. Est. pop. July 1, 1967, was 639,000.

North Dakota led the nation in production of spring and durum wheat, rye, barley and flaxseed; it was 5th in oats. Farm receipts for 1967 totaled \$727,034,000, more than half from its huge grain crops. In 1968 there were 2,132,000 cattle on farms.

Mineral production in 1967 was valued at \$97,729,000, a drop of 4%, mainly caused by a 6% drop in the value of oil produced, \$64,902,000; petroleum, natural gas and natural gas liquids account for 80% of the value of all minerals produced. Others include coal (lignite), uranium, vanadium, clays.

Tourism provided an est. \$60,000,000 in 1967.

There are 66 state parks and historic sites. The International Peace Garden, on a 2,200-acre tract extending across the border into Manitoba, commemorates the friendly relations between the U. S. and Canada. The state is known for its waterfowl, grouse and deer hunting, and bass, trout and northern pike fishing. Lake Sakakawea, formed by the Garrison Dam across the Missouri River, is 609 sq. mi. in area.

A museum with exhibits of pioneer life, the Northern Plains Indians and natural history of the area, is maintained by the State Historical Society on the State Capitol grounds, Bismarck.

Explorations in what is now North Dakota were made as early as 1738-1740 by French-Canadians. The Lewis and Clark expedition (1804-1806) passed through the territory and established Fort Mandan. With South Dakota and parts of Montana and Wyoming it comprised Dakota Territory, organized Mar. 2, 1861. It became a separate state Nov. 2, 1889.

Fort Abraham Lincoln, now a state park near Mandan, was the base from which Col. George Custer set out in 1876 on the campaign which ended in the deaths of Custer and 5 companies of the 7th Cavalry at the hands of Sioux Indians at the Little Big Horn in Montana.

Ohio

Buckeye State

CAPITAL: Columbus. **AREA:** 41,222 sq. mi., rank, 35th. **POPULATION:** (1960 Census), 9,706,397, rank, 5th. **MOTTO:** With God, All Things Are Possible. **FLOWER:** Scarlet Carnation. **BIRD:** Cardinal. **TREE:** Ohio Buckeye. **ADMISSION:** 17th.

Ohio is the nation's 3rd greatest industrial state; it ranks among the wealthier states in livestock and crop receipts, and is a leader in output of lime, coal and coke.

It leads the U. S. in a variety of products: tires, machine tools, playing cards, business machines, glassware, printing inks, clay and metal products. Industrial expansion continues at a rapid pace; in 1967 new capital invested in manufacturing totaled \$2.3 billion, a record for the state.

Total value added by manufacturing was \$18.4 billion in the 1965 Survey of Manufactures. Of this, autos, aircraft, boats and parts accounted for \$2.9 billion; iron, steel and other metals, \$2.7 billion; machinery, esp. industrial, \$2.6 billion; electrical machinery, esp. household appliances, \$1.7 billion. Also important are hardware, dairy and meat products, tires and other rubber and plastic products, chemicals.

Farm products were valued at over \$1.2 billion in 1967, more than two-thirds from livestock products. Ohio is the nation's largest producer of hot-house tomatoes and ranks high in milk, corn, grapes, clover, hogs, oats, soybeans and others.

Mineral production for 1967 was valued at a record \$495,118,000, with the largest part coming from bituminous coal. Ohio was the top state in lime production, 2nd in clays, 3rd in salt, sand and gravel. Among other products are cement, natural gas and gypsum.

Tourism produced an est. \$2.8 billion in 1967. Est. pop. July 1, 1967, was 10,462,000.

There are 71 state parks, over 275 roadside parks, and many historic memorials including Fallen Timbers Battlefield, prehistoric Indian mounds and the restored first settlement, Schoenbrunn (1772). The American Trapshooting Tournament is held annually at Vandalia. The state is served by 10 major railroads, 13 airlines and busy ports on Lake Erie and the Ohio River.

There are 100 institutions of higher learning, including Miami (Ohio), Oberlin, Ohio State, Antioch, Kenyon, Ohio Wesleyan, Wittenberg, Ohio Univ., Heidelberg, Case Institute, Western Reserve.

George Rogers Clark defeated the Indians at Pointe, 1780; thereafter Ohio had British-Indian raids and battles; Gen. Anthony Wayne defeated Indians at Fallen Timbers Aug. 20, 1794, imposed Treaty of Greenville, 1795. Oliver Hazard Perry defeated British on Lake Erie near Put-in-Bay, Sept. 10, 1813. As governor of Northwest Territory, Gen. Arthur St. Clair sat at Marietta (1789) and Cincinnati (1791). Ohio became a state in 1803. Columbus became seat of government in 1816.

Toledo, on Lake Erie, 4th largest Ohio city, is a major port, handling more than 38,000,000 tons annually. It is a center for bituminous coal shipments. Its glass industry has net sales of over \$1 billion a year. Its oil refineries handle up to 8,000,-

000 bbls. of crude. It is the home of the Kaiser Jeep Corp. It is the largest manufacturing center for motor car accessories. Est. pop. 1967, was 392,733.

The Toledo Museum of Art has paintings by El Greco, Velasquez, Goya, Holbein, Rembrandt, Cezanne, Gauguin, Van Gogh, Picasso, Samuel F. B. Morse, Gilbert Stuart, Benjamin West, etc.; ancient and modern sculpture, mummies and extensive glass collections. The Toledo Zoo has about a million visitors a year.

In Canton, the Pro Football Hall of Fame has a museum, library and daily movies; the Stark County Historical Society has science, industry and historical museums.

(See also Index for Akron, Cincinnati, Cleveland, Columbus, Dayton.)

Oklahoma

Sooner State

CAPITAL: Oklahoma City. **AREA:** 69,919 sq. mi., rank, 18th. **POPULATION:** (1960 Census), 2,328,284, rank, 27th. **MOTTO:** Labor Omnia Vincit—Labor Conquers All Things. **FLOWER:** Mistletoe. **BIRD:** Scissortailed Flycatcher. **TREE:** Redbud. **SONG:** Oklahoma. **ADMISSION:** 46th.

Most of Oklahoma is a great, rolling plain sloping S and E with a mean altitude of 1,300 ft. The Ozarks, in the NE, the Boston Mtns. in the E and the Ouachita Mtns. in the SE are heavily wooded. In the western Panhandle the land rises toward the Rockies with Black Mesa, 4,973 ft., the highest point.

Oil, wheat and cattle are the main ingredients of Oklahoma's economy, and oil is by far the richest.

The state's output of oil was valued at \$694.-710,000 in 1967, up 6% from the previous year, accounting for 70% of the total value of the state's mineral production, and ranking it 4th highest in the U. S.

Natural gas was another large income producer, providing \$203,203,000, or 20% of the total mineral value. Other minerals include helium, in which the state ranks 3rd, zinc, gypsum, cement, lead, coal.

Oklahoma's rich plains produced the nation's 3rd largest winter wheat crop in 1967 and the state ranked 5th in sorghum. Its cattle herd was the nation's 7th largest. Total income from farms was \$825,011,000, more than half from livestock products.

Much of the manufacturing industry is based on processing of the state's own wheat, meat and oil, but diversification is increasing. Value added by manufacturing totals over \$1 billion annually. Important lines, in order of value added, are food products (especially meat and flour), petroleum and coal products, machinery (especially construction and oil tools), metal products.

Est. pop. July 1, 1967, was 2,496,000.

There are 26 colleges and universities and 15 junior colleges. The state is served by 7 major railroads and 5 airlines. Attractions include 21 state parks, large lakes and reservoirs such as Eufaula (104,000 acres), Lake Texoma (93,080 acres); Ouachita National Forest (176,000 acres), the Will Rogers Memorial, rodeos, bass fishing and quail hunting.

The Will Rogers Memorial, Claremore, has collections of the great humorist's saddles and ropes, as well as trophies; his tomb is also here. In Anadarko, the Southern Plains Indian Museum and Crafts Center exhibits Indian arts and has a crafts sales shop. The Weolcar Museum near Bartlesville has 55,000 exhibits in a panorama of New World history, and a collection of paintings of the West.

The restored Fort Gibson Stockade, with many of the original buildings, near Muskogee, was erected 1824 and was the army's largest outpost in the Indian lands.

The Philbrook Art Center, Tulsa, has paintings by European and American masters, collections of Indian and Spanish cultures, and conducts an annual national competition for artists of Indian or Eskimo extraction, exhibited each May and June.

Also in Tulsa, the Thomas Gilcrease Institute has paintings by Remington, Catlin, Russell, Bierstadt, Meran, Copley, Sully, Homer, Eakins, etc., sculpture and Indian artifacts.

The 1st permanent white settlement in the area was made in 1796 by Maj. Jean Pierre Chouteau on the site of present-day Salina.

Part of the Louisiana Purchase, 1803, Oklahoma was known as Indian Territory (but was not given territorial government) after it became the home of the Five Civilized Tribes—Cherokee, Choctaw, Chickasaw, Creek and Seminole—1828-1846. The land was also used by Comanche, Osage and other plains Indians. As white settlers pressed west, land was opened for homesteading by runs and lottery, a run being a race for a claim at a specific time. The first run took place Apr. 22, 1889, the most famous was the run to the Cherokee Outlet, 1893. The portion thus opened was organized as a Territory; this and Indian Territory were joined by Congress in the State of Oklahoma, admitted to the Union Nov. 16, 1907. Oklahoma's Indian population (1960 Census) was 64,689, 2nd to Arizona.

(See also Index for Oklahoma City.)

Oregon

Beaver State

CAPITAL: Salem. **AREA:** 96,981 sq. mi., rank, 10th. **POPULATION:** 1,768,687 (1960 Census), rank 32nd. **MOTTO:** The Union. **FLOWER:** Oregon Grape. **BIRD:** Western Meadow Lark. **COLORS:** Navy blue and gold. **FISH:** Chinook salmon. **TREE:** Douglas Fir. **SONG:** Oregon, My Oregon. **ADMISSION:** 33rd.

Oregon is rich in timber, fish and wildlife, water power and scenic beauty, with lofty mountain ranges, deep river gorges and broad, fertile valleys.

Half of Oregon, or about 30,000,000 acres, is thickly forested and the state leads the nation in value of forest products, over \$1.5 billion a year. Production of lumber, paper and other forest products provides full-time jobs for about 85,000 workers and accounts for over 50% of the state's economy.

Also important are food products, fabricated metals and machinery. Value added by manufacture is over \$1.8 billion a year.

Agriculture is a large industry; the average number of agricultural workers was 60,200 in 1967. Farm receipts for the year totaled \$530,133,000, 56% from crops, the rest from livestock. Oregon is 1st among the states in pears and sweet cherries, 2nd in hops, 7th in turkeys, 12th in sheep.

Stone, nickel, cement, lime and pumice are important in mineral production, which was valued at \$77,259,000 in 1967.

The commercial fish catch, including salmon, tuna, halibut, sole, cod and shellfish, is worth over \$11,000,000 a year.

Tourism is also an important industry, est. at over \$253,000,000 annually. There are 210 state parks and both state and national forests. Crater Lake, a national park, is a body of sapphire blue water in a former volcano, 6 mi. in diameter and 1,932 ft. deep—deepest lake in the U. S. Fort Clatsop National Memorial includes a replica of the fort in which the Lewis and Clark expedition spent the winter of 1805-06. Oregon Caves National Monument contains stone waterfalls. Skiing and the annual Pendleton Round-Up are other attractions. By 1972, Oregon will spend \$730,000,000 on highway expansion. Mt. Hood, 11,235 ft., is the highest point in the state.

The Columbia River brings ocean shipping to Portland, 100 miles inland but one of the Pacific Coast's principal ports, and to other river ports. The Bonneville Power Administration, a federal agency, delivers electric power from 21 federal dams in the Pacific Northwest to 141 public and private utilities and industries. Seven more dams, under construction, will have a capacity of 3,605,000 kw.

Oregon has 39 colleges and universities and is served by 5 major railroads and 13 airlines.

The Univ. of Oregon in Eugene has a Museum of Art with Oriental, Pacific Northwest and other art collections. It also has a Museum of Natural History.

Est. pop. July 1, 1967, was 1,999,000.

Capt. Robert Grey, in the Columbia, discovered the river named after his ship May 11, 1792, and claimed the area for the U. S. President Jefferson sent the Lewis & Clark Expedition to the area, 1804-06. John Jacob Astor's fur depot, Astoria, was founded in 1811.

A provisional government was established in Champagoe, May 2, 1843, and U. S. title was established in 1846 in a settlement of U. S. and British claims to the area. Oregon became a state Feb. 14, 1859.

(See also Index for Portland.)

Pennsylvania

Keystone State

CAPITAL: Harrisburg. **AREA:** 45,333 sq. mi., rank, 33rd. **POPULATION:** (1960 Census), 11,319,366, rank, 3rd. **MOTTO:** Virtue, Liberty and Independence. **FLOWER:** Mountain Laurel. **BIRD:** Ruffed Grouse. **TREE:** Eastern Hemlock. Second of Original 13 States to ratify Constitution.

Pennsylvania has extensive mineral resources and fertile farmlands, is a leader in manufacturing and boasts a wealth of historic landmarks and scenic attractions. Est. pop. July 1, 1967, was 11,626,000.

Roughly rectangular in shape, Pennsylvania has prosperous farmlands in the SE and the W; through the center, running NE-SW, are parallel mountain ridges with valleys between. Highest point is Mt. Davis in the SW, 3,213 ft.

A third of the nation's steel plants are in Pennsylvania. It ranks 1st in iron and steel production with 24.4% of the U. S. total. Mill and factory products are many and varied; value added by manufacturing was est. at \$17 billion for 1965. Metals, \$3.1 billion, led, followed by dairy, beverage, candy and other food products, \$1.4 billion; electrical machinery, \$1.4 billion; machinery, \$1.3 billion, chemicals, metal products, transportation equipment, clothing.

The state ranked 1st in manufacturing of shoes in 1966 with 90,590,000 pairs.

Pennsylvania produces almost all of the nation's anthracite coal; it ranked 2nd in bituminous coal in 1967. Also important are stone, cement, natural gas, petroleum, clays, zinc, iron, gold, cobalt. Total mineral production value for 1967 was \$909,682,000.

Prosperous farms, such as those in the Pennsylvania Dutch country in the SE, increased total livestock and crops receipts in 1967 to \$913,447,000, much of it from dairy and poultry products.

The state ranks 1st in sausage products, scrap-ple, pretzels, cigar-filler tobacco, plantation-grown Christmas trees; 2nd in ice cream, 4th in grapes, 5th in milk and apples, 6th in peaches, 7th in chickens. Forest products are worth over \$1 billion annually.

The Commonwealth is rich in historic areas, including Valley Forge and the Gettysburg Battlefield, both national shrines. The Articles of Confederation, the Declaration of Independence and the Constitution were all adopted in Philadelphia.

There are more than 150 state and federal parks, recreation areas and historic sites. Scenic attractions include the Delaware Water Gap in the east and the 1,000-ft. deep Pine Creek Gorge in the north. Dutch folk festivals, county fairs, and fall foliage in the Poconos draw many visitors.

Valley Forge State Park, 22 mi. NW of Philadelphia, preserves the site of Washington's encampment during the winter of 1777-78; of 11,098 soldiers, close to 3,000, ill-equipped, died during the bitter weather; there is a museum, restored buildings, etc.

Longwood Gardens, near Kennett Square, include conservatories and rock, heather, flower and water gardens; arboretum, illuminated fountains, open-air theater; open every day of the year.

Lancaster County and nearby areas in the southeast are known as Pennsylvania Dutch Country. Descendants of early German (Deutsch) and Swiss settlers still maintain many of the early customs and "old world" culture which make their farms, festivals and market places attractive to tourists.

The William Penn Memorial Museum, Harrisburg, has collections of folk art, ironwork, glass, pewter, china, textiles, stage coaches, sleighs; replicas of artisans' shops, period rooms; fine arts exhibits and a planetarium.

There are 131 institutions of higher learning including Univ. of Pennsylvania (founded 1740), Univ. of Pittsburgh, Carnegie-Mellon-Univ., Bryn Mawr, Swarthmore, Lehigh, Lafayette, Dickinson, Drexel Institute, Temple, Villanova, Bucknell, Penn State, Duquesne.

First permanent settlement was in 1643 on Tinicum Is., near Chester, as part of New Sweden. In 1655, the Dutch took over; in 1664, the English. In 1681, Charles II granted land to Wm. Penn as payment for debts owed Penn's father. Penn made a treaty with the Indians, 1682, and called the land Pennsylvania (Penn's Woods) in honor of his father.

(See also Index for Philadelphia, Pittsburgh.)

Rhode Island

Little Rhody

CAPITAL: Providence. **AREA:** 1,214 sq. mi., rank, 50th. **POPULATION:** (1960 Census), 859,488, rank, 39th. **MOTTO:** Hope. **FLOWER:** Violet. **BIRD:** Rhode Island Red. **TREE:** Red Maple. **SONG:** Rhode Island. Thirteenth of Original 13 States to ratify Constitution.

Rhode Island is the smallest of the 50 states but has the longest official name: State of Rhode Island and Providence Plantations. It is not an island, although its Narragansett Bay, extending from the Atlantic 28 mi. inland, contains many islands, the largest of which is named Rhode Is. Highest point, Jerimoth Hill in Providence, is 812 ft.

Tiny Rhode Island is densely populated and highly industrialized. Population per sq. mi. of land (1960 Census) averaged 812.4, highest of the 50 states. But, by the July 1, 1965, Census pop. est. (920,000), Rhode Island pop. per sq. mi. was 869.6, 2nd to New Jersey which had 891.1.

Est. pop. July 1, 1967, was 901,000.

Industries show more than \$1.1 billion in value added annually by manufacturing, with textiles accounting for about 17% of that figure. Until 1940, textile mills, dating back to Samuel Slater's 1790 cotton mill, employed more workers than all other Rhode Island industries put together. Employment in the mills has fallen off sharply in recent years, but jobs in other areas have increased. The state also pioneered in jewelry and silverware manufacture and these are still 2nd to textiles in value added by manufacture followed by metals, machinery and rubber and plastics.

Rhode Island's recent economic gains, replacing with other industries the decline in its textile mills, have been dramatic; from 1947 to 1958, unemployment had been almost double the national average; by 1966, the state's unemployment rate fell below the nation's—3.7% for Rhode Island, 3.8% for the U. S.

Only 1% of the labor force is engaged in farming, and farm receipts in 1967 totaled \$20,353,000. Dairy and poultry (notably Rhode Island reds) are the most important lines; potatoes and apples are principal crops. The fish and shellfish catch is valued at over \$5,300,000 annually.

There are 16 colleges and universities, including Brown Univ. (1764), and 3 junior colleges. The Naval War College and Hq. of the Atlantic Cruiser-Destroyer Force are at Newport. A major Naval Air Station is at Quonset Point. Tourism produces about \$35,000,000 annually.

Rhode Island is distinguished historically for its battle for freedom of conscience and action, begun by Roger Williams, founder of Providence, exiled for religious dissent from Mass. Bay Colony, 1636. Wm. Coddington, John Clark, other religious exiles founded Pocasset, now Portsmouth, 1638, and Newport, 1639. First Baptist church in U. S. at Providence, 1638. Rhode Island gave protection to Quakers, 1657; to Jews from Holland, 1658.

Battle for individual rights brought resistance to British impressment of seamen, 1764, and to unjust taxation by burning of revenue vessel Gaspee, 1772. Rhode Island denounced allegiance to British King, May 4, 1776, before the Declaration of Independence. Ratified Constitution, May 29, 1790, 13th of original 13. Rhode Island had prohibition of liquor in 19th century, repealed it 1889, and refused to ratify the 18th amendment.

Providence is a major manufacturing and educational center and a port handling over 9,000,000 tons of cargo per year.

The Rhode Island Historical Society in Providence occupies the historic John Brown House, with rooms containing furniture by 18th Century cabinet makers and other items of local origin. Also in Providence, the Rhode Island School of Design has a museum with collections of classic art, 18th Century American furniture, 19th Century paintings, etc.

Newport became famous as the summer capital of society in the mid-19th Century, when industrial magnates built showy mansions. Easton's Beach and Bailey's Beach are noted resorts and Ocean Drive and Bellevue Avenue are showplaces. Touro Synagogue (1763) is the oldest in the U. S. and is a national historic site. Music festivals and water sports are among attractions.

The Newport Historical Society has a marine museum; extensive exhibits of silver, furniture,

china, etc.; a grist mill, several forts, a Seventh Day Baptist meeting house built 1729.

In Pawtucket, the Old Slater Mill Museum is a restored 1793 cotton mill, considered the 1st to spin yarn successfully in this country; it has demonstrations of hand spinning and weaving.

South Carolina

Palmetto State

CAPITAL: Columbia. **AREA:** 31,055 sq. mi., rank, 40th. **POPULATION:** (1960 Census), 2,382,594, rank, 26th. **MOTTO:** Dum Spiro, Spero—While I Breathe, I Hope, and Animis Opibusque Parati—Prepared in Spirit and Resources. **FLOWER:** Carolina (Yellow) Jessamine. **BIRD:** Carolina Wren. **SONG:** Carolina. **TREE:** Cabbage Palm. Eighth of the Original 13 States to ratify Constitution.

In South Carolina the land slopes from the Blue Ridge Mtns. in the NW, through thick pine forests and fertile farmlands with great fields of tobacco and cotton, to semi-tropic beaches and busy ports on the Atlantic. Deep-sea and inland fishing, hunting, the charm of ante-bellum houses, public gardens and famed shore resorts are among the state's attractions. Highest point is Sassafras Mtn. in NW, 3,560 ft.

Est. pop. July 1, 1967, was 2,603,000.

Efforts to diversify industry and expand foreign trade and tourism have been highly successful. Manufacturing is by far the major source of income; value added by manufacturing is about \$2.8 billion annually. The textile industry is still the most important, comprising 45% of the value of all manufactured products and employing the most workers. South Carolina's mills rank first in the nation in cotton consumption and in output of yard goods. They are also a major producer of synthetic and woolen goods. Other important lines, in order of value, are chemicals, apparel, paper, food products, machinery and stone-clay-glass products.

In 1967, new industrial investment was valued at \$305,797,000, providing an est. 11,176 new jobs.

Farms have become fewer but larger in recent years. South Carolina grows more peaches than any other state except California; it ranks 3rd in tobacco. Also grown are cotton, peanuts, sweet potatoes, pecans, etc. Poultry and eggs are important revenue producers; the state has large sales of chickens and turkeys. Total farm receipts for 1967 were \$414,792,000, two-thirds from crops, one-third from livestock.

The state's mineral production, mostly non-metallic, was up slightly in 1967 to a record \$46,029,000. It ranked 2nd among the states in vermiculite, used in insulation, and in kyanite, used in ceramics, and 4th in mica. Stone, including Winnsboro blue granite, accounts for 25% of income from the minerals industry.

Lumber for pulp and saw-timber is a major resource, especially the loblolly pine. Pulpwood production is over 2,800,000 cords annually.

Travel business was up 8% in 1967, travelers spending an est. \$307,000,000 in the state, \$189,000,000 of it by tourists from other states. Attractions include 28 state parks, famed gardens, historic sites, coastal islands and shore resorts such as Myrtle Beach, fishing and quail hunting. There are many historic churches and white-pillared houses in Charleston, Columbia and Beaufort. Gardens near Charleston include Middleton Place, Magnolia and Cypress; Brookgreen, south of Myrtle Beach, has 340 outdoor statues; other gardens are Edisto, at Orangeburg, Glencairn, at Rock Hill, Swan Lake, at Sumter.

Fort Sumter National Monument in Charleston harbor is the place where the Civil War began with bombardment of the fort by Confederate batteries, Apr. 12-13, 1861.

Charleston Museum, estab. 1773, has exhibits of interior paneling, furniture, arts, crafts and utensils from early South Carolina days.

The state has 32 institutions of higher learning, including the Univ. of South Carolina, Clemson and The Citadel. Columbia is the largest city, 97,433 (1960 Census).

South Carolina played an important part in American beginnings. First settled by Spaniards, 1526 and 1566, it was given by England's Charles I to Robert Heath as Carolina, 1629; had first royal governor, 1730. Charles Pinckney helped frame the Constitution of the U. S., 1787. The state was 1st to secede, Dec. 20, 1860; readmitted in 1868.

South Dakota

Coyote State, Sunshine State

CAPITAL: Pierre. **AREA:** 77,047 sq. mi.; rank, 16th. **POPULATION:** (1960 Census), 680,514, rank, 40th. **MOTTO:** Under God, the People Rule. **FLOWER:** American Pasque. **BIRD:** Ringnecked Pheasant. **SONG:** Hail South Dakota. **TREE:** Black Hills Spruce. **ADMISSION:** 39th or 40th with North Dakota.

South Dakota is a rectangle split down the middle by the Missouri and a chain of huge lakes formed behind dams on the river. In the E are rich farmlands which produce large crops of rye, oats and other grains. In the W are rolling grasslands which support millions of cattle and sheep, as well as vast acreages of wheat. In the far W are the Black Hills with Harney Peak, 7,242 ft., the highest point in the nation E of the Rockies.

With 55,000 farms occupying 93% of the land, agriculture is South Dakota's leading industry, and livestock produces over 80% of farm income. Mining and lumbering rank next in natural resource industries. Est. pop. July 1, 1967, was 674,000.

South Dakota led the nation in gold production in 1967 for the 19th consecutive year; the Homestake Mine in Lawrence Co. is the largest in the U. S. Gold accounted for \$21,000,000 of the state's total mineral production value, \$51,043,000 in 1967. The state also ranked 1st in beryllium and was 3rd in feldspar and 4th in lithium. Other products include petroleum, uranium, tin, vanadium.

The state ranked 1st in the U. S. in size of its rye crop, was 2nd to North Dakota in spring wheat, 2nd to Minnesota in oats, 3rd in durum wheat. The land supports twice as many sheep as people; in 1968 it had 1,382,000 sheep, ranking 5th among the states. It stood 8th in cattle and hogs.

With 130,000 acres under irrigation, plans were underway in 1966 to supply 300,000 acres in central South Dakota from the large Oahe Reservoir and to use Missouri River projects to provide for municipal water supplies.

Value added by manufacture is over \$157,000,000 a year; leading industries are food processing, electronics products, printing and publishing, stone-clay-glass products, in that order.

South Dakota has 8,400 sq. mi. of Indian Reservations. Indians, est. 28,000, are largely Sioux.

South Dakota has 17 institutions of higher learning—including seven state colleges and universities. There are 11 state parks and over 100 other state recreation areas totaling 90,000 acres. Pheasant, duck and geese are abundant. There are large herds of white-tail and mule deer and elk and about 3,800 bison in state and private herds.

Mount Rushmore in the Black Hills has an altitude of 6,200 ft. Sculptured on its granite face are the heads of Washington, Jefferson, Lincoln and Theodore Roosevelt. These busts by Gutzon Borglum are proportionate to men 465 ft. tall. Rushmore is visited by over 1,500,000 persons annually.

Other tourist attractions include Custer State Park, nation's largest state-owned park with the world's largest herd of bison; the Black Hills Passion Play, staged from June to Sept. in an amphitheater at Spearfish; the "Great Lakes of South Dakota," 4 reservoirs behind Oahe, Big Bend, Fort Randall and Gavins Point Dams on the Missouri with total water surface area of 571,000 acres. Out-of-state tourists spent an est. \$118,000,000 in South Dakota in 1965.

Fort Sisseton State Park, 18 mi. SE of Britton, is a restored Army frontier post of 1864. The Sioux Indian Museum in Rapid City features historic and contemporary arts of the Sioux and an Indian craft sales shop.

Discovery of this area dates back to 1743 when the first white men, the Verendrye brothers, Frenchmen, came in search of a route to the Pacific. South Dakota was admitted to the Union Nov. 2, 1889, together with its twin state, North Dakota, after 28 years as a part of Dakota Territory. South Dakota Historical Society asserts both states can be 39th or 40th state, since President Harrison intentionally shuffled the proclamations before signing.

Tennessee

Volunteer State

CAPITAL: Nashville. **AREA:** 42,244 sq. mi., rank, 34th. **POPULATION:** (1960 Census), 3,567,089, rank, 17th. **MOTTO:** America At Its Best. **FLOWER:** Iris. **BIRD:** Mockingbird. **TREE:** Tulip Poplar. **SONG:** Tennessee Waltz. **ADMISSION:** 16th.

Eastern Tennessee is rugged country with the Great Valley separating the Great Smoky Mtns., on the state's E border, from the Cumberland Mtns.; the Central Basin is a plateau area containing the famed Bluegrass country; from there the state slopes W to the bottomlands on the Mississippi River. Clingman's Dome, in the Great Smokies, is the highest point, 6,643 ft.

Est. pop. July 1, 1967, was 3,888,000.

Manufacturing has taken the top place in Tennessee's economy, with factory payrolls now twice farm income. Principal industries, in order of value, are chemicals, food products, apparel, textiles, paper, stone-clay-glass products, electrical machinery. Also important are furniture and other wood products.

There are 24 research centers including Oak Ridge, TVA and Arnold Engineering Development Center for airplane research. Value added by manufacture is over \$3.3 billion annually.

Farm income in 1967 included \$343,128,000 from livestock products and \$242,295,000 from crops. Tennessee ranked 6th among the states in tobacco production.

Lumbering is also important, providing full-time jobs to 40,000 persons. Wood products are valued at over \$500,000,000 annually and the state is known as the U. S. hardwood flooring center.

Tennessee produces a wide range of minerals and leads the other states in zinc and pyrites. Other products include silver, cement, copper, coal and phosphate rock. Total mineral production was valued at \$182,745,000 in 1967.

Tourism is of increasing importance; visitors spend about \$327,000,000 annually in Tennessee.

With six other states, Tennessee shares in Federal reservoir developments on the Tennessee and Cumberland River systems. About 41,000 sq. mi. are drawn on by Tennessee Valley Authority, which built Norris Dam on the Clinch River and operates a number of other dams in the state. Their reservoirs cover 756,321 acres.

Tennessee has a number of natural wonders—Reelfoot Lake, the reservoir basin of the Mississippi River formed by an earthquake (1811); Lookout Mountain a rock-faced promontory carved by the currents of the Tennessee River and overlooking Moccasin Bend, at Chattanooga; Fall Creek Falls, 256 ft. high; and the west half of Great Smoky Mountains National Park.

The American Museum of Atomic Energy in Oak Ridge has displays, models, lectures. The Hermitage, 13 mi. E of Nashville, home of Andrew Jackson, contains furniture and personal effects of the President. The Ancestral Home of James K. Polk, in Columbia, has portraits, furniture and various articles used by President Polk in the White House. The Parthenon, in Centennial Park, Nashville, is a full-size replica of the Parthenon of Athens, contains paintings and casts of the Elgin marbles.

There are 47 colleges and universities among them Univ. of Tennessee in Knoxville; Vanderbilt and Fisk in Nashville.

Tennessee is believed to have been reached by De Soto, 1541. La Salle built a fort 1682. It was part of the Carolina grant of Charles II and home of Cherokee tribes. During 1784-1788 settlers formed the "state" of Franklin, North Carolina ceded it to the Federal govt. 1790; it was part of the Territory South of the Ohio until it became a state in 1796. It seceded 1861, was the site of Civil War battles and was readmitted 1866.

(See also Index for Knoxville, Memphis, Nashville.)

Texas

Lone Star State

CAPITAL: Austin. **AREA:** 267,339 sq. mi., including 4,999 water, rank 2nd. **POPULATION:** (1960 Census), 9,579,677, rank 6th. **MOTTO:** Friendship. (Carrying out meaning of Indian word, Tejas—friends, from which Texas derives name). **FLOWER:** Bluebonnet. **TREE:** Pecan. **BIRD:** Mockingbird. **SONG:** Texas, Our Texas. **ADMISSION:** 28th.

Texas leads all other states in many categories, among them oil, cattle, sheep, cotton and rice. While these are basic to the Texas economy, manufacturing, as measured in terms of value added, makes an even greater contribution than either mineral output or farm receipts.

It is 2nd only to Alaska in area. Est. pop. July 1, 1967, was 10,873,000, ranking 5th among the states.

Texas oil fields produce 35% of the nation's petroleum; the state's 1967 output, 1.1 billion bbl., was valued at over \$3.3 billion. It is also the No. 1 producer of natural gas, asphalt, granite, natural gas liquids and magnesium chloride; it ranks 2nd in sulphur, salt, sodium sulphate, helium and bromine, and 3rd in cement and clays.

The total value of the state's mineral production is by far the greatest of any state, \$5.4 billion in 1967, up 8% from 1966 for a new record.

Texas stood 4th among the states in value of agricultural receipts, \$2.5 billion for 1967, 52% from livestock products, the rest from crops.

It led all states in number of cattle, 10,972,000 (about the same number as people) in 1968, and in sheep, 4,206,000; it ranked 3rd in turkeys and 5th in chickens. It grew the largest crops of cotton, rice and sorghum and was 3rd in peanuts, pecans and vegetables and melons. Also important are grapefruit, oranges, peaches, roses. Irrigation has reclaimed large arid areas in the W.

The Southwest Exposition & Fat Stock Show is held annually in Fort Worth; the nation's largest state fair in October in Dallas; the largest cattle auction in Amarillo.

Value added by manufacture was est. at \$12.4 billion for 1968, about 25% of it in chemicals, the largest industry—particularly petro-chemicals. Total manufacturing employment was 709,200 workers; largest employer is the transportation equipment industry with 95,400.

Texas is 4th among the states in commercial fishing with the annual catch valued at over \$42,000,000.

Tourists spend over a half billion dollars annually in Texas. There are 64 state parks, recreation areas and historic sites, including the Alamo, mountainous Big Bend National Park, Fort Davis National Historic Site and 4 national forests. Some 90 peaks reach altitudes of a mile or more; there are 640 miles of beaches on the Gulf of Mexico; there are numerous deep canyons and caverns.

The Texas Memorial Museum of the Univ. of Texas, Austin, has dioramas of oilfields, the Odessa, Tex., meteor crater, Texas mammals, Indian tribes; exhibits of fossils, minerals, guns, pioneers' tools; large relief maps illustrating the changing face of Texas through 250,000,000 years.

Texas has 56 colleges and universities and 47 junior colleges; enrollment 1964-65 was 223,000. Important schools include Univ. of Texas, Baylor, Rice, Southern Methodist, Texas Western, Texas A. & M., Texas Christian, Texas Technological, Univ. of Houston.

Texas is the only state that was an independent republic, recognized by the U. S., before annexation. Over it have flown the flags of Spain, France, Mexico, the Lone Star Flag of the Republic, the Confederate States and the United States.

The first Europeans to arrive in the area were Spaniards, Alonso de Pineda, in 1519, and Cabeza de Vaca, 1536, explored coastal areas; Francisco de Coronado crossed inland in 1541. The first missions were founded in 1659, 1690. Texas became a Spanish province in 1691 and a Mexican state in 1821.

American settlers revolted in 1835; after defeat at the Alamo, Mar. 6, 1836, they defeated the Mexicans at San Jacinto, Apr. 21, 1836. They formed the Republic of Texas and, in 1845, voted for annexation to the U. S. Texas was admitted as a state Dec. 29, 1845. It seceded and joined the Confederacy Feb. 1, 1861. It freed all slaves June 19, 1865, and was readmitted to the Union Mar. 30, 1870.

(See also Index for Dallas, Houston, San Antonio.)

Utah

Beehive State

CAPITAL: Salt Lake City. **AREA:** 84,916 sq. mi., rank, 11th. **POPULATION:** (1960 Census), 890,627, rank, 38th. **MOTTO:** Industry. **FLOWER:** Sego Lily. **BIRD:** California Gull. **TREE:** Blue Spruce. **EMBLEM:** Beehive. **SONG:** Utah We Love Thee. **ADMISSION:** 45th.

Wrested from the wilderness by Mormon settlers in the mid-19th Century, Utah is for the most

part a mountainous area, broken by fertile irrigated valleys, several deserts and two large lakes, Great Salt Lake in the N and Lake Powell in the S.

Great Salt Lake is 4,200 ft. above sea level, but has no known outlet. Its salt density varies from 20 to 25%, 2nd only to that of the Dead Sea; it covers more than 1,500 sq. mi.; it is crossed by a 13-mi., rock-fill, railroad causeway. Lake Powell, created by construction of the Glen Canyon Dam on the Colorado River just over the border in Arizona, is 186 mi. long, most of it in Utah. Highest point in Utah is Kings Peak in the NE, 13,528 ft.

Est. pop., July 1, 1967, was 1,022,000.

Manufacturing has become the state's major industry, well ahead of mining, agriculture and tourism. Value added by manufacture in 1967 was \$720,000,000 with primary metals accounting for \$212,000,000 and transportation equipment \$145,000,000.

Utah is an important center for research and production of intercontinental missiles, rocket engines, solid fuel propellants, supersonic engines, navigational systems for long-range, high-speed aircraft and electronic components for military computers. It has divisions of Thiokol, Hercules Inc., Boeing, Marquardt, Litton, Sperry.

Utah is a storehouse of many minerals. It ranks 2nd among the states in production of gold, silver, copper, asphalt, molybdenum and magnesium chloride; 3rd in lead, carbon dioxide, vanadium and potassium salts; 4th in uranium. Value of all minerals produced in 1967 totaled \$360,017,000, a decrease from the previous year, mainly because of a nationwide copper strike.

The nation's largest open-pit copper mine at Bingham Canyon normally hires about 7,100 men and produces about 20% of newly-mined copper in the U. S. Operations are being expanded in a 4-year program. Two great copper smelters are operated by Kennecott and International. An electrolytic refinery produces copper 99.96% pure and has a capacity of 384,000,000 lbs. annually. Geneva Works of U. S. Steel has a capacity of 2,300,000 ingot tons of steel a year.

The state ranked 6th in number of sheep in 1968, 1,074,000. Crops include barley, sugarbeets, alfalfa, winter wheat, potatoes. Farm receipts in 1967 included \$145,182,000 from livestock products, \$43,550,000 from crops.

Over 67% of the land is owned by the Federal government.

More than 5,000,000 visitors annually spend about \$183,600,000 in the state.

Utah is a great recreational area, with 11,000 mi. of fishing streams and 147,000 acres of lakes and reservoirs, numerous winter sports areas and camp grounds. Natural wonders may be seen at Zion and Bryce Canyon National Parks and Dinosaur, Rainbow Bridge and Natural Bridges National Monuments. A new national park, Canyonlands, the Lake Powell Recreation Area and Flaming Gorge Dam are other attractions.

Works by Utah artists and archeological, botanical, mineral and fossil collections may be seen at the Brigham Young Univ. Collections in Provo.

The Latter-day Saints number 72% of the population of the state (1960 census). The Mormons reached Utah July 24, 1847.

Utah was organized as a Territory Sept. 9, 1850; admitted to the Union Jan. 4, 1896.

(See also Index for Salt Lake City.)

Vermont

Green Mountain State

CAPITAL: Montpelier. **AREA:** 9,609 sq. mi., rank, 43rd. **POPULATION:** (1960 Census), 389,881, rank, 47th. **MOTTO:** Freedom and Unity. **FLOWER:** Red Clover. **TREE:** Sugar Maple. **BIRD:** Hermit Thrush. **ANIMAL:** Morgan Horse. **SONG:** Hall, Vermont. **ADMISSION:** 14th.

Vermont, 1st state to join the Union after the original 13, was the home of the Green Mountain Boys who played heroic roles in several victories of the American Revolution. They took their name from the Green Mountains which form the N-S backbone of the state. There are rich marble quarries in the western part of the state and large granite beds in the E. The Connecticut River runs along the E boundary, Lake Champlain forms much of the W line; among the many lakes is Memphremagog which lies partly in Canada to the N. Seven peaks rise over 4,000 ft. with Mt. Mansfield, 4,393 ft., the highest.

Est. pop. July 1, 1967, was 416,000.

Vermont has long been known for its stoneworking, forest and dairy industries, but manufacturing and the recreation-tourist business have expanded greatly.

Improved highways and truck facilities are credited with aiding the industrial growth. Principal manufactured goods are machinery (including business machines), stone and clay products, lumber, furniture and paper. Value added by manufacturing in 1967 was an est. \$449,000,000.

Recreation is a \$164,000,000-a-year business. Skiing accounted for most of the growth, with spending by skiers jumping from \$14,000,000 in 1958 to \$70,000,000 in 1966-67. There are over 60 miles of ski lifts in the state and 46 ski areas including Stowe, Killington, Mt. Snow, Stratton, Bromley, Jay Peak and Sugarbush.

Vermont has 68 state parks and forests covering nearly 100,000 acres. The Long Trail is popular for hiking and camping. There is fishing for trout, salmon, bass, muskellunge, and hunting for deer and game birds.

Vermont produced 310,000 gallons of maple syrup in 1967, the largest amount of any state. Large milk and butter production accounted for 80% of the total value of farm receipts in 1967, \$139,629,000.

The state ranks high in output of marble, granite, limestone; it ranks 2nd in asbestos and 4th in talc. Total mineral production value for 1967 was \$26,542,000.

The Shelburne Museum, 7 mi. S of Burlington, preserves 35 early American buildings, including furnished homes, doctor's and dentist's offices, stagecoach inn; covered bridge, sidewheeler, old trains, folk art, etc.; Webb gallery of paintings by Rembrandt, Goya, Corot, Manet, Cassatt. The Bennington Museum displays early American glass, furniture, pottery and what is said to be the oldest Stars and Stripes flag in existence.

The Vermont area was visited by Samuel de Champlain, 1609, and had its first permanent settlement at Fort Dummer near Brattleboro, 1724.

Jurisdiction over the area was disputed by New Hampshire and New York. During the Revolution, the Green Mountain Boys under Ethan Allen took Fort Ticonderoga and under Seth Warner captured Crown Point; later they helped defeat the British in the Battle of Bennington and at Saratoga.

In 1777 the colonists declared their independence, adopted a constitution, the first giving universal manhood suffrage without property qualifications, elected a governor. They chose the name Vermont, suggested by Dr. Thos. Young, Philadelphia, from Vert Mont (Green Mountain). Vermont ratified U. S. Constitution Jan. 1791, entered Union Mar. 4, 1791. Vermonters were intense anti-slavery men and supported Lincoln over their native son Stephen Douglas.

Vermont has 19 institutions of higher learning, including Univ. of Vermont at Burlington, Middlebury College and Norwich Univ.

Virginia

Old Dominion

CAPITAL: Richmond. **AREA:** 40,817 sq. mi., rank, 36th. **POPULATION:** (1960 Census), 3,966,949, rank, 14th. **MOTTO:** Sic Semper Tyrannis. **Thus Always to Tyrants.** **FLOWER:** Flowering Dogwood. **BIRD:** Cardinal. **TREE:** Flowering Dogwood (Unofficial). **SONG:** Carry Me Back to Old Virginia. Tenth of the Original 13 States to ratify Constitution.

The Commonwealth of Virginia is famed for its colonial heritage, for the statesmen it produced, its historic homes and estates, and the great battlefields on which the fate of the nation was decided in both the 18th and 19th centuries.

It was first settled, 1607, at Jamestown by English colonists and named for Elizabeth I, called the Virgin Queen. It had the New World's 1st representative legislature, the House of Burgesses, 1619; this assembly was elected by male suffrage. Virginia was active in resistance to the British Stamp Act and it provided much of the leadership that led to American independence and the writing of the Constitution.

Virginia's coastal plain, the Tidewater, consists mostly of 4 peninsulas formed by Chesapeake Bay and the Potomac, Rappahannock, York and James Rivers. The central Piedmont plateau rises, toward the W, to the Blue Ridge Mts. Beyond the Blue Ridge and between it and the Alleghenies on the W border lies the Shenandoah Valley, a rich farming region. Highest point is Mt. Rogers in the SW, 5,729 ft.

Est. pop. July 1, 1967, was 4,533,000.

Manufacturing has grown steadily and is diversified; it provides jobs for 320,186 while agriculture employs 91,100. Total value added by manufacturing is est. at over \$3.5 billion annually with payrolls totaling \$1.8 billion. Wood products, including furniture, paper and lumber, provided jobs for 58,300 in 1965; finished wood output was valued at \$700,000,000. Other leading products are chemicals, processed foods, textiles, clothing, cigarettes, machinery and ships. Hampton Roads is the major port, a leader in bulk export tonnage.

Agriculture remains a vital factor in the economy. In 1967 Virginia ranked 3rd among the states in sweet potatoes, 4th in apples, 5th in tobacco. Other important crops are peanuts, peaches, corn. It ranks 8th in turkeys; its Smithfield hams, from peanut-fed hogs, are famous. Farm receipts for 1967 totaled \$519,916,000.

Coal provides most of Virginia's mineral wealth. Record-breaking production of the fuel accounted for more than half the value of the state's total mineral output for 1967, \$290,738,000. Also important are lime, zinc, stone, natural gas, cement.

The commercial fishing catch is valued at over \$20,000,000 annually.

With its wealth of historical attractions and recreational facilities such as Shenandoah National Park in the Blue Ridge Mts. and Virginia Beach, the state has a large tourist business, est. at over \$800,000,000 a year. Tourism is 2nd to manufacturing and ahead of agriculture as a source of income.

Virginia was the birthplace of 8 Presidents: Washington, Jefferson, Monroe, Madison, Tyler, William H. Harrison, Taylor and Wilson—the last 3 elected from other states. It has many historic shrines, including Washington's birthplace, Wakefield; his home and grave at Mount Vernon; Jefferson's Monticello, near Charlottesville and the Univ. of Virginia he designed; Robert E. Lee's birthplace, Stratford Hall, and grave at Lexington.

Colonial Williamsburg is a restoration of the 18th Century buildings and living conditions in what was the capital of Virginia when Washington, Jefferson, Patrick Henry and George Mason were young men. There are more than 500 buildings, many of them the originals.

At Jamestown, 1st permanent English settlement, are foundations and ruins of early buildings, relics, statues and monuments and a nearby exhibit of early glassblowing.

At Yorktown, where the surrender of British Gen. Cornwallis to American and French forces, Oct. 19, 1781, virtually ended the American Revolution, may be seen Colonial buildings, the restored house in which terms of surrender were drawn up, earthworks and Revolutionary cannons.

In Fredricksburg, the James Monroe Law Office and Museum is the original building in which President Monroe practiced law in the 1780s; among other possessions is the desk at which he signed the Monroe Doctrine.

Appomattox Court House National Monument includes the rebuilt Wilmer McLean house in which Gen. Lee surrendered the Confederate Army of Northern Virginia to Lt. Gen. Ulysses S. Grant, Apr. 9, 1865.

Fort Monroe Casemate Museum has relics of the imprisonment in the fort of Jefferson Davis and Chief Black Hawk and of the battle between the Monitor and Merrimack. The Quartermaster Museum, Fort Lee, exhibits clothing, saddles, etc., of American soldiers from the Revolution on. The War Memorial Museum of Virginia, in Newport News, displays World War I and II weapons and equipment of many nations.

In Lexington are Washington and Lee Univ. and Virginia Military Institute, both closely linked with leaders and action in the Civil War. Also in Lexington is the George C. Marshall Research Library and Museum with displays of the life of the famed World War II general and statesman.

At Staunton is the Woodrow Wilson Birthplace, with memorabilia of his family. The Gen. Douglas MacArthur Memorial in Norfolk contains the general's sarcophagus, flags of 30 units he commanded, documents and murals of important events in his life.

Virginia seceded from the Union Apr. 17, 1861, and Richmond became the capital of the Confederate States. Virginia was readmitted Jan. 26, 1870.

There are 53 institutions of higher learning, including 31 colleges and universities, 7 professional schools and 15 junior colleges.

(See also Index for Norfolk, Richmond.)

Washington

Evergreen State

CAPITAL: Olympia. **AREA:** 68,192 sq. mi., rank 20th. **POPULATION:** (1960 Census), 2,853,214, rank, 23rd. **MOTTO:** Al-Ki, By and By. **FLOWER:** Coast Rhododendron. **TREE:** Western Hemlock. **BIRD:** American Goldfinch. **SONG:** Washington, My Home. **ADMISSION:** 42nd.

The state of Washington in the Pacific Northwest is a leader in many ways—in lumber, in fruit and other crops, and in aircraft production; its ports on Puget Sound are gateways to Alaska and the Far East; the great dams on the Columbia River provide power for production of aluminum and irrigation for the rich Columbia Basin.

The lofty Cascade Range splits the state N-S. To the W. the Puget Sound lowlands support dairy, poultry and truck-farming; in the extreme W. the Olympic Peninsula is studded with the peaks of the Olympic Mtns. and the Coast Ranges. On the E slopes of the Cascades are the state's great fruit orchards; further E, plateau country provides sheep and cattle lands and a rich wheat belt. Highest peak is Mt. Rainier in the Cascades, 14,410 ft.

The Columbia River cuts a zig-zag course across Washington from the NE, then flows W along the Oregon border to the Pacific.

Puget Sound has many deep harbors beside which Seattle, Tacoma, Everett and other great cities have grown.

Est. pop. July 1, 1967, was 3,089,000.

Manufacturing industries in Washington employ a quarter of a million workers with payrolls totaling \$2 billion and value added by manufacture est. at nearly \$3.5 billion a year. Transportation equipment, mostly aircraft but including ships and trucks, is itself a billion dollar industry. Other products, in order of value, are lumber, processed food, paper, chemicals and metals. The Atomic Energy Commission plant at Hanford produces nuclear fuels and electricity.

Washington's huge fruit and berry production and other crops place it 1st among the states in apples, hops, late summer potatoes, raspberries, blueberries, currants; 2nd in pears, sweet cherries, apricots, winter wheat, asparagus; 3rd in grapes, 4th in cranberries, 6th in peaches. Farm receipts for 1967 totaled \$767,531,000.

The commercial fishing catch is valued at over \$20,000,000 a year. Salmon accounts for half the total, followed by halibut and bottomfish.

Mineral production in 1967 was worth an est. \$68,577,000. Zinc, cement, uranium, gold, lead and silver were important.

Large aluminum reduction plants, using refined ore from out-of-state and low-cost electric power, expanded operations in 1967. Primary aluminum output was valued at \$378,728,833, compared to \$294,115,000 in 1966.

A series of great dams on the Columbia, including the massive Grand Coulee in the NE and Bonneville on the Oregon border, provide low-cost electric power.

More than half the state is in forests; one-sixth of the nation's standing sawtimber is in Washington. Towering Douglas firs and Ponderosa pines, western hemlocks and red cedars are among commercially important trees.

There are 37 institutions of higher education—15 colleges and universities, with Univ. of Washington, Washington State Univ. and Seattle Univ. the largest.

First visited by explorers in the late 18th Century, Washington was organized as a territory Mar. 2, 1853; admitted to the Union Nov. 11, 1889.

The state has two national parks, Mt. Rainier and Olympic National Park. Its state parks and national forests of nearly 10,000,000 acres have large hunting, fishing and recreation areas.

The Washington State Historical Society, Tacoma, has exhibits of the fur trade, Indian and Eskimo arts, and pioneer cabins, schoolhouse and covered wagon.

Tourism in 1967, it was est., would bring 8,600,000 visitors to the state, spending approx. \$300,000,000.

(See also Index for Seattle.)

West Virginia

Mountain State

CAPITAL: Charleston. **AREA:** 24,181 sq. mi., rank, 41st. **POPULATION:** (1960 Census), 1,860,421, rank, 30th. **MOTTO:** Montani Semper Liberi. **MOUNTAINEERS ALWAYS FREE.** **FLOWER:** Rosebay Rhododendron Maximum. **BIRD:** Cardinal. **TREE:** Sugar Maple. **ANIMAL:** Black Bear. **SONGS:** The West Virginia Hills. This Is My West Virginia, and West Virginia, My Home, Sweet Home. **ADMISSION:** 35th.

West Virginia's fortunes have long been based on those of the bituminous coal industry; the state leads all others in coal production with about 30% of the U. S. total. Increased output of coal and natural gas, plus growth in the chemical, steel, glass and tourist industries, have aided the economy. Highway development is underway.

The terrain is mountainous with Alleghenies running NE-SW in the eastern half of the state; the western half is a plateau sloping down to the Ohio River which forms most of the boundary on the W. Highest point is Spruce Knob in the NE, 4,862 ft.

Est. pop. July 1, 1967, was 1,798,000.

West Virginia was part of Virginia until that state seceded in 1861; delegates of 40 western counties adopted a state government at Wheeling. Nov. 27, 1861; West Virginia was admitted to the Union June 20, 1863.

Coal accounts for 80% of the state's total income from minerals and a substantial increase in coal output in 1967 set the pace for a 5% rise in total mineral income which reached \$936,093,000.

West Virginia produces and markets more natural gas than any other state east of the Mississippi. Also important are petroleum, salt, stone, cement, lime and clays.

Production of a wide variety of chemicals, based in the state's resources of salt brine, gas, oil and coal, and including synthetic fibers and plastics, dominates the manufacturing field, accounting for 43% of the \$1.8 billion in value added annually by manufacturing. Large plants are in the Ohio and Kanawha valleys, where electric power is abundant. The state is also a major producer of steel and iron, glass and pottery.

Investment in new plants and plant expansion reached a record \$437,000,000 in 1967, providing an est. 7,000 additional jobs.

Farm receipts totaled \$104,198,000 in 1967; the hilly terrain is not conducive to large-scale agriculture. Poultry, dairy products, cattle and sheep accounted for most of the receipts. Apples and peaches are profitable crops. About 65% of the state is in forests, including valuable hardwoods.

Tourism is being promoted and the influx of visitors grows at about 8% yearly. More than a million acres have been set aside for recreation in 20 state parks, 9 state forests, Monongahela National Forest and large reservoir recreation areas. Attractions include Harpers Ferry National Historical Park, mineral water resorts at White Sulphur and Berkeley Springs, trout fishing, turkey, deer and bear hunting.

Part of the town of Harpers Ferry is being restored to its condition in 1859, when John Brown seized the U. S. Armory. Still standing is the fire-engine house in which Brown and a score of followers were besieged and captured by a force of U. S. Marines under Robert E. Lee, then a U. S. colonel.

The State Museum in Charleston displays local relics and artifacts from prehistoric cultures (as early as 8,000 B.C.), Indians and pioneers, and the life of the area's people, past and present.

The Huntington Galleries, Huntington, has collections of 19th and 20th Century European and American paintings, furniture and decorative arts. The Oglebay Mansion-Museum displays Colonial furniture and 19th Century glassware.

There are 21 institutions of higher learning.

Wisconsin

Badger State

CAPITAL: Madison. **AREA:** 56,154 sq. mi., rank 26th. **POPULATION:** (1960 Census), 3,951,777, rank, 15th. **MOTTO:** Forward. **FLOWER:** Butterfly Violet. **BIRD:** Robin. **TREE:** Sugar Maple. **ANIMAL:** Badger. **FISH:** Muskegon. **WILDLIFE ANIMAL:** White-tailed deer. **SONG:** On, Wisconsin! **ADMISSION:** 30th.

Known as America's Dairyland, Wisconsin pro-

duces more milk and cheese than any other state and agriculture is a vital part of the state's economy. However, manufacturing, including processing of foods, has become the state's largest employer and biggest income producer.

Mining has declined with the near-cessation in 1965 of iron mining, but output of zinc and other minerals has increased. Reforestation has kept the paper and wood product industries important. There are 14 ports on Lakes Michigan and Superior with access to the St. Lawrence Seaway.

The state has an abundance of recreation resources; water and winter sports, hunting and fishing are among its attractions.

Est. pop. July 1, 1967, was 4,188,000. Highest point is Timms Hill in the N, 1,952 ft.

Wisconsin's rolling pastures and large crops support the nation's largest herd of milk cows, 2,147,000 in 1968; 80% of its farms are dairy farms. The state produces the most milk, cheese, malted milk, hay, alfalfa, peas; it ranks 2nd in butter, 3rd in oats, 6th in turkeys, 8th in corn, 9th in hogs.

Farm receipts for 1967 totaled \$1.4 billion, 8th highest in the U. S.

About 40% of income produced in Wisconsin comes from manufacturing and, with 493,000 factory employees, the state ranks among the top 12. Value added by manufacturing is over \$6.1 billion a year. Most important products, in order of value added, are: machinery, especially engines, turbines and construction; food products, including dairy, meat and beer; transportation equipment, particularly motor vehicles.

Mineral production for 1967 was valued at \$76,522,000, up 1%. Zinc, lime, cement and stone are important. Plans were underway to revitalize the iron ore industry through proposed production of pelletized low-grade ore.

Most of Wisconsin's timber production goes into pulp and paper, but the state is also a leading producer of hardwood, plywood and veneer.

Wisconsin has over 8,500 lakes, of which Winnebago is the largest, and fronts on both Lakes Michigan and Superior. Water sports, iceboating, and fishing for trout, bass and muskellunge are popular as are skiing and hunting for deer, bear and wildfowl. Public parks and forests take up one-seventh of the land area; there are 32 state parks, 9 state forests, two national forests. Other attractions include small towns which preserve Swiss, Scandinavian, German and other European cultures, visits to breweries and cheese factories, Indian festivals and the Dells (scenic gorges) of the Wisconsin River.

There are more than 40 institutions of higher learning, among them the Univ. of Wisconsin, Wisconsin State Univ., Marquette and Lawrence Univ.; Beloit, Ripon and Carroll Colleges.

The 1st European to visit the Wisconsin area was Jean Nicolet in 1634; he was followed by French explorers and missionaries and the land became part of New France. The French surrendered it to the British in 1763; the British ceded it to the U. S. in 1783, but were not completely dislodged until 1815. Wisconsin became a state May 29, 1848.

The Circus World Museum in Baraboo has over 100 circus wagons and other displays, and presents circus shows daily, early May-early Sept.

(See also Index for Milwaukee.)

District of Columbia

AREA: 67 sq. mi. POPULATION: (1960 Census), 763,956. MOTTO: *Justitia Omnibus*. Justice for All. FLOWER: American Beauty Rose. TREE: Scarlet Oak. BIRD: Wood Thrush. The City of Washington is co-extensive with the District of Columbia.

The District of Columbia is the seat of the Federal Government of the United States. It lies on the west central edge of Maryland on the Potomac, opposite Virginia. Its area was originally 100 sq. mi. taken from the sovereignty of Maryland and Virginia. Virginia's portion S of the Potomac was given back to that state in 1846.

The 23rd Amendment, ratified in 1961, granted residents of the District the right to vote for President and Vice President for the first time and gave it three members in the Electoral College. Residents cast the first such votes in Nov. 1964.

Wyoming

Equality State

CAPITAL: Cheyenne. AREA: 97,914 sq. mi., rank, 9th. POPULATION: (1960 Census), 330,066, rank, 48th. MOTTO: *Equal Rights*. FLOWER: Wyoming Paint Brush. BIRD: Western Meadow Lark. TREE: Plains Cottonwood (Balsam Poplar). SONG: Wyoming State Song. ADMISSION: 44th.

Wyoming's towering mountains and rolling plains provide spectacular scenery, grazing ranges for sheep and cattle, and a wealth of mineral resources. Most important industry is mining, including oil and gas; agriculture, including livestock, is 2nd; tourism is 3rd and manufacturing 4th. Est. pop. July 1, 1967, was 315,000.

Ranges of the Rockies cover the western two-thirds of the state; the eastern third is Great Plains country. Highest point is Gannett Peak in the W, 13,785 ft. The spectacular Teton Mtns. lie S of Yellowstone National Park, which is mostly carved out of Wyoming's NW corner.

Wyoming has large reserves of coal (deposits underlie 41% of the land), oil (it has 5% of the nation's proven reserves), natural gas (ranking 6th in the U. S.) and uranium (2nd in the U. S.).

Oil output for 1967 was valued at \$349,796,000, 66% of the total mineral production value for the year, \$530,792,000. The state ranked 1st in sodium carbonate production, 2nd in uranium, 3rd in sodium sulphate, 4th in vanadium. Also important are coal, clays and natural gas.

Wyoming is 2nd in the U. S. in wool production and in 1968 its sheep numbered 1,857,000, exceeded only by Texas; it also had 1,420,000 cattle. Principal crops include wheat, oats, sugarbeets, corn, potatoes, barley, hay, alfalfa. Livestock receipts for 1967 totaled \$166,794,000; crop receipts \$36,233,000.

Manufacturing includes petroleum and coal products, food products, soda ash, steel and iron, pumps and plumbing supplies. Value added by manufacturing is about \$94,000,000 annually.

Wyoming is a main source for 3 important river systems, the Missouri, Colorado and Columbia. Both power and irrigation are provided by a growing number of dams and reservoirs. Tourism produces an est. annual \$100,000,000.

Wyoming was organized as a Territory July 25, 1868; admitted to the Union July 10, 1890. Women were given the right to vote, for the first time in the U. S., by the Territorial Legislature in 1869.

Grand Teton National Park, with mountains 13,000 ft. high, comprises 299,326 acres; the National Elk Refuge covers 25,000 acres. Devils Tower, a cluster of rock columns 865 ft. high, became the first National Monument in the U. S. in 1906. Fort Laramie, partly preserved, partly restored, is a National Historic Site. The annual Cheyenne Frontier Days Celebration, last full week in July, is the state's largest rodeo. Hunting, fishing and skiing are other attractions.

The Buffalo Bill Historical Center in Cody has a museum with personal effects of William F. Cody (Buffalo Bill) and the Whitney Gallery of Modern Art with Indian art and paintings by Frederick Remington, Charles M. Russell, George Catlin, etc.

The Bradford Brinton Memorial Ranch, near Big Horn, has collections of western painting and sculpture, antiques, Indian arts, hunting trophies and firearms; open May 15-Sept. 15.

The University of Wyoming is in Laramie and there are six state community colleges.

(See Index for Yellowstone National Park.)

Congress governed the District 1878-1967 through 3 Commissioners appointed by the President. The Reorganization Plan of 1967 substituted a single Commissioner and assistant and a 9-member City Council, all likewise appointed by the President; budgetary funds are still appropriated by Congress; residents have no vote in local government (except for recently granted right to elect school board members) and no representative in Congress.

Est. pop. July 1, 1967, was 809,000.

Proposals for a "federal town" for the deliberations of the Continental Congress were made in 1783, four years before the adoption of the Constitution that gave the Confederation a national government. Rivalry between northern and southern delegates over the site appeared in the First Congress, meeting in New York in 1789. John Adams, presiding officer of the Senate, cast the

deciding vote of that body for Germantown, Pa. In 1790 Congress compromised by making Philadelphia the temporary capital for ten years. The Virginia members of the House wanted a capital on the eastern bank of the Potomac; they were defeated by the Northerners, while the Southerners defeated the Northerners attempt to have the nation assume the war debts of the 13 original states, the Assumption bill fathered by Alexander Hamilton. Hamilton and Jefferson arranged a compromise; the Virginia men voted for the Assumption bill, and the Northerners conceded the capital to the Potomac. President Washington chose the site in October, 1790, and persuaded landowners to sell their holdings to the government at \$25, then about \$66, an acre. The capital was named Washington.

Washington appointed Pierre Charles L'Enfant, a French engineer who had come over with Lafayette, to plan the capital on an area not over 10 miles square. The L'Enfant plan was considered grandiose, for streets 100 to 110 feet wide and one avenue 400 feet wide and a mile long on the

Potomac pastures seemed foolhardy. But Washington endorsed his plans. When L'Enfant ordered a wealthy landowner to remove his new manor house because it obstructed his vista, and demolished it when the owner refused, Washington had to step in and dismiss L'Enfant.

On Sept. 18, 1793, the cornerstone of the north wing of the Capitol was laid by President Washington. The occasion was expected to drum up sales of city lots, but there were few purchasers. Washington bought several lots. In the next few years Robert Morris and others invested. By 1799 the Senate wing of the Capitol had been roofed, the walls of the President's house were up and the Treasury building was ordered. On June 3, 1800, President John Adams moved to Washington and on June 10, Philadelphia ceased to be the temporary capital. The City of Washington was incorporated in 1802; the District of Columbia was created as a municipal corporation in 1871, embracing Washington, Georgetown and County of Washington.

OUTLYING U. S. AREAS

Commonwealth of Puerto Rico

Estado Libre Asociado de Puerto Rico

CAPITAL: San Juan. **AREA:** 3,435 sq. mi. **POPULATION:** 1960 Census, 2,349,544. **FLAG:** Three red, two white horiz. stripes; white star in blue triangle at staff. **SONG:** La Borinquena.

Puerto Rico is a hilly, tropical island lying between the Atlantic to the N and the Caribbean to the S; it is the easternmost of the West Indies group called the Greater Antilles, of which Cuba, Hispaniola and Jamaica are the larger units. It lies about 1,600 mi. SE of New York, 500 mi. N of Venezuela. It is roughly rectangular, 105 mi. long by 35 wide. Numerous small islands include Vieques, Culebra and Mona.

The soil of the coastal plain is fertile and there are many lush valleys, but there are dry areas in the S which need irrigation and an extensive system has been constructed by the government. The climate is mild, with a mean temperature of 76°; the mean maximum is 82° and the mean minimum 73°. Highest point is Cerro de Punta, 4,389 ft., near the island's center.

President Truman, on Aug. 5, 1947, signed an act giving Puerto Rico the right to choose its chief executive by popular vote. An act of 1950, affirmed by special election, June 4, 1951, permitted Puerto Rico to draft its own constitution. One similar to that of the United States was approved in a convention Feb. 4, 1952, and ratified by a popular vote March 3, 1952. President Truman signed, July 3, 1952, a Congressional resolution approving the new constitution, elevating Puerto Rico to the status of a free commonwealth associated with the United States, effective July 25, 1952. In 1961 Pres. Kennedy appointed two Puerto Ricans to important posts in his administration.

In a July 23, 1967, referendum, Puerto Ricans strongly favored continuation of commonwealth status. The vote was: commonwealth, 425,081; statehood, 273,315; independence, 4,205.

The Legislative Assembly consists of a Senate and House of Representatives, whose members are elected by direct vote every 4 years. Eight senatorial districts elect two Senators each, and 40 representative districts one member each; also 11 Senators and 11 Representatives at large. Its Resident Commissioner in the U.S. Congress does not have a vote. Puerto Ricans were granted American citizenship under the Organic (or Jones) Act of 1917. They do not vote for President, unless they move to the U. S., where they come under local laws.

Executive power is vested in a governor elected by direct vote. There are 9 executive departments each headed by a secretary: State, Justice, Education, Health, Treasury, Labor, Agriculture, Commerce, and Public Works. The governor is Roberto Sanchez Vilella, elected Nov., 1964. The judiciary is vested in a Supreme Court and lower courts.

The Commonwealth's "Operation Bootstrap" program for economic development has radically raised the standard of living; per capita income for 1967 was \$1,047, up \$279 from 1963.

Puerto Rico derives its largest income from manufacturing, \$678,200,000 in 1967 (up \$66,000,000 from 1966). Products include textiles and apparel, electrical and electronic equipment, plastics and chemicals. The chemical products include pharmaceuticals, cosmetics, ammoniated super-phosphate,

ethylene glycol and potassium sulphate.

Agriculture is a large but declining source of income, valued at \$182,200,000 for 1967, down 1%. Income from dairy and livestock products has surpassed that from sugar. Also important are tobacco, coffee, pineapples, coconuts, fruits and garden truck. Sugar derivatives include rum and molasses.

Mineral production was valued at \$56,862,000 for 1967, up 12%. Cement accounted for almost half the total value.

Gross capital investment in 1966 reached \$754,000,000; gross product, 1967, \$3.4 billion, both up.

Off-island trade is chiefly with the United States.

	Imports	Exports
1966	\$1,659,400,000	\$1,154,000,000
1967	\$1,799,000,000	\$1,321,000,000

While migration to the U. S. mainland after 1945 varied from 28,000 to 45,000 annually, flow was reversed in 1963 when Puerto Ricans returning to the island exceeded those leaving by 5,479; in 1967 the flow to the mainland was greater by 26,553. These changes are mainly caused by employment conditions, mainland and Puerto Rican. Unemployment rate on the island is usually over 11%. Est. pop. July 1, 1967, was 2,697,000. About 765,000 of Puerto Rican origin live in N. Y. City.

San Juan, with its international airport and many resort hotels, is the center of the ever-growing tourist industry which, in 1967, attracted 819,000 visitors who spent some \$163,000,000.

Spanish is the official language but most persons also speak English. Public school education is free and compulsory at the elementary school level; English is taught as a language and is compulsory in all 8 grades. Chief religion is Roman Catholicism.

Puerto Rico (or Borinquen, after the original Indian name Boriquen) was discovered by Columbus, Nov. 19, 1493. Ponce de Leon conquered it for Spain, 1509, and established the first settlement at Caparra, across the bay from San Juan. Ruled by Spain until 1898, it was occupied by Maj. Gen. Nelson A. Miles in the Spanish-American war and ceded to the U. S. by the Treaty of Paris, Dec. 10, 1898.

Canal Zone and Panama Canal

For Panama Canal cargo traffic see Index.

The Canal Zone has been, in effect, a U. S. Government reservation. It is a strip of land extending 5 mi. on each side of the axis of the Panama Canal, under jurisdiction of the U. S. by treaty with the Republic of Panama.

In 1967 Panama and the U. S. jointly announced that agreement had been reached on 3 new treaties. The treaties, in part, would provide for the U. S. to relinquish its sovereignty over the Canal Zone, for operation of the Canal by a binational authority, for increased payments to Panama to come from tolls revenue, and for political integration of the Zone with Panama.

Another major treaty provision would give the U. S. an option to build a new, larger, sea-level canal in Panama. A U. S. commission is studying the feasibility of a route to the east of the present canal and alternate routes through northern Colombia and along the Nicaragua-Costa Rica border. The proposed new treaties were awaiting finalization.

Negotiations for the new treaties were launched

by U. S. President Johnson and Panama President Robles after Panamanian riots protesting the 1903 and 1955 treaties caused the deaths of 21 Panamanians and 3 U. S. soldiers, Jan. 9, 1964. (See *Panama* in *Index* for further developments.)

The canal connects the Caribbean with the Bay of Panama on the Pacific. Because of the geographic loop made by the Isthmus of Panama, the Caribbean end of the canal, which could be called the eastern end, is actually further west than the Pacific end.

The Zone has an area of 553 sq. mi. of which 371 are land. Est. pop., 1967, was 55,600.

The Canal Zone Government and the Panama Canal Co. are the two operating agencies, both headed by an individual who acts as Governor of the Canal Zone and President of the Company. The governor is appointed by the President of the U. S. As governor he reports directly to the Secy. of the Army. As president of the company he reports to the board of directors, appointed by the Secy. of the Army. The Canal Zone Government maintains civil government. The Company operates the Canal, the Panama Railroad and a ship between New Orleans and the Canal Zone.

A French syndicate under Ferdinand de Lesseps failed to complete a canal, 1880-89, and a second French company failed in 1899. The U. S. bought their rights and offered Colombia compensation for a canal zone, but Colombia failed to ratify the treaty Oct. 1903. Panama declared itself independent of Colombia Nov. 3, 1903, and was recognized by President Theodore Roosevelt Nov. 6. American naval forces discouraged action by Colombia. On Nov. 13 Panama granted the Canal strip to the U. S. by treaty, ratified Feb. 26, 1904, compensation \$10,000,000, with annual payments of \$250,000 after 9 years, and a guarantee of Panama independence.

Under terms of the 1903 treaty, Panama granted the U. S. perpetual sovereignty over the Canal Zone "to the entire exclusion of the exercise by the Republic of Panama of any such sovereign rights, power or authority."

The canal was opened to traffic Aug. 15, 1914. In 1922 Colombia accepted \$25,000,000 from the U. S. plus special land transportation privileges, and agreed to recognize Panama. The U. S. increased its annual payment to Panama to \$430,000 and withdrew its guarantee of independence, and agreed to bar all commercial enterprise with the Zone except that directly concerned with shipping.

A further treaty regulating relations between the U. S. and Panama was signed Jan. 25, 1955, increasing the annuity paid Panama to \$1,930,000. In addition, the U. S. gave Panama about \$28,000,000 worth of real estate and buildings no longer needed by the Canal Zone administration. U. S. citizen and non-citizen employees were guaranteed equality of pay and opportunity. In addition, the U. S. agreed to build the high level bridge over the Pacific entrance to the Canal, opened Oct. 12, 1962, as a link in the Inter-American Highway.

THE PANAMA CANAL

The Panama Canal is a lock and lake canal, crossing the Isthmus of Panama from the Caribbean Sea in a southeasterly direction to the Bay of Panama of the Pacific Ocean. It is 50 mi. long from deep water to deep water, at least 300 ft. wide at the bottom of excavated channels, 110 ft. wide in lock chambers, which have a usable length of 1,000 ft. Depth varies, but is not less than 41 ft. Average transit time is 8 hours.

Gatun Dam blocks the Chagres river near its Atlantic mouth, creating Gatun lake, 23 $\frac{1}{2}$ mi. long, 85 ft. above sea level, about 45 ft. deep. Ships ascend to the lake by locks and then pass through Gaillard (formerly Culebra) Cut, 8 mi.

Virgin Islands

CAPITAL: Charlotte Amalie, on St. Thomas Is. **AREA:** 133 sq. mi. **POPULATION:** (1960 Census), 31,904; (1968 est.) 60,000. **FLOWER:** Yellow Cedar.

The Virgin Islands of the United States, an unincorporated territory administered by the Interior Dept., lie to the E of Puerto Rico at the western end of the Lesser Antilles, 1,629 mi. SE of New York. There are about 100 islands in the Virgins, of which the western 65 belong to the U. S.; the remainder are the British Virgin Islands.

The three largest and most populous of the U. S. islands are St. Croix, St. Thomas and St. John. Formerly the Danish West Indies, the 65

islands were purchased by the U. S. from Denmark for \$25,000,000 (effective Mar. 31, 1917) for defense purposes. The islands were discovered by Columbus in 1493. About 80% of the population is of Negro descent.

Mean winter temperature is 78°; summer, 82°. Virgin Islands National Park occupies about three-fourths of St. John, smallest of the three principal islands.

The inhabitants have been citizens of the U. S. since 1927, but do not vote in U. S. elections. Legislation originates in a unicameral house of 15 senators, elected for 2 years. The Governor is appointed by the President of the U. S.

Tourism is the largest industry and is growing. Principal exports are watch movements, jewelry, rum, wool textile products, thermometers, bay rum.

Minor Caribbean Islands

The **Swan Islands** lie 97 mi. NE of Honduras; **Great Swan** is 2 mi. by $\frac{1}{2}$ mi. with pop. of 28 (1960 Census), chiefly employees of the U. S. Weather Bureau, which operates an upper-air observing station, and the Federal Aviation Administration, serving air navigation and communications functions; **Little Swan**, $1\frac{1}{2}$ by $\frac{1}{2}$ mi., is uninhabited. They are classified as unincorporated territory of the U. S.; they have also been claimed by Honduras.

The **Corn Islands**, consisting of **Great Corn** and **Little Corn**, lie 30 mi. off the SE coast of Nicaragua, have a pop. of 1,872 (1960 Census), were leased by the U. S. in 1914 from Nicaragua for 99 years.

Quita Sueno Bank, **Roncador Cay**, **Serrana Bank** and **Seranilla Bank** lie in the Caribbean between Nicaragua and Jamaica. They are uninhabited. Colombia also claims sovereignty over them, and Honduras claims ownership of Quita Sueno and Roncador.

Navassa lies between Jamaica and Haiti, covers about 2 sq. mi., is reserved by the U. S. for a lighthouse.

American Samoa

CAPITAL: Pago Pago. Island of Tutuila. **AREA:** 76 sq. mi. **POPULATION:** (1960 Census): 20,051; (1968 est.) 26,000.

Blessed with spectacular scenery and delightful South Seas climate, American Samoa is the most southerly of all lands under U. S. ownership. It is an unincorporated territory consisting of 6 small islands of the Samoan group: Tutuila (where Pago Pago, the capital, lies by a crescent bay beneath tall mountains), Aunu'u, the Manua Islands (Tau, Olosega and Ofu), and Rose. Also administered as part of American Samoa is Swain's Is., 210 mi. to the NW, acquired by the U. S. in 1925. The islands are 2,300 mi. SW of Hawaii.

American Samoa became U. S. territory by a treaty with the United Kingdom and Germany in 1899, confirmed by local chiefs in 1900 and 1904. Pago Pago had been a U. S. Navy coaling station under an 1872 commercial treaty.

Western Samoa, comprising the larger islands of the Samoan group, was a New Zealand mandate and UN Trusteeship until it became an independent nation Jan. 1, 1962. (See *Index*.)

Tutuila has an area of 52 sq. mi. Tau has an area of 17 sq. mi., and the islets of Ofu and Olosega 5 sq. mi., with a population of a few thousand. Swain's Island has nearly 2 sq. mi. and about 100 population. Highest peak is Lata, on Tau Is., 3,056 ft.

About 70% of the land is forest. Chief products and exports are fish products, copra and handicrafts. Taro, bread-fruit, yams, coconuts, pineapples, oranges and bananas also are produced.

Formerly under jurisdiction of the Navy, since July 1, 1951, it has been administered by the Interior Dept, which appoints a Governor and a Secretary. It has a bicameral legislature.

The American Samoans are of Polynesian origin. They are nationals of the U. S.

Educational television was started in Sept. 1964, and serves as the core of education in Samoa's public schools.

Wake, Midway, Other Islands

Wake Island, and its sister islands, **Wilkes** and **Peale**, lie in the Pacific Ocean on the direct route from Hawaii to Hong Kong, about 2,000 mi. W of Hawaii and 1,290 mi. E of Guam. The group is $4\frac{1}{2}$ mi. long, $1\frac{1}{2}$ mi. wide and totals about 3 sq. mi.

The United States flag was hoisted over Wake Island, July 4, 1898, by Gen. F. V. Greene, commanding Second Detachment, Philippine Expedition. Formal possession was taken Jan. 17, 1899; Wake is administered by the Federal Aviation Administration which provides civil and military air traffic control.

The Midway Islands, acquired in 1867, are a group of two, Sand and Eastern, in the North Pacific, 1,150 mi. NW of Hawaii, with area of about 2 sq. mi., administered by the Navy Dept.

Johnston Island, SW of Hawaii, and Kingman Reef, S of Hawaii, are under Navy control.

Howland, Jarvis and Baker Islands, south of the Hawaiian group, uninhabited since World War II, are under the Interior Dept.

Palmyra is an atoll SW of Hawaii, 4 sq. mi. until 1959 administered by Honolulu.

Certain islands taken from Japan in World War II were retained by the U. S. as possible military bases with the understanding they would eventually be returned to Japan.

On June 26, 1968, these islands were returned to Japanese control and administration. They included: the Bonin Islands, with an area of about 40 sq. mi., S of Japan; the Volcano Islands, S of the Bonins, including Iwo Jima (about 8 sq. mi.), scene of the famous World War II battle; Marcus Island, about 1 sq. mi., E of the Volcanoes.

The 1963 agreement provided that the U. S. would continue the use of Loran navigational stations on Iwo Jima and Marcus.

Ryukyu Islands (Okinawa)

The Ryukyu Islands, 73 in number, lie in an arc stretching SW from Japan toward Taiwan (Formosa), between the North Pacific and the East China Sea. They have an area of 848 sq. mi. and pop. (1967) of 952,000.

Okinawa, largest of the group, has an area of 454 sq. mi. and population of 746,742 (1966). Independent for centuries, they paid tribute to both China and Japan until they were annexed in 1874 by Japan.

Okinawa was taken by U. S. troops during World War II, June 21, 1945. Administration of the islands was vested in the U. S. by the Japanese peace treaty (1951), effective Apr. 28, 1952. The Ryukyus are an important American base. The nearby Daito Islands, also formerly Japanese, are included in the administrative area.

Naha, Okinawa, is the seat of the U. S. civil administration and of the local Ryukyuan government. Administration is carried out by a High Commissioner, responsible to the U. S. Secretary of Defense. The local Ryukyuan government has a popularly elected legislature, a chief executive elected since Nov. 1968 by popular vote (previously chosen by the legislature) and an independent judiciary.

High Commissioner: Lt. Gen. F. T. Unger; Civil Administrator: Stanley W. Carpenter; Chief Executive: Seiho Matsuoka.

Statements by U. S. officials have indicated that the islands eventually may revert to Japanese jurisdiction. Some of the islands, the Amami group, were returned to Japan in 1953.

Sugar, pineapples, vegetables, and marine products are the main exports.

Guam

CAPITAL: Agaña. **AREA:** 209 sq. mi. **POPULATION:** (1960 Census) 67,044; (1968 est.) 101,000.

Guam, the largest of the Mariana Islands, now an unincorporated territory, was ceded to the U. S. by Spain in the Treaty of Paris, Dec. 10, 1898. It is 30 mi. long and 4 to 8½ mi. wide. Distance from Manila, 1,499 mi.; from San Francisco, 5,053 mi. Mean annual temp. is 81°, average annual rainfall, July to September, 70 in. The island is volcanic and mountains rise 700 to 1,329 ft. Highest peak is Mt. Lamlam.

In March, 1967, President Johnson visited the island for talks with Vietnam advisers.

Magellan discovered the group of islands, Mar. 6, 1521, and called them the Ladrões (thieves). They were colonized in 1668 by Spanish missionaries who renamed them the Mariana Islands in honor of Maria Anna, queen of Spain.

When Spain ceded Guam to the U. S. it sold the other Marianas to Germany. Japan obtained a League of Nations mandate over the German islands in 1919; in Dec. 1941 it seized Guam; the island was retaken by the U. S. in July 1944. Guam is a base for both the Navy and Air Force.

Guam is under the jurisdiction of the Dept. of the Interior. It is administered under the Organic Act of 1950, which provides for a governor, named for 4 years by the President of the U. S., a 21-member unicameral legislature, elected biennially by the residents, who are American citizens but do not vote for President. Guamanians are of primarily Chamorro (Micronesian) stock.

School attendance is compulsory. There are a Territorial College and a vocational school. English is the official language. Chief religion is Roman Catholicism.

Principal products are fruits and vegetables; virtually all other commodities are imported. Except for metal scrap, there are virtually no exports.

Islands Under Trusteeship

CAROLINES, MARIANAS, MARSHALLS

The U. S. Trust Territory of the Pacific Islands includes 3 major archipelagoes: the Caroline Islands, Marshall Islands and Mariana Islands (except Guam: See above). There are 2,141 islands, 98 of them inhabited; land area total 687 sq. mi. but the islands are scattered over 3,000,000 sq. mi. of Micronesia in the western Pacific, N of the Equator and E of the Philippines. Total pop. (1967 est.) was 91,448.

In 1885, many of the islands were claimed by Germany. Others, held by Spain, were sold to Germany at the time of the Spanish-American War, 1898. After the outbreak of World War I, Japan took over the islands and, after the war, League of Nations mandates over them were awarded to Japan.

After World War II, the United Nations assigned them (1967) as a Trust Territory to be administered by the U. S. They are under administration of the U. S. Interior Dept.

Among the noted islands are: Saipan and Tinian in the Marianas, scene of a bitter engagement when they were taken by the U. S. from Japan in World War II; the former Japanese strongholds of Palau, Peleliu, Truk and Yap in the Carolines; Bikini and Eniwetok, where U. S. nuclear tests were staged, and Kwajalein, another World War II battle scene, all in the Marshalls.

Most of the islands are volcanic and picturesque, with luxuriant vegetation, but only a few are self-sustaining. Principal exports are copra, trochus shells, fish products, handicrafts and vegetables.

In 1967 U. S. President Johnson proposed that a plebiscite might be held in 1972 to allow the Micronesians to decide their future government. Opinion on the islands was divided on whether to seek independence or affiliation with the U. S. Islanders complained that some projects, such as schools, hospitals and roads, had been delayed or postponed by Federal economy measures.

Disputed Pacific Islands

In the central Pacific, S and SW of Hawaii, lie 25 islands and atolls claimed by the U. S.; 18 of them are also claimed by the United Kingdom, and 7 by New Zealand. All are S of the Equator with the exception of Christmas Island.

Those claimed by the U. K. are:

The Line Islands, S of Hawaii, including Christmas, Flint, Malden, Starbuck and Vostok Islands and Caroline Atoll; only Christmas is inhabited. All are administered by the U. K.

Also, the Phoenix Islands, SW of Hawaii, including Canton and Enderbury Islands and Birnie, Gardner, Hull, McKean, Sydney and Phoenix Atolls. All are inhabited and administered by the U. K. except for Canton and Enderbury which are uninhabited and are under joint U. S. and U. K. administration. A U. S. missile tracking station on Canton was discontinued in Dec. 1967.

Also, the Ellice Islands, further to the SW, including Funafuti, Nukufetau and Nukulalala Atolls and Nurakita; all inhabited and all administered by the U. K.

Those claimed by New Zealand are:

The Union (Tokelau) Islands, S of the Phoenix group, including Nukunono, Atafu and Fakaofu Atolls. All are inhabited and administered by New Zealand.

Also, the Northern Cook Islands, E of the Unions, including Danger, Manahiki, Rakahanga and Penrhyn (Tongareva) Atolls. All are inhabited and administered by New Zealand.

Origin of the Names of U. S. States

Source: State officials, and a study by John P. Harrington, Bureau of American Ethnology, Smithsonian Institution, Washington, D. C.

Alabama—Indian for tribal town, later tribe, of the Creek confederacy.

Alaska—Russian version of Aleutian (Eskimo) word for Alaska Peninsula.

Arizona—Spanish version of Pima Indian word for "little spring place," identified as in Arizona Creek.

Arkansas—French variant of Kansas, a Sioux Indian name for south wind people.

California—Bestowed by the Spanish Conquistadores, being the name of an imaginary island, near the earthly paradise, in "Las Serges de Esplandian," a romance of chivalry written by Montalvo, 1510. Baja California (Lower California, Mexico) was first penetrated 1533. The state later was Alta (Upper) California.

Colorado—Spanish, red, first applied to Colorado River.

Connecticut—From Mohican and other Algonquian words meaning "long river place."

Delaware—Lord De La Warre, first governor of Virginia Company, entered bay, 1610. Name first applied to river, then to Indian tribe and state.

District of Columbia—For Columbus, 1791.

Florida—Named by Ponce de Leon on Pascua Florida, feast of flowers, Easter Sunday, 1513.

Georgia—For King George II of England by James E. Oglethorpe, colonial administrator, 1732.

Hawaii—Possibly derived from native word for homeland.

Idaho—Shoshone derivation. State calls it "light on the mountains."

Illinois—French for Illini or land of Illini, Algonquian word meaning men or warriors.

Indiana—Named because Indians lived there.

Iowa—A Sioux word, meaning "one who puts to sleep."

Kansas—Sioux word for south wind people.

Kentucky—Wyandot word for plain, originally applied to Kentucky Plains, Clark County.

Louisiana—Part of territory called Louisiana by LaSalle for French King Louis XIV.

Maine—From Maine, ancient French province.

Maryland—For Queen Henrietta Maria, wife of Charles I of England.

Massachusetts—From Indian tribe named after "large hill place" identified by Capt. John Smith as near Milton, Mass.

Michigan—Alouet, 1672, makes it designate a clearing, but later writers mentioned Chippewa micigama, large water.

Minnesota—From Dakota Sioux word meaning "clouded or milky" water of Minnesota River.

Mississippi—Probably Chippewa: mishi, large; zibi, river. Tonti wrote it Michi Sepe.

Missouri—Algonquian word, "canoe haver," applied to tribe on river which received their name.

Montana—Latin for mountainous.

Nebraska—From Omaha Indian name for Platte River, both meaning flat.

Nevada—Spanish, meaning snow-clad.

New Hampshire—Named 1629 by Capt. John Mason of Plymouth Council for county in England.

New Jersey—The Duke of York, 1664, gave a patent to Lord John Berkeley and Sir Geo. Carteret to be called Nova Caesaria, or New Jersey.

New Mexico—Spaniards in Mexico applied term to land north and west of Rio Grande.

New York—For Duke of York and Albany who received patent to New Netherland from his brother Charles II and sent an expedition to capture it, 1664.

North Carolina—In 1629 Charles I gave a large patent to Sir Robt. Heath to be called Province

of Carolana, from Carolus, Latin name for Charles. A new patent was granted by Charles II to Earl of Clarendon and others. Divided into North and South Carolina, 1710.

North Dakota—Dakota is Sioux for friend or ally.

Ohio—Indian, great, applied to river.

Oklahoma—Choctaw coined word meaning red man, proposed by Rev. Allen Wright, Choctaw-speaking Indian.

Oregon—In 1765 Maj. Robert Rogers proposed to George III to seek Northwest Passage by travel from Great Lakes to "a river called by the Indians Ouragan." In 1772 he spelled it Ourigan. In 1778 his associate, Jonathan Carver, wrote of "River Oregon or River of the West." In 1817 William Cullen Bryant wrote "where rolls the Oregon." In 1822 Rep. John Floyd (Va.) proposed creation of Oregon Terr. Wauregan is Algonquian for beautiful water. Presumably Rogers and Carver meant the Columbia.

Pennsylvania—William Penn, the Quaker, who was made full proprietor by King Charles II in 1681, suggested Sylvania, or woodland, for his tract. The king's government owed Penn's father, Admiral William Penn, £16,000, and the land being granted in part settlement, the king added the name Penn to Sylvania, against the desires of the modest proprietor, in honor of the admiral.

Puerto Rico—Spanish for Rich Port.

Rhode Island—Red island, first named by Adrian Block because of its red clay. Roger Williams suggested Island of Rhodes. His settlement, Providence Plantations, was also used.

South Carolina—See North Carolina.

South Dakota—See North Dakota.

Tennessee—From 1784 to 1788 this was the State of Franklin, or Frankland. Tannasi was the name of Cherokee villages on the Little Tennessee river.

Texas—Variant of word used by Caddo and other Indians meaning friends or allies, and applied to them by the Spanish in eastern Texas. Also written texias, tejas, teysas.

Utah—From a Navajo word meaning upper, or higher up, as applied to a Shoshone tribe called Utes. Spanish form is Yutta, English Uta or Utah. Proposed name Deseret, "land of honeybees," from Book of Mormon, was rejected by Congress.

Vermont—From French words Vert, green, and Mont, mountain. The Green Mountains were said to have been named by Samuel de Champlain. The Green Mountain Boys were Gen. Stark's men in the Revolution. When the state was formed, 1777, Dr. Thos. Young suggested combining vert and mont into Vermont.

Virginia—Named by Sir Walter Raleigh, who fitted out the expedition of 1584, in honor of Queen Elizabeth, the Virgin Queen of England.

Washington—Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, the name was changed to Washington because of the existence of the District of Columbia.

West Virginia—So named when western counties of Virginia rejected secession, 1863.

Wisconsin—An Indian name, spelled Ouisconsin and Misconsin by early chroniclers. Means "grassy place" in Chippewa. Congress made it Wisconsin.

Wyoming—The word was taken from Wyoming Valley, Pa., which was the site of an Indian massacre and became widely known by Campbell's poem, Gertrude of Wyoming. In Algonquin it means "large prairie place."

ACCESSION OF TERRITORY BY THE UNITED STATES

Florida	Mar. 30, 1822	No fixed date		
Indian (organized 1834)*				
Wisconsin	Apr. 20, 1836	July 3, 1836	May 29, 1848	12
Iowa	June 12, 1838	July 3, 1838	Dec. 28, 1846	7
Oregon	Aug. 14, 1848	Date of act	Feb. 14, 1859	10
Minnesota	Mar. 3, 1849	Date of act	May 11, 1858	9
New Mexico	Sept. 9, 1850	On President's Proclamation	Jan. 6, 1912	61
Utah	Sept. 9, 1850	Date of act	Jan. 4, 1896	44
Washington	Mar. 2, 1853	Date of act	Nov. 11, 1889	36
Nebraska	May 30, 1854	Date of act	Feb. 9, 1867	12
Kansas	May 30, 1854	Date of act	Jan. 29, 1861	6
Colorado	Feb. 28, 1861	Date of act	Aug. 1, 1876	15
Nevada	Mar. 2, 1861	Date of act	Oct. 31, 1864	3
Dakota	Mar. 2, 1861	Date of act	Nov. 2, 1889	28
Arizona	Feb. 24, 1863	Date of act	Feb. 14, 1912	49
Idaho	Mar. 3, 1863	Date of act	July 3, 1890	27
Montana	May 26, 1864	Date of act	Nov. 8, 1889	25
Wyoming	July 25, 1868	When others were qualified	July 10, 1890	22
Oklahoma	May 2, 1890	Date of act	Nov. 16, 1907	17
Hawaii	Apr. 30, 1900	June 14, 1900	Aug. 21, 1959	59
Alaska	Aug. 24, 1912	Nov. 5, 1912	Jan. 3, 1959	47

(a) Included present Ohio, Indiana, Illinois, Michigan, Wisconsin, eastern Minnesota; (b) as the State of Tennessee; (c) as the State of Ohio; (d) as the State of Louisiana; (e) organic act for Missouri Territory of June 4, 1812, became effective Dec. 7, 1812.

*Indian Territory was set aside in 1834 for the 5 civilized Indian tribes—Cherokee, Choctaw, Chickasaw, Creek and Seminole. In 1839 part of it was included in the Territory of Oklahoma. In 1906 Indian Territory and the Territory of Oklahoma were merged to form the state of Oklahoma.

American Territorial Expansion

When the War of the Revolution ended the 13 original states—Massachusetts, Rhode Island, Connecticut, New Hampshire, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina and Georgia had a land and water area of 892,135 sq. mi., comprising New England, all land from Canada to Florida and from the Atlantic to the Mississippi. At the request of Congress (acting under the Articles of Confederation) the states gave their unorganized land to the Congress, which passed the Northwest Ordinance of 1787, and formed Northwest Terr., north of the Ohio river and another territory south of it.

France originally occupied and fortified a large area from Canada to the Gulf via the Great Lakes and the Mississippi, which it lost to Britain by the Treaty of 1763 after the French and Indian War. Britain yielded this territory to the U. S. by the Treaty of Paris, 1783. After fighting Indians and British in border campaigns, the U. S. took possession July 11, 1796.

LOUISIANA PURCHASE

The first accession to the United States was the Louisiana Purchase, 827,192 sq. mi. west of the Mississippi. This was held by Spain until ceded to France in 1800, with the proviso that it go back to Spain if France gave it up. In order to free navigation on the Mississippi President Jefferson sent James Monroe and Robert R. Livingston to Paris to buy the Isle of Orleans (New Orleans) and West Florida, for which Congress voted \$2,000,000. Napoleon, defeated in San Domingo, offered the vast Louisiana area. The treaty was signed Apr. 30, 1803; Congress ratified it in October; the U. S. took possession at New Orleans Dec. 20, 1803. The U. S. paid \$11,250,000 (60,000,000 francs), assumed claims of Americans against France, \$3,750,000. Total cost \$15,000,000.

Nobody knew the exact boundaries. After Mar. 10, 1804, the U. S. divided the Purchase into the Territory of Orleans, later the state of Louisiana, and the Territory of Louisiana. Included in the Purchase were the present state of Louisiana west to the Sabine River plus the port of New Orleans; the present areas of Arkansas, Missouri, Nebraska, Iowa and South Dakota; North Dakota except the northeast corner, held by Britain until the treaty of 1819; Minnesota west of the Mississippi; Kansas except a small part in the southwest; Oklahoma except the Panhandle no-man's-land; parts of Colorado and Montana. Sometimes Wyoming was claimed and the territory was thought to have run as far as the Pacific coast, but U. S., Britain, Spain and Russia had conflicting claims and settled them by treaty.

SPAIN GIVES UP FLORIDA

Spain, which still claimed East Florida and West Florida as far as Mobile, Ala., ceded all rights to the U. S. by treaty Feb. 22, 1819, ratified by Spain 1821. The U. S. gave up claims to an undetermined border in Texas and on the Rio Grande and assumed \$5,000,000 worth of Spanish obligations to Americans; total cost, \$6,674,057.

Spain, Britain, France and the Americans had fought in this territory. Spain's title was recognized in 1783. In 1810 the U. S. took possession of large areas along the Gulf, except Mobile, and West Florida declared itself independent and asked annexation. In 1814 Gen. Andrew Jackson took Pensacola from the British.

OREGON TERRITORY ORGANIZED

Organization of the Territory of Oregon in 1848 was not called an accession because the U. S. claimed title by (1) discovery and occupation; (2) a free interpretation of the Louisiana Purchase; (3) treaties with Spain, 1819, Great Britain, 1818, Russia, 1824. The northern boundary was settled by treaty with Britain in 1846.

The Territory extended from the crest of the Rockies to the Pacific coast, north of 42° N. Lat. and included the present states of Oregon, Washington, Idaho and parts of Montana and Wyoming.

ADMISSION OF TEXAS AS STATE

The third accession came when the Republic of Texas was admitted to the Union as a state, Dec. 29, 1845. This was part of a Mexican state settled by many U. S. citizens. Texas declared its independence in 1836, was recognized by the U. S. and applied for admission into the Union. It was bounded by the Rio Grande on the Southwest, and the Sabine, Red and Arkansas Rivers on the North and Northeast, and roughly comprised parts of present New Mexico, Colorado, Wyoming and a bit of Kansas as well as Texas of

today, 390,144 sq. mi. Today the state has 267,339 sq. mi. Texas had declared for slavery and its admission was opposed by anti-slavery men. Since a two-thirds majority of the Senate could not be attained it was admitted, Mar. 1, 1845, by a joint resolution of Congress, requiring only a majority of both houses. Texas ratified the agreement July 4, 1845.

Texas formally became a state Dec. 29, 1845. Congress gave Texas the right to divide itself into as many as five states "of convenient size" and sufficient population, at its own discretion. The Lone Star flag of the republic has been retained as the state flag of Texas. It can be flown by the side of the Stars and Stripes, but not above it.

TERRITORY FROM MEXICO

At the end of the Mexican War the U. S. and Mexico signed the treaty of Guadalupe-Hidalgo, Feb. 2, 1848, which gave the fourth large accession of territory. This included the present states of Arizona, New Mexico, California, Nevada, Utah, and Colorado west of the Rockies. The Gila river was a boundary line. The U. S. paid \$15,000,000 to Mexico and assumed claims of U. S. citizens against Mexico. The claim of Texas to part of New Mexico territory was settled in 1850 by paying Texas \$10,000,000. Interest increased both totals.

Inexact boundaries and agitation by railroad men for the Gila river valley to build the Southern Pacific led President Franklin Pierce to send James Gadsden as ambassador to Mexico to negotiate concessions of land. Gadsden got the Mexican dictator, Santa Anna, to yield 29,640 sq. mi. for \$10,000,000 in 1853. This made the Rio Grande the boundary line on the South and the Colorado river on the West.

ALASKA FROM RUSSIA

Russia, which operated Alaska as a fur and fishing station at a loss, first offered to sell it during President Pierce's administration, about 1856. President Buchanan wanted to pay \$5,000,000 for it in 1860. Secy. Seward, an expansionist, signed a treaty with Baron Stoeckl, Russian minister, Mar. 30, 1867, to buy it for \$7,200,000. Senate ratified it Apr. 9, 1867, and it was transferred to U. S. at Sitka Oct. 18, 1867, before it had been paid for. The House, by 113 to 43, appropriated the money July 14, 1868. The legend that the U. S. bought Alaska to repay Russia for checkmating Britain during the Civil War is without foundation.

ACQUISITION OF HAWAII

A British naval officer seized the kingdom of Hawaii, 1843, but was disavowed. Britain and France recognized its independent status 1843. France seized it, 1849, but restored it at once. In 1851 the King offered it to the U. S.; Danl. Webster, Secy. of State, refused it. Annexation was urged, 1854, but rejected. A reciprocity treaty with U. S., 1875, increased trade; it was renewed 1884 to include lease of Pearl Harbor as naval base. Jas. G. Blaine, Secy. of State, in 1881 had practically extended Monroe Doctrine to Hawaii. After revolution, 1893 (with American connivance) the republic, 1894, asked annexation. U. S. voted this July 7, 1898, effective Aug. 12, 1898, and assumed a national debt of \$4,000,000.

ISLANDS FROM SPAIN

After the 1898 war with Spain, Spain by treaty of Dec. 10, 1898, ceded Puerto Rico, Guam and the Philippine islands for \$20,000,000. An additional \$100,000 was paid later for islands of the Philippines not in the original treaty. Puerto Rico is a free commonwealth electing its own executives. Guam is administered by the Dept. of the Interior. The Philippine Islands received their independence July 4, 1946, as the Republic of the Philippines.

PACIFIC AND CARIBBEAN

American Samoa in the Pacific. Port of Pago Pago was ceded 1872. Tutuila and other islands ceded to U. S. by convention with Great Britain and Germany, Dec. 2, 1899. Swain's Isl. annexed 1925. Dept. of the Interior.

Wake annexed Jan. 17, 1899, from Spain. Midway Islands (Sand Isl., Eastern Isl.) occupied Sept. 30, 1867, Under Navy Dept.

Baker Island, discovered 1832, U. S. since 1857. Also Jarvis, and Howland. Under Interior Dept.

Virgin Islands in the Caribbean, the former Danish West Indies, comprising St. Croix, St. Thomas, St. John and islets, bought from Denmark Jan. 25, 1917, for \$25,000,000.

Panama Canal Zone, acquired from the Republic of Panama.

Public Lands of the United States

Total		1,807,681,920	30,080,640	1,837,762,560	\$85,079,222

*All areas except Alaska were computed in 1912, and have not been adjusted for the recomputation of the area of the United States which was made for the 1950 Decennial Census.

†Cost data for all except "State Cessions" obtained from U. S. Geological Survey.

‡Paid by Federal Government for Georgia Cession, 1802 (56,689,920 acres).

§Excludes areas eliminated by Treaty of 1819 with Spain.

¶Basin of the Red River of the North, south of the 49th parallel.

Disposition of Public Lands 1781 to 1967 (In acres)

Disposition by methods not elsewhere classified¹	301,800,000	Granted to States for:	
Granted or sold to homesteaders	287,300,000	Support of common schools	77,600,000
Granted to railroad corporations	94,300,000	Reclamation of swampland	64,900,000
Granted to veterans as military bounties	61,000,000	Construction of railroads	37,100,000
Confirmed as private land claims²	34,000,000	Support of misc. institutions³	21,500,000
Sold under timber and stone law⁴	13,900,000	Purposes not elsewhere classified⁵	18,700,000
Granted or sold under timber culture law⁴	10,900,000	Canals and rivers	6,100,000
Sold under desert land law⁵	10,600,000	Construction of wagon roads	3,400,000
		Total granted to States	229,300,000
		Grand Total	1,041,400,000

¹Chiefly public, private, and preemption sales, but includes mineral entries, script locations, sales of townships and townlots.

²The Government has confirmed title to lands claimed under valid grants made by foreign governments prior to the acquisition of the public domain by the United States.

³The law provided for the sale of lands valuable for timber or stone and unfit for cultivation.

⁴The law provided for the granting of public lands to settlers on condition that they plant and cultivate trees on the lands granted. Payments for the lands was permitted under certain conditions.

⁵The law provided for the sale of arid agricultural public lands to settlers who irrigate them and bring them under cultivation.

⁶Universities, hospitals, asylums, etc.

⁷For construction of various public improvements (individual items not specified in the granting act), reclamation of desert lands, construction of water reservoirs, etc.

Land Owned by Federal Government (In acres)

The Homestead Act; Sale of Public Land

The Homestead Act became effective Jan. 1, 1863, the same day that President Lincoln issued his Emancipation Proclamation. Its purpose was to open the vacant lands of America's vast public domain to agricultural settlement.

To qualify for a homestead a person had to be a citizen of the United States or express his intention of becoming one, be over 21 years of age or the head of a household, and own less than 160 acres of land.

To acquire title to 160 acres of public land the homesteader had to establish residence on the land and bring a portion under cultivation. After 6 months residence he could purchase the land for \$1.25 per acre, or after 5 years residence he could acquire title for a \$15 filing fee.

Originally passed by Congress on May 20, 1862, the Homestead Act was later amended to increase acreage limitations under certain conditions. Under the Homestead Act and its several amendments, more than a million families received title to over 248,000,000 acres of public land across the plains, prairies and mountains of western United States. But as subsequent waves of settlers moved onto vacant land the supply of arable land dwindled; by the late 1930s some homesteaders had settled on submarginal lands that would not support a farm family. In 1937 Congress passed the Bankhead-Jones Act authorizing the Government to

repurchase bankrupt farms to relieve the plight of such families. Under this program about 2,000,000 acres of homestead land was returned to Federal ownership.

Alaska is the last frontier for the homesteader, but with statehood most of that State's potential farm land has been acquired by the State under terms of the Alaskan Homestead Act.

By the time of its 100th anniversary the Homestead Act had accomplished its purpose—the transformation of a wilderness into productive farm-land. Now outdated, the Homestead Act will always be a part of the American heritage.

PUBLIC LAND SALE

From time to time the Bureau of Land Management sells public land to private individuals. Public land is always sold for its fair market value as determined by public auction. The Federal Government offers no free land. Persons wishing to purchase public land should contact the Bureau of Land Management, Washington, D. C. 20240, or one of the Bureau's Land Offices in the public land states.

The Bureau stresses that it is the only authoritative source of information on the sale of land under its jurisdiction. No person or firm outside of Government is authorized to dispense information regarding public land sales.

Confederate States and Secession, 1861-1865

The American Civil War, 1861-1865, grew out of sectional disputes over the employment of slavery in the South and the contention of southern legislators that the states retained many sovereign rights, including the right to secede from the Union.

The principal product of the South was cotton, harvested by slave labor. For 50 years Northern leaders had been trying to curtail slavery, but were checkmated in Congress by Southern legislators. Extreme partisans in the North, who demanded the immediate end of slavery for moral reasons, were called Abolitionists.

The Southern states argued that the U. S. Constitution was a contract between sovereign states, which could withdraw (secede) when state rights were violated. This has led Southern historians to call the Civil War the War Between the States. Actually the war was not fought by state against state but by one federal regime against another, the Confederate government in Richmond assuming control over the economic, political and military life of the South, under protest from Georgia and South Carolina.

The Census of 1860 gave the United States a population of 31,443,321. This included 487,690 free Negroes and 3,953,780 Negro slaves.

Earlier acts against slavery included the **Missouri Compromise of 1820** which admitted Missouri as a slave state but prohibited slavery in the Louisiana Terr. N of Arkansas; the **Compromise of 1850**, which admitted California as a free state, omitted action on slavery in organizing Utah and New Mexico as territories, ended slave trade in Dist. of Columbia, amended Fugitive Slave Act to punish any who aided a fugitive and abolished trial by jury for fugitive; **Kansas-Nebraska Act, 1854**, which left choice of slavery in Kansas and Nebraska to residents there. (Squatter sovereignty)

Harriet Beecher Stowe's *Uncle Tom's Cabin*, 1851-52, intensified feeling against slavery.

Tension increased when the Supreme Court ruled Mar. 6, 1857, that Dred Scott, a Negro, did not become free when taken to a free state and did not have rights as a citizen; also that the Missouri compromise on slavery was unconstitutional.

John Brown's attempt to arm slaves at Harpers Ferry, Oct. 16-18, 1859, inflamed partisans.

Abraham Lincoln's stand for free soil (no slavery) in new states and territories, and his general condemnation of slavery, caused Southern fanatics to threaten secession if he were elected. When Sen. Stephen A. Douglas split the Democratic party by his stand against secession, Lincoln's election was assured. Even before inauguration Lincoln had Sen. Wm. H. Seward (N. Y.) offer a resolution that the Constitution never be altered to interfere with slavery where established, that the Fugitive Slave Law be amended to include trial by jury, that all states repeal laws contrary to the Constitution.

SECESSION OF STATES

South Carolina voted an ordinance of secession from the Union, repealing its 1788 ratification of the U. S. Constitution, Dec. 20, 1860, proclaimed in effect Dec. 24. Other states seceding in 1861 and their votes in convention were:

Mississippi, Jan. 9, 1861 by 84 to 15

Florida, Jan. 10, 1861, by 62 to 7

Alabama, Jan. 11, 1861, by 61 to 39

Georgia, Jan. 19, 1861, by 208 to 89

Louisiana, Jan. 26, 1861, by 113 to 17

Texas, Feb. 1, 1861, by 166 to 7, ratified by popular vote Feb. 23, 1861; for secession, 34,794; against 11,235.

Virginia had delayed action, but when President Lincoln called for troops after Sumter fell it voted for secession April 17, 1861, by 88 to 55, ratified by popular vote May 23, 1861; for secession, 128,884; against, 32,134.

Arkansas, May 6, 1861, by 69 to 1.

North Carolina, May 21, 1861, voted secession but refused by two-thirds vote to submit it to people for ratification.

Tennessee, May 7, 1861, entered a military league with the Confederacy; popular vote, June 8, for secession, 104,019; against 47,238.

Missouri Unionists stopped secession in the convention at Jefferson City Feb. 28 and at the second session in St. Louis Mar. 9. The legislature condemned secession Mar. 7. Under the protection of Confederate troops secessionist members of the legislature adopted a resolution of secession at Neesho, Oct. 31, 1861. The Confederate Congress seated representatives.

Kentucky did not secede and its government remained Unionist. In a part occupied by Confederate troops Kentuckians passed an act of secession and the Confederate Congress admitted representatives.

Maryland legislature voted against secession Apr. 27, 53 to 13. Delaware did not secede. Western Virginia held conventions at Wheeling, named a pro-Union governor June 11, 1861; admitted to Union as West Virginia June 20, 1863; its constitution provided for gradual abolition of slavery.

CONFEDERATE GOVERNMENT

Forty-two delegates from South Carolina, Georgia, Alabama, Mississippi, Louisiana and Florida met in convention at Montgomery, Ala., Feb. 4, 1861. Howell Cobb of Georgia was chosen to preside. On Feb. 6 delegates from North Carolina arrived to plead in vain for conciliation. The first delegate from Texas came Feb. 13. The congress adopted a provisional constitution of the Confederate States of America Feb. 8, 1861, and on the next day elected Jefferson Davis (Miss.), provisional president, and Alexander H. Stephens (Ga.), provisional vice president. Davis was inducted into office at Montgomery, Feb. 18, 1861.

A permanent constitution was adopted Mar. 11, 1861. It provided that the president should be elected for a single term of 6 years and abolished the African slave trade. The congress moved to Richmond, Va., July 20, 1861. Jefferson Davis was elected president, October, 1861, inaugurated Feb. 22, 1862.

Jefferson Davis (1808-1889) was a West Point graduate, 1828; served in Black Hawk and Mexican wars; Senator from Mississippi, 1847-1851; Secretary of War, 1853-1857; Senator, 1857-1861.

The congress adopted a flag, consisting of a red field with a white stripe in the middle third, and a blue jack with a circle of white stars, going two-thirds of the way down the flag. This flag was unfurled in Montgomery Mar. 4, 1861. Later the more popular flag was the red field with blue diagonal cross bars that held 13 white stars, designed by Gen. P. G. T. Beauregard.

National Parks and Other Units of the National Park System

Source: National Park Service

The year is that of creation of the park; figures in parentheses show Federal land acres.

NATIONAL PARKS

Acadia, 1919, Maine (32,264)—The group of granite mountains upon Mount Desert Island, also Schoodic Point on mainland.

Big Bend, 1944, Texas (706,538) on Rio Grande.

Bryce Canyon, 1928, Southwestern Utah (36,010)—By canyon filled with countless array of fantastically eroded pinnacles of vivid coloring.

Canyonlands, 1964, Southeastern Utah (257,640)—at junction of the Colorado and Green rivers.

Carlsbad Caverns, 1930, Southeastern New Mexico (46,433)—Stupendous caverns not yet wholly explored, limestone decorations.

Crater Lake, 1902, Southwestern Oregon (160,290)—Lake of extraordinary blue in crater of extinct volcano. Sides 500 to 2,000 feet high.

Everglades, 1947, Southern Florida (1,325,895)—Portion of only subtropical area in the United States; extensive watercourses; abundant bird life.

Glacier, 1910, Northwestern Montana (1,010,936)—Rugged mountain region of great beauty; more than 200 glacier-fed lakes, 60 small glaciers.

Precipitous thousands of feet deep.

Grand Canyon, 1919, North Central Arizona (673,203)—vast and picturesque example of erosion with spectacular color effects.

Grand Teton, 1928, Northwestern Wyoming (303,174)—Includes most spectacular portion of Teton Mountains, an uplift of unusual grandeur.

Great Smoky Mountains, 1930, North Carolina and Tennessee (512,655)—Massive mountain uplift; magnificent forests.

Guadalupe Mountains, 1966, Texas (19,640).

Haleakala, 1961 Hawaii (17,130)—Huge dormant volcano on the island of Maui.

Hawaii Volcanoes, 1916, Hawaii (201,007)—Interesting volcanic areas—Kilauea and Mauna Loa, active volcanoes on the island of Hawaii.

Hot Springs, 1921, Middle Arkansas (1,035)—Hot Springs said to have therapeutic value. Bathhouses under Government supervision.

Isle Royale, 1940, Michigan (539,341)—Largest island in Lake Superior; rugged forested wilderness.

Kings Canyon, 1940, Middle Eastern California (459,468)—Sierra wilderness with numerous peaks 13,000 to 14,000 feet high; park also contains groves of giant sequoias.

Lassen Volcanic, 1916, Northern California (106,277)—Only recently active volcano in United States proper. Lassen Peak, 10,453 feet; Cinder Cone, 6,913 feet; hot springs; mud geysers.

Mammoth Cave, 1936, Southwestern Kentucky (51,351)—Series of caverns including spectacular onyx cave formation. Became nationally known in the war of 1812 when saltpeter from the cave was used in making gunpowder.

Mesa Verde, 1906, Southwestern Colorado (51,525)—Most notable and best preserved prehistoric cliff dwellings in the United States.

Mount McKinley, 1917, South Central Alaska (1,939,493)—Highest mountain in North America; caribou, Dall sheep, and other unusual wildlife.

Mount Rainier, 1899, West Central Washington (241,781)—Greatest peak-glacial system in the United States; radiating from the summit and slopes of an ancient volcano; dense forests.

Olympic, 1938, Northwest Washington (888,927)—Notable as finest remnant of the Pacific Northwest forests, including the famous "rain forests," and for its numerous glaciers; also as the summer feeding ground for the rare Roosevelt Elk.

Petrified Forest, 1962, Arizona (94,189).

Platt, 1906, Southern Oklahoma (912)—Numerous cold mineral springs.

Rocky Mountain, 1915, North Middle Colorado (260,591)—Heart of the Rockies, snowy range, peaks 11,000 to 14,255 feet altitude. Remarkable records of glacial period.

Sequoia, 1890, Middle Eastern California (385,413)—Great groves of giant sequoias, world's largest and probably oldest living things; magnificent High Sierra scenery, including Mount Whitney, highest mountain in United States proper.

Shenandoah, 1935, in Northern Virginia (193,533)—Outstanding scenic section of the Blue Ridge Mts.

Virgin Islands, 1956, V. I. (1,055).

Wind Cave, 1903, Southwestern South Dakota (28,059). Limestone caverns having galleries containing peculiar formations. Buffalo herd.

Yellowstone, 1872, Northwestern Wyoming, Southwestern Montana, and Northeastern Idaho (2,213,207)—More geysers than in all rest of world together. Boiling springs; mud volcanoes; petrified forests. Grand Canyon of the Yellowstone, remarkable for gorgeous coloring. Large lakes; many large streams and waterfalls. Wild animal herds.

Yosemite, 1890, Middle Eastern California (759,080)—Mountainous region of unusual beauty; Yosemite and other inspiring gorges; many waterfalls of extraordinary height; 3 groves of giant sequoias.

Zion, 1919, Southwestern Utah (136,271)—Magnificent gorge (Zion Canyon), depth from 1,500 to 2,500 feet, with precipitous walls.

NATIONAL HISTORICAL PARKS

Appomattox Court House, 1954, Virginia (937), **Chalmerte, 1939, Louisiana (141)**—Site of Battle of New Orleans, Jan. 8, 1815.

City of Refuge, 1961, Hawaii (181)—Until 1819, vanquished Hawaiian warriors, noncombatants, and taboo breakers found sanctuary here.

Colonial, 1936, Virginia (7,205)—Includes most of Jamestown Isl., the first permanent English settlement in America; historic Yorktown; the parkway connecting these and other Colonial sites with Colonial Williamsburg and Cape Henry Memorial.

Cumberland Gap, 1955, Ky., Tenn., Va. (20,169)—Wilderness Road Crossing, used by pioneers.

George Rogers Clark, 1966, Indiana (17) Commemorates the winning of the northwest.

Harpers Ferry, 1963, West Virginia-Maryland (1,280). Site of important events of Colonial times and of the famous John Brown raid.

Independence, 1956, Philadelphia, Pa. (16)—Scene of adoption of the Declaration of Independence, meeting place of the Continental Congress and of the Constitutional Convention of 1787; Federal Capital, 1790 to 1800.

Minute Man, 1959, Massachusetts (435)—Tract of natural setting where, on April 19, 1775, British troops retreating from Battles of Lexington and Concord were fired on by Colonial Minute Men.

Morristown, 1933, New Jersey (1,215)—Sites of important military encampments during the Revolution; Washington's Headquarters, 1779-80.

Nez Perce, 1965, Idaho (83), a group of 22 sites. **San Juan Island, 1966, Wash., 1859** Canadian agreement.

Saratoga, 1948, New York (2,432)—Scene of the American victory over the British General Burgoyne, 1777; turning point of the Revolution.

NATIONAL MILITARY PARKS

Chickamauga-Chatanooga (8,190) Ga., Tenn. **Fort Donelson (197) Dover, Tenn.**

NATIONAL CAPITAL PARKS

National Capital Parks total 7,978 acres—comprises 727 units in the District of Columbia and vicinity.

GREAT CITIES OF NORTH AMERICA

Their History, Business and Industry, Educational Facilities, Cultural Advantages, Tourist Attractions and Transportation

Akron, Ohio

The World Almanac is sponsored in the Akron area by the Akron Beacon Journal, 44 E. Exchange St., Akron, Ohio 44309; telephone (216) 253-1111; founded 1809 by Hiram Bowen; circulation daily 176,656, Sunday 202,221; president & editor, John S. Knight; executive editor & publisher, Ben Maidenburg; general manager, Sam McKeel.

Akron, "The Rubber Capital of the World," is on the Ohio Canal and Big and Little Cuyahoga Rivers 30 miles south of Lake Erie in northeastern Ohio, and covers 56 sq. mi. within the 413-sq. mi. metropolitan Akron area of Summit County.

Founder was Gen. Simon Perkins, who served in the area during the War of 1812. He returned after the war and began to acquire vast areas of the wilderness.

In 1825 the Legislature authorized construction of the Ohio Canal from Lake Erie to Portsmouth on the Ohio River, with 17 locks to be built in a two-mile stretch all owned by Gen. Perkins. Workers and tradesmen poured in and Gen. Perkins started a town; the plat was recorded Dec. 1825.

The name, Akron, comes from the classical Greek and means "High Point"; 395 ft. above Lake Erie, it is the highest point on the Ohio Canal. Incorporated as a city Jan. 21, 1865, it is Ohio's 5th largest, est. population 299,341. It has a mayor-manager charter government.

Growth of the rubber industry in Akron can be traced to Nov. 1870, when an eastern physician, Dr. Benjamin Franklin Goodrich, enticed by a booster pamphlet, arrived in town. With \$16,000 pledged by local townspeople, he opened a small, two-story building on the site of the present B. F. Goodrich complex and started making fire hoses and beer tubing.

Many earlier firms have passed out of existence, but home offices and plants of 4 of the world's 5 largest rubber firms—Goodrich, Goodyear, Firestone and General—employ 45,000 Akronites.

With 113 motor freight carriers and 58 contract carriers located here, Akron is the largest trucking center in the nation, as well as home of the Quaker Oats Co., one of the world's largest cereal manufacturing firms. Other Akron-produced products include automobile bodies and wheel rims, fishing tackle, matches, salt,

clay products, rubber toys, batteries, synthetic rubber, road-building machinery and missile components.

Two airports, Akron Municipal and Akron-Canton, handle more than 60 jet and propeller plane flights daily through four airlines, and six railroads serve the city through two passenger stations. Greyhound bus lines averages 73 daily arrivals and departures through the city. Akron Municipal Airport is the site of the Goodyear Zeppelin Dock, one of the largest buildings without interior supports.

Also in the Akron Airport vicinity are Derby Downs, home of the All-American Soap Box Derby, and a 36,000-seat municipal stadium, "The Rubber Bowl," home of the University of Akron Zips.

Another well-known sports center in Akron is the Firestone Country Club, home of the American Golf Classic, World Series of Golf, and twice since 1960 site of the PGA championship.

One of the nation's top cultural attractions is Akron's Stan Hywet, the former baronial mansion of F. A. Seiberling, founder of the Goodyear and Seiberling Rubber Cos.

The city is the seat of the University of Akron. Other points of interest include the Akron Art Institute, the Goodyear Rubber Exhibit in Goodyear Hall, and the Akron Children's Zoo.

Urban renewal and downtown revitalization are the theme of multi-million dollar construction projects now under way. There are plans for \$13,000,000 private construction in the business district.

Specialized information may be obtained from the Area Development Committee, First National Tower, Akron, Ohio 44308, and the Akron Area Chamber of Commerce, Delaware Building, Akron, Ohio 44308.

Atlanta, Georgia

Atlanta is the capital of Georgia, largest state in area east of the Mississippi, and is the center of the first metropolitan statistical area in the Southeast to reach 1,000,000 population (1966 U. S. Census). The U. S. Census estimates rank Metropolitan Atlanta, with 1,258,000, as the 21st such area in population in the nation. Atlanta is the county seat of Fulton. The metro area includes Fulton, Clayton, Cobb, DeKalb and Gwinnett Counties.

Financial, manufacturing, industrial and communications center of the region, Atlanta also is a transportation hub. It has the nation's fourth busiest airport, 7 airlines, 7 bus lines and 13 rail lines. Six legs of 3 Federal Interstate Highways converge at an interchange behind the State Capitol, itself a symbol of the Midas-touched economy. The Capitol dome is covered with gold leaf beaten from nuggets donated by citizens of Dahlonega, in northern Georgia, once the site of a U. S. mint and where gold may still be panned.

Diversity of manufacturing keeps the economy stable. Over 1,650 manufacturers produce more than 3,500 commodities, in-

cluding automobiles, aircraft, textiles, chemicals, furniture, food, iron and steel. Annual retail sales exceed \$2.3 billion.

Atlanta's first official marker was the Zero Mile Post of 1850, marking the Southeastern terminus of the Western and Atlantic Railroad. Not far away, the original 1837 surveyor's stake had been pounded to connect the Western and Atlantic with the Georgia Railroad and the Central of Georgia. There grew a settlement appropriately called Terminus. Incorporated in 1843 and named Marthasville after Gov. Wilson Lumpkin's youngest daughter, the city's name was changed to Atlanta Dec. 26, 1845. One theory is that the word Atlanta was the feminine of Atlantic.

At the time of its incorporation, the city's limits extended one mile in all directions from the area of the Zero Mile Post. In almost the same spot today towers the First National Bank Building at Five Points, still the center of the city. A block away begins famous Peachtree Street.

Situated on the Piedmont Plateau of the Blue Ridge Mountains' foothills, Atlanta has an altitude of 1,050 feet with a

7-month casual living season stretching from April through October.

Nearby Stone Mountain, looming 630 feet above a surrounding memorial park, is the largest piece of exposed granite in the world. On one side are carved likenesses of 3 colossal figures of the Confederacy—Robert E. Lee, Stonewall Jackson and Jefferson Davis. At the park is the detailed diorama and map of Georgia depicting Union Gen. William Tecumseh Sherman's sweep through Georgia.

As a U. S. Army lieutenant, Sherman was stationed near Atlanta for 6 weeks in 1864, when he had an opportunity to study the area's terrain. Twenty years later, as Gen. Sherman, he came back to capture Atlanta in September, 1864. He burned most of it to the ground before his March to the Sea.

For the same reasons Sherman militarily had to destroy this key point of the Confederacy—transportation, communications, commerce—Atlanta grew again. In New York City in 1866 Henry Woodfin Grady, editor of the Atlanta Constitution, made his famous New South speech, which urged the putting aside of hate and slavery and predicted the glowing future to come. In his audience was Sherman.

Symbolically Atlanta's official seal, adopted in 1877, is the phoenix, fabled bird that rose from the ashes to begin a new life. The city government is administered by a mayor and aldermen.

With the world's largest Bell System

toll-free dialing area, one of the world's largest television installations, one of the nation's 5 TV-radio control centers and the South's largest Sunday newspaper in circulation, Atlanta is a vital communications center.

Atlanta has extensive hospital, medical research and educational facilities. It is national headquarters of the Communicable Disease Center of the U. S. Public Health Service.

Recreational and cultural facilities include a regional amusement park, Six Flags Over Georgia; the multimillion dollar Atlanta Sports Stadium, home of the baseball Braves (National League), Falcons (National Football League), and Chiefs (North American Soccer Assn.). Also in Atlanta are the Hawks (National Basketball Assn.).

The Memorial Arts Center encompasses the Atlanta Symphony Orchestra, Atlanta Ballet, Opera Company and Repertory Theatre, and the High Museum of Art, where some of the famous Kress collection of Renaissance paintings hang. Another point of interest is the Cyclorama, huge circular painting of the Battle of Atlanta. The \$10,000,000 Civic Center, auditorium-exhibition hall complex, offers 70,000 sq. ft. of exhibit space.

Among institutions of higher learning are the Georgia Institute of Technology, Georgia State College, Emory University, Agnes Scott College, Oglethorpe College and the Atlanta University Complex.

Baltimore, Maryland

The World Almanac is sponsored in the Baltimore area by the Baltimore News-American, 301 E. Lombard St., Baltimore, Md. 21203; telephone 752-1212; founded Aug. 20, 1773, as The Maryland Journal and Baltimore Advertiser, merged with Baltimore News founded Nov. 2, 1872, adopted present name Jan. 13, 1964; circulation daily 219,580, Sunday 318,425; publisher, Mark F. Collins; executive editor, Sterling Noel; managing editor, Thomas J. White; business manager, W. Melvin Street; winner American Medical Association award and Albert Lasker Medical award; sponsors 1 Am an American Day parade, Teen-Age Fair, Old Newsboys' Day, Hole-in-one golf tournament.

Baltimore City is the core of a metropolitan area extending into 4 adjacent counties (Baltimore, Anne Arundel, Harford and Howard) which covers 2,259 square miles and has 2,035,700 inhabitants. The city itself has a population of 912,500 (June, 1968, estimate) and includes 92 sq. mi., 13 of which are water-covered.

Important to the city's development has been that it is a seaport 50 to 200 miles nearer the Midwest than other North Atlantic ports. Alone among Atlantic ports, it has two routes to the sea: by way of Chesapeake Bay, and through the Chesapeake and Delaware Canal.

The port has 45 miles of waterfront, a 42-foot channel, and handles some 45,000,000 tons of freight per year. Leading imports are ores, steel and bananas. Baltimore is the leading receiver of foreign autos. It has 3 trunk line railroads and over 150 certified truck transport lines. Truck and auto tourist traffic are aided by a twin-tube tunnel through the city under the Patapsco River. Friendship International Airport, used by 11 major airlines, is 15 minutes from downtown Baltimore.

Industries are highly diversified, with none dominating the city's economy. Among the most important are shipbuilding and repairing, steel fabricating, manufacture of electrical equipment and food containers, processing of foods, sugar, petroleum, chemicals and copper. Research and development activities, chiefly in the fields of aerospace, bioscience, oceanography, chemistry, metallurgy and

electronics are carried on by 122 firms employing 90,700 persons.

Sixteen colleges offering 4-year courses and 6 junior colleges are in the Baltimore area. Johns Hopkins University and the University of Maryland each has two campuses, including a large hospital, at Baltimore. Among other educational institutions are Goucher, Morgan State, Loyola, Towson State, Mt. St. Agnes and Western Maryland colleges, the University of Baltimore and the Maryland Institute. Other cultural facilities include the Baltimore Art Museum, Walters Art Gallery, Baltimore Symphony Orchestra, Baltimore Civic Opera, Center Stage Theater and the Enoch Pratt Free Library.

A downtown renewal project, begun in 1958, cleared 32 acres of the central business section and erected on the site a Civic Center, office buildings, a hotel and the Morris A. Mechanic Theater. Another project, to include a World Trade Building, office buildings, apartment houses and a marina is now under way.

In sports, Baltimore is the home of the Orioles (baseball), the Colts (football), the Bullets (basketball), the Bays (soccer), and the Clippers (ice hockey). Pimlico race track, where the famous Preakness race is held annually, is within the city limits. Two other mile tracks and two half-mile tracks are nearby, including Laurel where the Inter. Race is held.

An outstanding tourist attraction is Fort McHenry, which withstood 25 hours of bombardment from British ships during the War of 1812, during which Francis

Scott Key, a Maryland lawyer who was held captive on a British ship, wrote "The Star-Spangled Banner." His original manuscript is at the Maryland Historical Society building in Baltimore and the fort is a National Shrine and Historic Museum.

Among other places of historic interest are the first architectural monument erected to George Washington, the U. S. frigate Constellation, the Baltimore and Ohio Railroad Museum at Mt. Clare, first passenger railroad station in the country, and the Peale Museum building. The grave of Edgar Allan Poe is in Westminster Church yard, and the city in 1968 purchased as a memorial the house in which baseball star Babe Ruth was born.

Baltimore was founded in 1729 by an act of the Provincial Assembly of the Maryland colony which was established by members of the Calvert family, Barons of Baltimore. Its early economy was based largely on trans-Atlantic and coastal shipment of tobacco, grain and flour and on shipbuilding. By the time of the Revolution it was an important port which sent

privateers that harassed British shipping. In the War of 1812, similar activities caused the British to term Baltimore a "nest of pirates" and to try to capture the city by land and sea attacks. Both were repulsed.

After this war, Baltimore's economic growth was threatened by New York's completion of the Erie Canal and the city's business leaders countered by building the nation's first railroad, the Baltimore and Ohio. During the Civil War the sympathies of Baltimoreans were sharply divided, and the war's first blood was shed when a mob attacked Union troops who were marching from one railroad station to another en route to protect Washington. Though Maryland did not secede, Federal troops occupied Baltimore for 5 years.

Much of downtown Baltimore was destroyed by fire in 1904. No lives were lost and the rebuilding resulted in improvements to the area which, though great, have been far surpassed by the accomplishments of the last 10 years.

Birmingham, Alabama

The World Almanac is sponsored in the Birmingham area by the Birmingham Post-Herald, 2200 Fourth Ave., North, Birmingham, Alabama 35202; telephone (205) 323-5381; Post founded Jan. 21, 1921, by Scripps-Howard Newspapers; Herald founded 1887 by W. P. Pinckard, Rufus N. Rhodes and Frank P. O'Brien; circulation 82,230; editor, Duard Le Grand; vice president W. H. Metz; managing editor, George Cook; major public service projects include Goodfellow Christmas Fund and Alabama Favorite Teacher Selection.

Birmingham, situated in the north central portion of Alabama, is the state's largest city and one of the world's youngest major cities. It is located in Jones Valley, named for the family that settled the area in the early 1800s. Between its incorporation on December 19, 1871, and the turn of the century, Birmingham acquired the name "Magic City" for its rapid growth rate.

Overlooking Birmingham from nearby Red Mountain is Vulcan, the mythical god of the forge, in a cast iron statue that is second only to the Statue of Liberty in size. Vulcan symbolizes the reason for Birmingham's rapid growth into a metropolis, the iron and steel industry, which expanded quickly because of the availability of the three basic elements of iron making—ore, coal and lime—in the area. The related mining industry also grew rapidly, but has now declined because of the relatively low grade of ore and the scarcity of new coal seams. Most ore used locally is now imported from rich fields in South America.

The city is still a heavy manufacturing center. U. S. Steel Corporation has its southern headquarters in Fairfield, a suburb, and a large Republic Steel Corporation mill is in Birmingham. Dozens of other plants manufacture steel and iron products.

For the past two decades, however, Birmingham has been involved in a switch from blue to white collar workers. A focal point of the change is the sprawling University of Alabama Medical Center a few blocks south of the downtown business area. At the end of a current expansion, the Medical Center will encompass 60 square blocks with nearly a dozen hospitals, research facilities, related businesses and the University of Alabama in Birmingham's College of General Studies. The Medical Center is now the second largest employer in the Birmingham area, ranking behind U. S. Steel.

Birmingham has a population of 340,887 (1960 census), and a 3-county metropolitan area of almost a million. It is sur-

rounded by 35 municipalities within Jefferson County.

Birmingham has been the scene of major civil rights incidents, starting with the Mother's Day "freedom riders" disturbance of 1961 and mostly ending by the time 16th Street Baptist Church was bombed, killing 4 Negro girls on Sept. 15, 1963. There has been little racial trouble since that time, largely because of policies established by a new mayor and 9-member city council voted in to replace the old 3-man city commission. The new government took office in 1963, has been more moderate on the racial issue, and is leading the city in its biggest building boom in 40 years. Birmingham's skyline, with only about 4 new, large buildings added since 1925, is now undergoing a major change, with 3 new skyscrapers under construction. Among them is the multi-million dollar headquarters for South Central Bell Telephone Company, formed in 1968 from the Southern Bell area.

Now in the planning stages is a civic center, already funded by new taxes, which will cost more than \$25,000,000 and will include a coliseum, theater, music hall and exhibit hall. The complex is due to be finished by the beginning of the city's centennial year, December, 1971.

In addition to the University of Alabama complex, Birmingham has 6 colleges and universities—Samford University, Birmingham-Southern College, Miles College, Daniel Payne College and Wenhatch and Jefferson State Junior Colleges.

The city's Municipal Airport, served by 4 major airlines, is due to undergo expansion in the near future. A recent \$12,500,000 bond issue was approved to expand the modern terminal, completed in 1961, and the runway system. Birmingham is also served by 13 railroads, and the two interstate highways due to serve the city are under construction, I-59 and I-65.

Specialized information may be obtained from the Birmingham Area Chamber of Commerce, 1914 Sixth Avenue North.

Boston, Massachusetts

The World Almanac is sponsored in the Boston area by the Boston Herald-Traveler, 300 Harrison Ave., Boston, Mass. 02106; telephone (617) 426-3000; Traveler founded 1825, Herald 1846, consolidated July 10, 1967; daily circulation, 216,000, Sunday, 301,000; chairman of the board, George E. Akerson; president and publisher, Harold E. Clancy; executive editor, Eugene J. Moriarty; editor, John R. Herbert; major awards include four Pulitzer Prizes for editorial writing (to Herald staff members), two for photography (to Traveler staff members); sponsors Herald Traveler Charity Fund, Repertory of Classical Drama and Festival of Music.

Boston, founded in 1630 by a company of Puritans under the leadership of John Winthrop and incorporated as a city Feb. 23, 1822, has been known variously as The Hub and the Athens of America; more recently, as a result of broad programs of urban renewal and a quickening of civic interest, commercial and cultural, as The New Boston.

It is the capital city of the Commonwealth of Massachusetts, with the Governor's Office and the Senate and House of the Legislature (officially the Great and General Court) meeting in the historic Bulfinch State House with its striking gold-sheathed dome.

Boston itself is governed by a Mayor and 9-man City Council, elected at large in non-partisan elections, the Mayor for a 4-yr. term, councilmen for two-yr. terms. A 5-member school committee directs the public school system, with an enrollment of 90,000, the members also elected at large on a non-partisan basis for two-yr. terms.

The city has a population of 616,326 (1965 state census), its standard metropolitan area a population of 2,605,452. Recent years have seen a steady drop in the population of the city proper, a corresponding rise in the residential suburbs.

City planners hope to arrest that trend with construction of high and middle income apartment complexes, such as Charles River Park, overlooking the river and Cambridge, and along the historic waterfront.

The city's unhappy experience with massive low-income housing has brought a change of thinking in that field, with new emphasis on smaller projections and rehabilitation of existing properties.

Beacon Hill, so evocative of London, had been declared a historical district to preserve it from drastic or startling change.

Renewal has had its biggest impact downtown, where a new glass-and-concrete government center now stands in what was the old honky tonk area of Scollay Square.

In the Back Bay, there is the Prudential Center, with its 52-story tower rising from a complex of low-rise buildings which includes a new War Memorial Auditorium.

A terminus for three major railroads, the New York, New Haven & Hartford, the Penn Central (Boston & Albany) and the Boston & Maine, the city in recent years has become a center of experiments in mass transportation.

The Massachusetts Bay Transportation Authority was established by the Legislature to take over operation of the deficit-plagued municipal transportation network of subways and surface lines and to extend service to a total of 78 cities and towns.

To keep the railroad commuter lines in operation, the MBTA is paying the deficits incurred in operations of the B&M and the New Haven which service more than 20,000 riders from the suburbs daily.

The city is also served by Logan International Airport, on 2,200 acres of "made" land in Boston Harbor, and by 18 major airlines.

In 1967, the field handled 178,446 domestic and international flights, carrying a total of 6,691,246 passengers. With completion of new terminals now under construction or in design in 1972, the field expects to handle 22,000,000 to 25,000,000 passengers annually, with parking for 12,000 cars.

Boston is the world's leading wholesale wool market, has a thriving shoe manufacturing industry and lands annually a fish catch valued at more than \$10,000,000.

Major corporations based in or near the city include Raytheon, General Electric, Gillette Co., Prudential Insurance Co. of North America and John Hancock Mutual Life Insurance Co.

Boston is a major medical center, with such institutions as Massachusetts General Hospital, Children's Hospital Medical Center and Peter Bent Brigham Hospital, and Harvard, Boston University and Tufts Medical Schools. It ranks third in the country in the number of persons employed in the field of medicine.

Today, there are 52 colleges and universities in the immediate area of the city, among them Harvard, Massachusetts Institute of Technology, Tufts, Boston College, Boston University, Northeastern University, Radcliffe, Wellesley, Jackson, Simmons, Emmanuel, Regis, Brandeis, Wentworth Institute, Emerson College and a new campus of the University of Massachusetts.

The city's museums and cultural activities reflect the broad range of intellectual interest which runs back to Emerson, Thoreau, Hawthorne and Parkman.

They include the Boston Museum of Fine Arts, the Museum of Science, a new aquarium on the waterfront, the Isabella Stewart Gardner Museum, the Museum of Contemporary Art.

Cultural activities include the Boston Symphony, the Pops Concerts in the spring, those on the Esplanade in early summer, a Winterfest and a Christmas Festival which sees thousands of lights sparkling on Boston Common.

Places of historical interest include Paul Revere's House, Park Street Church at "Brimstone Corner" on the Common, Old Granary Burying Ground, King's Chapel, Old South Meeting House, the Old State House, the Old North Church of Paul Revere fame, Copp's Hill Burying Ground.

Among the famous churches are Trinity in Copley Square, the Mother Church of Christian Science in the Back Bay, Holy Cross Cathedral in the South End. The Boston Public Library in Copley Square is considered one of the finest examples of Italian Renaissance architecture.

Professional sports is represented by the Red Sox, 1967 American League baseball champions; the Celtics (National Basketball Association); the Bruins (National Hockey League); the Patriots (American Football League); and by the Beacons (North American Soccer League).

The city is served by 6 television stations, four VHF and two UHF, and a number of radio stations.

Buffalo, New York

The World Almanac is sponsored in the Buffalo area by the Courier-Express, 785 Main St., Buffalo, N. Y. 14240; telephone (716) 852-5353; founded June 14, 1926, as a merger of the Courier and the Express by William J. Conners, Sr. circulation morning 154,165, Sunday 311,112; publisher, William J. Conners, III; asst. to publisher, Howard W. Clother; gen. mgr., A. Gordon Bennett; business mgr., Richard C. Lyons, Jr.; sponsors hole-in-one tournament, learn to swim program, ski school, Goodfellows.

Buffalo, the hub of the "Niagara Frontier," is located in Western New York at the end of Lake Erie and the beginning of the Niagara River. The first white settlers came to the area then called New Amsterdam in 1784. The British and hostile Indians burned the settlement of 1,500 in 1813. It was rebuilt and incorporated as the Village of Buffalo in 1816. With the opening of the Erie Canal in 1825, Buffalo's growth began as the village became the transfer point of immigration and commerce for the movement to the west. Buffalo was chartered as a city in 1832 when the population reached 10,000.

The city now operates under the mayoral form of government with the mayor being elected every four years. The Buffalo Metropolitan area, referred to as the Niagara Frontier, consists of Erie and Niagara counties and ranks 16th in metropolitan population in the nation (1965 Census Bureau estimate). The City of Buffalo itself, according to a special 1966 U. S. Census, has a population of 481,453 with Erie County, in which the city is located, having 1,087,183. The Niagara county portion of the metropolitan area including the City of Niagara Falls, has a population of 234,477 (1967 special census).

The Niagara Frontier trade market has 1,300,000 population with an annual income of \$3.5 billion. Some 55% of the U. S. population and two-thirds of the Canadian population live within a 500-mile radius.

With ample hydro-electric power from Niagara Falls augmented by the Niagara Power Project, industry on the Niagara Frontier has flourished. The area has over 2,000 manufacturing firms representing 99% of all major categories listed by the Census Bureau. Corporations with headquarters in the area include National Gypsum, Carborundum, Hooker Chemical, Trico Products and Houdaille Industries.

The Niagara Frontier is a research center of growing importance with 115 research operations. It is the home of Textron's Bell Aerosystems Co., Cornell Aeronautical Laboratory, the Western New York Nuclear Research Center on the campus of the State Univ. at Buffalo.

The city's flour milling and grain distribution facilities are among the world's largest, with 27 grain elevators having a total storage capacity of 51,915,000 bushels. In 1967, Buffalo had retail sales estimated at \$2.1 billion for the metropolitan area and \$700,422,000 for the city itself.

Buffalo became a world port with the opening in 1959 of the St. Lawrence Seaway. The port handled more than 15,000,000 tons of cargo from both the Great Lakes and ocean-going shipping in 1966. During the year 67 ocean-going vessels with 103,901 tons of cargo visited Buffalo.

The Greater Buffalo International Airport is serviced by 6 airlines. The airport handled 147,842 scheduled and non-scheduled flights with a total of 2,010,000 passengers. It is being expanded.

Buffalo also is one of the largest railroad centers in the U. S., with 15 freight terminals scheduling 25,000 trains annually. It is serviced by 8 major railroads. Approximately 150 motor carriers serve industries on the Niagara Frontier, while cross-country bus lines operate in and out.

The city currently is in the midst of a major redevelopment program highlighted by a privately-financed renewal of a large section of the downtown area. Already completed is a \$16,000,000 (22 stories) bank and office building for the Manufacturers & Traders Trust Co. and completed in 1968 a \$20,000,000 shopping mall and 26-story building for the Erie County Savings bank. Government-sponsored projects also are underway.

A progressing cultural city, Buffalo is proud of its Albright-Knox Art Gallery and Kleinhans Hall, the home of the Buffalo Philharmonic orchestra. A full-time professional theater, Studio Arena, was founded in Buffalo in 1965. Also here are the Buffalo Museum of Science, Historical Museum and Zoological Gardens.

Metropolitan area universities and colleges include the State University at Buffalo, which is about to build a new \$130,000,000 campus in suburban Amherst; State College at Buffalo, Canisius College, D'Youville College, Rosary Hill College, Niagara University, Medaille College, Villa Maria College, Trocaire College, Erie County Technical Institute, Niagara Community College.

In the world of sports, Buffalo is noted for the Buffalo Bills, twice champions of the American Football League. The city also has the Buffalo Bison baseball team in the International League and the Buffalo Bisons in the American Hockey League.

Information about Buffalo can be obtained from the Chamber of Commerce or the Boost Buffalo Committee, both at 238 Main St., Buffalo, N. Y. 14202.

Calgary, Canada (see Edmonton-Calgary)

Chicago, Illinois

The World Almanac is sponsored in the Chicago area by the Chicago Tribune, 435 N. Michigan Ave., Chicago, Ill. 60611; telephone (312) 222-3232; founded June 10, 1847. by Joseph Medill; circulation daily 831,257, Sunday 1,166,904; publisher, J. Howard Wood; president and general manager, Harold F. Grumhaus; editor, W. D. Maxwell; executive editor, Clayton Kirkpatrick; major awards include 3 Pulitzer Prizes won by staff members; sponsors college-pro all-star football game, Miracle of Books Fair, Good Fellows program, annual presentation of Nutcracker ballet.

Chicago, Illinois, is located just north and east of the center of population of the United States. Geography has helped in making Chicago the nation's center of industrial distribution and transportation.

Indians named the area Checagou for its strong-smelling wild onions. Wagon trains set up camp south of Fort Dearborn

in the 1830s on what was to become Michigan Avenue. On Mar. 4, 1837, Chicago was incorporated by 4,170 pioneers on the lower western shores of Lake Michigan.

At the time of the great Chicago fire in 1871 it had 300,000 residents. Now, as the nation's second largest city, Chicago proper has 3,538,000 people, according to Sales

Management. The same source shows Metropolitan Chicago, defined as the Illinois counties of Cook, Lake, McHenry, Du Page, Kane and Will, and the Indiana counties of Lake and Porter, with 7,492,400 people. The city, seat of Cook County, has 1,721,400 households; the 8-county area has 2,281,200. Some 64,000,000 people live within a 500-mile radius of the city. Chicago Tribune Research Dept. estimates project Metropolitan Chicago population to 8,012,000 in 1970, and 9,520,000 in 1980.

Chicagoans earn an average of \$12,650 per household, 26.3% higher than the national average. Per capita income is \$3,039, 28.2% more than the national average. Approximately 3,455,000 persons are employed in the area. Metropolitan Chicago, with 3.8% of the population of the U. S., accounts for 6.2% of the national output.

Voters elect the mayor, the city council of 50 aldermen, a city treasurer, city clerk, municipal court clerk, bailiff, judges.

Chicago leads all U. S. metropolitan areas in the production of steel, telephone equipment, radios, television sets, confectionery products, household appliances, metal wares, electrical machinery, non-electrical machinery, plastic products, diesel engines, sports and athletic goods, mirrors, picture frames, gloves and mittens, soaps, perfumes, cosmetics, window screens, blinds, shades, tin cans, snuff.

Chicago's biggest industry is primary metals, \$5.5 billion. Next is food and kindred products at \$5.2 billion; then electrical machinery, non-electrical machinery, chemical products, fabricated metal products, printing and publishing.

In the 8-county area, 14,384 manufacturers have sales of \$35.6 billion compared to \$22.5 billion only 5 years ago. More than 54,000 retail businesses in the area have combined sales of \$13.8 billion, up from \$8.5 billion 10 years ago. An \$11.4 billion climb in sales from 1958 was achieved by the area's 12,700 wholesalers. Service establishments have doubled annual sales in 10 years, reaching \$2.9 billion. The area's share of the gross national product is \$40.3 billion.

Chicago's Midwest Stock Exchange provides a market for more than 478 different kinds of stocks and bonds, and has 415 members with more than 3,000 offices. The city is headquarters for the nation's Seventh Federal Reserve District Bank, home to world's leading grain futures market, the Chicago Board of Trade, the world's biggest farm produce market, and the Chicago Mercantile Exchange.

More than 1,200 industrial laboratories are spending more than \$2 billion annually for private research and development. Argonne National Laboratory will soon be joined by the Atomic Energy Commission's 200 billion electron volt particle accelerator in nearby Weston.

Chicago hosts more than 900 trade shows and conventions annually; nearly

1,300,000 persons attend.

Chicago has more than a dozen major highways, tollways and expressways. Twenty trunk line railroads operate on half the nation's total railway mileage. Chicago's 3 principal airports handle more than 26,000,000 persons annually. Chicago combines lake, ocean and river shipping, serving as the link between the Mississippi River and the St. Lawrence Seaway.

Chicago's railroads handle more than 34,000 freight cars daily in the switching districts. Chicago is the terminal for western and eastern railroads.

The Port of Chicago handles 28.2% of all overseas cargo entering or leaving the Great Lakes, and is served by more than 100 steamship lines.

Twenty-six scheduled commercial airlines serve the city. The city originates 15.3% of the nation's air cargo. O'Hare Field is the world's largest and busiest commercial airport and handles as many as 2,000 aircraft movements a day. One of every 5 foreign visitors to the U. S. passes through customs at O'Hare Field.

Chicago's industrial complex has grown by more than 2,000 factories in the past 15 years. More than \$900,000,000 in private and public funds have been scheduled for port and waterway developments. Announcements of new commercial construction since 1960 total \$1.6 billion.

Higher education is provided by 83 colleges and universities including the University of Chicago, Illinois Tech, Roosevelt University, the new Chicago Circle Campus of the University of Illinois, Loyola, De Paul, and Northwestern. The city has 5 medical schools, 3 dental colleges, a pharmacy college, and a college of osteopathy. There are 154 hospitals in metropolitan Chicago.

Chicago's Art Institute is famous for its French impressionists and oriental collections. The Museum of Science and Industry displays wonders of space technology, electronics and industry. The Field Museum of Natural History has exhibits on anthropology, botany, zoology, and geology. The Shedd aquarium is the first and largest of its kind in the world. The Adler planetarium has a dome-shaped central chamber to show images of the heavens. Lincoln Park zoo and Brookfield zoo are popular year-round attractions.

The city's professional sports teams include the Chicago Bears, National Football League; Chicago White Sox, American (Baseball) League; Chicago Cubs, National (Baseball) League; Chicago Black Hawks, National Hockey League; Chicago Bulls, National Basketball Association; Chicago Spurs, National (Soccer) League; Chicago Mustangs, United (Soccer) Assn.

Information on the city may be obtained from the Visitors Bureau and Information Center of The Chicago Association of Commerce and Industry at 30 W. Monroe, Chicago 60603.

Cincinnati, Ohio

The World Almanac is sponsored in the Cincinnati area by the Cincinnati Post & Times-Star, 800 Broadway, Cincinnati, Ohio 45202; telephone (513) 721-1111; founded Jan. 3, 1881, by Alfred and Walter Wellman; circulation 243,618; editor, Dick Thornburg; business manager, Arnold L. Royer; sponsors annual Zoo Food and Home Show, co-sponsors annual Post-Firemen's Mile of Dimes; major awards received include 1967 Scripps-Howard Roy Howard Award.

Cincinnati, with a population of 498,400 (Census estimate, 1968) is the hub of a 7-county metropolitan area of 1,393,200 (Ohio Development Dept. 1967 estimate) on the Ohio River in southwest Ohio.

The compact downtown, on a flat plain facing the river, is surrounded on 3 sides by steep, green hills. The metropolitan

area spreads in a 30-mile circle over the hills and up industrialized valleys between, and encompasses parts of Kentucky and Indiana.

The first settlement was founded Nov. 11, 1788, by 23 settlers under Benjamin Stites. They flatbatted down the Ohio. Their settlement, Columbia, is now a sub-

urb. On Dec. 28, 1788, another group came by flatboat and founded Losantiville 6 miles downstream. Losantiville's name was changed to Cincinnati. It was where today's downtown river front is.

The river was responsible for the city's early growth. Surplus crops were sent to markets down river by boat. Cincinnati already had established itself as a river port when the steamboat came along about 1816 and let the city capitalize on its reputation.

Cincinnati is governed by a 9-member council, elected in odd years and a city manager appointed by the council. The council elects a mayor from its ranks. Cincinnati's 1968 budget is \$73,981,550.

No one industry dominates the city. Cincinnati is the home of Procter & Gamble, world's largest soap manufacturer (1967 sales \$2.4 billion); the Kroger Co., world's third largest retail food chain (1967 sales \$2.8 billion); the world's largest department store chain, Federated Department Stores, Inc. (1967 sales \$1.7 billion), and the world's largest maker of playing cards, the U. S. Playing Card Co. (1967 sales \$30,000,000).

The Cincinnati Milling Machine Co. (1967 sales \$273,000,000) is the largest of several companies that make Cincinnati the world's leading producer of machine tools.

Cincinnati is a world leader in the production of jet engines, shoes, leather goods, pianos, cosmetics, chemicals, and in printing and publishing.

Total retail sales in the 7-county metropolitan area in 1967 were \$1.950 billion (Sales Management Magazine estimate).

Cincinnati is a transport hub linking the South, the Great Lakes states, and the trans-Appalachian East. Seven railroads serve the city—Pennsylvania, New York Central, Chesapeake & Ohio, Baltimore & Ohio, Norfolk & Western, and Southern. The city owns the Southern's right-of-way to Chattanooga.

Six trunk airlines (TWA, American, Delta, Eastern, Piedmont, Lake Central) made 146,975 scheduled flights in 1967 into

and out of Greater Cincinnati Airport. The city-owned Lunken Airport handled 192,355 flights, mostly business and private craft.

River shipping on the Ohio in 1967 exceeded 110,000,000 tons and 24 billion ton-miles.

Cincinnati is in the midst of a \$100,000,000 urban renewal program in which all or part of 12 downtown blocks will be razed and rebuilt. The city has a new \$11,000,000 Convention-Exposition Center, and is getting 3 new high-rise downtown motels, garages for 2,500 cars downtown, and 4 new office buildings.

Downtown renewal includes a system of second-story-level "skywalks" linking major blocks by footbridges, covered arcades, second-story sidewalks, and corridors within buildings, all connected to street level by escalators and stairways.

A new \$32,000,000 stadium planned for the downtown river front will be the new home of the Cincinnati Reds National League baseball team and of the city's new entry in the American Football League. The Cincinnati Royals of the National Basketball Assn. play in the 14,000-seat Cincinnati Gardens.

The urban renewal program also includes a \$24,000,000 effort to rehabilitate and upgrade two older suburban neighborhoods. It also includes a now completed 296-acre industrial-commercial development adjacent to downtown, where the squalid West End slums once stood.

Cincinnati is the home of the University of Cincinnati, founded in 1819, one of the oldest municipally controlled universities. It has one of the nation's leading medical centers, where Dr. Albert Sabin, developer of the oral polio vaccine, works.

The Cincinnati Art Museum is famous for the quality of its permanent collections, reviewing the world's major civilizations of the past 5,000 years. The Taft Museum contains a famous art collection.

The Cincinnati Symphony Orchestra under director Max Rudolf, plays in Cincinnati Music Hall, also the home of the annual Cincinnati May Music Festival.

Cleveland, Ohio

The World Almanac is sponsored in the Cleveland area by the Cleveland Press, 901 Lakeside Ave., Cleveland, Ohio 44114; telephone (216) 623-1111; founded Nov. 2, 1878, by E. W. Scripps; circulation 400,000; editor, Thomas L. Boardman; managing editor, Harding Christ; business manager, George E. Carter; major awards received, Pulitzer Prize, Lasker Award; sponsors Helping Hand Charity Fund, Cleveland Open Golf Tournament, NFL Pro Football doubleheader.

Visitors to "The Best Location in the Nation," as Cleveland calls itself, are greeted by a big sign as they leave the city's Hopkins International Airport. Within 500 miles, it tells them, are 53% of the U. S. population, 54% of the nation's retail sales, 59% of the nation's industries and 67% of the billion-dollar markets.

Location is a big part of the Cleveland story. It was here—where the twisting Cuyahoga River flows into Lake Erie—that Gen. Moses Cleaveland and his hardy band of pioneer-surveyors established the first settlement in the summer of 1796. The group had been sent here by the Connecticut Land Co. to found a "capital" town for the Western Reserve, a tract of western land reserved by the new state of Connecticut.

The new settlement was given the name of its founder, but spellings in early official documents omitted the "a," and the community became known from its first years as "Cleveland." Its strategic location along the waterways—the river, the Great Lakes and, in 1827, the Ohio Canal which penetrated the state's heartland—spurred

its growth. In 1836, it became a city.

This largest city in Ohio, 8th largest in the United States, lies along the south shore of Lake Erie east and west of the Cuyahoga River along whose winding valley lies the wealth of its heavy industries. The Public Square, commercial hub of the city, is marked by the 52-story Terminal Tower, one of the tallest U. S. buildings outside New York. From the Square radiate the main streets of the city like spokes on a wheel to the east and west and south.

Many of the people who live here are descendants of immigrants from more than 60 nations around the world. They live within the city's corporate limits of some 76 square miles or within city and suburbs (included within Cuyahoga County or Greater Cleveland) which embrace some 458 square miles. Population of the City of Cleveland (according to the 1965 special census) is 810,858. For Greater Cleveland the count is 1,738,797 (according to estimate by Real Property Inventory in 1965). City government is by mayor and council.

No single industry dominates Cleveland's economy, but the making of steel and the manufacturing of metal products are mainstays. Again the city's location is a factor, for it is in Cleveland that iron from the upper Great Lakes meets the coal from the lower Great Lakes. The city is basically a "hard-goods town," its manufacturing complex occupied essentially with the creation of capital goods—machine tools (Cleveland is second only to Cincinnati), steel (its flat-roll stock used heavily by automakers), automotive products, primary metals, fabricated metal products.

Important Cleveland industries include such diversified enterprises as the manufacture of electric motors, petroleum products, chemicals, paints, rubber products, wearing apparel, measuring instruments, electronic components. Value of Cleveland's products totals almost \$7 billion a year. Greater Cleveland's retail sales come to \$2.5 billion.

Eighteen Cleveland industrial firms are included in the 1967 Fortune Magazine listing of the nation's top 500 giants. These are Republic Steel Corp., TRW Inc., Eaton, Yale & Towne, Inc.; White Motor Co., Standard Oil Co. of Ohio; Sherwin-Williams Co., Midland-Ross Corp., Addressograph-Multigraph Corp., Diamond Alkali Co., Automatic Sprinkler Corp., Hupp Corp., Reliance Electric Co., Harris-Intertype Corp., White Consolidated Industries, Cleveite Corp., Hanna Mining Co., Warner & Swasey Co., and Parker-Hannifin Corp.

Cleveland is a transportation crossroads and one of the city's most important facilities is its port. Cleveland is the largest city on Lake Erie, the third largest city on the Great Lakes, a competitor with Chicago in overseas tonnage, handling some 22,000,000 tons of bulk cargo and some 531,209 tons of general cargo. Forty steamship lines offer service to more than 140 ports in 70 countries.

Four major railroads serve the Cleveland area—the Baltimore and Ohio, Erie Lackawanna, Penn. Central and the Norfolk and Western. Some 4,000,000 passengers arrive at and leave from Cleveland Hopkins Airport each year. Another 170,-

000 or so each year use the city's Burke Lakefront Airport, just 5 minutes from the center of Cleveland and capable of handling intermediate jets.

Cleveland's giant downtown rebuilding plan has seen the completion of a 40-story office building and plaza, and a nearby 32-story Federal Bldg. A number of other high-rise apartment and office buildings are under construction downtown.

The city's new Convention Center is the largest city-owned convention facility in the country. And Cleveland's cultural treasures are manifold.

There are the Cleveland Orchestra, world famous; the Cleveland Play House, the nation's oldest and largest resident professional theater; the Cleveland Museum of Art, with its internationally known collections housed in one of the most beautiful museum buildings in America; Karamu House, nationally acclaimed for its interracial artistic accomplishments; the Western Reserve Historical Society, and the Cleveland Health Museum. And there are the lovely Cultural Gardens, the Cleveland Zoo, the Natural Science Museum and an expansive system of metropolitan parks which has helped earn for Cleveland the title of "Forest City."

Cleveland is a sports-minded city, home of the Browns of the National Football League, the Indians of the American (baseball) League, the Barons of the American Hockey League. Professional soccer has become a part of the sports scene, too, and area fans have their calendars full the year around with such attractions as horse racing, stock car racing, basketball, even curling and judo.

Colleges and universities include Case Western Reserve University, Baldwin-Wallace College, Cleveland State University, Cuyahoga Community College, John Carroll University, Notre Dame College, St. John College and Ursuline College.

Companies or persons seeking information on Cleveland business and living conditions may write to the Greater Cleveland Growth Assn., Union Commerce Bldg., Cleveland, Ohio 44114.

Columbus, Ohio

The World Almanac is sponsored in the Columbus area by the Columbus Citizen-Journal, 34 S. Third St., Columbus, Ohio 43216; telephone (614) 461-5000; The Citizen founded in 1899, The Ohio State Journal in 1811; circulation 117,940 six mornings of the week; owned by the E. W. Scripps Co.; editor, Charles Egger; business manager, Paul W. Ream; sponsors Citizen-Journal Spelling Bee, Adopt-A-Family, Sweepstakes Night at Scioto Downs, Outstanding Women's Tea, Broadway Theater Party; co-sponsors of Golden Age Hobby Show, Charity Newsies.

The capital city of Ohio, Columbus has an estimated population of 581,883 (1968) and is the state's largest city in area, the second largest in population.

Columbus is in the heart of Ohio, on rolling plains 777 feet above sea level at the confluence of the Scioto and Olentangy Rivers (both Indian names), and ever since its founding in 1812 has been a crossroads and mecca.

The central location led to its creation as the capital, the original streets being laid out in a forest in the gridiron pattern set by Philadelphia, Pa. Today the gridiron is surrounded by the Innerbelt, the Outerbelt, suburbs with winding streets, industrial parks and greenbelts.

Minerals and clay of the Hocking Valley coal field southeast of Columbus balanced agricultural areas north and west, leading to spectacular growth in wholesaling, which still supplies a vast sector of Ohio and two states to the south. Investment in Hocking Valley enterprises contributed greatly to the city's wealth.

Columbus has more than 900 manufacturing plants. The city produces jet planes, refrigerators, telephones, mining machinery, wheel assemblies for railroad cars, auto parts, electrical machinery, shoes, paint, food, packaging, plastics, wall coverings, bearings, grave vaults, tools, glassware, printing, cement mixers, heating and air-conditioning units. Columbus manufacturers employed 74,556 persons in 1967 with annual payroll of \$485,405,577.

The city government has a council. Its members and the mayor are chosen in nonpartisan elections. The 1968 budget included \$32,750,000 for general-fund operating expenses and \$62,500,000 for capital improvements.

Ohio State University is largest among Columbus' colleges, other major ones including Capital University, Franklin University, Ohio Dominican College (formerly St. Mary of the Springs) and St. Charles Seminary. The horseshoe-shaped 84,000-seat Ohio Stadium has become a symbol

of the city, the OSU home football games attracting capacity crowds. Professional teams include Columbus Jets (baseball), Checkers (hockey) and Comets (basketball). Tracks are Beulah Park (thoroughbreds) and Scioto Downs (harness horses).

Worldwide in its research assistance to industry and government is Battelle Memorial Institute. Global also is Chemical Abstracts. Situated between them is the OSU Medical Center.

The Armed Forces has the world's largest materiel depot in Columbus. Thirty-six insurance firms have their home offices in Columbus, which is the seat of Franklin County that has a projected 1970 population of 942,386. Columbus retail sales were an estimated \$1,462,318,976 in 1967, an increase of 61.7% over 1960. The city has 4 railroads; there are 9 airlines, most of them using Port Columbus International Airport. Yearly import-export business of Columbus firms is over \$60,000,000.

The Ohio State Fair is held in late summer at the in-city Ohio Expositions Center, where the Ohio Historical Society has

built a spectacular museum. Tentative discussions have been held on a 1992 World's Fair inasmuch as the city is the largest in the world named for Christopher Columbus.

Downtown developments include a marina, a convention center and a sports arena. Two slum areas have been replaced by new, bright buildings. Tallest tower in the city is the LeVeque-Lincoln Tower, matching the 555 feet of the Washington Monument. High-rise apartments and dormitories overlook valleys.

Other attractions include the Park of Roses (world's largest), Columbus Symphony Orchestra, Ohio Railway Museum and German Village, an urban restoration. German immigrants were a major factor in the city's growth, and each year an Oktoberfest is held. The Columbus Gallery of Fine Arts has an outstanding collection of oils by George Bellows, artist born in Columbus.

Those wanting more information on Columbus can write or phone the Columbus Area Chamber of Commerce, 30 E. Broad St., Columbus, Ohio 43216.

Dallas, Texas

The World Almanac is sponsored in the Communications Center, Dallas, Tex. 75222; by Samuel Bangs; circulation 236,273 daily, 275,699 Sunday; president, Joseph M. Dealey; executive editor, Jack B. Krueger; managing editor, Thomas J. Simmons; major awards received include Pulitzer Prize and National Headliner Award; sponsors Dallas Beautification award, Teenage Citizenship Tributes, Fly-the-Flag campaign, etc.

The second largest city in Texas, Dallas is the financial, transportation, trade and cultural capital of its region.

According to Chamber of Commerce estimates based on employment figures, metropolitan Dallas with an estimated population of 1,430,500 in June 1968, had experienced since 1960 the fastest growth rate of the 20 leading U. S. standard metropolitan areas. Dallas County's population was estimated at 1,229,600, a gain of about 278,000 since the 1960 census. The incorporated area's population was estimated at 840,900.

The city sits astride the Trinity River in North Texas, about 75 miles south of the Oklahoma border, at an elevation ranging from 450 to 750 feet in an area of plains.

Lacking any significant natural advantage as a city site, Dallas was built largely through aggressive personal efforts of numerous commercial and civic leaders who promoted the city's interests. It is still noted for a "booster" spirit exemplified by its nickname "Big D."

The first settler was a frontiersman from Tennessee, John Neely Bryan, who chose a natural fording place on the Trinity, near the Three Forks of that stream, as the site for a trading post for the Caddo and Cherokee Indians of the vicinity. White settlers soon drove the Indians westward, however. Neely operated a ferry, and plotted the townsite in 1844. The log cabin he built in 1843, the first home in Dallas, still stands on the Old Courthouse grounds in downtown Dallas near its original site. Dallas County was created in 1846, named for Vice President George Mifflin Dallas, and the city was incorporated in 1856 with about 300 inhabitants.

Since 1931 the city has had a council-manager form of government. Although the fertile "Blackland" that made Dallas County productive of wheat and cotton in earlier years is rapidly being converted to industrial and residential use, the city remains the agribusiness capital of the Southwest, with a large trade in farm equipment, feeds, fertilizers and cotton

Dallas area by the Dallas Morning News, telephone (214) RI 7-4611; founded in 1842 by Samuel Bangs; circulation 236,273 daily, 275,699 Sunday; president, Joseph M. Dealey; executive editor, Jack B. Krueger; managing editor, Thomas J. Simmons; major awards received include Pulitzer Prize and National Headliner Award; sponsors Dallas Beautification award, Teenage Citizenship Tributes, Fly-the-Flag campaign, etc.

gin machinery.

Its spectacular population growth began with the post-World War II move of aircraft manufacturers to the Dallas suburban area, augmenting an economy that had been built first on cotton, then on oil, banking and insurance. The East Texas oil boom of the 1930s brought oil company offices and oilfield suppliers to Dallas.

Diversified economic expansion, marked by notable increases in aviation, aerospace and electronics manufacturing, has fed the growth of the 1960s.

Dallas ranks fourth among U. S. cities in the number of million-dollar-net-worth companies' headquarters. Four leading science-oriented industries (Texas Instruments, Ling-Temco-Vought, Dresser Industries and Collins Radio) together recorded sales over \$1.8 billion in 1966.

Retail sales in the metropolitan area totaled \$1.809 billion in 1963 and were estimated at \$2.353 billion in 1966, while effective buying income per household in 1966 was estimated at \$9,508.

Dallas is an important wholesale apparel center, with several seasonal market showings, and a regional retail trade center. Neiman-Marcus specialty store has built an international reputation for fashion leadership and merchandising.

In the past three years, more than 30 new first-class office buildings have been constructed, including the city's tallest skyscrapers, the First National Bank and the Republic National Bank Tower. A new county government center was completed in 1966. Major construction scheduled, newly completed or under way includes a \$26,000,000 Federal center; a \$30,000,000 post office; a \$23,900,000 downtown municipal center; the Army and Air Force Post Exchange Service headquarters; a \$65,000,000 shopping center in the southwest section of the city, to be the largest such facility in the South; One Main Place, a downtown "superblock" of shops and offices to rise 34 stories at a cost of about \$41,000,000.

The city is served by 8 airlines, 9 railroads, two transcontinental bus lines and

37 motor freight lines. They move an estimated 20,000 tons of freight into Dallas daily and carry more than 15,000 passengers a day. The city has 6 outlets on the interstate highway system. A long-sought canalization of the Trinity River for barge traffic awaits Federal appropriations.

Love Field is the nation's 7th busiest airport. In fiscal 1967, 3,807,760 passengers enplaned there. Dallas and its neighbor city of Fort Worth, 30 miles to the west, are building a new regional airport midway between the cities by the early 1970s.

Higher education is served by Southern Methodist University, the University of Dallas, Bishop College, Dallas Baptist College, Christian College of the Southwest, Dallas County Junior College, the Southwestern Medical School of the University of Texas and the Baylor University College of Dentistry.

Dallas is the site of the Texas State Fair for 16 days each October, the largest such exposition in the nation in attendance. Within Fair Park, open the year round, are the Hall of State historical museum, Dallas Museum of Fine Arts, Aquarium,

Museum of Natural History, Health and Science Museum, Dallas Garden Center, State Fair Music Hall, Cotton Bowl.

Also of interest to visitors are the Mar-salis Park Zoo, Dallas Theater Center (designed by Frank Lloyd Wright), and SMU's Owens Fine Arts Center with a collection of paintings and sculpture. Leading musical events are the Dallas Symphony and Dallas Civic Opera seasons, an annual spring tour of the Metropolitan Opera and professional Summer Musicals at Fair Park.

The Cotton Bowl is the site of an annual New Year's Day football game as well as home games of the professional Dallas Cowboys (National Football League). Other sports are represented by the Dallas-Fort Worth Spurs (Texas League baseball) the pro basketball Chaparrals (American Basketball Assn.), the Black Hawks hockey team and the Dallas Tornado soccer team.

Information about Dallas business and living conditions may be obtained from the Chamber of Commerce, Fidelity Union Tower Building, Dallas, Tex. 75201.

Dayton, Ohio

The World Almanac is sponsored in the Dayton area by The Journal Herald, 37 South Ludlow Street, Dayton, Ohio 45401; telephone (513) 223-1111; founded Sept. 18, 1808, as Dayton Repository by William McClure and George Smith; circulation 111,062 daily (six months ending March 31, 1968); editor, Glenn Thompson; managing editor, Charles T. Alexander; editor, editorial page, Theodore Bingham; community projects include Neighborhood Beautification Awards, Senior Citizens' Tours, Fishing Clinic, Father-Son Sports Night, National Industrial Bowling Tournament, Learn-To-Swim, Cincinnati Reds' Baseball Clinic, Area Football and Basketball All-Stars Banquet and TV Program.

Dayton, the "Birthplace of Aviation," is one of the nation's major industrial and research centers, located in the rolling hills of west central Ohio where the Miami, Stillwater and Mad Rivers join.

Dayton is the fastest growing metropolitan area in Ohio and the center of the 10th largest local service market in the nation. Retail sales in the city totaled \$539,606,000 in 1966 and \$1,248,499,000 in the Dayton metropolitan area.

Dayton was the first major metropolitan city to install the commission-manager form of municipal government (1913); and the first area to have a comprehensive flood control project, the Miami Conservancy District, which was financed entirely by local funds (started in 1913). Dayton was also the first Ohio city to enact an income tax by popular election after the courts declared a council-enacted income tax unconstitutional (1950).

Dayton was settled by a score of men, women and children in 1796 when a group headed by Samuel Thompson left Cincinnati by boat for Dayton. The city was incorporated in 1805 and chartered as a city in 1841. It is the 4th largest standard metropolitan statistical area in the state.

The city of Dayton has a population of 272,000, while the metropolitan area is 851,100. Projections are for a population of 300,000 in the city and 1,081,800 in the metropolitan area by 1975.

From almost 1,000 industrial plants in the Dayton area come a variety of widely-known products. It is the home of the world's largest cash register manufacturing plant (National Cash Register Company), the world's largest magazine production facility (McCall Corporation); and the third largest concentration of General Motors Corporation operations (Delco Moraine, Delco Products, Frigidaire, Inland Mfg. and AC Electronics).

Dayton is the home of Wright-Patterson Air Force Base, which stands on land where the Wright Brothers did much of their early flying.

WPAFB is the worldwide headquarters

for the Air Force Logistics Command and headquarters for the Aeronautical Systems Division which conducts research and development and manages procurement of all aircraft used by the Air Force.

Other organizations at the base include the Foreign Technology Division, Aerospace Medical Research Laboratories, four other major laboratories (Avionics, Materials, Flight Dynamics, and Aero Propulsion), the Air Force Institute of Technology, the Air Force Museum (which draws an estimated one million visitors a year) and the 17th Bombardment Wing of the Strategic Air Command.

A second major defense installation is the Defense Electronics Supply Center which handles procurement of more than 500,000 electronic components for all branches of the military service.

Dayton is a growing city and has plans for an extensive new county government complex downtown as well as a redeveloped downtown section known as Center City West. In 1967, 264 commercial building permits were issued in Dayton, valued at \$20,590,207. In the same year, 482 permits were issued in the metropolitan area, with a value of \$37,465,906. Through April, 1968, 77 commercial building permits were issued in the city, valued at \$11,726,757, and 141 in the metropolitan area for a value of \$15,046,337.

Under construction in 1968 were a 22-story office building, an 11-story hotel and large buildings for Ohio Bell Telephone, Price Bros. Construction Company (64,000 square feet), a 3-story Senior Citizens Center (25,000 square feet), and a new Post Office (213,000 sq. ft.). Planned is a 30-story bank and office building.

Located in the center of a business center containing 7 metropolitan areas with a population of 3,700,000, Dayton is served by five airlines and 3 trunk line rail systems. Seven motor bus lines offer local and national service and a trolley system operates within the city.

Dayton is the home of the 118-year-old Catholic University of Dayton and Wright

State University, which accepted its first students in 1964 as a branch of two other state universities. It is now an independent state university. There are also two junior colleges, Sinclair with programs in business, liberal arts and engineering and Miami-Jacobs, an accredited junior college of business. The city is also home for the School of the Dayton Art Institute and United Theological Seminary.

College football and basketball are provided by the University of Dayton teams. UD's basketball team was the National Invitational Tournament champion in 1968. Other spectator sports include a professional hockey team, the Dayton Gems, and two stock-car raceways.

Dayton's Philharmonic Orchestra, a Civic Music Association and the Dayton

Opera Association all present annual program series. Outdoor summer concerts are offered at the Diehl Memorial Shell and Deeds Carillon. Dayton Art Institute houses both permanent and special exhibits throughout the year. Four amateur theatrical groups perform in winter, two professional companies in summer.

Points of interest include the Amateur Trapshoot Association headquarters in suburban Vandalia, where the annual Grand American Trapshoot is held in August; Carillon Park, containing Deeds Carillon and historical exhibits pertinent to Dayton history; Paul Lawrence Dunbar homestead, home of the famed Negro poet now maintained as a national shrine; Wright Brothers Memorial; and the national Aviation Hall of Fame.

Denver, Colorado

The World Almanac is sponsored in the Denver area by the Rocky Mountain News, 400 W. Colfax Ave., Denver, Colo. 80201; telephone (303) 892-5000; founded Apr. 23, 1859, by William N. Byers; circulation daily 195,448, Sunday 212,872; editor, Jack Foster; business manager, Edward W. Estlow; sponsors Colorado-Wyoming spelling bee, Golden Wedding party, Huck Finn Day, Ski School.

Denver, Colorado's capital, is exactly one mile above sea level at the far western edge of the Great Plains, near the foothills of the Rocky Mountains, lending it the dual designation of "Mile High City" and "Queen City of the Plains."

Largest city between Chicago, St. Louis and West Coast, its government is non-partisan with mayor and nine councilmen.

Founded in 1858 with discovery of placer gold at the junction of South Platte River and Cherry Creek, now in geographical center of city, Denver rapidly became the supply center for mining camps in nearby mountains. It remains the largest distribution center in the region extending from Canada to Mexico and embracing one-third of the U. S. geographical area.

Since World War II, Denver has become center for "smokeless industries" with 1,400 manufacturing companies. A tourist mecca, Denver is a gateway to vast recreational areas, including more than 20 major winter sports resorts and more mountains than Switzerland.

The 1960 U. S. census gave Denver a population of 493,887. Today, population of its standard metropolitan area is estimated at 1,201,800, total effective buying power of \$3.2 billion. Total retail sales in 1967 were \$3.476 billion.

Denver-headquartered companies include the Gates Rubber Co., world's largest producer of V-belts and hose, sixth largest U. S. rubber company with plants in 8 U. S. cities and 5 foreign countries. It is family-owned, widely diversified.

Samsonite Corp., world's largest luggage manufacturer, also produces folding furniture and toys. It has 11 plants in U. S. and foreign cities.

Other large Denver-based firms include: Great Western Sugar, Ideal Cement, American Crystal Sugar, Colorado Milling & Elevator, and CF&I Steel.

Adults in Metro Denver have average of 12.2 years of formal education, second among major U. S. cities to Washington, D. C. Leading higher education institutions are: University of Colorado; University of Colorado Medical School; University of Denver; Iliff School of Theology; Colorado School of Mines; Regis College; Loretto Heights College; Temple Buell College (formerly Colorado Woman's College), and Metropolitan State College.

Denver is served by six Class I railroads; 68 major interstate and 42 intrastate motor carriers; two transcontinental and two intrastate bus lines, and 10 commercial airlines.

Stapleton International Airport in 1967 handled average daily arrivals and departures of 420 commercial flights daily, or a total of 153,515 for the year. Passengers in and out, 1967, totaled 5,078,502. In addition, general aviation aircraft in and out averaged 791 planes daily for a yearly total of 288,735, making the airport the eighth busiest U. S. Airport. Air Freight in 1967 totaled 94,242,966 pounds, air express 8,679,403 pounds and air mail 43,320,359 pounds.

An airport improvement plan of \$25,000,000 has been completed. A new \$50,000,000 million expansion is under way.

Until recently, buildings were limited to 12 stories. In the last 15 years, 16 buildings, up to 32 stories, were built in the downtown area. Tallest building, a 42-story apartment, office and shop complex, is completed. More than 35 high-rise apartments have been built.

Military establishments include Lowry Air Force Base; Air Force Accounting and Finance Center; Army's Rocky Mountain Arsenal (fire bombs, nerve gas, etc.); Fitzsimons General Hospital.

Denver has the largest number of U. S. Government offices of any city outside of Washington, D. C. Also, site of Atomic Energy Commission's Rocky Flats plant and U. S. Mint.

A \$25,000,000 urban renewal project was recently completed. A new, \$250,000,000 project is under way, including an \$11,800,000, 3-square-block convention center.

Although in a semi-arid region with annual precipitation averaging less than 15 inches, Denver is known for its beautiful lawns and trees, thanks to the far-sighted municipal water department which has spent \$120,000,000 to provide 520,000 acre feet of water storage.

Denver has more than 100 named parks and a 20,000-acre mountain park system.

Other points of interest include: Colorado Capitol Bldg., with its dome covered by 250 ounces of 28 karat Colorado gold leaf; world-renowned Colorado Museum of Natural History; City Park Zoo; Denver Art Museum; Denver Botanic Gardens; Metro Denver's 28 private and public golf courses (where golf is played 324 out of 365 days a year); and the 12,000-seat Red Rocks open-air theater.

Denver offers 4 professional sports teams—Denver Bears of the Triple-A Pacific Coast Baseball League; Denver Broncos of American Football League; Denver Rockets of the American Basketball Assn.; and Denver Spurs of the Western Hockey League.

Des Moines, Iowa

The World Almanac is sponsored in the Des Moines area by the Des Moines Register & Tribune, 715 Locust St., Des Moines, Iowa 50304; telephone (515) 284-8000; founded July 26, 1849, by Barlow Granger; circulation Morning Register 255,474, Evening Tribune 116,722, Sunday Register 526,033; president, Gardner Cowles; board chairman, John Cowles; editor & publisher, Kenneth MacDonald; general manager, David Kruidenier; writers and photographers have won 11 Pulitzer Prizes; sponsors Tribune Community Service Award, Drake University-Register summer workshop.

Des Moines, Iowa's capital city, is located at the junction of the Des Moines and Raccoon rivers in south central Iowa. Its rolling hills and wooded areas make it a city of beautiful parks and residential sections.

A military post was established at this site in 1843 to protect Indian rights. In 1845 the surrounding land was thrown open to settlers. Des Moines was incorporated in 1851 and became the capital in 1857. The fort was disbanded in 1847, but a new Fort Des Moines was built in 1902 as a cavalry post. During World War Two it was the headquarters for the Women's Army Corps (WAC). Today military reserve forces use the remaining buildings.

The Greater Des Moines Chamber of Commerce estimates the present metropolitan area population to be 272,000. The city has had a council-city manager form of government since 1950.

Des Moines is an important retail center with annual sales of \$662,000,000. Manufacturing plants produce more than 500 products valued at more than \$1 billion annually. There are more than 700 wholesaling and jobbing firms.

Among the manufacturing plants are the North American headquarters of Massey-Ferguson, Inc., John Deere and Ford Motor Implement, manufacturers of farm implements, Firestone Tire and Rubber Co. and Armstrong Rubber Co. have large Des Moines plants.

Des Moines is a major publishing center. Located there are The Des Moines Register and Tribune, circulation offices of Look Magazine; Meredith Publishing Co. which publishes Better Homes and Gardens and Successful Farming; and Wallace Homestead Co., publisher of Wallace Farmer Magazine. There are 11 radio and four television stations.

Des Moines contains home offices of 56 insurance companies. The Equitable Life Insurance Co. of Iowa, founded in 1867, is the oldest life insurance company west of the Mississippi River. Bankers Life Insurance Co. of Des Moines is the largest west of the Mississippi.

The city is served by 3 commercial air-

lines, 7 railroads, 46 truck lines and two major bus lines. The municipal airport recorded 664,968 arriving and departing passengers in 1967. Two major interstate highways intersect at Des Moines.

New buildings recently completed or under construction include a 10-story Federal Office Building, regional post office, and a 300-unit, \$3,800,000 low rent housing project by the Des Moines Area Council of Churches. Recently built homes and buildings have been designed by such renowned architects as Mies van der Rohe, Eliel Saarinen, Richard Neutra and Skidmore, Owings and Merrill. An older area just north of the downtown area is being revitalized by a large urban renewal project.

Other major buildings include the gold-domed State Capitol, built in the late 1800s atop a majestic hill; the Saarinen-designed Des Moines Art Center with an addition designed by I. M. Pei; Veterans Memorial Auditorium, a 15,000-seat convention and sports center; and civic buildings and a beautiful YMCA along the Des Moines River front. Construction began in 1968 on a new YWCA.

KRNT Theater seats 4,200 and is one of the largest legitimate theaters in the world. The Des Moines Community Playhouse, with 8,000 members, stages conventional theater and is supplemented by a theater-in-the-round called the Drama Workshop. The Iowa State Fair, one of the largest agricultural expositions in the world, is held in August. A Children's Zoo was opened in 1966. Des Moines has a professional hockey team and is the site of both the boys' and girls' state high school basketball tournaments.

Drake University is the home of the Drake Relays, an important annual track meet. Also in Des Moines are Grand View College, a two-year school, and the College of Osteopathic Medicine and Surgery. Iowa State University is located 25 miles north of Des Moines in Ames.

The Greater Des Moines Chamber of Commerce, Eighth and High streets, provides information on business and living conditions.

Detroit, Michigan

The World Almanac is sponsored in the Detroit area by the Detroit News, 615 W. Lafayette Blvd., Detroit, Mich. 48231; telephone (313) 222-2000; founded 1873 by James E. Scripps; circulation daily 702,591, Sunday 953,929; board chairman, Warren S. Booth; president & pub., Peter B. Clark; executive v.p. & gen. mgr., Edwin K. Wheeler; editor, Martin S. Hayden; major awards won include University of Missouri Award, Pulitzer Prize; community projects include Policeman and Fire Fighter of Month awards, NCAA Championship Indoor Track Meet, Detroit Soap Box Derby, Science Fair, Scholastic Writing and Art Awards, Spelling Bee, Michigan Industrial Education Awards, and Green Pennant Safety Awards.

Detroit, "The Motor City," is the nation's fifth largest, with a 1967 population of 1,620,000 and a 3-county metropolitan area population of 4,214,000, by estimate of the regional planning commission. The city covers 139.6 square miles on the Detroit River, a Great Lakes connecting link and the world's busiest inland waterway.

The city government is headed by a mayor and 9 councilmen elected at large on a nonpartisan ballot, under a "strong mayor" city charter.

Detroit was founded in 1701 by the Frenchman Cadillac as a strategic frontier fort and trading post, ceded to the British

in 1763 and turned over to the U. S. in 1796, a village of 2,500. Destroyed by fire in 1805 and rebuilt, it was reoccupied by British for a year in the War of 1812.

Completion of the Erie Canal in 1825 opened a cheap water transport route from New York to the Northwest and made Detroit an important commercial center. Rail service reached Chicago in 1852, New York in 1854.

Population in 1860 was 45,619. Detroit was an important terminus of the Underground Railroad by which fugitive slaves reached freedom.

By 1880 Detroit was a major industrial

city, with 116,000 people and 825 factories. Tobacco and metal products were leading industries, especially stoves and railroad cars. Pharmaceuticals and industrial chemicals (based on vast underlying strata of salt and brines) grew in importance by 1900, but metalworking industries led. Its thriving machine and foundry industries, carriage and wagon shops laid the foundation for Detroit's emergence as the nation's auto capital, along with the fact that several pioneer auto experimenters lived in the city.

Among them were R. E. Olds, who built Detroit's first auto factory in 1899, and Henry Ford, who hand-built his first car in 1896, formed his first company in 1899 and the present Ford Motor Co. in 1903.

Auto production, the World War I boom and the Roaring Twenties pushed Detroit's population from 285,000 in 1900 to 993,000 in 1920 (fourth largest in the U. S.) and 1,568,000 in 1930. The area's industries made it the "Arsenal of Democracy" in World War II.

Despite postwar decentralization, Detroit remains the capital of the auto industry. Area plants produce 25% of the nation's cars and trucks, employing 225,000. Transportation equipment accounted for 42% of the total \$6.6 billion value added by area manufacturers in 1963. But the area's business is highly diversified, with only 16% of its labor force in the auto industry. Nonautomotive manufacturing employs 354,000; 835,000 are in nonmanufacturing employment. Other leading products are machine tools, gray iron products, metal stampings, hardware, industrial chemicals, drugs, paints, wire products and office machinery.

In addition to the major auto firms, leading companies headquartered in Detroit include Parke, Davis & Co., drugs; Burroughs Corp., business machines; Excelsior Corp., milk carton machinery; R. P. Scherer, gelatin capsules.

Total metropolitan area personal income in 1967 was \$14.25 billion, \$11,804 per household. Area retail sales were \$7.2 billion.

Detroit is served by 9 railroads, 200 truck lines, 15 airlines and 3 air freight carriers and 50 ship lines. Air passengers totaled 5,760,000 in 1967; rail freight tonnage was 26,750,000 in 1967. Port of Detroit cargo tonnage was 33,300,000 in 1966, of which 1,423,604 was overseas traffic. More than 7,500,000 vehicles a year cross the international border between Detroit and Canada.

Hub of the downtown business district

is the 75-acre, \$100,000,000 Civic Center, including Cobo Hall and Convention Arena with its 400,000 square feet of exhibit space, which replaced a district of rundown riverfront warehouses. Other major urban rebuilding projects include 660 acres in the Lafayette and Elmwood downtown residential developments, valued at \$284,000,000 when completed, a 235-acre, \$151,000,000 midtown medical center and a 182-acre expansion of the Wayne State University campus.

Detroit's city-owned water system, now supplying 3,503,800 people in 70 communities, is in a \$475,000,000 expansion program to serve 6,500,000 by 1985. Nearby Lake Huron affords an unlimited water supply. Expenditure of \$36,000,000 was scheduled for 1968 in an area pollution control program to cost \$922,000,000 by the year 2000.

Points of interest to visitors include Chrysler, Ford and General Motors auto plants, Henry Ford Museum and Greenfield Village historical displays, Cranbrook Institute (science museum and arts), Belle Isle (1,000-acre island park), Zoological Park (natural animal settings), Institute of Arts, Public Library, Historical Museum, and Fort Wayne Military Museum. There are 1,000 inland lakes within an hour's drive.

Cultural institutions and events include the Detroit Symphony Orchestra, International Institute, Meadow Brook music and drama programs and the annual Freedom Festival, celebrating Canada's Dominion Day, July 1, and the U. S. Independence Day, July 4.

Eleven colleges and universities are located in the metropolitan area, including Wayne State University, among the nation's leading urban universities, Univ. of Detroit, and branches of the Univ. of Michigan and Michigan State Univ.

Detroit is represented in professional sports by the Detroit Tigers baseball club (American League), Detroit Lions (National Football League), Detroit Red Wings (National Hockey League), Detroit Pistons (National Basketball Assn.) and Detroit Cougars (United Soccer Assn.).

Among Detroit-area "firsts" are the world's first mile of concrete highway, 1909; first scheduled radio broadcast station, WWJ-The Detroit News, 1920; first U. S. pouring of Bessemer steel, 1864.

Information about Detroit is available from the Greater Detroit Board of Commerce, 150 Michigan Ave., Detroit, Mich. 48226, and Mayor's Committee for Industrial and Economic Development, 322 Veterans Memorial Building, Detroit 48226.

Edmonton-Calgary, Canada

Fort Edmonton, built in 1795, was related to the fur trade but today's Edmonton, a supply center for Canada's northland and of a mixed farming area, is expanding on a solid industrial base.

The economy of the region was transformed by the discovery of oil at Leduc (20 miles south) in 1947, and now agriculture and livestock-producing are balanced by refining and manufacturing operations. Edmonton is the originating terminus of 5 pipelines transporting Alberta crude oil and natural gas to eastern Canada and the U. S. The city is located on a transcontinental railroad, a new trans-Canada highway through the all-weather Yellowhead Pass, and is linked north and south via the Alaska Highway.

The city's population doubled in the decade 1950-1960. Now, with a population of 420,000, its 5-year growth rate is the fastest in Canada. Twenty-story towers

have become commonplace and current construction is highlighted by an office structure reaching to 40 stories.

Edmonton boasts a 2,700-seat auditorium, new \$2,000,000 art gallery, new provincial Museum and Archives, new \$5,000,000 Centennial Library, its own symphony orchestra and many live stage production groups.

Points of interest include the Alberta Game Farm, Storyland Valley Zoo, Canada's first public planetarium, and the University of Alberta.

In July the city relives the 1898 Yukon gold rush during "Klondike Days" as the 89-year-old Edmonton Exhibition is now known. Edmonton's amateur athletic teams have established an enviable record dating from the international champion Grads, a girls' basketball team that won 502 games and lost 20 between 1915 and 1940. The Superiors (1933) and the Mer-

cury (1950) hockey teams won world titles and the Mercury team (1952) won an Olympic title.

The Eskimos of the Canadian Football League are the sole professional sports organization, but Canada's largest motor

sports complex is Edmonton's Speedway Park, site of many international races.

Specialized information about Edmonton is obtainable through Leo LeClerc, Industrial Development Coordinator, City Hall, Edmonton, Alberta.

Calgary, Canada

The World Almanac is sponsored in the Calgary and southern Alberta area by The Calgary Albertan, 830 Tenth Ave., S.W., Calgary 3, Alberta; telephone (403) 263-7730; founded April 10, 1902; circulation 34,472; publisher, G. Max Bell; general manager, Frank McCool; managing editor, David Humphries; business manager, Al Vogt.

Calgary, one of Canada's highest cities (elevation: 3,440 feet) lies at the foothills of the Rocky Mountains, 180 miles south of Edmonton and 150 miles north of the Montana-Alberta border. The city began as a Mounted Police outpost and as early as 1885, when the railway arrived, it had a population of 1,800. The city now encompasses an area of 155.8 square miles with a population of 360,000. Its growth rate of 4.8% is the fastest in Canada in the latest 12-month census period.

Calgary became the trading center for southern Alberta in the early days and continues to hold a wholesale and manufacturing function. Oil was discovered in 1914 at Turner Valley, just south of the city and 400 firms directly connected with the oil industry have headquarters in Calgary. Although ninth in population, the city is fifth in bank clearings. Its industry includes oil refineries, chemical, fertilizer and supply industries and the older agricultural industries. Shipment of goods reaches \$375,000,000 annually. Calgary is served by 5 airlines and two railroads.

The city's location close to the mountains (resulting in "chinook" winds that can provide pleasant spring-like interludes in the middle of a prairie winter) and its connection through history to the old west attract tourists from all parts

of the continent. The civic symbol, the white cowboy hat, is an outgrowth of the Calgary Stampede, held each July. The city's motto is "Onward."

Calgary has a 2,700-seat auditorium, a gift of the province during Alberta's Jubilee year; the provincial government Glenbow Museum, Allied Arts Center, a Centennial Planetarium, symphony orchestra and live theatre. Attractions to visitors center on the western theme. Heritage Park reconstructs the early days; at the Horseman's Hall of Fame life-like figures recall western historical events; and at the Calgary Zoo and Natural History Park life-size dinosaurs do battle. Happy Valley, a 460-acre park, is Canada's largest man-made recreation area. The 626-ft. rotating Husky Tower provides a panoramic view of the city with room for 200 for dining and 300 in its observation area. The University of Calgary has 6,000 students.

Every active sport is displayed in the city and newly-constructed facilities for hockey, football and curling rank with the finest in the nation. The professional Stampeders of the Canadian Football League often draw capacity crowds.

Assistance in locating industrial information is provided by Ken Ford, Industrial Coordination, City Hall, Calgary, Alberta.

Hartford, Connecticut

The World Almanac is sponsored in the Hartford area by the Hartford Times, 10 Prospect St., Hartford, Conn. 06101; telephone (203) 249-8211; founded 1817 by Frederick D. Bolles and John M. Niles; circulation 145,000; general manager, Robert R. Eckert; editor, Stuart A. Dunham; Pulitzer Citation as one of Gannett Newspapers, Pulitzer Prize to staff member; major community projects included series on education, housing, urban renewal.

Hartford, capital and most populated city (165,000 residents) of Connecticut—core city of the Capitol Region (Greater Hartford) of 28 surrounding towns—is located generally in the center of the state midway between New York City and Boston via highway, rail or air, at the head of navigation on the Connecticut River 50 miles inland from Long Island Sound. Population of Capitol Region: 647,000.

First settlers were the Dutch, who erected a fort (1633) at the present site of Hartford, and in 1636 the Rev. Thomas Hooker and a company of settlers journeyed overland from Newtown (Cambridge), Mass., founded the city. Hooker and other leaders adopted the "Fundamental Orders" (1638-1639) which historian John Fiske called "the first written constitution known to history that created a government. . . ."

Hartford has a council-manager form of government, adopted by the voters and approved by the General Assembly (1947).

Hartford, the center of the insurance industry, is known as "The Insurance City" with 15 insurance companies headquartered in and around the city, and employing 26,000 locally. Combined assets of all the insurance firms: over \$25 billion. Well-known companies include The Travelers Insurance Companies, Connecticut General, Aetna Life & Casualty and the Hartford Insurance Group.

Greater Hartford's second major industry is aircraft engines; East Hartford is home office of United Aircraft Corp., one of world's largest aircraft firms.

Rail passenger and freight service is provided by the New York, New Haven and Hartford Railroad, with direct service to New York and connections at Springfield to Boston or the West. High-speed service is expected soon.

The Hartford area, and many sections of the state, are serviced by Bradley International Airport in Windsor Locks, 20 minutes by car from Hartford on Interstate 91. The airport is served by 7 scheduled passenger and cargo carriers and one all-cargo carrier. Direct airline service is available from Bradley to 50 major cities in the U. S. International service is available, with passenger service direct to London; other cities for export cargo. Expansion of the airport is presently underway.

Hartford is the hub of a trunk-line highway network. And more than 3,000,000 tons of cargo, mainly fuels, are now carried annually by barge or tanker via the 15-foot-deep channel of the Connecticut River to Hartford and Wethersfield.

Hartford is now being redeveloped in what Architectural Forum has called, "one of the best-rounded renewal examples yet attempted in the United States." An example is the multi-million dollar Constitution Plaza, a 15-acre tract in the

center of the city which once contained deteriorated residential and commercial properties. The entire renewal package is expected to total \$165,000,000 over 20 years. In 1968, several insurance and other companies planned new buildings in the Trumbull St. Redevelopment area, where a civic center with an arena is to be developed.

Educational and cultural institutions include Trinity College, the University of Hartford, Rensselaer Polytechnic Institute, St. Joseph College and, at nearby Middletown, Wesleyan University; the Wadsworth Atheneum is the oldest and

one of the best-known public art museums in America. Mark Twain's House, where Samuel Clemens wrote "Tom Sawyer," "Huckleberry Finn" and "A Connecticut Yankee" is now a museum. The city also is the home of the Hartford Symphony Orchestra, the Connecticut Opera Association and the Hartford Stage Company, a resident professional theater.

Information on the city and its surrounding towns may be obtained from the Greater Hartford Chamber of Commerce, 250 Constitution Plaza, Hartford, Conn. 06103 or from the Mayor or City Manager, City Hall, Hartford, Conn. 06101.

Honolulu, Hawaii

The World Almanac is sponsored in Honolulu by The Honolulu Advertiser, P. O. Box 3110, Honolulu, Hawaii 96802; telephone 52-977; founded July 2, 1856, as the Pacific Commercial Advertiser by Henry M. Whitney; circulation 66,499 mornings, 156,123 Sunday; president and publisher, Thurston Twigg-Smith; editor George Chaplin; managing editor, Buck Buchwach; major awards received from Alicia Patterson Fund, American Medical Association, Overseas Press Club of America, National Headliners Club and J. C. Penney-University of Missouri.

Honolulu (Hawaiian for "sheltered bay") was a small native Hawaiian village called Waikiki when first visited by two British ships in 1786, eight years after Capt. James Cook discovered the Hawaiian Islands. Today, with nearly 400,000 inhabitants, it is the capital of Hawaii.

The City and County of Honolulu has a total population of about 650,000 and covers all 595 square miles of Oahu, an island traversed by two rugged parallel mountain ranges. The city itself occupies 20 miles of Oahu's southeast coast—from Pearl Harbor to Koko Head—and its residential subdivisions reach back through lush fingerlike valleys and climb the ridges of the Koolau Range at its back. The combined city-county has a strong-mayor form of government, with an elected 9-member city council.

In the early 19th century, Honolulu became a favored port for whaling ships in the Pacific. Shortly after 1900 the U. S. Navy built its famous base at Pearl Harbor, now headquarters of the U. S. Pacific Fleet. Honolulu is the only American city to have been bombarded in modern times—when Japan launched its surprise attack on Pearl Harbor Dec. 7, 1941.

Tourism is rapidly becoming the dominant industry in Honolulu; the city greeted more than 1,000,000 visitors in 1967. The other big industries are sugar and pineapple (there are two large pineapple canneries in the city). The military is also big business in Honolulu, with facilities for all branches of the service, the largest being Pearl Harbor Naval Base and Hickam Air Force Base.

The city has become a business and financial center for the Pacific Basin; one of its major corporations does international construction work, another operates a large steamship line. Smaller industries include manufacturing of wooden bowls, serving trays and furniture from locally grown monkeypod and koa woods, and sewing of brightly colored Hawaiian-print shirts and dresses.

The University of Hawaii enrolls over 17,000 students and is especially noted for its departments in marine biology and tropical agriculture. Students from halfway around the world attend the East-West Center, an institution of higher learning co-sponsored by the university and the U. S. State Department. Other 4-year colleges are Chaminade College, operated by the Catholic Church, and the Church College of Hawaii, run by the

Church of Jesus Christ of Latter-day Saints (Mormon).

The Bernice Pauahi Bishop Museum houses artifacts from throughout the Pacific and is a center of archaeological study of Hawaii. Art objects from all over the world are on display at the Honolulu Academy of Arts. The city has a 70-member symphony orchestra, a spring opera festival and several community theater groups. Other cultural institutions include Sea Life Park and the Waikiki Aquarium, displaying local marine life; Hawaiian Paradise Park, a bird sanctuary; and the Polynesian Cultural Center and Ulu Mau Village, both live re-creations of ancient Polynesian and Hawaiian culture.

The usual "outside" image of Honolulu is of Waikiki Beach and its famous view of Diamond Head. Waikiki, of course, is the hub of the tourist and convention industry; its high-rise hotels are mushrooming so fast the City Council has had to set limits to prevent them from blotting out Diamond Head altogether. But Honolulu's main attraction is a combination of its Polynesian heritage, cloud-topped majestic mountains, palm-fringed beaches along the deep-blue Pacific, and the most enjoyable sunny weather anywhere. Daytime temperatures average in the high 80s in summer, low 80s in winter; nighttime temperatures usually range 10 to 15 degrees lower. There is year-round surfing, swimming and fishing.

Three major U. S. airlines serve Honolulu from the West Coast, and two additional ones have been recommended. Foreign airlines connect Hawaii directly with most countries around the Pacific. Two steamship lines provide regular passenger service from the West Coast.

Most of Honolulu's incoming and outgoing cargo travels by ship, but airlines are winning an increasing share of the business. The airlines' share is expected to jump tremendously when "jumbo jets" begin flying in 1970.

There is bus service to most parts of the city, but outlying suburbs and small towns on Oahu have no public transportation. Studies are underway for a possible subway or other fixed-rail mass-transit system to relieve Honolulu's growing traffic congestion. New freeways connect the city with its suburbs, and tunnels carry two four-lane highways through the Koolau Range to the communities of Windward Oahu.

Houston, Texas

The World Almanac is sponsored in the Houston area by The Houston Post, 2410 Polk Ave., Houston, Texas 77001, telephone (713) CA3-3131. Founded originally in 1836, the first edition was published with The Houston Post masthead on Feb. 1, 1880. Circulation: morning—280,268, Sunday—318,984. Chairman of the board and editor, Oveta Culp Hobby; president and executive editor, William P. Hobby, Jr.; executive vice president, John C. Stetson. Major awards include Pulitzer Prize. Sponsors Houston Post Charities, Inc.

Industrial giant of the Southwest, Houston is the nation's sixth largest and fastest growing major city. Located on the upper Gulf Coast prairies, connected to the Galveston Bay by a 50-mile ship canal, it enjoys an average temperature of 68.6°.

The fine weather helps to draw more than 3,000,000 visitors and tourists each year to see such points of interest as the new growing complex of concert music halls, theaters, art centers and museums which encircle the million dollar Jones Hall for the performing arts, in downtown Houston. Houston's Alley Theatre is considered to be one of the nation's foremost repertory theaters and represented the U. S. at the Brussels World's Fair. The Houston Music Theatre is one of the most successful theaters "in the round." Houston has two wide-screen cineramas, 66 movie theaters, and a symphony of 90 musicians conducted by Andre Previn.

The world famous Texas Medical Center represents an investment of more than \$125,000,000 in 10 major hospitals and clinics, 3 medical schools, and 3 research institutes where many notable heart and organ transplants have been reported. The Astrodome, one of America's largest enclosed sports stadiums, is the home of the National League Astros baseball team, the American Football League Houston Oilers, Houston Stars soccer team, and the University of Houston football team, the Cougars, making Houston a sports center.

The Museum of Fine Arts houses a permanent collection valued at \$6,000,000 plus 23 major art institutes. Twenty-two mi. from the downtown area is the Manned Spacecraft Center, controller of space orbit communications, which gives Houston its nickname, "Space City, U.S.A." A \$250,000,000 complex, the installation is the center of astronaut training, equipment testing and flight control for the Project Apollo moon landings.

The San Jacinto Monument and Museum are on the San Jacinto Battleground. This 460-acre state park, 22 mi. east of Houston, honors the 910 Americans led by Gen. Sam Houston who routed Mexican forces of more than 1,200 under Gen. Santa Anna, April 21, 1836. The museum depicts the region's history from the early Indian civilization to Texas, a State in the Union.

Houston ranks first in the nation as a refinery center, housing 9 refineries which convert 830,000 bbl. of crude oil daily into gasoline and other products; first in the manufacture and distribution of petroleum equipment, and first in pipeline transmission with 14 major companies operat-

ing 83,000 mi. of natural gas pipelines.

Houston has the third largest seaport in the country, two major airports, the William P. Hobby Airport and the International Airport, and ranks third in the number of private aircraft. Other major industries are chemicals and petrochemicals, food products, primary and fabricated metals, lumber and wood products, synthetic rubber and plastics, electronic instruments, printing, and publishing. Nearly 60% of total U. S. sulphur is produced within 250 mi. of Houston.

To transport Houston's goods there are 23 airlines, 131 steamship lines, 6 major rail systems, 34 truck lines and 6 bus lines. In 1968, Houston's new International Airport handled 200 arrivals and departures daily. An elaborate 245-mi. inner and outer loop freeway system expedites traffic.

Population of the city of Houston is estimated at 1,187,000—up 26% from the 1960 Census. The metropolitan area (1,839,000) is up 30% and is one of the fastest growing major metropolitan areas. Its average growth is 1,000 a week.

In 1966, retail sales for the metropolitan area increased 46% over 1960 to \$2.8 billion, while wholesale sales have increased 25% to \$5.3 billion. It is estimated that the annual manufacturing payroll for Houston is \$1 billion. Through industrial expansion and diversification, Houston has become the largest industrial and manufacturing center in the South and Southwest.

The University of Houston has the largest of Houston's 14 college campuses. Houston is also the seat of the widely known Rice University.

The Houston metropolitan area is also an important agricultural center. The 13-county region, with less than 5% of the state's land area, receives approximately 7% of the state's farm cash income. Rice, grain, sorghum, and cattle are highly important in the farm picture of the area. The region produces about 86% of the state's rice, nearly 30% of the nation's total production, and contains the top cattle producing county in Texas. More than 50% of the export tonnage of the Port of Houston is agricultural.

The Houston region has extraordinary supplies of oil, gas, sulphur, salt, lime, timber, industrial soil, sea water, and fresh water. The value of annual mineral production in the Houston area is approximately \$457,000,000.

Houston has a mayor-council form of government with the mayor and 8 councilmen serving as the legislative body. These 9 officials and the city controller are elected for 2-year concurrent terms.

Indianapolis, Indiana

The World Almanac is sponsored in the Indianapolis area by the Indianapolis Star and the Indianapolis News, 307 N. Pennsylvania St., Indianapolis, Ind. 46206; telephone (317) 633-1240; News founded 1869 by John H. Holliday, Star 1903 by George F. McCulloch; circulation Star daily 229,954, Sunday 378,817, News 197,111; president & publisher, Eugene C. Pulliam; asst. publisher, Eugene S. Pulliam; Star editor, Jameson G. Campaigne; News editor, M. Stanton Evans; major awards include Pulitzer Prize to News, National Headliners first prize to Star; Star sponsors annual Indiana-Kentucky all-star basketball game, News sponsors Women's Anti-Crime Crusade, Junior Olympics.

Indianapolis, capital and largest city in Indiana, is located near the center of the state at the junction of White River and Fall Creek. Most early settlers came from Connorsville 60 miles to the southeast,

including George Pogue, who arrived first in 1819, and others who formed the first settlement in 1820. It was selected as the state capital in 1821 because of its central location and was named Indianapolis.

The city was laid out by Alexander Ralston, who earlier had assisted Major L'Enfant in laying out Washington, D. C. Because it was not on a navigable waterway, growth of Indianapolis was slow until the arrival of the first railroad in 1847 started its development as a major rail center. Today the city has a population of 519,400, with 1,049,000 in its metropolitan statistical area (estimated by Sales Management). It is governed by a mayor and city council.

Indianapolis is an industrial and trade center with more than 1,100 diversified plants turning out products valued at \$1.362 billion annually (1963 Bureau of the Census). Its leading industries are transportation equipment (\$374,392,000 annually), chemicals and allied products (\$200,154,000) and electrical machinery (\$162,560,000). Major firms with headquarters in Indianapolis include Allison Division of General Motors Corp., Eli Lilly & Co., P. R. Mallory & Co., Inc., and the Home Instruments Division of Radio Corporation of America. Western Electric Co. makes most of the nation's telephones in its Indianapolis plant. The U. S. Army Finance Center at Ft. Benjamin Harrison employs 5,600 and handles the payroll for the entire Army. Retail sales in Indianapolis total \$1.361 billion annually and \$1.755 billion in the metropolitan statistical area.

The city is served by 5 railroads, 6 major airlines and 3 commuter airlines, 4 interstate bus lines and more than 100 truck lines. There are 144 scheduled airline arrivals and departures daily, and the city is the hub of four interstate highways.

Indianapolis is in an era of great progress. Major downtown projects underway include a 37-story Indiana National Bank Building which will be the tallest in the state and a 20-story Hilton Hotel, both to

be completed in 1969. Preliminary work has begun on a new \$10,000,000 Federal Building and an \$18,000,000 convention-exposition center. A multi-million-dollar expansion of the Indiana University regional complex will make it a four-year campus, and Purdue University also plans to expand its regional center. On the north side of the city a new \$10,000,000 art center is under construction.

Passenger facilities at Weir Cook Municipal Airport have been doubled in the last year by a \$6,500,000 expansion program, and construction is now underway on a six-story administration building and other facilities. Some 3,200 housing units for low income and elderly persons are being completed, and more are planned. Most of the city's traffic problems will be solved with the completion of an inner loop and outer loop of expressways.

Monument Circle in the center of downtown has as its apex the Soldiers & Sailors Monument, 284½ feet tall, built in 1901. Five-block-long Memorial Plaza on the northern edge of downtown includes the World War Memorial and American Legion National Headquarters.

Indianapolis is the home of Butler University, on the campus of which was completed in 1963 a new center for the performing arts, Clowes Memorial Hall. This is headquarters for the Indianapolis Symphony Orchestra. The city also is the home of Indiana Central College, Marian College and Indiana University Medical Center.

The Indianapolis Indians baseball team plays in the Pacific Coast League, and the Indiana Pacers are in the American Basketball Association. The "500" Festival is an annual series of events in conjunction with the Indianapolis 500-Mile Race on Memorial Day.

Kansas City, Missouri

The World Almanac is sponsored in the Kansas City area by the Kansas City Star, 1729 Grand Ave., Kansas City, Mo. 64108; telephone (816) HA1-1200; founded 1880 by William Rockhill Nelson; circulation evening 332,364, morning 340,013, Sunday 404,547; president, Richard B. Fowler; executive v.p., Paul V. Miner; gen. mgr., Frank McKinney; editor, W. W. Baker; executive editor, Cruise Palmer.

Its location at the confluence of the Missouri and Kansas Rivers amid the agricultural lands of the Middle West was important in the founding and development of Kansas City, which had a population of 599,100 in July, 1968 (City Plan Commission estimate). Its area of 316.3 sq. mi. is one of the nation's largest.

The beginnings of Kansas City can be traced to the establishment by French trappers of a trading post at the merging of the rivers about 1826. It became an important trade and transportation center as the overland routes of the Oregon and Santa Fe Trails spread westward. As agricultural production boomed, it became an important market and distribution center for crops from throughout the Middle West. Presently Kansas City is a leading hard wheat center, stocker and feeder market, and is among the top 5 cities in flour production, grain elevator capacity and meat packing. Its stockyards are among the nation's busiest.

Growing steadily as a market, Kansas City became important in transportation. It remains one of the busiest rail centers. Twelve railroad trunk lines had 108 arriving and 103 departing freight trains and 74 passenger trains daily in 1966.

The city's air facilities in 1966 handled nearly 3,400,000 persons with 8 airlines and 320 scheduled daily flights. Approval of \$150,000,000 in revenue bonds in December, 1966, for construction of the Kansas

City International Airport is expected to place the city among world leaders as an airline center with capacity for supersonic jumbo jets. More than 9,300 trucks from 197 truck lines serve the city over a growing network of interstate roadways. Four barge companies continue barge operation on the rivers.

Kansas City has emerged as an industrial, as well as an agricultural leader. Second in nation in car and truck assembly with large Ford and General Motors plants, the city is first in production of vending machines and sixth in production of wearing apparel. National firms with headquarters in Kansas City include Hallmark Cards, Interstate Bakeries, Farmland Industries, Panhandle Eastern Pipeline company, H. D. Lee company, Western Auto and Nelly Don. Trans World Airlines has maintenance and training headquarters, with plans for a multi-million dollar training center announced in July, 1967. Top employers include the U. S. Government, General Motors, TWA, Bendix, Western Electric, and Ford. A newly-constructed Federal office building houses 20,000 workers. A new state office building is now open. Plans are being studied for a civic plaza in the area of City Hall, County Courthouse, and Federal Buildings, including new facilities for police and municipal courts.

Total retail sales in 1967 were \$311,550,889. In January, 1967, Hallmark announced

plans to convert 85 acres just south of the downtown district into a model urban community. Several other plans have emerged for revitalization of the downtown district. Country Club Plaza was one of the first shopping centers.

More than 100 parks cover 5,345 acres, including Swope Park, second largest in the nation. Swope Park houses one of the few remaining free zoos in the country. Kansas City's boulevard and parkway system is a subject of pride.

Cultural activities include the Starlight Theater, the country's second largest outdoor theater; Kansas City Philharmonic; Lyric Theater; the William Rockhill Nelson Gallery of Art and Mary Atkins Museum of Fine Arts, among 6 top American museums with furnishings and displays valued at more than \$25,000,000 including third largest Oriental collection outside China; and the Performing Arts Foundation, a group formed in 1965 to present festival events of all arts.

The American Royal Livestock and Horse Show each fall attracts entries from throughout the country. Kansas City is the home of the Chiefs of the American

Football League, Royals of American Baseball League, Blues of Central Hockey League and K. C. Spurs of North American Soccer League.

Kansas City's government is manager-council form. The 29-story city hall was, when built, highest in the world.

A distinguished citizen of the area is Harry S. Truman, 33rd President of the United States, who was born in Lamar, Mo., and lives in Independence, a suburb.

The University of Missouri at Kansas City, Rockhurst College, Kansas City Institute of Art, and the University of Kansas Medical Center are in the metropolitan area. Within commuting distance are the University of Kansas, Park College, William Jewell College, and Central Missouri State College. Linda Hall Library of Science and Technology on the U. M. K. C. campus is one of the largest privately endowed technical reference libraries with more than 375,000 volumes and 11,500 current scientific journals. The Truman Library in Independence contains primary research material from the Truman Administration.

Knoxville, Tennessee

The World Almanac is sponsored in the Knoxville area by The Knoxville News-Sentinel, 204-208 West Church Avenue, Knoxville, Tenn. 37901; telephone (615) 523-3131; Sentinel founded in 1886 by John T. Hearn, News in 1921 by Scripps-Howard Newspapers, Sentinel purchased by Scripps-Howard in 1926 and combined with News; circulation 107,390 daily and 157,342 Sunday; editor, Ralph L. Millett Jr.; managing editor, C. W. Orcutt; public service projects include Empty Stocking Fund, General Knox Mercy Fund, Southern Appalachian Spelling Bee and Science Fair.

Knoxville is an important commercial and manufacturing center in an area noted for its scenic beauty. Its first settler was James White, who came to the site in 1786, built a small fort and planted a turnip patch in the area of what now is the First Presbyterian Church Cemetery.

It became a city in 1791 and was designated capital of the Territory South of the Ohio River in 1792. Blount Mansion, home of the territorial governor, William Blount, still stands and is preserved as a national monument. It is the city's major historic visitor attraction and is believed to be the first frame house built west of the Allegheny Mountains. When Tennessee became a state in 1796, Knoxville was its first capital.

The city has an estimated population of 185,000 and it is the center of a 3-county metropolitan area of about 400,000.

The Holston and French Broad Rivers join immediately east of the city to form the Tennessee, which has a 9-foot channel linking Knoxville with the Ohio and Mississippi Rivers and the Inland Waterway System.

The administrative headquarters of the Tennessee Valley Authority is at Knoxville, and the city is situated on TVA's Fort Loudoun Lake, impounded by a TVA dam 53 river miles downstream. The city is within less than an hour's drive of 5 other major TVA lakes.

Situated near the lakes and between two mountain ranges of exceptional beauty, Knoxville and some of the smaller cities in the area thrive on tourist business. Great Smoky Mountains National Park, with 600 miles of hiking trails and nearly that many miles of productive trout streams, along with an exceptional variety of plant life, is 40 miles southeast of Knoxville. About 40 miles westward are the Cumberland Mountains, increasing in popularity with visitors.

Knoxville is in the heart of the Southern Appalachian dogwood region, and is the scene each April of the Dogwood Arts Festival, a 10-day event featuring about

45 miles of Dogwood Trails of outstanding beauty, along with hundreds of cultural and sports events.

The major manufacturing industry in Knoxville proper is clothing. Standard Knitting Mills, established in 1900, is the leader in the field. It employs about 3,000 persons and is the largest manufacturer of knitted clothing under one roof in the nation. Levi Strauss & Co., Palm Beach Co. and Apparel Corp. of America also have Knoxville clothing plants. Dempster Brothers, one of the nation's leaders in manufacturing of garbage collection equipment, was established in Knoxville in 1933. It employs about 775.

By far the biggest employer in the Knoxville area is Union Carbide Corp.'s Nuclear Division, at Oak Ridge, about 20 miles west of Knoxville. Carbide, which operates the Atomic Energy Commission's nuclear plants at Oak Ridge, employs more than 12,800. All told, nearly 15,000 are employed in AEC-related work at Oak Ridge.

Many Oak Ridge workers are Knoxville residents. The same is true of many workers at Aluminum Co. of America's plant at Alcoa, about 15 miles south of Knoxville. ALCOA, with about 6,800 employees, is the second largest employer.

Two rail lines, 5 airlines, two bus lines and 23 motor freight carriers serve Knoxville. Interstate Highways I-40 and I-75 intersect in the heart of the city; I-40 and I-81 intersect several mi. east of the city.

The Downtown Knoxville Association was formed in 1957 to rejuvenate the city's business district. One of its outstanding projects was the Market Mall, completed in 1961. The Mall, which replaced an old market house, has trees, flowers and fountains; it is flanked by stores with modernistic masonry sidewalk roofs which run the length of the Mall. At the north end is a covered area where vendors sell home-grown flowers and vegetables. The Mall was a joint project of the Association and the city.

One of the cultural and entertainment centers of the city is the James White Memorial Auditorium-Coliseum, opened in 1961. The six-story structure covers two and a half acres. The auditorium seats 2,536 and the coliseum 7,250. A Holiday on Ice troupe puts together a new show each year on the coliseum ice.

Los Angeles, California

The World Almanac is sponsored in the Los Angeles area by the Los Angeles Herald-Examiner, 1111 S. Broadway, Los Angeles, Calif. 90054; telephone (213) 748-4141; founded Mar. 27, 1871; circulation daily 623,474; Sunday 650,991; publisher, George R. Hearst, Jr.; managing editor, Donald Goodenow; general manager, George W. Sjostrom; sponsors annually American History Awards, Youth Forum, Bill of Rights Essay Contest, Carrierboy Scholarship Award, Junior Diplomat Program, etc.

When Juan Rodriguez Cabrillo, the Spanish explorer, anchored his caravel in Los Angeles Harbor in 1542, he wasn't too impressed. Looking over the broad mud flats, he saw the smoke of many primitive Indian fires drifting over the steep slopes and wide bay. He named the harbor the Bay of Smokes and Fires and sailed on.

Things hadn't changed much when on Sept. 4, 1781, Father Junipero Serra and Don Felipe de Neve, Spanish governor of California, founded a pueblo alongside the Indian village of Yang-na. They named it El Pueblo de Nuestra Senora la Reina de Los Angeles de Porciuncula (the City of Our Lady the Queen of the Angels of Porciuncula). The name was actually bigger than the city as 44 settlers built small adobe houses around a plaza by the Porciuncula River.

Until 1817, Los Angeles alternated with Monterey as the capital of the Mexican territory of Alta California. On Mar. 9, 1842, the first gold discovery in California was made at Placerita Canyon, in the northern part of Los Angeles County, 6 years before the famous strike was made at Sutter's Mill.

In 1846, the city was captured in a bloodless battle by U. S. Navy Commodore R. F. Stockton.

Today, the City of Los Angeles has an estimated population of nearly 3,000,000 and covers 458.2 square miles. It is the seat of Los Angeles County, which has a population of 7,087,667 and extends for 4,071 sq. mi., according to Chamber of Commerce surveys.

The City of Los Angeles was incorporated Apr. 4, 1850, and today is governed by a Mayor, 15-member Council, and commissions as provided for by a charter effective July 1, 1925. The Mayor, Council, City Controller and City Attorney are elected every 4 years. Members of commissions are appointed by the Mayor, subject to City Council approval.

As the city grew, its name was shortened to Los Angeles. Its growth came about for many reasons: the driving of the golden spike at Southern Pacific's Lang Station in Soledad Canyon Sept. 5, 1876, connecting Los Angeles by rail with the energetic East; the beginning of the greatest man-made harbor in the world at San Pedro Bay in 1899; the first complete motion picture in the city manufactured in 1908 in a rented house at Eighth and Olive Streets; only dry subtropical climate in North America with mild, sunny winter days and rainless summer days with cool nights; the annual average rainfall of 14.68 inches and the average mean temperature of 64.4 degrees, and proximity to the ocean, mountains and desert.

The smoky harbor dismissed with a shrug 426 years ago at San Pedro is today known as "The Cargo Capital of the West." General cargo for the 1965-66 fiscal year exceeded the 7,300,000-ton mark and total tonnage handled was a record 26,-

Knoxville in 1968 became the first of Tennessee's 4 major cities to provide both primary and secondary treatment for its sewage. Three treatment plants remove from 85 to 98% of suspended solids and biochemical oxygen demand from the sewage before the effluent is discharged into Fort Loudoun Lake.

293,560 tons. Ships of 30 nations, along with U. S. flagships, made 3,964 port calls with steel mill products, molasses, pipes, tubing, bananas, frozen fish and copra.

In the next 20 years, the new harbor headquarters on Terminal Island will oversee the development of 850 acres of land for 75 new deep-water berths for the Port of Los Angeles. The future Los Angeles World Trade Center also will be located on Terminal Island.

The economy of Los Angeles is diversified, composed of a variety of enterprises in agriculture, manufacturing, trade, fishing, mining, entertaining and other services. Los Angeles has a higher proportion of small business than any other large metropolitan area yet is the most popular location west of Chicago for branch plants as well as management headquarters for nationally-recognized companies. Major growth industries are electrical machinery and electronics, ordnance, instruments, rubber, petroleum refining, printing and publishing, furniture and chemicals.

The Greater Los Angeles area has more savings and loan holding companies than any other area of the United States. It is an important insurance center, housing 90 companies with home offices.

Sales of \$3.4 billion were recorded in 1963 for the more than 600 electronics firms in the area. Los Angeles is the sportswear center of the nation and the second largest garment manufacturing center in the world. It ranks as one of the nation's leading fishing ports in both volume and value.

The Los Angeles Metropolitan Area ranks third in the nation as a banking center with a total of 860 banks and branches with deposits of over \$13 billion.

Retail sales currently total over \$12 billion for the area and by 1970, the Chamber of Commerce estimates that retail sales should exceed \$13,250,000,000.

Los Angeles is a city on wheels. There are over 3,400,000 automobiles registered in the Los Angeles Metropolitan Area, a car for every 2.2 persons, a higher ratio than any other major city in the world.

The area has 3 transcontinental railway systems; 22 certificated air carriers, carrying 18,000,000 passengers a year; 111 steamship lines and agencies with 5,290 ships carrying more than 37,000,000 tons of cargo annually, and 6 major passenger bus lines. Los Angeles ranks as the West's largest trucking center.

Each day 1,800 planes arrive and depart at the Los Angeles International Airport.

Since the first movie made in Los Angeles in 1908, Los Angeles has become the film capital of the world. Hollywood was annexed to the city in 1910 and a recent report showed 617 firms engaged in the production, distribution and service of motion pictures, including those made for television. Many of the nation's top television shows originate from Hollywood studios.

Los Angeles leads the nation in the

manufacture of aircraft and parts. Since Galbraith Rodgers, completing the first transcontinental flight, landed at nearby Pasadena on Nov. 5, 1911, and the first round-the-world flight started from Santa Monica on Mar. 17, 1924, the area has been an aviation center.

Added to the natural recreational advantages of ocean, desert and mountains within an hour's drive, Los Angeles residents enjoy such man-made facilities as the Hollywood Bowl, the Huntington Library and Art Museum, the new Music Center, Griffith Park Planetarium, the Los Angeles Museum of History, Science and Art; Mt. Wilson Observatory, Pasadena's Rose Bowl, Marineland, Disneyland, Knott's Berry Farm, the new zoo in Griffith Park, and Pacific Ocean Park.

The Los Angeles Dodgers and Los Angeles Lakers keep baseball and basketball fans busy, while the Los Angeles Rams

football team attracts capacity crowds.

Los Angeles County has such leading higher schools of learning as the California Institute of Technology, Loyola University, Occidental College, Pomona College, the University of California at Los Angeles, the University of Southern California, Whittier College, and 27 others.

Los Angeles has 154 parks totaling 9,875 acres, and 129 recreation centers.

The County of Los Angeles was established Feb. 18, 1850, and was one of California's original 27 counties. The county has a governing body consisting of a 5-member Board of Supervisors, each elected for a 4-year term. With a population in excess of 7,000,000, greater than that of any other county in the nation and exceeded by only 7 states, Los Angeles County is 800 square miles larger than the combined areas of the States of Delaware and Rhode Island.

Louisville, Kentucky

Though Louisville is steeped in the leisurely traditions of the South, its location on the Ohio River makes it a major industrial and distributing center and a key city in the accelerating industrialization of the Southern states. The city was founded by the explorer George Rogers Clark, who in 1779 established a small community which would later be a base of supply for his exploration of the Northwest. In 1780, the city was given its name by the Virginia Legislature, which formally established the town, naming it after King Louis XVI of France.

The opening of the Louisville and Portland Canal in 1830 to allow river boats to circumvent the 25-ft. falls in the Ohio River, led to a rapid growth of the city. Today, Louisville is Kentucky's largest city with an estimated metropolitan area population of 775,000 in 1966.

Louisville is probably most famous as the site of the Kentucky Derby, which is held the first Saturday in May at Churchill Downs. The "Run for the Roses," as the race is often called, is traditionally preceded by the playing of "My Old Kentucky Home" and the winner is draped in a blanket of roses. The race has been held annually since 1875.

The city is one of the largest tobacco manufacturing centers in the world, and the counties of Louisville and Jefferson produce about 25% of all the liquor distilled in the country.

One of the largest manufacturing plants

in Louisville is General Electric's Appliance Park, with 4,000,000 sq. ft. of space located on a 1,000-acre site.

The "Louisville Slugger," long a favorite bat with American youngsters and professional baseball players, is manufactured here by Hillerich & Bradshaw Co., which has a Museum of Bats open to the public. The American Printing House for the Blind, the largest publishing company in the world producing Braille books and magazines as well as talking books, is also open to the public.

In addition to places of historic interest, such as the site of Ft. Nelson and the grave of George Rogers Clark in Cave Hill Cemetery, the visitor to Louisville will find many other attractions.

There are many municipal parks, Shawnee, Seneca, Cherokee and Iroquois being the largest. The J. B. Speed Art Museum houses outstanding collections of 19th century sculpture, paintings, tapestries and other art objects as well as paintings of American Indians by Kentucky artists. The University of Louisville, founded in 1798 and one of America's oldest municipal universities, has on its campus the Rauch Memorial Planetarium, which is open to the public at a nominal charge.

The Kentucky Fair and Exhibition Center, covering 357 acres, has a stadium which can seat some 20,000 people and is the site of the Kentucky State Fair and Horse Show usually held the last week in August.

Memphis, Tennessee

The World Almanac is sponsored in the Memphis area by the Memphis Press-Scimitar, 495 Union Ave., Memphis, Tenn. 38101; telephone (901) 526-2141; Scimitar founded 1880 by G. P. M. Turner, Press 1906 by Scripps-McRae League, predecessor of Scripps-Howard Newspapers; circulation 133,644; editor, Charles H. Schneider; managing editor, Ed. Ray; associate editor, J. Z. Howard; major public service projects include Goodfellows Christmas Fund and Cynthia Milk Fund.

Memphis is on a bluff on the east bank of the Mississippi River, in the southwest corner of Tennessee. The city occupies 179 sq. mi. and is the center of a metropolitan area that includes large parts of Shelby County, Tenn., DeSoto County, Miss., and Crittenden County, Ark. There are 3 bridges across the Mississippi at Memphis—one highway bridge and two railroad bridges. A new 6-lane highway bridge is under construction and will be part of the Federal Interstate highway network.

The site of Memphis is a point where DeSoto stopped in 1541 when he discovered the Mississippi River. In 1797 a U. S. military post, Fort Adams, was established at the site of Memphis. In 1801 Fort Pickering was built, and a section of the city where the fort stood near the river

now bears that name. In 1818 the U. S. purchased West Tennessee, including the Memphis site, from the Chickasaw Indians, and settlement of the area began. The town of Memphis was laid out in 1819 by owners of land grants, and incorporated in 1826. The following year Marcus B. Winchester was elected the first mayor.

A major yellow fever epidemic struck in 1878 and the city was nearly depopulated. The following year it surrendered its charter and became a taxing district. But by 1890 population was up to 64,589 and by 1900 to 102,320.

Latest population count for the city is 536,585, according to a special census by the U. S. Bureau of Census made in 1967. Population of Shelby County, which includes Memphis, is estimated at 772,200

and for the metropolitan area at 829,000, both by the Memphis Area Chamber of Commerce.

Memphis has a mayor-council form of government.

The city is the center of an important trade area ranging over much of Tennessee, Arkansas, and Mississippi and parts of Missouri and Alabama.

Memphis is the world's largest hardwood lumber center, and consequently has manufacturing of furniture and hardwood flooring. The city is the site of the world's largest inland spot cotton market, centered along picturesque Front St., overlooking the Mississippi River. The city is the nation's 10th largest distribution center, supplying dry goods, hardware, etc., for a large area of the South. It is headquarters for Plough, Inc., world-wide drug concern founded in Memphis by Abe Plough in 1908, and also for Holiday Inns of America, Inc., the world's largest motel chain, founded in Memphis in 1952 by Kemmons Wilson.

The city is served by 9 airlines with a total of 114 arrivals and 114 departures a day at Memphis Metropolitan Airport. The city is served by 8 trunk line railroads, 89 motor freight lines and 5 barge lines. Memphis is one of the nation's largest inland river ports, having handled 8,400,000 tons of freight in 1966.

On Presidents Island, once an island in the Mississippi River but now part of the city and joined to the mainland by a causeway, a 963-acre industrial park is now 83% filled with industries. Just across the harbor from that area, the city will soon open the 6,800-acre Frank C. Pidgeon Industrial Park.

Memphis is the home of the Cotton Carnival each May. The city's picturesque

Beale Street, at the south end of downtown is famous in the world of blues music; it is where W. C. Handy, the composer, lived.

Colleges and universities include Southwestern at Memphis, Memphis State University, Christian Brothers College, Siena College, LeMoyné-Owen College, University of Tennessee Medical Units, Mid-South Bible College, Southern College of Optometry, and the State Technical Institute at Memphis.

Memphis Memorial Stadium is the home of the annual Liberty Bowl football game plus Memphis State's home games. The Mid-South Coliseum, adjacent to the stadium, is the site of Memphis State's basketball games and is home of the Memphis South Stars, which is a farm team of the Minnesota North Stars and plays in the Central Hockey League.

Also adjacent are the Fairgrounds, site of the annual Mid-South Fair, and Blues Stadium, home of the Memphis Blues baseball team, which is a farm club of the New York Mets and plays in the AA Texas League.

The annual Memphis Open Golf Tournament, on the PGA tour, is held at Colonial Country Club.

The Municipal Auditorium has annual performances of New York's Metropolitan Opera, as well as regular performances of the Memphis Symphony Orchestra and many other traveling cultural attractions.

Inquiries should be addressed to Dan Dale, director of industrial development, Memphis Light, Gas and Water Division, Madison and Third Sts., or to James Pirtle, manager of Industrial Department, Memphis Area Chamber of Commerce, Memphis, Tenn. 38101.

Mexico City, Mexico

Mexico City (Ciudad de Mexico) is the oldest and one of the largest and most beautiful cities of North America.

Set in the lofty Valley of Mexico at an altitude of 7,349 ft., nearly a mile and a half above sea level, the city is the capital of Mexico and is the political, economic, cultural and transportation hub of the nation. Population of Mexico City (1968 est.) was 3,118,059. Including the suburbs, which make up the Federal District, the population was 6,815,800.

The art and architecture of the city present a striking exhibit of the three great cultures embodied in Mexican history: that of the Aztec Indians who founded the city on islands in Lake Texcoco in 1325; that of Europe imported by the Spaniards who conquered the Aztecs in 1519, and that created by the Mexicans of today in distinctive, ultra-modern design.

Here are the remains of grim pyramids from the days when Tenochtitlan, as the Aztecs called their capital, was a city of 300,000 or more.

Here, too, are the huge, ultra-baroque Metropolitan Cathedral, the arcaded buildings and the broad avenues, studded with a profusion of monuments, which were created by the Spaniards and the descendants of both races under the influence of European styles.

Finally, here are the daring forms of modern Mexican architecture, ranging from a glass-sided, skyscraper pyramid to the towering block of a university library whose exterior walls are entirely covered by colorful mosaic murals.

Places of particular interest include: Xochimilco and its "floating gardens" and flower-decked gondolas; the National University (founded 1551) which has 90,000 students; the National Palace with its famed Diego Rivera murals, on the site where stood the palace of Moctezuma II, last of the Aztec emperors; the Palace of Fine Arts and its much-acclaimed Ballet Folklórico; the National Museum of Anthropology and the 22-ton, remarkably accurate Aztec Calendar Stone; Chapultepec Castle, where the ill-fated Maximilian and Carlota lived briefly as the French-supported Emperor and Empress of Mexico, 1864-67.

Mexico City has large low-cost housing developments, fine residential areas created by its new and affluent middle class, and large new apartment houses erected to house, during their visits, the athletes of the 1968 Olympics. In dramatic background to the city stands a ring of mountains, including the perpetually snow-capped volcanoes, Popocatepetl (17,887 ft.) and Iztaccihuatl (17,343 ft.).

The altitude and tropical latitude combine to give the city a perpetually spring-like climate.

In shops and markets visitors will find the distinctive artistic and craft products of Mexico: silver, tin and copperwork, jewelry, leather goods and textiles. The city is a sports center, from bullfights and jai alai to baseball and golf.

There are 23 international airlines serving the city and a network of modern highways. The city is 5 hrs. by jetliner from New York, 3 hrs. from Los Angeles.

The city is governed, as part of the

Federal District (Distrito Federal), by a Governor appointed by the President, and a council.

The tempo of business and industry, which show steady growth, is that of any great city. The traditional siesta is no

longer observed in Mexico City.

For more information, write Mexican National Tourist Council, Mariano y Escobedo 726, Mexico, D.F.; or 677 5th Ave., N.Y. 10022; or 9445 Wilshire Blvd., Beverly Hills 90212.

Miami, Florida

The World Almanac is sponsored in the Miami area by the Miami Herald, 1 Herald Plaza, Miami, Fla. 33101; telephone (305) 350-2111; founded Dec. 1, 1910, by Frank B. Shutt; circulation 369,609 daily, 463,782 Sunday; publisher, John S. Knight; president, James L. Knight; general manager, Alvah H. Chapman, Jr.; editor, Don Shoemaker; major awards include 1968 Pulitzer Prize to Publisher Knight for editorial writing, previous Pulitzer Prize to paper and one to staff member, Headliners Awards, and a Sigma Delta Chi 1st prize; sponsors annual Silver Knight Awards to high school seniors, fishing tournament, Science Fair, Dolphin Charity Football Game, program to send underprivileged children to summer camp.

Miami (Seminole for "Sweet Water") is wedded to the sea. Located at the southern tip of the Florida peninsula and brushed by the warm Gulf Stream, this sub-tropical city is surrounded by the Atlantic Ocean, Biscayne Bay and the "River of Grass," Everglades National Park.

It is America's newest big city. In 1895 there were only 3 houses and a handful of residents living in what was then called Fort Dallas, site of a military outpost used during the Seminole Indian wars in the 1830s. In that year, a hard freeze destroyed the Florida citrus crop upstate and a Miami widow, Julia Tuttle, convinced millionaire Henry Flagler to extend his railroad from West Palm Beach to Miami by sending him a green sprig, undamaged by frost, cut from her backyard orange tree. Flagler's trains began arriving in Miami the following year, bringing people and the migration south hasn't stopped yet. Except for a few months following the disastrous 1926 hurricane, Miami and its population have grown rapidly.

Incorporated in 1896, the year the first trains arrived, the City of Miami now has 343,500 year-round residents. But the metropolitan Miami area, which includes the cities of Miami, Miami Beach and 25 other municipalities, now has a permanent population of an estimated 1,200,000.

Dade County's 2,352 sq. mi. (more than half is under water and cannot be developed) are administered by a government in which 8 county commissioners and a mayor establish policy and the routine of administration is headed by a professional county manager. The City of Miami turned over many of its municipal functions to the county to avoid duplication as urban residents followed a national trend and moved to the suburbs. The city is governed by a 5-man commission, including a mayor, with a city manager.

Miami takes pride in calling itself "The Gateway to Latin America." It is increasingly the center of U. S.-Latin American trade with 4,000 small manufacturing plants serving virtually all of the Caribbean islands, Central and South America.

Tourism is still king although it is no longer the only industry in Miami. More than 20,000,000 visitors a year flock to Florida, producing a \$5 billion annual tourist economy. Most head for Miami—"The Magic City"—and Miami Beach, which offers the world's largest concentration of luxury hotels. There are 45,000 first class hotel and motel rooms and 100,000 rental apartments in Miami Beach.

While its reputation as an international playground is unchallenged, Miami is also on the road to becoming a center of business and commerce and science. It is the home base for Eastern Airlines, National Airlines and Family Finance Service, Inc. It also serves as international headquarters for Minnesota Mining and Manufac-

turing Co., Dow Chemical, Eastman Kodak, International Petroleum, Owens-Corning Fiber Glass Corp., and Pan American World Airways.

Miami, with the anticipated opening in the early 1970s of the Environmental Science Services Administration's Oceanographic Laboratory, will lead the world in undersea study. It is already the home for the University of Miami's famed Institute of Marine Science and the U. S. Bureau of Commercial Fisheries' Tropical Atlantic Laboratory.

Total retail sales in Miami in 1967 hit \$2.6 billion.

Miami International Airport, as hub of air traffic between North and South America, is one of the world's busiest air terminals, served by all the major certified domestic and foreign airlines, 92 in all. An average of 47 commercial flights arrive or take off at Miami every hour—a total 446,867 flight movements in 1967, carrying 8,722,032 passengers. Two railroads serve the city, the Florida East Coast and Seaboard Coast Line.

Dodge Island Seaport, currently in the middle of an expansion program, was visited by 2,200 ships in 1966 and 865,000 tons of cargo were handled. The port is home for cruise ships making regular runs to the Bahamas and Jamaica and some 260,000 passengers passed through the seaport's terminal in 1966.

The Greyhound and Trailways bus systems provide service to all major U. S. cities with 62 departures daily.

Fifteen major inter-intrastate motor common carriers service Miami.

Since the 1959 takeover by Castro in Cuba, Miami has become the refugee center for fleeing exiles. Some 125,000 Cubans now make Miami their home.

Urban renewal plans and a comprehensive revitalization program submitted by city planner Constantinos Doxiadis are now under examination as the city prepares massive rehabilitation of the downtown business and financial district.

Completion of the \$200,000,000 expressway system connecting the quadrants of the city is expected by early 1969.

The Orange Bowl is the home stadium for the University of Miami Hurricanes football team and the Miami Dolphins of the American Football League. It also hosts the traditional New Year's game between two of the nation's top-ranked teams and, in 1969, will again provide the setting for the Super Bowl game and the National Football League Playoff Game.

The University of Miami is the largest independent institution of higher learning in the Southeast, and Miami-Dade Junior College, which opened in 1960, is already the nation's largest junior college.

For information write: Dade County Development Department, 330 Biscayne Blvd., Miami, Fla. 33132.

Milwaukee, Wisconsin

The World Almanac is sponsored in the Milwaukee area by the Milwaukee Journal, Journal Square, Milwaukee, Wis. 53201; telephone (414) 271-6000; founded 1882 by Lucius W. Nieman; circulation 374,623 daily, 570,342 Sunday; chairman of the board, Irwin Maier; president and publisher, Donald B. Abert; executive vice president and general manager, Robert K. Drew; business manager, Francis D. Kelly; editor, Richard H. Leonard; major awards include two Pulitzer Prizes to newspaper and two to staff members; sponsors various sports events, major home shows and cultural events annually.

Milwaukee, the largest city in Wisconsin and an important manufacturing center, was founded by Solomon Juneau, one of the many French explorers, traders and trappers who visited the Midwest in the early 1800s. Marquette, Joliet and La Salle had visited the site during their earlier explorations.

The name of Milwaukee was originally "Mahnawaukee-Seepe," or "gathering place by the rivers," referring to the level of land at the confluence of the Milwaukee, Menomonee and Kinnickinnic Rivers, all entering the Bay of Milwaukee on Lake Michigan.

Incorporated in 1846, the city now covers 96.5 sq. mi. and has an estimated population of 774,000. Its standard metropolitan statistical area, including Milwaukee, Waukesha, Ozaukee and Washington Counties, covers 1,458 sq. mi., with an estimated population of slightly over 1,400,000, and with 427,100 households.

Milwaukee has a mayor-council government, with aldermen elected for 4-year terms.

A leading brewing center, Milwaukee also is a major grain market. Its leading manufactured products include electrical machinery, outboard motors, motorcycles, chemicals and textiles. The metropolitan area is second in the U. S. in percentage of the labor force in manufacturing. Ten Milwaukee manufacturers are in Fortune magazine's list of the 500 top U.S. corporations in sales volume.

Total retail sales in the Milwaukee metropolitan area in 1967 were estimated at \$2.4 billion, ranking 17th in the U. S. The metropolitan area ranked 7th in retail sales per household.

Milwaukee's General Mitchell Field, with facilities for the largest jet transports, is served by 5 major airlines; the field's passenger volume in 1967 was 1,378,400. Five important rail systems serve the area; car ferry lines also operate out of Milwaukee's harbor. Railroad freight tonnage is over 10,000,000 annually. The area is served by 62 truck lines and there are 4 intercity bus lines.

A leading Great Lakes port, Milwaukee is an important export and import gateway between mid-America and overseas points. The municipally-owned port serves lake vessels, barges, and ocean-going vessels of 43 lines.

An intensive program of building construction involving private, city, state and Federal enterprise has been under way in Milwaukee for the past 8 years.

The University of Wisconsin at Milwaukee and Marquette University are notable among the area's 18 universities and colleges, which have a total estimated enrollment of almost 43,000.

Notable buildings include the Greek Orthodox Annunciation Church, designed by Frank Lloyd Wright, and the Eero Saarinen-designed War Memorial Center on the lakeshore, housing the Milwaukee Art Center. By the end of 1969 Milwaukee will have a \$9,500,000 Center for the Performing Arts and a Music Hall Theater, mostly financed by public subscriptions.

Milwaukee County has 12,630 acres of parks in 108 locations. The new Horticultural Conservatory in Mitchell Park consists of 3 glass conoidal domes duplicating climate and plant life found throughout the world.

Milwaukee's annual Fourth of July parade has been changed to a large exhibit of circus animals and reconstructed circus wagons from the Circus Museum in Baraboo, Wis.

Cultural enterprises include a permanent Milwaukee Repertory Theater and the Milwaukee Symphony Orchestra.

The Green Bay Packers of the National Football League play 4 regular league games a year in Milwaukee's County Stadium. The Chicago White Sox played 10 of their regular season games in Milwaukee in 1968.

Detailed information on the area can be obtained from the Milwaukee Journal's marketing research department and the Metropolitan Milwaukee Association of Commerce.

Minneapolis, Minnesota

St. Anthony's Falls in the Mississippi River provided the geographical nucleus for Minneapolis—a city that would use the power of the 50-foot falls to become a flour-milling and lumber center and the urban heart of a vast agricultural region. The site of the city was first visited by Father Louis Hennepin in the 1680s. French fur traders next used it as a base of operations, and in 1805-06 the Sioux Indians gave up all rights to the land in a treaty concluded by Lt. Zebulon Pike. The city was incorporated in 1871.

Today, Minneapolis, along with its Twin City sister, St. Paul, is a manufacturing, wholesaling, retailing, financial and educational center with a combined population of 1,629,000, according to a provisional estimate of the Census Bureau.

Minneapolis has 25 industrial parks and such corporate giants as Honeywell Inc., General Mills, Pillsbury Co., National Biscuit Co., and Control Data, call the city home. In a move that is expected to attract more industry to the area, the city

is constructing Upper Harbor, a 12-acre river terminal that will handle the shipping and storage of grain, fertilizer, petroleum products, sand, gravel, salt and coal.

Massive freeway and urban renewal programs have been undertaken by both cities, with Minneapolis' \$286,000,000 Gateway Center, already underway, transforming a 17-block area in the heart of the city into a modern building complex.

The Twin Cities are served by the Minneapolis-St. Paul International Airport which in 1966 handled more than 3,000,000 passengers and 50,000,000 pounds of cargo.

Minneapolis is an enthusiastic sports town featuring the Minnesota Twins of baseball's American League and the Minnesota Vikings of the National Football League, both of whom play their home games in Metropolitan Stadium at nearby Bloomington.

The Minneapolis Symphony Orchestra and the Tyrone Guthrie Theater are the two brightest lights in the city's cultural sky. The city plays host all year long to

national touring companies of ballet, opera and local performing arts groups.

The Minneapolis Institute of Arts is one of the foremost museums in the country with outstanding collections highlighted by masterpieces of El Greco, Van Gogh, Rembrandt, Gauguin, Matisse and other prominent artists. The Walker Art Center, primarily devoted to current trends in painting, sculpture, drawing and print

making, is connected to the Tyrone Guthrie Theater by a sculpture court.

There are 153 parks in the city comprising 5,906 acres with 22 lakes offering sailing, boating, fishing and various other summer and winter activities. The Minneapolis Aquatennial is held in July.

The University of Minnesota, Northwestern College, Augsburg College and Seminary are among the institutes of higher learning located in Minneapolis.

Montreal, Canada

The World Almanac is sponsored in the Montreal area by The Gazette, 1000 St. Antoine Street, Montreal, Quebec, Canada; telephone (514) 861-1111; founded 1778 by Fleury Mesplet; circulation 138,613 daily; president, Charles H. Peters; general manager, H. J. Larkin; editor, Edgar Andrew Collard; managing editor, John A. Meyer; major prizes include four National Newspaper Awards to staff members; sponsors annual Christmas Fund for needy families; participates in various community service projects.

There is something for everybody in Montreal—after Paris, the second-largest French-speaking city in the world, and one of North America's most cosmopolitan centers.

The island city in the St. Lawrence River is Canada's largest urban center, ranks 9th on the continent with a metropolitan area population of 2,321,000 (with 1,400,000 in the city itself) and is the nation's financial, commercial and industrial hub. Two-thirds of its people are of French origin and 20% have an Anglo-Saxon heritage.

An international flavor is reflected in Montreal's theaters, shops, boutiques, its 4,000 restaurants which make it a gourmet's delight, and its celebrated night life—it has been called "the Paris of North America."

Located in the St. Lawrence where the Ottawa and Richelieu Rivers flow into it and at the head of the St. Lawrence Seaway, Montreal has become a great transportation center. The Seaway is a \$1 billion Canadian-American waterway and power project which runs 1,300 miles to the Great Lakes in the heart of North America. It has helped Montreal, 1,000 miles from the sea, become the world's second greatest inland port, after only Rotterdam. Its harbor limits extend for 42 miles and its port annually produces revenues of more than \$240,000,000, handles more than 2,000,000 tons of cargo and sees 125,000 passengers pass through it.

Montreal also is known as the air capital of the world, with the headquarters of both the International Civil Aviation Organization and the International Air Transport Association—the two global regulatory bodies—located in the city and 17 airlines serving its huge international airport. It also is Canada's railroad hub, and a leading truck and bus center.

The city is a leader—it has been called "the only 20th Century city in the world"—in terms of the redevelopment of its core and its underground, weather-proof facilities. Its most spectacular development is the \$125,000,000 Place Ville Marie, a cruciform-shaped building of 42 stories which has more office space than any other complex in the world except Rockefeller Center in New York. The underground city covers 40 acres, connecting office skyscrapers, railroad stations, hotels; Place Bonaventure, the world's second largest trade and convention center, the Montreal and Canadian Stock Exchanges, cinemas and theaters, restaurants, hundreds of shops and boutiques; and the Metro, the city's two-year-old, \$225,000,000, 16-mile subway system.

Montreal is a major cultural center. Facilities include the Place des Arts, which has a fine 3,000-seat concert hall and two theaters. It serves as the home of the Montreal Symphony Orchestra and at-

tracts the finest in drama, opera, ballet and music. The city has excellent art galleries, including the Montreal Museum of Fine Arts and the modern Musee de l'Art Contemporain. Its many specialized museums run the gamut.

Montreal also boasts some of the continent's most beautiful churches, including the Roman Catholic Mary Queen of the World Basilica, a half-size replica of St. Peter's in Rome, and it is the home of two of Canada's most famous universities, McGill and l'Universite de Montreal.

The city has more than 100 playgrounds covering more than 5,000 acres including one centered about the 764-foot-high Mount Royal, its most dominant physical characteristic. The parks include an outdoor art gallery, a children's zoo, theater and concerts, excellent sports facilities of all kinds and the Botanical Garden, one of the world's largest and most beautiful.

The city has remembered its history, too. Old Montreal, some 1,000 acres in all, is the largest such area undergoing restoration in North America and retains unchanged the general atmosphere of the 18th Century.

Finally, among its many attractions, there is Man and His World, the largest permanent exhibition anywhere and the successor to the fabulously-successful Expo 67 on two man-made islands in the St. Lawrence. The 1968 version had participation by 45 nations, exhibiting both artistic treasures and commercial goods in their own pavilions, and a 135-acre amusement and entertainment area called La Ronde, which has been compared favorably with such places as the Tivoli Gardens in Copenhagen and California's Disneyland. The 1969 exhibition promises to be even bigger and better.

Montreal has a mayor-council form of government with elections each four years, and the major project now underway is a massive urban renewal scheme. The city is the home of two professional sports teams—the world champion Canadiens of the National Hockey League and the Alouettes of the Canadian Football League. Major league baseball is due to come to Montreal in 1969, with a National League franchise.

Montreal was first visited by Jacques Cartier in 1535 and was founded under the name of Ville Marie in 1642. Today, it shares the island with 29 other autonomous municipalities—its suburbs—and occupies 18 sq. mi. of the island's 60.

Its major industries include oil refining, petro-chemicals and chemicals, aircraft manufacturing, textiles, sugar refining, flour milling, meat packing, brewing and construction products. It boasts more head offices of major Canadian companies than any other city.

Nashville, Tennessee

The World Almanac is sponsored in the Nashville area by The Nashville Tennessean, 1100 Broadway, Nashville, Tenn. 37202; telephone (615) 255-1221; founded as The Tennessean, May 12, 1907 by Col. Luke Lea; but other incorporated publications date to 1812; circulation daily 146,000, Sunday 240,000; publisher, Amon C. Evans; editor, John Seigenthaler; associate editor, Lloyd Armour; major public service projects include continuing efforts to further economic development of the Tennessee Valley region; a series of free concerts annually; an Outdoor Show to aid Girl Scouts; and annual publication of tabloids with proceeds going to local charities.

Nashville sits 500 feet above sea level on the banks of the Cumberland River in north central Tennessee. The state's capital city, it was settled in 1780 as a fort built by James Robertson and a group of settlers in what was then North Carolina. In 1783, the land around Fort Nashborough became a county under an act of the North Carolina legislature and was called Davidson County after Gen. William Davidson of Mechlenburg, N. C.

A year later Fort Nashborough was incorporated under the name Nashville; it had the first written constitutional government west of the Alleghenies. In 1778 a transient horseman named Andrew Jackson made Nashville his home and later put it on the map as the state's first congressman and the first of its three U. S. Presidents. His home, the famous Hermitage, still stands as a major Nashville landmark.

Federal troops occupied the city during the Civil War, and it was there that Gen. Thomas Hood's Confederate army suffered a disastrous defeat in 1864.

More than a century later, Nashville has grown into a major cultural, educational and commercial complex and the heart of a great regional trading area. It is served by nine major airlines, providing 83 flights daily, and is served by six routes of the Interstate Highway System.

Education has been a traditional trademark since the first public school system in the South opened its doors on a Nashville street Feb. 26, 1855.

Now 13 universities and colleges, 141 public schools and more than 40 commercial and vocational schools dot its landscape. Among the institutions of higher learning are Vanderbilt University, Fisk University, Tennessee A & I State University, a branch of the University of Tennessee, George Peabody College, Belmont College, David Lipscomb College and Meharry Medical College.

Rich in schools, it is even richer in churches and church-related industries, including several large publishing houses that have helped to make printing the city's largest single industry. Among them are the National Baptist Publishing Board, The Methodist Publishing House and the National Baptist Sunday School Publishing Board.

But printing is only a small part of Nashville's diversified economy, which boasts more than 500 individual manufacturers employing more than 28,000

workers and more than 40,000 individual business concerns.

It is also a banking and investment center and ranks second to Hartford, Conn., in the number of major insurance company offices. Two of the industry's largest, National Life and Accident Ins. Co. and Life and Casualty Ins. Co., have skyscraper headquarters in Nashville.

Other major employers include E.I. du Pont de Nemours Co., Ford Motor Co., Genesco Inc., Avco Corp. and Gates Rubber Co.

In 1925 radio station WSM, a National Life operation, went on the air and in November of that year presented a program of folk music known as the Grand Ole Opry. That program, still on the air, snowballed into a multi-million dollar music industry.

The music business now pumps an estimated \$60,000,000 annually into the Nashville economy and the famous "Nashville sound" has made the city second only to New York as a recording center.

Recording studios and music publishing houses occupy a burgeoning section of the city, with an entire street now named "Music Row."

On it stands the "Country Music Hall of Fame," a relatively new building which must be numbered along with the Hermitage and a replica of the Greek Parthenon among Nashville's top attractions.

The city has a symphony orchestra and art showings are continuous at the Parthenon and at Cheekwood Botanical Gardens, a fine arts center.

On April 1, 1963, the local governments of Nashville and Davidson County were consolidated in a unique form of Metropolitan Government which encompasses all the county's 533 square miles.

The consolidation boosted Nashville's population to more than 465,000, second largest in the state. Nashville is ruled by a mayor-council form of government and constitutes the 5th Congressional District.

The city lies in the heart of a fertile valley served by the Tennessee Valley Authority, the source of electrical power and flood control for millions.

TVA dams in the area have surrounded Davidson County with major lakes and all the recreational facilities which accompany them.

Additional information on Nashville can be obtained from the Nashville Area Chamber of Commerce, 310 Union St., Nashville, Tenn. 37201.

New Orleans, Louisiana

The World Almanac is sponsored in the New Orleans area by the New Orleans States-Item, 3800 Howard Ave., New Orleans, La. 70140; telephone (504) 821-1411; founded Jan. 3, 1880, by Maj. Henry J. Hearsey; circulation 140,201; executive editor, George W. Healy, Jr.; managing editor, Walter G. Cowan; general manager, Robert E. Gough; major awards received, Pulitzer Prize and two Sigma Delta Chi awards; sponsors Visual Education Program for High School Students, slum clearance campaigns and Football Fund for Underprivileged Children.

New Orleans, having completed its 250th anniversary year in 1968, combines Old World charm with New World progress and industry as the nation's second port, based on value of imports and exports.

Named after the Duke of Orleans, the city was founded on the edge of a swamp

within a crescent of the Mississippi River 100 miles upstream from the Gulf of Mexico by Jean Baptiste le Moyne, Sieur de Bienville.

The new settlement struggled for existence until 1722, when Bienville persuaded the French to make it the capital

of the Louisiana Territory. In that year Adrien de Pauger laid out the city, with a square on the bank of the river around which important public buildings stand. The area occupied by the original city is known as the Vieux Carre or French Quarter, which attracts millions of tourists to its museums, shops, restaurants, markets, jazz centers and residential patios.

Above Canal street, modern New Orleans is the banking and business center of the Deep South. For many years the city relied almost solely on shipping for economic support. Then agriculture—principally sugar, rice and cotton—manufacturing, trapping, fishing, production of petroleum and tourism became vital parts of its economy. Lands surrounding the city, including offshore areas, are the most productive sources of oil in the United States. The city produces Saturn rockets for the space program.

The port, served by the river, the Gulf Tidewater Channel, Inner Harbor Navigation Canal, Intracoastal canal and Lake Pontchartrain, moved cargo valued at \$2.34 billion in 1967.

The city proper, covering 363.5 square

miles, of which 199.4 are land, is governed by a mayor and city council. The population of the metropolitan area was estimated at more than 1,076,600 in 1967.

Three airports, for scheduled airlines, commercial and private aviation and military use, serve the city. The Union Passenger Terminal, opened in 1954 in the center of the city, consolidated passenger services of six railroad stations.

Among New Orleans' educational institutions are Tulane University, Louisiana State University in New Orleans, the LSU Medical College, Loyola University and 4 other institutions of higher learning. Museums include the Louisiana State Museum, Isaac Delgado Museum of Art, the Middle American Research Institute of Tulane and many small galleries.

Ideally placed geographically for handling foreign and domestic commerce, the city had to conquer threats of yellow fever, of river floods and of hurricanes to achieve eminence as a world trade center.

Through its vicissitudes it has remained a play capital of America—home of North America's most lavish Mardi Gras celebrations and birthplace of jazz.

New York, N. Y.

The World Almanac is sponsored in the greater New York City metropolitan area by the Daily News and Sunday News, 220 E. 42nd St., New York, N. Y. 10017, which this year celebrates its 50th Anniversary of publication; telephone (212) MU 2-1234; News Syndicate Co., Inc., founded June 26, 1919, by Joseph Medill Patterson; circulation daily 2,080,906, Sunday 3,221,849; president and publisher, F. M. Flynn; executive vice president, W. H. James; executive editor, W. A. Casselman; associate editor, Floyd Barger; treasurer, J. J. Lynch; business manager, V. E. Palmer; major awards include Pulitzer Prizes (news photography, international reporting, cartoon, editorial writing); sponsors Golden Gloves, Harvest Moon Ball, New York Relays, Ike Golf Championship and many community and school activities.

New York is the nation's largest city, its richest port and its leader in business, manufacturing, service industries, communications, fashion, art, music and literature, as well as the world's chief financial center and, as host to the headquarters of the United Nations, the "capital" of the world.

The city credits Giovanni da Verrazano with discovering its magnificent harbor in 1524. Henry Hudson explored Manhattan Island (now the seat of central government for the city's five boroughs) in 1609. Settlement by the Dutch soon followed, with the first houses built by Adriaen Block in lower Manhattan in 1613.

In 1626 Peter Minuit, first director general of the Dutch province of New Netherland, bought the island from the Manhattan Indians "for the value of 60 guilders," or about \$24, probably in goods and trinkets. The settlement at the lower end of Manhattan was named New Amsterdam; Fort Amsterdam was built where the U. S. Customs House now stands.

The Dutch erected a church in 1633; in 1642 they built a public meeting house on the site of 73 Pearl St.; in 1653, to protect the settlement, they erected a wall from which Wall St. takes its name. On Feb. 2, 1653, when New Amsterdam reached 800 in population, it was incorporated as a city.

On Sept. 8, 1664, British troops occupied New Amsterdam without resistance, took over the government from the Dutch director general Peter Stuyvesant and named the city New York to honor the Duke of York, brother of King Charles II of England. Without notice to the Dutch, Charles had conferred on the Duke title to all Dutch land in North America, including much of the present states of New York, New Jersey and Connecticut.

Thomas Willert was named the first English mayor in June 1665. The Treaty of Breda, 1667, confirmed British owner-

ship, giving the Dutch in exchange the former British colony of Surinam in South America. On Aug. 9, 1673, the Dutch recaptured New York and renamed it New Orange in honor of the Prince of Orange. In Nov. 1674 it was restored to the British and again named New York.

The British made easy terms for the Dutch and many prominent Dutch merchants and landowners became loyal subjects. The city was divided into 6 wards Dec. 8, 1683, with an alderman for each. The first charter was granted Apr. 27, 1686. The first printing press arrived Apr. 12, 1693, and the first newspaper was issued Oct. 16, 1725.

In 1700 the city built a city hall at the northeast corner of Broad and Wall Sts. A library was founded 1754. A stage service to Philadelphia was opened 1756. Streets were first lighted at public expense, 1762. Trinity Church, first of the Anglican communion, was first erected 1698.

New York was a focal point for both Continentals and British during the American Revolution. Washington had his headquarters for a time in the Kennedy house, which stood at present No. 1 Broadway and later became British headquarters. The Declaration of Independence was read to the American troops July 9, 1776, in the presence of Washington near the present City Hall. The Americans lost the Battle of Long Island Aug. 27, 1776, and the British occupied New York Sept. 15, 1776. Over 500 houses were destroyed by fire Sept. 21, 1776. The Americans entrenched on Harlem Heights, where they fought several actions; on Nov. 16, 1776, they lost Fort Washington, in upper Manhattan, to the British and left the island.

Washington reentered New York on Evacuation Day, Nov. 25, 1783. On Apr. 30, 1789, Washington took the oath of office as first President on the balcony of Federal Hall, Broad and Wall Sts., where a bronze

statue by J. Q. A. Ward now stands. New York was the national capital until 1790, when it had a population of 33,131. Until 1797 it was the capital of the state.

A new city hall was built 1803-12 in City Hall Park, bounded by Broadway, Park Row and Chambers St. It is still in use.

By act of the state legislature, Kingsbridge, West Farms and Morrisania, NE of Manhattan, were joined to the city Jan. 1, 1874. In 1894 adjacent towns voted on annexation. Eastchester and Pelham Manor voted favorably; Mount Vernon and Westchester (town) unfavorably, the latter by one vote. The legislature overrode Westchester and joined it to the city with Eastchester and Pelham Manor, total over 39 sq. mi., or 26,017 acres.

On Jan. 1, 1898, Manhattan and large areas to the NE, E and S were consolidated into one City of New York, a metropolis with 5 boroughs (which also are counties of the state). Manhattan became the Borough of Manhattan. The areas to the N became the Borough of the Bronx; originally parts of Westchester County, they had become part of New York County along with Manhattan; later they became Bronx County, and New York County was limited to Manhattan. The City of Brooklyn (Kings County) became the Borough of Brooklyn. Staten Island (Richmond County) became the Borough of Richmond. Areas on Long Island which are now Queens County became the Borough of Queens (see also pages 436-438).

Population of New York City by Boroughs

Year	Manhattan	Bronx	Brooklyn	Queens	Richmond	Totals
1790 (U. S. Census)	33,131	1,781	4,495	6,159	3,835	49,401
1850	515,547	8,032	138,882	18,593	15,061	696,115
1900	1,850,093	200,507	1,166,582	152,999	67,021	3,437,202
1910	2,331,542	430,980	1,631,351	284,041	85,969	4,766,883
1920	2,284,103	732,016	2,018,356	469,042	116,531	5,620,048
1930	1,867,312	1,265,258	2,560,401	1,079,129	158,346	6,930,446
1940	1,869,924	1,394,711	2,698,285	1,297,634	174,411	7,454,995
1950	1,900,101	1,451,277	2,738,175	1,550,849	191,555	7,891,957
1960	1,698,281	1,424,815	2,627,319	1,809,578	221,991	7,781,984
1967 (estimated)	1,750,000	1,470,000	2,650,000	1,985,000	270,000	8,125,000

Norfolk, Virginia

The World Almanac is sponsored in the Norfolk Metropolitan Area by The Virginian-Pilot and Ledger-Star, 150 W. Brambleton Ave., Norfolk, Va. 23501; telephone (703) 625-1431; Virginian founded 1865 by G. A. Sykes & Co., Ledger founded 1876 by J. Richard Lewellen & Co.; circulation: L-S daily 105,470, V-P daily 126,393, Sunday 172,241; chairman of the board and publisher, Frank Batten; president, Paul S. Huber, Jr.; senior vice pres. and assistant publisher, Harold G. Sugg; V-P editor, Robert H. Mason; L-S editor, William H. Fitzpatrick. Major awards include two Pulitzer Prizes for The Virginian-Pilot. Both newspapers sponsor area-wide Christmas Joy Fund, founded 34 years ago; a scholastic achievement award program for high school students; other community relations projects.

Norfolk is the financial hub of the South Hampton Roads Metropolitan Area which encompasses the four contiguous cities of Norfolk, Portsmouth, Chesapeake and Virginia Beach. The metropolitan area covers 667 square miles; there are no counties. Its 88% urban population attests to its close knit nature. Estimated population for the four-city area is 690,360. It is Virginia's top-ranking area in population, income, and retail sales.

The cities of Norfolk and Portsmouth date back to the 17th Century. Chesapeake, the largest city in land area, and Virginia Beach were recently formed in annexation with surrounding counties. The town of Norfolk was established in 1682 on the site of an Indian village. Sold by its owner, Nicholas Wise, to the colonial government in Williamsburg for \$400 worth of tobacco, it was chartered as a borough in 1736. Lt. Gov. Robert Dinwiddie, honorary citizen of Norfolk, presented the borough with a seal and silver mace, the city's official symbol still in ceremonial use. During the Revolutionary War Norfolk was destroyed by fire. Old St. Paul's Church, built in 1738, was the only major building to survive; an English cannonball remains embedded in its wall. The Norfolk Naval Shipyard, founded in Portsmouth in 1738, was also destroyed. By 1831, however, the rebuilt shipyard housed the oldest drydock in the western hemisphere. Here the engines for the Powhatan, Commodore Perry's ship, were built and installed. The world's first armored warship was built here on the scuttled hulk of the man-of-war, the Merrimack.

World War I saw the building of the first aircraft carrier, the U. S. S. Langley. But full recognition of the port's value came only with the founding of the Norfolk Naval Base on Independence Day in 1917.

From this beginning, the area has grown to house the greatest concentration of naval installations in the world. Among the 38 major commands in Norfolk alone are the Atlantic Fleet, the Second Fleet, NATO's Supreme Allied Command Atlantic (SACLANT), the Armed Forces Staff College and the Commandant 5th Naval District. Naval facilities have mushroomed to include a 1967 payroll for the Navy and Civil Service of more than \$400,000,000, with nearly \$26,000,000 in other new construction for Norfolk's naval installations. An additional \$364,000,000 is paid to fleet personnel, most of whom have families residing in the area.

As a port Hampton Roads has the world's finest natural harbor. Close to 6,000 ships from over 350 world ports navigate its deep, ice-free channels each year. Its temperate climate is ideal for the handling of all types of cargo. Among Atlantic ports, Norfolk holds first place in export tonnage. Both Portsmouth and Norfolk have new berths for containerized cargo. Norfolk International Terminals has projected a \$50,000,000 investment in its port development.

Eight railroads, with Norfolk-Portsmouth as the terminus of a 7,400-mi. rail system, reach directly into the manufacturing heart of the nation. Over 50 common and contract motor carriers offer flexible service. The Chesapeake Bay Bridge Tunnel provides a direct North-South highway system from New York to Florida. Four airlines provide direct flights to major cities in the nation.

Educational institutions in Norfolk include 3 4-year liberal arts colleges. Old Dominion College has an engineering school and technical institute. Two-year colleges are located in Portsmouth and Chesapeake.

Norfolk has 7 hospitals; Portsmouth

has 3, including the nation's oldest naval medical center recently enlarged by a \$17,000,000 addition. Virginia Beach has complete facilities in its new hospital.

Civic, social and recreational activities abound in the South Hampton Roads area. Norfolk has an excellent symphony orchestra, chamber group and civic chorus, a Little Theater and civic ballet. Norfolk has just begun construction of a \$24,000,000 cultural and convention center. Numerous dinner theaters operate in the area. The city's arts and sciences museum recently more than doubled its facilities. The Norfolk Tour includes the MacArthur Memorial, final resting place of Gen. Douglas MacArthur; the Adam Thoroughgood House, built in 1636 and the oldest brick home in the nation, and Norfolk's

Botanical Gardens which include 175 acres of azaleas to furnish a background for the annual NATO Azalea Festival.

Portsmouth is known for its Old Towne District and harbor tours. Much of the world famous Dismal Swamp is located in Chesapeake, with its vast rural area, woodlands, wild rivers and dense forests. The famed resort city of Virginia Beach offers 174 hotels, motels and tourist homes. Its 38 miles of beach provides excellent swimming, fishing and surfing area. Camping facilities are available at Seashore State Park. Each year Virginia Beach sponsors a Boardwalk Arts Festival where over 200 artists display their works.

The South Hampton Roads area is served by 11 AM, 9 FM and 5 television stations.

Oklahoma City, Oklahoma

The World Almanac is sponsored in the Oklahoma City area by The Daily Oklahoman and Oklahoma City Times, Oklahoma City, Okla. 73125; telephone (405) 232-3311; The Oklahoman founded in 1894, Times in 1888; Oklahoma Publishing Co. acquired The Oklahoman 1903 and the Times 1916; circulation (March 31, 1968) Oklahoman, 185,306; Times, 115,541 and 274,785 Sunday; editor and publisher, E.K. Gaylord; managing editor, Charles L. Bennett.

Oklahoma City, capital and most populous city in Oklahoma, is located near the center of the state on the North Canadian River. Its population in 1968 was 405,000, with 635,000 in its metropolitan statistical area. The city is about 300 miles south of the exact center of the continental United States.

Oklahoma City exploded into being Apr. 22, 1889. In the morning, its site was a peaceful and quiet Indian Territory railroad stop. Twelve hours and the Run of '89 later, it boasted 10,000 residents, a tent city that spread over 3 townsites.

In the center of a rich agricultural area, the city is a manufacturing and distributing center of farm products.

Livestock plays a major role in the economic life of the area, with dairying and broiler growing increasing.

Oklahoma City lies in the heart of a rich oil producing area. Heaviest production in the state lies within 60 miles of the city, with approximately 1,800 producing wells in the metropolitan area. The original Oklahoma City field has produced more than 750,000,000 barrels of oil and the city is the gateway to heavy development taking place in western Oklahoma. In 1968 an estimated 39,500 Oklahoma Cityans were earning their living from the oil industry.

Oklahoma City, an aviation pioneer, is a major aeronautical center. Located here is Tinker Air Force Base, headquarters of the Oklahoma City Air Materiel Area, world's largest air depot. The \$100,000,000 installation employs more than 26,000 civilians and 4,000 military personnel. The Federal Aviation Administration operates major facilities in the city, worth over \$222,000,000, including the FAA Aeronautical Center and the Civil Aeromedical Institute. Some 38,000 city residents were employed in aviation occupations in 1968, with an estimated annual payroll of \$287,500,000.

Manufactured products include aircraft, telephone exchange equipment, space electronic components, auto bodies and parts, iron and steel products, oil field and refinery equipment and supplies, oil and greases, aviation gasoline, building materials, flour, feed, meat, cottonseed products, and paper products.

The city is a growing regional, national and international marketing center, and the Bureau of Customs opened an office in 1967 to expedite exports and imports.

Effective buying income in the city for 1967 was reported as \$1.015 billion. In the Oklahoma City trade area, effective buying income was \$2.863 billion. Consumer sales in 1967 totaled \$1.052 billion.

Oklahoma City is served by 5 passenger airlines, American, Braniff, Trans World, Continental and Frontier. Four primary federal highways and 3 major state highways traverse the city; two Federal Interstate Highways (I-40 and I-35) pass through the city and I-44 terminates here. The city boasts a fully-planned urban expressway system, major bus lines and through railway service.

Points of interest include the National Cowboy Hall of Fame and Western Heritage Center, \$5,000,000 center with exhibits of art, sculpture and relics and dance performances by authentic Plains Indians; Mummies Theater; the State Historical Society Building and Museum; State Capitol building; Oklahoma City Symphony and Junior Symphony; Oklahoma Art Center, and Oklahoma City Zoo.

In addition, Oklahoma City is one of the nation's leading convention centers. Some 350 conventions in 1967 attracted 160,000 delegates. Other attractions bring an additional 1,000,000 visitors annually.

Among universities and colleges in the metropolitan area are Oklahoma City University, the University of Oklahoma (18 miles to the south at Norman), Central State College, Oklahoma Christian College, Bethany Nazarene College, Southwestern Bible College and Midwest Christian College. Also in the city is the U. of Oklahoma School of Medicine.

Oklahoma City is one of the Southwest's leading medical centers. The city has fine hospitals and medical clinics and is currently expanding a research and treatment center.

The city is among the nation's largest in area, with a total of 647.5 sq. mi. The metropolitan statistical area includes 2,141 sq. mi.

Oklahoma City is in the midst of 3 major Urban Renewal renovation projects with an estimated total cost of \$77,000,000.

Big Eight Conference sports are at the University of Oklahoma, 18 miles south, and at Oklahoma State University, 60 miles away. The city boasts the nation's oldest college basketball tournament classic, the All College Tournament, hosted by Oklahoma City University.

Professional sports teams include the Oklahoma City baseball 89ers (Pacific Coast League) and the Blazers (Central

Hockey League), performing in the city's spacious new State Fair Arena, which seats more than 10,000.

Orlando, Florida

The World Almanac is sponsored in the Orlando area by the Orlando Sentinel and Orlando Evening Star, 633 N. Orange Ave., Orlando, Fla. 32802; telephone (305) 423-4411; The Sentinel and Evening Star, published as dailies since 1913, were merged in 1931 under Publisher Martin Andersen; acquired by Tribune Company of Chicago in 1965; circulation 149,398 daily; 148,646 Sunday; Editor Publisher William G. Conomos; public service projects include Shoes for the Shoeless Fund and Florida Symphony \$1 Charity Concert; sponsors annual Shad Fishing Derby, Cooking School, Spelling Bee in nine county area and Easter Parade Contest.

Orlando, "The City Beautiful," has been praised as one of the 14 most pleasant communities in the United States. In Orange County in east-central Florida, Orlando encompasses 30.55 sq. mi. of rolling countryside dotted with over 50 lakes.

Orlando had its beginning in 1842 at the end of the Seminole Indian War when Aaron Jernigan settled on land which is now a part of the city and gave his name to the small community. In 1857, Jernigan was changed to Orlando in memory of Orlando Reeves, a soldier killed in a skirmish with the Indians.

Incorporated in 1857 with a one-sq.-mi. area and only 75 citizens, Orlando now has more than 109,238 residents.

Current estimated population of metropolitan Orlando, consisting of Orange and Seminole Counties, is 406,100. But according to present-day estimates, the impact of almost unmatched industrial, commercial and recreational expansion will cause the population to reach 813,860 by 1982.

The \$600,000,000 Florida Disney World, developing on a 27,400-acre tract 14 mi. southwest of downtown Orlando, is scheduled to open in 1971. Expected to attract 6,000,000 visitors during the first year, Disney World will include an amusement area, an unusual group of hotels surrounding the park, a jet airport and an Experimental Prototype Community of Tomorrow (EPCOT) planned for 20,000 permanent residents.

Another feature will be an industrial park covering approximately 1,000 acres of the Disney tract where some 10,000 employees will work.

The new Orlando Naval Training Center, officially commissioned July 1, 1968, is one of the Navy's largest recruit training centers. It will have a capacity to train 8,000 recruits at a time and accommodate 6,500 military personnel and 2,000 civilian workers when completed.

Florida Technological University, with an opening class of 1,500 students, Sept. 1968, will have a student body of more than 15,000 by 1978. Valencia Junior College, a public junior college, opened in 1967 and joined Orlando Junior College and Rollins College in the field.

Orlando is the home of the Martin-Marietta Co. plant, largest single industrial employer in Florida with some 9,000 persons on its payroll.

Orlando has become the most important insurance center in Florida with 7 home

offices and 7 regional home offices. By the fall of 1970, an \$8,500,000, 19-story building in downtown Orlando will be completed by Continental Casualty Co.

With new companies arriving on the average of two a week, Orlando has become more than the citrus capital of the past. There are 12 beautiful and well planned industrial parks and districts. Among already established industries in larger parks are: Xerox Corp., du Pont, National Biscuit Co., Sealtest Co. and Sealy Mattress Co. Industries with more than 200 employees include: American Bakeries, General Dynamics' Dynatronics, Frito-Lay, Minute Maid Co. and the Sentinel Star Co., publisher of Orlando's two daily newspapers, the Sentinel and the Evening Star.

Rapidly becoming a convention city, Orlando has a total of 143 hotels and motels with over 5,000 modern rooms.

One of the prime reasons for the concentration of new industry is the available transportation. Orlando is less than 4 hours from every major Florida market. In the geographic center of the state, it is the natural hub of Florida's network of modern highways and expressways.

National, Eastern and Delta airlines serve Orlando with 51 flights daily. Orlando is also served by Shawnee Airlines, Seaboard Coast Line Railroad, Greyhound and Trailways bus systems, 21 common carrier truck lines and 8 freight forwarding companies.

The City of Orlando operates under the Mayor-Council form of government.

Orlando's Tinker Field is the site of spring training and exhibition games of the major league Minnesota Twins. The local Orlando Twins are members of the Florida State League. The Orlando Panthers belong to the Continental Football League. In December the city has two nationally recognized post-season bowl games, the Tangerine Bowl and the Mistle Bowl.

Orlando is also the home of the \$115,000 Florida Citrus Open Golf Tournament held in March of each year at Rio Pinar Country Club.

City-owned Ben White Raceway gives Orlando the distinction of being the world's largest winter training headquarters for trotters and pacers.

The Orlando-based Florida Symphony Orchestra, the only all-professional symphony in Florida, gives 8 subscription concerts each season with renowned guest artists and conductors.

Ottawa, Canada

The World Almanac is sponsored in the Ottawa area by the Ottawa Journal, 237 Queen St., Ottawa, Ontario; telephone (613) 236-7511; founded 1885 by A. S. Woodburn; circulation daily 78,220, Saturday 88,210; president and editor, I. Norman Smith; vice president and general manager, Lucien A. Lalonde; managing editor, W. H. Metcalfe; affiliation, FP Publications; Head Office, Winnipeg; sponsors annual Cup of Milk Fund, Unitarian Church; bicycle safe driving contest; Regional Water Safety Program.

Ottawa, Canada's national capital, is the country's 5th largest city.

Founded as Bytown in 1827, it was renamed Ottawa and incorporated as a city in 1855. Two years later, the progressive

young community was chosen as capital of the United Province of Canada, which became the Dominion of Canada in 1867.

Now spread over 30,481 acres of land, of which 3,256 acres are covered with water,

the city itself has a population just shy of 300,000.

The capital is located on the provincial border of Ontario and Quebec at a point where the Ottawa River tumbles over the Chaudiere Falls. A short distance downstream, the Gatineau and Rideau Rivers flow in from the north and south.

The sprawling urban area surrounding Ottawa on the Ontario side was combined in mid-1963 to form the first regional government area of its kind in the province. The new regional municipality of Ottawa-Carleton covers an area of 1,100 sq. mi. with a population of 420,000. It includes the cities of Ottawa and Eastview and 14 other neighboring villages and townships.

The infant area-wide administration is headed by regional Chairman Denis Cooclain, who receives an annual salary of \$30,000. Mayor Don Reid is the city's chief administrator.

Just across the Ottawa River to the north in the Province of Quebec, the city of Hull and environs provide homes for another 116,000 people.

Ottawa is the Anglicized form of Outaouac or Outaouais, the name of a tribe of Indians from Lake Huron who were prominent in trade with the French in the 17th Century. They carried their furs along the Ottawa River in canoes.

The Parliament buildings—housing the nation's House of Commons and Senate—provide the city's main tourist attraction. Designed in the Gothic style and situated on Parliament Hill overlooking the city's main downtown business district, the seat of government occupies 3 main buildings. The Peace Tower, a famous landmark and memorial to Canada's war dead, towers above the main center block.

Not including the 22-mile Gatineau Parkway in a mountainous, lake-dotted district just north of the city in Quebec Province, there are 23 miles of parkways

and driveways in and around Ottawa. All have been designed and maintained by the Federally-operated National Capital Commission.

The Federal Government's continuing drive to develop the capital area has resulted in construction of a \$45,000,000 National Arts Center in the heart of the city. The center, to be opened some time in 1969, will feature an opera house-concert hall, a theater, and an experimental studio.

Every summer, the Central Canada Exhibition, which runs for 10 days, provides the full variety entertainment of a fair including midway, grandstand performances, horse shows, and varied exhibits. The exhibition takes place at Lansdowne Park, where the new \$9,000,000 Civic Center multi-purpose arena-stadium provides homes for the Canadian Football League Ottawa Rough Riders and the Ottawa 67's, a junior hockey team. The Ottawa Winter Fair takes over the Lansdowne facilities for a week every fall.

The Civil Service provides the bulk of employment for residents of the Greater Ottawa area, but in recent years the city has stepped up its drive to attract industry. However, the E. B. Eddy Co., producer of paper products and one of the area's oldest industries, is still the largest private employer.

Ottawa International Airport, 5th busiest in the nation, handles 60 scheduled flights daily for Air Canada and Eastern Airlines. It also serves as an alternate for Montreal's giant International Air Terminal, 120 miles away. Charter flights from almost all the world's major airlines make Ottawa stops.

Ottawa is served by both the Canadian Pacific and Canadian National Railways.

For further information contact Ottawa Tourist and Convention Bureau, 70 Besserer Street, Ottawa 2, Ontario, Canada.

Oakland, California (See San Francisco-Oakland)

Philadelphia, Pennsylvania

The World Almanac is sponsored in the Philadelphia area by The Philadelphia Inquirer, 400 N. Broad St., Philadelphia, Pa. 19101; telephone (215) LO 3-1600; traces its lineage to The Pennsylvania Packet, founded 1771; circulation 504,669 daily, 935,458 Sunday; editor and publisher, Walter H. Annenberg; editorial page director, Harold J. Wiegand; managing editor, John S. Gillen; sponsors Delaware Valley Science Fair, Old Newsboys' Day, Book and Author luncheons, awards

scholarships and grants-in-aid to newsboys.

Birthplace of the nation, Philadelphia today is a major center of commerce, finance and culture, rich in both history and renewal, with a population of 4,690,000 in the metropolitan area.

The English Quaker, William Penn, founded the city in 1682, giving it a name that means "city of brotherly love." His grid pattern of streets and public squares dictated the modern shape of the center city area from the broad Delaware River to the smaller Schuylkill.

The original two sq. mi. of Penn's "greene Country Towne" has grown to 129, and the early population, 400, to more than 2,000,000. But the Quaker influence remains strong in the fields of finance and private education.

Philadelphia was the largest and wealthiest of American cities in Colonial days. It held a pre-eminent position through the Revolution as the seat of the Continental Congress and for 10 years afterward during which it was the national capital.

The city abounds in relics of those days. The restored mansions of merchant princes dot the 4,000-acre Fairmont Park and there are buildings which still bear

the scars of the Battle of Germantown.

The Betsy Ross House in which the seamstress is said to have fashioned the Stars and Stripes still stands on Arch St., around the corner from Old Christ Church where George Washington worshipped.

The major historical shrines are clustered in Independence National Historical Park, focal point of which is Independence Hall where the Declaration of Independence was signed and the Constitution was framed. The Liberty Bell, symbol of freedom, occupies a place of honor in the building. (See Index for Independence Hall, Liberty Bell and American Revolution.)

Other buildings of outstanding interest in the park include Carpenters' Hall, meeting place of the First Continental Congress in 1774; Philosophical Hall, home of the American Philosophical Society founded in 1743 by Benjamin Franklin; the First Bank of the United States, erected in 1795 and probably the oldest bank building in the U. S., and the Bishop White House, home of the Rt. Rev. William White, "Father of the American Protestant Episcopal Church."

A new U. S. Mint is located on Independence Mall, and in the Delaware River a few blocks away is berthed the U.S.S. Olympia, Admiral Dewey's flagship in the Spanish-American War.

Adjoining the national park in what has been described as "America's most historic square mile" is Society Hill whose town houses of the Colonial and Federal periods have been restored amid modern apartment towers as part of Philadelphia's \$600 million urban renewal program.

This program has spurred the development of a "new city" in the Penn Center complex of transportation terminals, office buildings and apartment houses. It has given Philadelphia a modern Food Distribution Center and has created on open land a community called Eastwick, the nation's largest renewal project.

One of the principal modernization projects of the 1960s has been the construction of a \$16,000,000 exhibition hall addition to the Philadelphia Civic Center, which includes the 12,000-seat Convention Hall and a museum devoted primarily to the subject of trade.

Philadelphia's industrial base is widely diversified, embracing 87% of all the classifications listed by the U. S. Department of Labor. It is the largest petroleum refining center on the East Coast and the second largest in the nation.

In terms of employment, the building trades rank first among the city's industries, followed in order by machinery manufacturing, primary metals and metal fabrication, textile and clothing manufacturing, electrical machinery, food processing, chemicals, printing and publishing, paper manufacturing and instrument making.

Philadelphia has the largest fresh water port in the world with 50 miles of waterfront. Total foreign tonnage in 1967 was 49,175,803 tons, second highest in the nation. The vessels of more than 100 shipping lines link the city to 273 ports in 75 countries.

Serving the growing transportation needs of the Delaware Valley region is Philadelphia International Airport, which accommodated more than 5,000,000 passengers in 1967.

Philadelphia is corporate headquarters for the Penn-Central Railroad and has pioneered in subsidizing rail commuter service on an extensive network of lines of the Penn-Central and Reading Railroads through the Southeastern Pennsyl-

vania Transportation Authority.

The financial base of the city's economy is in 11 commercial banks and four mutual savings funds which have combined resources of more than \$6.5 billion. Philadelphia is third in the nation in bank clearings. A number of nationwide insurance companies are headquartered in the city.

Philadelphia has a cultural tradition with its roots in Colonial times. The Philadelphia Orchestra of international renown makes its home in the Academy of Music, built in 1856 with an auditorium modeled after the La Scala opera house in Milan, Italy. The academy also plays host to the Pennsylvania Ballet Co. and to the Lyric Opera Co. and the Grand Opera Co.

The Philadelphia Museum of Art contains more than 100,000 works. It houses the Johnson Collection of Western art from the 14th through the 19th Centuries and the Arensburg Collection of modern masterpieces. The Rodin Museum is devoted to the works of the French sculptor, Auguste Rodin.

The Franklin Institute, dedicated to scientific research and education, provides visitors to its science teaching museum with the opportunity to operate exhibits illustrating basic scientific principles and to study the heavens as projected on the dome of the Fels Planetarium.

The Academy of Natural Sciences, founded in 1812, is the oldest scientific institution of its kind in the U. S. Exhibits feature lifelike animal groups in natural settings.

There are 17 colleges and universities in Philadelphia, the largest among them being the University of Pennsylvania and Temple University. Nearby are Villanova University and Bryn Mawr, Swarthmore and Haverford colleges.

The Philadelphia Phillies are the National League baseball team. Professional football is represented by the Philadelphia Eagles. The Philadelphia Flyers hockey club and the Philadelphia 76ers professional basketball team play in the 15,000-seat Spectrum, which opened in 1967. Crowds of more than 100,000 annually watch the traditional Army-Navy football game in John F. Kennedy Stadium.

Further information may be obtained from the Office of the City Representative and Department of Commerce, 1660 Municipal Services Building, Philadelphia, Pa. 19107, and from the Greater Philadelphia Chamber of Commerce, 121 South Broad Street, Philadelphia, Pa. 19107.

Phoenix, Arizona

The World Almanac is sponsored in the Phoenix area by the Phoenix Gazette, 120 E. Van Buren St., Phoenix, Ariz. 85004; telephone (602) 271-8000; founded Oct. 28, 1880 as Arizona Gazette by Charles H. McNeil; circulation 95,952; publisher, Eugene C. Pulliam; managing editor, S. Lowell Parker; sponsors Golden Gloves, Science Fair, nutrition and medical forums, Music Memory programs and nine other events each year.

Phoenix is the capital and largest city of Arizona, with 1968 population estimated as 530,000. Metropolitan Phoenix covers 250 sq. mi. and includes satellite communities of Glendale, Scottsdale, Paradise Valley, Tempe, Mesa, Chandler, Buckeye and the remainder of Maricopa County, with 940,000 residents.

The first white settlement, a hay camp, was established in 1866 by John Y. T. Smith. He held a Government contract to supply mounted troops from Fort McDowell, 30 miles to the northeast.

In the winter of 1867 the John Swilling Co. began clearing out prehistoric canals to carry water from Salt River to the fertile lands of the valley.

Like the prehistoric people who lived here in 200 B.C., the white man found the

Valley of the Sun blessed by a mild climate with plentiful water. Cotton, citrus and cattle accounted for more than \$260,000,000 of farm income in 1967.

Phoenix, in south-central Arizona, was incorporated Feb. 11, 1881, and is governed by the mayor-council form of government with a city manager as executive officer.

It is a major Southwestern trading center and haven for winter tourists. Light manufacturing continues increasingly important to the city's economy.

The tourist business and conventions contributed \$240,000,000 in 1967 and is projected to reach \$260,000,000 in 1968.

Veterans Memorial Coliseum, a \$6,000,000 convention and sports facility opened in 1965 at the state fairground. With 10,294 permanent seats, it can accommodate

15,000 for many events.

Phoenix Civic Plaza, a \$19,000,000 convention and cultural complex in the heart of Phoenix, will be completed in 1970.

Manufacturing is the area's major source of income, contributing \$1.3 billion in 1967 and a predicted \$1.5 billion in 1968.

Major employers are Western Electric, Cudahy, Swift and Company, Motorola, Reynolds, E. L. Gruber, Sperry Phoenix, General Electric, AiResearch, Goodyear Aerospace and Dickson Electronics. Both Motorola and Dickson Electronics are undergoing extensive plant expansions.

Transportation facilities include 9 airlines, two railroads, two transcontinental bus lines, 30 interstate and 39 intrastate truck lines.

Over 2,500,000 arrivals and departures are expected at Sky Harbor airport during 1968.

There are 111 shopping centers in the Metropolitan Phoenix area. Retail sales for 1967 were \$1.62 billion while 1968 estimates are \$1.75 billion.

A new \$5,000,000 Post Office was dedicated in May, 1968. Pepsi-Cola Management Institute also opened during the year. In September of 1967 Arizona State University opened its new Law School on the campus at Tempe, Arizona.

Phoenix boasts a symphony orchestra, an art museum, Indian museum, zoo, musical theater, community theaters, and botanical garden. Nearby is Taliesin-West. Home of the late Frank Lloyd Wright, now an architectural school directed by Mrs. Wright.

A legitimate theater, running for 35 weeks, opened in October of 1968.

Sports events include horse, dog and auto racing, the Phoenix Open Golf Tournament, spring baseball with the San Francisco Giants, Chicago Cubs, Oakland Athletics and Seattle Pilots, Phoenix Suns, new member of the National Basketball Association, Phoenix Giants of the Pacific Coast Baseball League, and the Phoenix Roadrunners of the Western Hockey League.

Higher educational institutions include Arizona State University, Phoenix College, Grand Canyon College, the American Institute for Foreign Trade, a two-year community college at Mesa and Glendale, Southwestern College and Arizona Bible College.

Additional information on Phoenix may be obtained from the Arizona Development Board, Chamber of Commerce, Convention Bureau, and the Research Department of The Phoenix Gazette.

Pittsburgh, Pennsylvania

The World Almanac is sponsored in the Pittsburgh area by the Pittsburgh Press, 34 Boulevard of the Allies, Pittsburgh, Pa. 15222; telephone (412) 263-1100; founded June 23, 1884, as Evening Press by Thomas J. Keenan; circulation 350,000 daily, 760,000 Sunday; editor, John Troan; business manager, Barney G. Cameron; major awards received include Edward J. Meeman Conservation Award; public service projects include campaigns for legislative action against ravages of strip mining, campaign to push mass immunization against polio.

Pittsburgh, one of the nation's top steel-making and coal mining areas, is a city of many hills and valleys through which run 3 major rivers as the Allegheny and Monongahela join to form the mighty Ohio, America's Gateway to the West for more than 200 years.

The first hunters and trappers came through here around 1714; the city itself dates from Nov. 25, 1759, when English forces under Brig. General John Forbes occupied the ruins of Fort Duquesne which French soldiers had burned and abandoned, and built a new and bigger fortress called Fort Pitt.

Protected by the fort and endowed by nature with fabulous riches, the area's first residents prospered as farmers and manufacturers. And the city grew steadily.

By the time it was incorporated as a city in 1816, it had already gained a reputation as a "Smoky City" because of the factories and coal-burning homes. It took 130 years to get rid of this grime.

Today, led by Mayor Joseph M. Barr and a nine-man council, Pittsburgh is one of 129 municipalities in Allegheny County. It has a population of 604,332 (1960 census) and is the center of a 4-county metropolitan area with 2,368,100 residents.

Pittsburgh is one of the country's top headquarters cities. It ranks second only to New York City in the amount of capital invested by its home-based firms, and ranks third—behind New York and Chicago—in the number of headquarter operations, as compiled in Fortune Magazine's Top 500 listing.

Concentrated in its metropolitan area is one-fifth of the nation's steelmaking capacity, and western Pennsylvania coal mines produce 40,000,000 tons of bituminous coal annually. Although steel and coal works dominate the area, around 6,000 different products are made here and 260,000 workers split an annual pay-

roll of \$1.8 billion. And there are 9 nuclear facilities hereabouts.

Although thought of as an inland city, Pittsburgh exports nearly \$225,000,000 worth of goods annually, and its river ports handle 54,000,000 tons of freight annually; that's more than any other inland river area.

Retail sales total about \$3.8 billion a year; wholesale, about \$4.6 billion a year.

Pittsburgh is a vital transportation center. Besides its river traffic, it is served by 3 passenger rail carriers; 6 rail freight carriers; more than 350 common and contract motor carriers; 5 domestic air trunklines and 3 local service airlines.

Locally, the Port Authority of Allegheny County has welded some 30 independent bus lines and the Pittsburgh Railways Co. into an integrated transit system. A major plan for rapid and mass transit facilities is in preparation.

Pittsburgh is the home of the world's first full-scale nuclear power plant, the first industry-owned nuclear testing reactor; the first atomic engines were built here.

It's the home of the world's largest manufacturers of aluminum, steel rolls, rolling mill machinery, air brakes, plate and window glass, and safety equipment.

Here, too, are the largest American producers of bolts, nuts, and rivets; wrought iron pipe and bituminous coal.

There are around 125 industrial research and testing laboratories in the Pittsburgh area, along with facilities for basic and applied research in educational institutions.

Pittsburgh is a city of progress; this is where the guidebook on urban renewal was written in the 1940s. Pittsburgh's own war on poverty, through neighborhood programs carried out by ACTION-Housing, Inc., and others, predates the Great Society by several years.

More than \$3 billion has been spent on urban renewal here since 1947 with 35 major buildings going up, and at least 5 more are planned, including a 64-story U. S. Steel headquarters that will tower above the city's skyline. Since World War II, more than \$2.5 billion has gone into industrial expansion, and major smoke and flood control projects have cleared the skies and rivers. Still to come: a 50,000-seat major league sports stadium; a downtown home for the famous Pittsburgh Symphony Orchestra, and the Pennsylvania Railroad has unveiled plans for a 147-acre downtown development that will increase the Golden Triangle by over one-third.

Among its schools are the University of Pittsburgh, Duquesne University, Point Park College, Chatham College, Mt. Mercy College, and Robert Morris Junior College. Mellon Institute and Carnegie Institute of Technology have merged to form Carnegie-Mellon University.

Its Health Center in Oakland, where Dr. Jonas Salk perfected his polio vaccine, is one of the best in the nation. In all, there are 62 hospitals scattered throughout the metropolitan area.

In Oakland, too—the area is considered the City's cultural center—is WQED, one of the nation's pioneer educational television stations. It went on the air April 1, 1954, and is considered the country's first.

There are 18 Carnegie public libraries,

3 bookmobiles and dozens of community libraries. Theaters include the Civic Light Opera and 4 other summer showplaces, 3 community legitimate theaters and two commercial legitimate theaters. The Pittsburgh Symphony and the Pittsburgh Opera Company are widely known.

Points of interest include Buhl Planetarium, the Aviary with its rare birds, Phipps Conservatory, the Carnegie Museum and its Art Gallery, Highland Zoo, an aquarium, the Children's Zoo, the Underground Zoo, and the Allegheny Observatory for stargazers.

Notable buildings include the County Courthouse and Jail designed by H. H. Richardson, Mellon Institute; and the University of Pittsburgh's 42-story Cathedral of Learning, with its Gothic campus companions, the Stephen Foster Memorial and Heinz Chapel.

Historic sites include the reconstructions of the walls of Fort Pitt in the downtown area and the Blackhouse, which stood outside the fort's ramparts and which is the only building still standing from the early days.

In sports, Pittsburgh has the Pittsburgh Pirates (baseball) in the National League, the Steelers in the National Football League and the Penguins in the National Hockey League.

Additional information on Pittsburgh can be obtained from The Chamber of Commerce of Greater Pittsburgh, 411 Seventh Ave., Pittsburgh, Pa. 15222.

Portland, Oregon

The World Almanac is sponsored in the Portland area by the Oregon Journal, 1320 SW Broadway, Portland, Ore. 97201; telephone (503) 222-5511; founded April, 1902; circulation 141,242; publisher, Wm. W. Knight; editor, Arden X. Pangborn; executive news editor, Harry Leeding; editorial page editor, Donald J. Sterling, Jr.

Portland, Oregon's largest city, covers 80 sq. mi. at the junction of the Columbia and Willamette rivers in the northwest portion of the state. It was chartered in 1851 with a population of 821 and was named for Portland, Me., rather than for Boston, Mass., when two of its early citizens from those two New England cities flipped a penny to decide its name. Today's population is an estimated 385,500.

An important seaport, Portland grew as a commercial and industrial center of Oregon because of its strategic location, draining much of the Pacific Northwest's agricultural and forestry output down the Willamette and Columbia river valleys. Much of Oregon's produce in the mid-19th Century was shipped south by water from Portland to feed gold miners who rushed to California after 1849.

The Greater Portland Metropolitan area has an estimated 933,159 population.

Agricultural products and shipping were the city's original economic base, developing later to forest products processing and shipping. Today metal working, mostly aluminum, has become Portland area's biggest resource, plus some steel work, clothing, paper, electronics. It ranks first as manufacturer of huge, specialized equipment for the logging-lumbering industry. The city's economic base is varied and broad. It is the home of Georgia-Pacific Corporation (forest products, lumber, paper); Crown Zellerbach (forest products, paper); Tektronix and Electronics Specialty companies (sophisticated electronics testing equipment); Omak Industries (chain saws); Hyster Corporation (lifts, hoisting equipment, lumber handling devices); and White Stag, Jantzen and Pendleton (sports clothes).

Total retail sales for Greater Portland area (1967) were set at \$1,595,773,000 and for the state of Oregon at \$3,394,525,000.

Portland is served by 5 railroads, 10 airlines and two major bus lines. Since World War II it has become increasingly a warehousing center, and is served by many major truck lines.

Mild year-around weather makes Portland a pleasant living place, also makes it a rose-growing center and site of the annual June "Rose Festival," 50-yr.-old pageant parade, and rose show.

Among its famous buildings is the Pittock Mansion, elaborate turn-of-century home which has become a unit of the Portland Public Parks system.

Portland's zoo has gained fame in past years as "outstanding producer of baby elephants in the Western Hemisphere" with herd sire Thonglaw having produced six offspring. The city has an outstanding public parks system, headed by Washington Park which houses International Rose Test Garden and outdoor summer theater; and which is adjacent to the Portland Zoo and the Oregon Museum of Science and Industry; and by Hoyt Arboretum, largest forested area inside a U. S. city's limits.

Memorial Coliseum is the home of the Portland Buckaroos, of the Western Hockey League. The city floated a bond issue for purchase of Multnomah Stadium and has renamed it Portland Civic Stadium, home of the Portland Beavers in the Pacific Coast Baseball League.

In or on the fringes of the city are Portland State College, University of Portland, Lewis & Clark College, Reed College, Marylhurst College, Multnomah College, Cascade College, and Concordia College.

Specialized information may be obtained from the Portland Development Commission, City Hall, Portland, and the Portland Chamber of Commerce, 824 SW 5th Ave., Portland.

Regina, Canada

The World Almanac is sponsored in southern Saskatchewan by The Leader-Post, 1964 Park St., Regina, Sask.; telephone (306) 527-8511; founded 1885 by Nicholas Flood Davin; circulation, 64,911; president, Michael Sifton, Toronto; executive vice president, William Thomson; editor, Thomas Melville; managing editor, C. E. W. Bell; advertising manager, William Duffus; awards: MacLaren Trophy for editorial page excellence of reproduction; 4 awards by Canadian Circulation Managers' Assn., for newspaper sales promotion and carrier training; sponsors a variety of fund-raising campaigns for worthy causes.

Founded on the site of a pile of buffalo bones, Regina, Saskatchewan's capital, has overcome a lack of natural advantages to grow into a beautifully-treed urban community known as the Queen City of the Plains.

The community was founded in 1882 when the Canadian Government and Canadian Pacific Railway chose the site for the capital of the Northwest Territories. Indians had piled the bones of countless slaughtered buffalo on the banks of a creek in the vicinity. The settlement was called variously Pile O'Bones, Manybones, and Bone Creek. Later it became Wascana, a corruption of the Cree Indian word "oskana," meaning bones. The more dignified name of Regina was chosen by Princess Louise in honor of her mother, Queen Victoria. Incorporated as a city in 1903, Regina was named provincial capital two years later when Saskatchewan was formed.

Regina has survived cyclone, riot, drought and depression to become a prosperous city of some 140,000, riding a boom that has more than doubled the value of its taxable property—from \$75,000,000 to \$190,000,000—in the past 10 years. Regina is one of Western Canada's leading industrial centers. It is the service center for a prolific oil and grain producing area, and its industries include meat packing, steel, pipe, oil refining, paper box, paint manufacturing, cement and fertilizer, agricultural machinery and an industrial gas plant.

The rapid development of potash mining in the province has had a tremendous economic effect on Regina, where much of the activity is centered.

It was in Regina, in the depths of the depression in 1933, that the Co-operative

Commonwealth Federation (CCF) was founded. The CCF formed the Saskatchewan Provincial Government in 1944, first Socialist government in North America, which remained in power for 20 years.

The head office of the Saskatchewan Wheat Pool is located in the city. Founded in 1924 because of farmer resentment of the railway and elevator monopoly, it is world's largest primary grain-handling organization with over 100,000 members.

Regina's modern steel and concrete high-rise buildings contrast with the portable wooden buildings shipped here in 1882 to accommodate the new headquarters of the North West Mounted Police. The city remains Western headquarters of the NWMP's successors, the Royal Canadian Mounted Police, and the Mounties' museum and chapel are tourist musts.

The impressive Saskatchewan Legislative Building stands on the south bank of Wanasca Lake. The lake is the focal point of a 100-yr. project called Wanasca Centre. The plan, financed by the province, city and University of Saskatchewan, is a multimillion-dollar development of public buildings, parks and recreation areas on a 1,600-acre site in the heart of the city.

Points of interest in Regina include the Natural History Museum, the Norman MacKenzie Art Gallery, and the 13-story Saskatchewan Power Building, an award-winning \$10,000,000 S-shaped structure.

Educational institutions include the Regina Campus of the University of Saskatchewan.

In Regina are the Saskatchewan Roughriders, who in 1966 won their first Grey Cup as national professional football champions.

Richmond, Virginia

The World Almanac is sponsored in the Richmond area by the Richmond Times-Dispatch and The Richmond News Leader, 333 East Grace St., Richmond, Va. 23213; telephone (703) 649-6000; Times-Dispatch founded 1850 by James A. Cowardin; circulation 148,413 daily, 200,389 Sunday; News Leader founded 1896 by Joseph Bryan; circulation 123,636; publisher, D. Tennant Bryan; president, Alan S. Donahoe; managing editor, Times-Dispatch, John E. Leard; managing editor, News Leader, Charles H. Hamilton; sponsor Christmas Mother Fund, editorial campaigns for traffic injustice; major awards include Pulitzer Prize editorials.

Richmond, a blend of the old and the new South, is on the James River 65 miles inland from the Chesapeake Bay.

In 1607, Captains John Smith, Christopher Newport and party explored the James River to the falls and there put a cross; the first settlement was in 1609.

The name was suggested by William Byrd II, who had frequently visited the English borough of the same name during his stay in London. In 1737 Byrd founded and Major William Mayo laid out the town, to be called Richmond because "its situation was like that of Richmond-on-the-Thames in England."

Richmond was incorporated as a town in 1742 and was made the Virginia capital in 1780. It was incorporated as a city in 1842 and was Confederate capital (1861-65).

The 1968 city population is 216,500 with 526,200 in the Standard Metropolitan Statistical Area that includes the counties of

Henrico, Chesterfield and Hanover.

Richmond has survived a terrible flood in 1771, burning by Benedict Arnold in 1781, and the evacuation fire of 1865 when stores of cotton and tobacco were burned to prevent their use by Federal troops.

With corporate land area of 39.9 square miles, the city has under way a court action to annex 50 square miles and 75,000 residents of the County of Chesterfield.

Completely separate and independent from any county, the city operates with a nine-member council-city manager form of government. Financial bond rating services accord Richmond bonds the highest possible rating, AAA, and citizen activity has twice won the All-America City Award.

A headquarters city, Richmond serves as a distribution center with almost 50% of the total employment in white collar jobs. Manufacturing accounts for one-fourth of all employment.

The labor force expands at the rate of 6,000 workers per year. Special training is offered and productivity is 27% higher than the average of 72 major industrial areas.

Richmond is on the shortest and most economical highway route between New York and Florida. It is served by 3 interstate routes, 6 U. S. highway routes, 9 state highway routes, 4 railroads, 4 commercial airlines, two commuter airlines, 5 inter-city bus lines and 50 fixed route motor truck lines.

The modern deepwater terminal and navigable James River with 25-foot channel help make Richmond a trade center of the South Atlantic with 860 wholesale distributors and more than \$1.9 billion in annual sales. Nine institutions of higher learning offer education in the arts, business, science, medicine, law, humanities and theology.

"Tobacco Capital of the World," Richmond produces enough cigarettes each year to encircle the earth 200 times. The Richmond area has the largest nylon plant in the world and is a center for packaging with aluminum, cellophane and paper products. The city is one of the major financial centers in the United States.

The Richmond Braves play at Parker Field and represent Richmond in the (AAA) International League.

One of the nation's most interesting cities, Richmond has a bus tour sponsored by Richmond Jaycees that shows such points as St. John's Church, where Patrick Henry delivered his immortal "Give me liberty or give me death" speech; the Virginia Capitol designed by Thomas Jefferson, meeting place for the Virginia General Assembly, the oldest legislative body in the western hemisphere; Hollywood Cemetery with the graves of 18,000 Confederate soldiers, Confederate President Jefferson Davis, Gen. J. E. B. Stuart, and U. S. Presidents Tyler and Monroe.

The Lee House, Confederate Museum, John Marshall House, Valentine Museum, Poe Museum, Battle Abbey and Virginia Museum of Fine Arts are attractions.

Preserving the splendor of old Richmond is Monument Ave. with its monuments of Gen. J. E. B. Stuart, Gen. Robert E. Lee, Jefferson Davis, Gen. Thomas J. "Stonewall" Jackson and Commodore Matthew Fontaine Maury.

Richmond has under construction a \$23,000,000 coliseum-convention center seating 12,000, a new 17-story City Hall costing \$17,000,000, and a 13-mile system of new expressways costing \$95,000,000 to serve the heart of the city.

Additional information available from the Richmond Chamber of Commerce, 616 East Franklin St., Richmond, Va. 23219.

Rochester, New York

The World Almanac is sponsored in the Rochester area by the Democrat & Chronicle and the Times-Union, 55 Exchange St., Rochester, N. Y. 14614; telephones, Democrat & Chronicle (716) 232-5300; Times-Union (716) 232-7100; Democrat & Chronicle founded as Morning Advertiser 1833 by Sidney Smith, Times-Union founded as Advertiser 1826 by Henry C. Sleight; circulation Democrat & Chronicle 142,794 (morning), 218,586 (Sunday), Times-Union 143,855 (evening); publisher, Paul Miller, president, Gannett Co., Inc.; general manager, Allen H. Neuhauf; director of operations, Duane R. Jacobs; director of sales, Al F. Mahar; director of news, John Quinn; director of public service, Vince Spezzano; both papers shared in 1964 Pulitzer Prize awarded to Gannett Newspapers; public service projects include Lend-A-Hand Fund, Newspaper-In-The-Classroom, Harvest Queen.

Rochester, third largest city in New York State, is a world leader in the manufacture of precision goods and a major eastern U. S. cultural center. Located on Lake Ontario, it leads the world in the manufacture of photographic film and cameras, optical goods, dental equipment, and thermometers.

Settled in 1789 by Ebenezer Allen, who built a grist mill in a swamp on the Genesee River shore, it was established as a village in 1812, incorporated as Rochester in 1817, and became Rochester in 1822.

The Erie Canal boom in the 1820s established Rochester as a trade center. It became a city in 1834 and its many flour mills gained it the nickname "Flour City."

Rochester had 301,829 people in 1965, and an estimated 298,500 in 1967. Estimated metropolitan area population in 1968 was 832,200. It is governed by a city manager and a 9-member council.

Largest employers are Eastman Kodak Co. (46,000), Xerox (12,000), and Bausch & Lomb (5,300); all were founded in Rochester and have headquarters there.

Estimated retail sales for the metropolitan area in 1967 were \$1.309 billion.

Rochester is served by 5 railroads and 3 airlines. Rochester-Monroe County Airport serviced 1,188,460 passengers in 1967, and was over the million mark in passengers serviced for the first time in history. There were 26,573 scheduled flights by commercial airlines, an increase of 2320 over 1966. The Port of Rochester docked 73 cargo-bearing ships, loading and unloading 65,016 tons.

Among major development programs are Xerox Square, a \$20,000,000 downtown project dominated by a 30-story tower;

Genesee Crossroads Redevelopment project, a joint civic and business project expected to cost \$70,000,000; and a \$39,000,000 Civic Center and Plaza, a \$70,000,000 Clinton Square redevelopment project, to be dominated by a 26-story \$11,000,000 Lincoln-Rochester Bank and a 21-story Marine Midland bank-office building.

Rochester is now known as the "Flower City," because of its outstanding public and private floral and horticultural attractions. Its mid-May "Lilac Festival" is a major international attraction. The Monroe County Parks system includes 14 parks in and around the city, including Seneca Park Zoo and the lilac gardens at Highland Park. Community War Memorial auditorium is home of Rochester Americans of the American Hockey League. The International (baseball) League Red Wings play at Red Wing Stadium.

Eastman Theater is part of the home of the Eastman School of Music of the U. of Rochester and home auditorium of the Rochester Philharmonic, Eastman Philharmonia, and Eastman Wind Ensemble. Memorial Art Gallery has one of the country's largest gallery memberships. Other museums include Rochester Museum of Arts and Sciences; George Eastman House of Photography, and Ward's Natural Science Establishment. Colleges include University of Rochester, Rochester Institute of Technology, Roberts Wesleyan, Nazareth and St. John Fisher Colleges; State U. College at Brockport; Colgate Rochester Divinity School; Monroe Community College.

Information about Rochester is available from the Chamber of Commerce, 55 St. Paul St., Rochester, N. Y. 14604.

Sacramento, California

The World Almanac is sponsored in the Sacramento area by The Sacramento Bee, 21st & Q. Sacramento, Calif. 95816; telephone (916) 442-5011. The Bee was founded Feb. 3, 1857, and developed into the Capitol City's leading newspaper under the direction of its pioneer editor, James McClatchy, and, later under his son, C. K. McClatchy. They served the Pulitzer Prize-winning Bee for almost 80 years. Daily circulation is 175,000; Sunday circulation, 203,000. Eleanor McClatchy is president of McClatchy Newspapers, which include The Modesto Bee and The Fresno Bee.

Sacramento, capital of California, is located in the Sacramento Valley, 85 mi. northeast of San Francisco and 385 mi. north of Los Angeles. It is the 13th fastest growing metropolitan area in the U. S.

The City of Sacramento, has an estimated population of 275,000 and covers 93 sq. mi. It is the seat of Sacramento County, estimated population 630,000, area 997 sq. mi. Sacramento also is the heart of a 19-county market area which includes the Sacramento Valley and the surrounding mountain counties. Within this large area are over 50 cities and towns with populations of 1,000 or more. The area possesses much natural wealth: lumber, minerals, petroleum and water, and is blessed with a mild climate and fertile land. Retail sales for the 19-county market exceed \$2.077 billion annually.

Sacramento grew out of the founding by John Augustus Sutter of his famous fort near the confluence of the Sacramento and American Rivers in 1839. His adobe fort was civilization's lone outpost in the California interior. On Jan. 24, 1848, James Wilson Marshall discovered gold at Sutter's mill on the American River in Coloma, 35 mi. northeast of Sacramento.

In a short time Sacramento, gateway to the Mother Lode country, became the goal of a great migration. Approximately 100,000 gold seekers came to California by wagon-train and ship, most of them headed for Sacramento and Stockton.

Early Sacramento also saw the Pony Express and the Central Pacific Railroad which crossed the Sierra Nevada.

Leaves built during this early period helped development of one of the world's most productive agricultural areas. There now are more than 15,500 farms in the 19-county area, producing 2,000 different crops annually worth over \$462,000,000.

Water for irrigation and industry comes from the Sierra country where California's \$1.75 billion Feather River water project and system of dams assures a year-round water supply. The Oroville Dam is the key unit in the project.

There are 367 manufacturing plants in Sacramento. Included are such names as Campbell Soup, Procter and Gamble, Libby, McNeil and Libby, California Almond Growers Exchange, Aerojet-General and McDonnell Douglas Astronautics.

The state employs over 26,000 in the Sacramento area and McClellan Air Force Base has 20,000 civilian employees.

Transportation and distribution facilities are highlighted by the new \$55,000,000 Port of Sacramento which provides a deep water channel to the Pacific. Interstate and other major highways intersect within Sacramento city limits. Sacramento has a new, jet age Metropolitan Airport, a Municipal Airport and 14 smaller airfields. The city is served by the transcontinental lines of the Southern Pacific and Western Pacific railroads. It also has the freight facilities of the Central California Traction Co. and the Sacramento Northern.

Sacramento has a city manager form of government. The manager is selected by the City Council. The Councilmen are elected by the city at large for two-year terms.

Sacramento County has 12 general hospitals with a bed capacity of 1,907. There are two junior colleges, Sacramento State College and the University of Pacific's McGeorge Law School. Nearby at Davis is the University of California with an enrollment of nearly 10,000.

Twelve publicly-sponsored cultural organizations provide theatrical, ballet, symphony and art gallery programs. Recreational facilities include 95 public parks, a zoo, 74 playgrounds, 44 theaters, 6 18-hole and 6 9-hole public golf courses and 4 private golf clubs. Fishing, swimming, boating and camping facilities are found along the American and Sacramento Rivers. Nearby are the High Sierras with lake and stream fishing, hunting, boating and some of the nation's best skiing.

Historical points of interest include the State Capitol, John Sutter's Fort, Gov. Leland Stanford home, Pony Express Terminal, Crocker Art Gallery and the Governor's Mansion.

St. Louis, Missouri

The World Almanac is sponsored in the St. Louis area by the St. Louis Post-Dispatch, 1133 Franklin Ave., St. Louis, Mo. 63101; telephone (314) MA 1-1111; founded Dec. 12, 1878, by Joseph Pulitzer; circulation 387,180 daily, 610,016 Sunday; editor and publisher, Joseph Pulitzer, Jr.; managing editor, Arthur R. Bertelson; general manager, Charles J. Hentschell; business manager, Alex T. Primm; director of public affairs and promotion, Frank Leeming; major awards include 5 Pulitzer Prizes to newspaper, 9 to staff members; community projects include high school scholar-athlete program, straight A baseball tickets, science fair and Silver Skates.

St. Louis, Mo., "Gateway to the West," is crowned at its downtown riverfront by the 630-foot-high Gateway Arch, a stainless steel, catenary arch designed by Eero Saarinen. The nation's tallest monument, it stands in an 85-acre park that once was filled with riverfront warehouses. It commemorates Jefferson's Louisiana Purchase, the westward expansion of America and the role of St. Louis as the gateway city for vast numbers of settlers who left the Mississippi River there and headed west. The arch has capsule cars for rides to the top; the park and underground museum are not yet finished.

The Arch stands near the place chosen

by Pierre Laclède Liguette, French fur trader, in 1763 as an ideal spot for a camp and village. The landing he chose was about 14 miles down the Mississippi from the mouth of the Missouri river. In 1764 Laclède sent his lieutenant, Auguste Chouteau, back to establish the post. Laclède named it St. Louis after Louis XV. St. Louis was governed by a succession of Spanish viceroys until 1804 and later was selected as a settlement center by generations of Germans; it attained early distinction as an American melting pot.

In 1876 the proud city fathers declared St. Louis a "free" city and legally separated it from St. Louis County. At the

time that was thought to be an advance in municipal government, but the strictly set boundaries have become a straitjacket, the city has been boundary-bound to 65 square miles, locked in by the Mississippi on the east and unable to expand west.

The city proper has declined in population to an estimated 693,000, the county has grown to 942,000 in 95 municipalities, the metropolitan area to an estimated 2,395,000. Negroes make up a third of the population of the city proper.

St. Louis is experiencing a renaissance. The spectacular World's Fair of 1904 gave impetus to growth that filled the city's boundaries; there was a surge of pride when Lindbergh flew the Atlantic in the "Spirit of St. Louis" in 1927, but by 1950 it seemed that the city had become a dowager and had gone to sleep. The Post-Dispatch ran a series of articles pointing out what had happened under the title, "Progress or Decay? St. Louis Must Choose." Businessmen and city government got together to shake the city awake.

Today, near the soaring Arch, the new 50,000-seat, \$24,000,000 Busch Memorial Stadium provides a beautiful home for professional baseball, football and soccer; Mansion House Center, with apartment towers and business buildings, is a modern riverfront residence; new office buildings, motels and apartments stand where blight had spread. The Mississippi was spanned anew in 1967 by a \$30,000,000 bridge downtown to connect interstate highways and trafficways to be completed by 1970.

Major industrial and commercial projects under construction, awarded or planned totaled \$2.700 billion in 1967 for the metropolitan area. Still, while gleaming new buildings went up at some places, blight, decay and population loss attacked others. Although urban renewal has been extensive, vast areas remain to be rebuilt.

In the steamboat era, St. Louis grew into a city as a riverboat port. The Mississippi below St. Louis is the most heavily traveled river in the world and St. Louis remains the busiest port on the river except for the deep-water ports of New Orleans and Baton Rouge. St. Louis harbor cargo runs 9,500,000 tons a year.

St. Louis is second only to Detroit in automobile assembly. It is the home of the McDonnell Douglas Corp., aerospace manufacturers, who did pioneering work in space travel in making space capsules for the Mercury and Gemini projects. Lambert-St. Louis Field is served by 8 airlines with more than 400 jet flights to and from St. Louis each day. In 1967 more than 2,225,000 passengers arrived by

air and a slightly smaller number departed. St. Louis is served by 16 trunk line railroads and 5 switching roads and there were more than 1,000,000 revenue car switchings by the terminal railroad in 1967. St. Louis is recognized as the second largest trucking center in the nation. More than 200 common carriers provide service to the U. S. and Canada. The city is served by 16 bus lines.

"First in shoes and first in booze" was an old St. Louis slogan. It has the headquarters of the two largest shoe manufacturers, Interco, Inc., and Brown Shoe Co., the biggest brewery, Anheuser-Busch, and a large competitor, Falstaff Brewing Corp. Monsanto Co., among the largest American industrial corporations, has headquarters and plants in St. Louis. The food industry is represented by Ralston-Purina Co. and Pet, Inc. Peabody Coal Co. is a leader and Granite City Steel Co. is a major producer. Emerson Electric Co. represents the electrical field. Retail sales for the year ended Apr. 30, 1968, were estimated at \$3,976 billion.

St. Louis has wide manufacturing capabilities with firms operating in 431 of the standard industrial classifications. It is at the heart of the only such area in the country producing 6 basic metals: iron, lead, zinc, copper, magnesium and aluminum. It is the metropolitan area closest to the center of U. S. population.

The new downtown stadium and an excellent new planetarium in Forest Park have added to public attractions such as the Zoo, Missouri Botanical Gardens, City Art Museum and Symphony. The Spanish Pavilion from the New York World's Fair is being constructed downtown. Architectural attractions include the Eads Bridge, Old Courthouse and Old Cathedral on the riverfront, the Victorian Union Station, Old Post Office, Gen. Grant's cabin, Gen. Sherman's home and several restored historic houses. Professional sports teams are the 1967 World Champion St. Louis Cardinals of the National League, the Cardinals of the National Football League, Stars of the National Professional Soccer League, Blues of the National Hockey League.

Both Washington University and St. Louis University are engaged in building campaigns and a new campus of the University of Missouri has grown to more than 7,000 students in 5 years.

Specialized information may be obtained from the Chamber of Commerce of Metropolitan St. Louis, 224 North Broadway, or the Regional Industrial Development Corp., 7701 Forsyth Blvd.

St. Paul, Minnesota

The World Almanac is sponsored in the St. Paul area by the St. Paul Dispatch and Pioneer Press, 55 E. 4th St., St. Paul, Minn. 55101; telephone (612) 222-5011; Dispatch founded 1868, Pioneer Press founded as Minnesota Pioneer 1849 by James Goodhue; circulation, Pioneer Press 104,088 (morning), 220,896 (Sunday), Dispatch 130,535 (evening); Bernard H. Ridder, chairman of the board; Bernard H. Ridder, Jr., president and publisher; Fred S. Heaberlin, executive editor; William G. Sumner, editor.

St. Paul is the capital city of Minnesota. It has an estimated (1967) population of 317,287 and is the second largest city in Minnesota, exceeded only by Minneapolis. St. Paul and Minneapolis are Minnesota's Twin Cities. They and their suburbs form a metropolitan area of nearly 2,000,000 people.

St. Paul is located on hilly banks of the Mississippi River in eastern Minnesota. It is close to vacation areas of both Minnesota and Wisconsin and is noted as a manufacturing, transportation, retail and education center.

The site of the city was Sioux (Dakota) Indian country when Father Louis Hen-

nepin, Catholic missionary and explorer, visited it in 1680. Land near the confluence of the Minnesota and Mississippi Rivers, just southwest of the present city, was acquired for the U. S. in 1805. Fort Snelling was built there and after many years of service is now a Minnesota State Park. The old fort is being reconstructed.

St. Paul's first settler (1838) was a trader, Pierre Parrant, nicknamed "Pig's Eye." Parrant was one of the Fort Snelling squatters who in 1840 were removed from the military reservation and settled in what is now the heart of St. Paul. In 1841 Father Lucian Galtier, missionary at St. Peter's (Mendota) on the south side

of the river, built a chapel to serve the squatter community. He dedicated it to St. Paul and soon the settlement became known as St. Paul or St. Paul's rather than Pig's Eye. St. Paul was incorporated as a town in 1849 and as a city in 1854.

The first steamboat reached Fort Snelling in 1823 and St. Paul became the upstream terminus of regular shipping in 1847. The city remains a major river port, served by 7 barge lines. In 1967, receipts and shipments at the Port of St. Paul totaled 5,039,178 tons.

In the latter 1800s, St. Paul prospered as a rail and lumber center. It continues as the headquarters of the Great Northern Railway and the Northern Pacific Railway. The city is served by 62 railroads, including eight Class I lines.

More than 4,000,000 passengers were handled by 7 airlines at St. Paul-Minneapolis International Airport in 1967. There were 270,911 flight arrivals and departures. St. Paul Downtown Airport (Holman Field), which caters to business uses, saw 177,666 arrivals and departures. International Airport is home base for two major airlines, Northwest Orient and North Central.

There are three interstate bus lines and four transit lines operating in St. Paul, and the city forms the nation's third largest trucking center.

The Twin Cities area is now the fourth largest electronics center in the nation. St. Paul is fourth largest in publishing and printing, fifth in the production of cosmetics in the nation and the largest producer of refined petroleum products in the Midwest.

In 1888 St. Paul Union Stockyards were founded and now are second only to Omaha in the U. S., with a 1967 volume of 4,897,180 head of livestock.

Higher education facilities in St. Paul include the University of Minnesota Institute of Agriculture, Hamline University, Bethel College and Seminary, College of St. Thomas, College of St. Catherine, Concordia College, Macalester College, William Mitchell College of Law, Luther Theological Seminary, Northwestern Luther Theological Seminary, St. Paul Bible College, St. Paul Seminary and United Theological Seminary of the Twin Cities.

Attractions include the St. Paul Winter Carnival; the Minnesota State Fair, billed as the nation's largest; Como Park Zoo and Conservatory; the onyx statue of the Indian God of Peace by sculptor Carl Milles in the City Hall and Court House Building, the State Capitol, the St. Paul Arts and Science Center and the Minnesota Historical Society museums.

St. Paul is undergoing a vast downtown redevelopment program including a 12-block Capital Centre project that will feature year-round, temperature-controlled elevated sidewalks connecting new and existing buildings. About \$90,000,000 in urban renewal land clearance and redevelopment is now underway.

St. Paul in 1967 issued \$41,318,000 in non-residential and \$11,026,000 in residential building permits. Its retail sales totalled \$580,833,000.

The city has a commission-mayor form of government and also is the seat of Ramsey County government.

In suburban Bloomington are the American League Minnesota Twins baseball team, the National Football League's Minnesota Vikings, and the National Hockey League's Minnesota North Stars.

Specialized information is available from the Chamber of Commerce, Osborn Building, St. Paul, Minn. 55101.

St. Petersburg, Florida

The World Almanac is sponsored in the St. Petersburg area by The St. Petersburg Times and Evening Independent, 490 First Avenue South, St. Petersburg, Fla. 33731; telephone (813) 894-1111; The Times founded 1884, The Independent 1906; circulation Times, morning, 151,615 daily, 166,711 Sunday; Independent, evening, 25,163 daily; papers produced by The Times Publishing Co., Nelson Poynter, editor and president; Donald K. Baldwin, executive editor; John B. Lake, general manager; major awards include Pulitzer Gold Medal for public service, National Headliners Award, University of Missouri Award; sponsors Most Valuable Legislators awards for Florida legislature, science fair, spelling bee, boat show, Christmas parade.

The story of St. Petersburg begins with the Caloosa Indians who lived hundreds of years on the rich game in the forest and succulent fish from the waters of the Gulf of Mexico. These first Floridians greeted Hernando De Soto and Ponce De Leon when they sailed on their historic voyages early in the 16th century.

It was not until 1835 that Dr. Odet Philippe, former surgeon in the armies of Napoleon, sailed into Old Tampa Bay and became the first permanent white settler. Hardy pioneers followed to conquer a wilderness and create one of America's leading resort areas.

St. Petersburg covers 58 square miles on the southern tip of Pinellas county, a peninsula separating the Gulf of Mexico and Tampa Bay, half way up Florida's west coast. Incorporated in 1892, the city now has a population estimated at 216,000, while Pinellas County's population has grown to 452,000.

The American Medical Association Journal in 1885 described the St. Petersburg area as the world's healthiest place to live because of its climate. The delightful year-round climate, coupled with tropic beauty, soon established St. Petersburg as a tourist mecca.

The Evening Independent's offer of a free paper on days when the sun fails to

shine—paid off on an average of 4 times a year since 1910—helped establish St. Petersburg as the Sunshine City.

Today, nearly 2,300,000 visitors come to St. Petersburg and Pinellas County each year, spending \$600,000,000 to swim, fish, sail, ski and enjoy the attractions for which the area is famous.

St. Petersburg experienced rapid growth during the land boom of the 1920s when Gandy Bridge was built, linking peninsula Pinellas with the Florida mainland. Another expansion followed World War II, when thousands of servicemen who had trained in the area returned to make it their permanent home.

Space industry came to Pinellas County in the 1950s, bringing with it thousands of young engineers and technicians and their families. Honeywell, General Electric, Sperry Rand and Electronics Communications Inc. are among firms providing a stable, smokeless, industrial economy.

Effective buying income in the Pinellas metropolitan area in 1967 was estimated at \$1.1 billion, second only to Miami-Dade County in Florida. Retail sales were set at \$815,000,000, fourth highest in Florida.

Since 1950, bank deposits in Pinellas have risen from nearly \$150,000,000 to over \$810,000,000. Savings and loan deposits are up from \$50,000,000 to \$700,000,000.

More than 88,000 students attend school in the St. Petersburg metropolitan area, including St. Petersburg Junior College, Florida Presbyterian College, Bay Campus of the University of South Florida and Stetson University College of Law.

Among recent major city projects are the \$5,000,000 Bayfront Center auditorium and arena, \$1,000,000 art museum, \$1,000,000 library, \$5,000,000 Federal building, \$1,000,000 municipal marina and development of recreation facilities along the downtown waterfront.

St. Petersburg is operated under a council-manager form of government.

It is a city of more than 230 churches, third in the nation in per capita church attendance for major metropolitan areas.

During February and March, the St.

Louis Cardinals and New York Mets hold spring training at Al Lang Field, playing against other major league teams.

In the immediate area are greyhound racing, horse racing and jai alai, in addition to excellent golf, tennis, bowling, shuffleboard and water sports facilities.

St. Petersburg's downtown Albert Whitted Airport provides services for private planes, while commercial air transportation is available at nearby Tampa International Airport. The city also is served by Seaboard Coastline Railroad and Greyhound and Trailway Bus Lines.

Detailed information can be obtained from The St. Petersburg Times Public Service Department and the Greater St. Petersburg Chamber of Commerce.

Salt Lake City, Utah

The World Almanac is sponsored in the Salt Lake City area by the Salt Lake Tribune, 143 S. Main St., Salt Lake City, Utah 84110; telephone (801) 524-4545; founded Apr. 15, 1871; circulation 110,146 daily, 190,790 Sunday; publisher, John W. Gallivan; executive editor, Arthur C. Deck; editorial page editor, Theodore W. Long; major awards received included 1957 Pulitzer Prize; civic projects include statewide civic beautification awards, Sub for Santa program, Community Christmas Tree.

Salt Lake City, capital of Utah and largest city in the state, with an estimated 1968 population of 210,000, is best known for being headquarters of the Church of Jesus Christ of Latter-day Saints (Mormon). Founded July 24, 1847, by Brigham Young and a contingent of pioneers, the settlement first was known as Great Salt Lake City, a name which continued for many decades.

Nestled between the Wasatch and Oquirrh mountains, Salt Lake City was the parent colony of nearly all early Western communities. From it were sent emigrant parties to all parts of Utah and to areas that were to become Idaho, Nevada, Wyoming, Arizona, New Mexico, Colorado, California, Mexico and Canada. Because of its location the city became the crossroads of Western travel and today is the geographical center of the 11 Western states. It is the mining, smelting and refining center of the West, and is the only city of metropolitan proportions between Denver and the Pacific Coast.

Situated near the southeast shore of the Great Salt Lake at an elevation of 4,327.27 feet (measured at the Mormon Temple Block, natural center of the community), Salt Lake City's most famous landmarks are the LDS Temple and Tabernacle. Other well-known buildings and places of interest include Brigham Young's Lion House and Beehive House, the Eagle Gate, and Kennecott Copper Corp.'s Bingham

Mine—the world's first open pit copper mine and the world's largest man-made excavation—on the western outskirts.

Operating under a mayor-city commission form of government, Salt Lake City is completing a \$17,000,000, 14,000 seat civic auditorium complex (Salt Palace). Grand opening is scheduled for April, 1969.

Salt Lake City is served by 4 air lines (in July, 1968, it seemed certain at least two others would receive CAB certification), and two railroads. During 1967 853,368 passengers deplaned and 852,905 enplaned at the Salt Lake City's International Airport. The city is a hub of the central Transcontinental Highway System, and is served by all of the major Western truck lines, plus bus lines operating in all directions.

Home of the world-famed Mormon Tabernacle Choir, it also is headquarters for the National Woolgrowers Assn., site of the 1967 World Championship Judo matches and was U. S. representative in bidding for the 1972 Winter Olympics.

The University of Utah and Westminster College are in the city.

Major employers are Hill Air Force Base 30 miles to the north, local defense industries and Kennecott Copper Corp.

Additional information is available from the Salt Lake Chamber of Commerce, 146 S. Main St., or the Utah Travel Council, Council Hall, Capitol Hill, Salt Lake City, Utah.

San Antonio, Texas

The World Almanac is sponsored in the San Antonio area by San Antonio Express and San Antonio News, Ave. E at Third St., San Antonio, Texas 78205; telephone (512) CA 5-7411; morning Express founded Sept. 27, 1865, evening News founded Sept. 4, 1918; circulation Express 83,212, News 64,117, Sundays 119,721; publisher, Conway C. Craig; president, Houston H. Harte; executive editor, Charles O. Kilpatrick; the Express and News have won many journalistic awards, being consistent leader in South Texas in this respect.

San Antonio, one of the most historic and colorful of America's cities, stands at a meeting place of plains and hills in South Central Texas, within easy reach of the Gulf Coast and the Mexican border.

The city's best-known landmark is the Alamo, a symbol of man's fight for freedom since its stalwart defense against overwhelming odds in 1836. Today the old mission-fortress occupies a place of honor downtown in the modern city which has grown up around it, further symbolizing the easy blend of old and new which is part of the city's character.

The modern city lives with other signs

of its past, notably the Missions San Jose, Concepcion, Capistrano and Espada. San Jose, called "Queen of Missions," is a National Historic Site.

The city's past has left it a rich heritage of diverse cultural influences. Founded in 1718 and made capital of the province of Texas, it was under Spanish rule until 1821, when revolt raised the flag of Mexico. In 1836, with battles at the Alamo and elsewhere, the Republic of Texas came into being, governing until Texas joined the union in 1845.

San Antonio in 1968 celebrated its 250th anniversary with the holding of Hemis-

Fair, a world's fair which built a glamorous spectacle of entertainment and education on a practical base of urban renewal.

The fair's benefits are expected to be felt for years to come, in intangible ways as well as in the permanent structures on the downtown fair site, including the city-built \$14,000,000 convention center complex, and the 622-foot Tower of the Americas with its revolving restaurant.

Now in a new surge of growth, the city has expanded from population of 408,442 in 1950, to 587,718 in 1960, to present estimates of over three-quarters of a million. Population is 51.2% Anglo-American, 41.4% Latin American and 7.1% Negro.

San Antonio, which has council-manager government, covers an area of 182.73 square miles in Bexar County.

For the period of 1950-1966, San Antonio Chamber of Commerce estimates that Bexar County has grown 60.6% in population, 109.6% in effective buying income, and 113.2% in retail sales.

Long a commercial and financial center for a large ranching and farming region, San Antonio serves a 50-county retail trade area with 1966 population of 2,344,700, and retail sales of \$2,829,085,000.

San Antonio's role as a military center is of prime economic importance. It is home of Kelly Air Force Base; of Brooks AFB, headquarters of the Air Force Aerospace Medical Division; of Lackland AFB and Randolph AFB with their training

programs; and of historic Fort Sam Houston, headquarters of the Fourth Army and site of Brooke Army Medical Center.

In addition to economic influence of military and other governmental employment, San Antonio has other significant sources of income in trade and service industries, in tourism, and in area livestock production and truck crops. The city also has diverse manufacturing.

Of growing importance are the city's position as a medical center, based on military and civilian hospitals and the new University of Texas Medical School, and its science-related activities in which the Air Force's famed School of Aerospace Medicine, the fast-growing Southwest Research Institute and the biomedical Southwest Foundation for Research and Education are prominent.

Six scheduled airlines, 3 trunk railroads and many truck lines serve San Antonio.

San Antonio has 4 colleges and universities and two junior colleges, museums, a notable symphony orchestra, a fine expressway system, a reputation for cleanliness and well-lighted streets, and a calendar of cultural and other events in which the week-long gaiety of the spring Fiesta San Antonio is a highlight.

Detailed information may be obtained from San Antonio Chamber of Commerce, P.O. Box 1628, San Antonio, Texas 78206.

San Diego, California

The World Almanac is sponsored in the San Diego area by The San Diego Union and Evening Tribune, 940 Third Ave., San Diego, Calif. 92112; telephone (714) 234-7111; Union founded 1868, Evening Tribune or predecessors 1881; circulation morning Union 137,014, Sunday Union 244,518, Evening Tribune 121,177; publisher, James S. Copley; president & general manager, Alex De Bakcsy; vice president, E. Robert Anderson; Evening Tribune editor, Eugene F. Williams; Union day managing editor Edward Thomas, night managing editor Fred Kinne.

San Diego, which observes the 200th anniversary of its founding in 1969, is the name of both a city and a county which are great not only in terms of area, population, industry and agriculture, but in human advantages as well. Sharing these are an estimated 680,500 residents of San Diego proper; the overall county population exceeds 1,314,000. City and county are among the nation's fastest growing areas; there are manager-type governments for both.

San Diego is the southwesternmost city in the U. S. The Pacific forms its western boundary, Mexico its southern. It has been under 4 flags since its discovery by Cabrillo in 1542 and its founding by Junipero Serra, a Franciscan missionary, almost 200 years ago in 1769—Spanish, Mexican, Californian, and U. S. Within San Diego city, besides much oceanfront, are two famous bays, San Diego and Mission. Alive with sailing and other craft, the latter is home of Sea World, a marine entertainment park. San Diego Bay, one of the world's fine natural harbors, is home of great Navy shore and fleet establishments, which with shipbuilding and research help create in San Diego a "Maritime Pacific" complex.

A famous civic asset is Balboa Park and its great Zoo, with the world's largest wild animal exhibit. Close proximity to Mexico is another San Diego tourist feature. Tourism's growth has been spectacular, the city possessing more hotel accommodations than all of Hawaii, as well as fine restaurants. A complete convention center is part of a theater-government-visitor community concourse.

Sunny skies and beneficent tempera-

tures, winter and summer, have been factors in San Diego's growth, as have Colorado River water resources, recruitment of "name" employers and the air transportation boom. San Diego has a fine freeway network, a new airport terminal and splendid sports facilities, including the 50,000-seat San Diego Stadium, soon to be a big league baseball park.

San Diego is an aerospace center—home of the Atlas missile—a leader in electronics and is staking its claim as an oceanography center. Industry location is assisted by Economic Development Corp. of San Diego County, 530 B St., San Diego 92101.

San Diego has collections of Old Masters, a noted Shakespeare Festival, and is scheduled to erect a repertory theater directed by the noted Michael Langham. Campuses include California Western University, a unit of United States International University, University of California at San Diego, San Diego State College, and the University of San Diego.

The city is a center for sportfishing and, uniquely, whale-watching. In winter whales parade close to the coast en route to Mexico's "lying-in" lagoons. Horse racing, at nearby Del Mar and in Caliente in Mexico, is a tourist attraction.

San Diego ranks among the top 20 counties in the U. S. in agricultural production, with 685,000 of 2,700,000 county acres in cultivation. Tomatoes, oranges, avocados and eggs are important revenue sources. Neighboring Imperial County is the nation's wealthy winter "hothouse" for fresh fruits and vegetables.

Taxable retail sales in 1967 were \$1.740 billion in San Diego county.

San Francisco-Oakland, California

The World Almanac is sponsored in the San Francisco-Oakland area by the San Francisco Examiner, P. O. Box 3100, Rincon Annex, San Francisco, Calif. 94103; telephone (415) 781-2424; founded June 12, 1865, purchased in 1880 by Sen. George Hearst, who turned it over in 1887 to his son William Randolph Hearst; circulation Daily Examiner 213,649, Sunday Examiner & Chronicle 680,486; publisher, Charles Gould; editor, Edmund J. Dooley; executive editor, Thomas Eastham; managing editor, Rene Cazenave; advertising director, Bob Ward; major awards include Pulitzer Prize, Freedoms Foundation Award; sponsors Golden Gloves, Bridal Forum, Bay to Breakers Race, Hearst Regatta.

San Francisco, chief port and financial center of the Pacific Coast, is centrally located on the California shoreline at the entrance to one of the world's finest land-locked harbors. Famed for its hills, the city covers 44.6 sq. mi. on the northern tip of a peninsula.

San Francisco Bay was discovered in 1769 by a Spanish scouting expedition headed by Sgt. Jose Ortega, and the Presidio and Mission Dolores, both within present city limits, were founded in 1776 by Col. Juan Bautista de Anza. The pueblo of Yerba Buena was established on the site in 1834, and was renamed San Francisco on Jan. 3, 1847. Its population was 800. When gold was discovered at Sutter's Mill on the American River in 1848, the area grew rapidly. The spreading tent settlement was established as a county and incorporated as a city in April, 1850. Gold production declined after 1855, but the fine port made San Francisco the main Pacific Coast point of entry, and maritime trade helped the bay region prosper.

Estimated population of San Francisco on July 1, 1968, was 747,500. The city is second only to Manhattan Island in population density. Its combined county-city government gives legislative powers to an elected 11-member board of supervisors. Certain officials, including the mayor, are elected; others are appointed by the mayor and have permanent tenure.

The city and the surrounding counties of Alameda, Contra Costa, Marin and San Mateo comprise the San Francisco-Oakland Metropolitan Area. San Francisco is the financial center of the west, home of the Pacific Coast Stock Exchange, many banks and savings and loan associations.

The Port of San Francisco handled 4,890,246 tons of cargo in 1967. Leading exports were dried fruit and fruit in airtight containers, non-electric machinery and appliances, and rice. Chief imports were green coffee, telecommunications apparatus, and nonmilitary road vehicles. Passenger liners make more than 100 calls at San Francisco each year.

Retail and wholesale trade account for the greatest number of jobs in the metropolitan San Francisco area, 282,700, and services are second, 275,000. Manufacturing employs 196,600, about 30% of the 5-county total, with food and kindred products; printing, publishing and allied arts,

and fabricated metal products as the leading industries. More than 65 industrial parks lie within a 50-mile radius of downtown San Francisco. The city has 8,577 retail establishments which reported taxable sales of \$1.27 billion in 1967.

San Francisco International Airport is served by 19 trunk and regional airlines. In fiscal 1967, it processed 12,723,811 passengers, ranking fourth in the nation. A total of 481,168,609 lbs. of cargo, and 217,791,000 lbs. of mail were also moved.

Three major transcontinental railroads and one regional railroad link San Francisco to all sections of the nation, Canada and Mexico. The transcontinental routes are connected to the San Francisco waterfront by rail ferry service.

A \$1 billion Bay Area Rapid Transit System is under construction, scheduled for completion in 1969-70 to serve San Francisco and Alameda and Contra Costa counties. An office building boom has changed the city's skyline rapidly.

San Francisco is famous for its cable cars and Fisherman's Wharf, and for such varied structures as the Ferry Building, the new \$45,000,000 Federal Office Building, the historic Fairmont, Mark Hopkins, and Sheraton-Palace hotels; the California Palace of the Legion of Honor, the newly renovated Palace of Fine Arts, and Grace Cathedral. The Cow Palace, home of political conventions, sports and livestock exhibitions, lies just across the boundary line in San Mateo County. The San Francisco Zoo and 1,013-acre Golden Gate Park, containing California Academy of Sciences, De Young Museum, lakes, deer and buffalo, are attractions.

Candlestick Park is the home of the San Francisco Giants, National Baseball League; Kezar Stadium, that of the San Francisco 49ers, National Football League. Other professional teams include the San Francisco Warriors of the National Basketball Assn., and the Golden Gate Gales of the United Soccer Assn.

The University of California maintains its medical school and extension classes in San Francisco, which is also known for San Francisco State College, the U. of San Francisco, City College of San Francisco, and San Francisco College for Women.

Detailed information may be obtained from the Greater San Francisco Chamber of Commerce, 420 Montgomery St., San Francisco, Calif. 94104.

Oakland, California

The city of Oakland covers 53.4 sq. mi. of land and 25.7 of water on the east side of San Francisco Bay in California. Linked to San Francisco by the 8¼-mile Bay Bridge, it is the county seat of Alameda County. The area was first explored in 1772, and was settled in 1850 when it attracted the overflow from the Gold Rush. Oakland was incorporated as a town in 1852 and as a city in 1864. Fifteen years later, the first westbound transcontinental train brought commerce and steady growth. Population in July, 1968, was estimated at 386,000. The city has a council-manager government.

For the county, manufacturing with 85,000 workers and services with 73,100 workers are the major areas of employment. Other important job fields are retail trade, 62,600; wholesale trade 22,800; transportation, communications and utilities, 33,200; finance, insurance and real estate 16,700; and construction 23,200. Processed foods and fabricated metal products, including passenger cars and trucks, head the manufacturing output for Alameda County. The city's retail sales in 1967 were \$822,531,000, the county's, \$1,868,374,000.

Three transcontinental railroads serve metropolitan Oakland and 245,945 carloads

of freight were moved in 1967. The Port of Oakland handled 831 ocean-going vessels in 1967 and moved 3,070,007 tons of cargo. Metropolitan Oakland International Airport is served by 7 leading trunk and regional airlines and is headquarters for 3 chartered lines.

Oakland has an urban renewal program affecting 70 of 100 square blocks in the downtown area. Older neighborhoods are undergoing massive redevelopment. Oakland operates a Manpower Training Act job-training center.

Lake Merritt, a 160-acre body of salt water, provides a park-like setting in the heart of Oakland. The new \$8,000,000 Oakland Museum and fabled Jack London square are major tourist attractions. Some 16,000 acres of East Bay Regional Parks offer nearby camping and recreation.

San Jose, California

The World Almanac is sponsored in the San Jose area by the San Jose Mercury and News, 750 Ridder Park Dr., San Jose, Calif. 95131; telephone (408) 289-5000; Mercury (California's second oldest daily newspaper) founded June 20, 1851, by J. C. Emerson. A. Jones, Jr., J. F. Damon, News founded July 23, 1883, by Hugh A. DeLacy; circulation morning Mercury 130,491, evening News 77,068, Sunday Mercury-News 192,230; publisher, Joseph B. Ridder; general manager, Anton F. Peterson; executive editor, Kenneth S. Conn; advertising director, Louis E. Heindel; new facility won Factory magazine's "Plants of the Year" award in 1968; since 1946 newspapers have won 44 first and 21 second place awards in national and state competition; co-sponsor International Invitational Swimming & Diving Championships.

San Jose is located in the Santa Clara Valley region of northern California at the southern end of San Francisco Bay. A city of 204,196 according to the 1960 Census, it has an estimated population of 412,700 as of Apr. 1, 1968. San Jose is the central city of one of the nation's 10 fastest growing metropolitan areas and the county seat of Santa Clara County. The county and official metropolitan area are coextensive and have a population presently estimated at 1,008,000.

San Jose can aptly be called California's "first city," as it lays claim to the following: 1st civilian settlement (November, 1777); 1st State Capitol (December, 1849) and home of its first governor; site of the first public school in California (1795) and first state institution of higher learning (San Jose State College, 1857); home of the first radio broadcasting station in America (1909). San Jose is the urban center of one of the largest aerospace industrial/research complexes.

Agriculture, which until the late 40's was the main "industry" in the area,

Saskatoon, Canada

The World Almanac is sponsored in the northern Saskatchewan area by the Saskatoon Star-Phoenix, 204 Fifth Ave. North, Saskatoon, Sask., Canada; telephone (306) 652-9200; founded 1902; circulation daily 51,480; publisher, Michael C. Sifton; general manager, Norman G. Paterson; editor, M. D. Macdonald.

About 85 years ago, temperance colonists camped on a high bank of the South Saskatchewan River in the center of the Canadian prairies. Their camp has grown into a city of 35 square miles, 123,000 people and 1,800 businesses. Its name, Saskatoon, is a derivative of a Cree Indian label for a berry found there.

It is the second fastest-growing city in Canada and the second largest city in a province of 251,700 square miles. Wide streets, spacious residential areas and 1,300 acres of parks add to its esthetic quality. Its university is internationally known in agricultural science, and its university hospital is the home of some of the most advanced medical work.

Saskatoon stands over the world's richest and largest known body of potash. Six mines will, by 1970, tap that bed.

In the best hard spring wheat area in the world, Saskatoon provides grain storage capacity for 6,000,000 bushels. The livelihood of many of the 425,000 people

Knowland State Arboretum and Park is the home of the Oakland Zoo. The recently completed \$25,500,000 multi-purpose Oakland Coliseum has a maximum capacity of over 50,000. Professional teams include the Oakland Raiders, American Football League; Oakland Oaks, American Basketball Assn.; California Seals, National Hockey League; and Oakland Clippers, National Professional Soccer League.

The University of California's Berkeley campus is only minutes from Oakland, and the city houses Mills College for Women, College of Holy Names, Peralta Junior College, and the California College of Arts and Crafts.

Detailed information may be obtained from the Oakland Chamber of Commerce, 1320 Webster St., Oakland, Calif. 94612.

remains a factor in the local economy. Industrial growth since World War II has made the metropolitan area the state's 2nd county in value of manufactures, 3rd in number of manufacturing employees. It has a council-manager government.

San Jose is served by two major railroads, over 60 interstate truck lines, Greyhound passenger and parcel terminals, United Airlines, Air West and major intra-state airlines. Numerous daily helicopter flights connect to interstate and overseas flights. Several extensive urban renewal projects are transforming the face of the city's core into the cultural, commercial and educational center of the region.

The metropolitan area, home of San Jose State College, Stanford University and the University of Santa Clara, is one of the West's major seats of learning and research. An estimated 77,500 students will attend these and other local institutions during the fall (1968) term.

The nearby city of Santa Clara boasts the famous Santa Clara Swim Club.

in the 70,000-square-mile trading area is based on agriculture. The 1,200 retail stores, 240 wholesalers and 344 manufacturing plants report an annual volume of \$452,000,000.

Unlimited power and water come from the fourth largest dam in the world, 70 miles from the city. Within or adjacent to Saskatoon are the head office of Intercontinental Packers (a meat-processing company), two chemical plants, a cement plant, machine and clothing manufacturers and several iron foundries.

Saskatoon is served by two railroads and 3 airlines, is a truck traffic hub, with 7 major highway approaches.

It features a museum containing machinery used by man since his earliest days in the West, and is the jumping-off point for some of the finest fishing and hunting in North America.

Additional information may be obtained from the Board of Trade, Bessborough Hotel, Saskatoon, Sask.

Seattle, Washington

The World Almanac is sponsored in the Seattle area by the Seattle Times, Fairview Ave. N. & John St., Seattle, Wash. 98109; telephone (206) MA 2-0300; founded 1896 by Alden J. Blethen; circulation 251,617 daily, 310,040 Sunday; publisher, John A. Blethen; president, W. J. Pennington; general manager, Harry H. Cahill; sponsors 4-yr. scholarship annually to journalism student, two seasonal sports contests for boys, girls' track and field event.

Seattle, settled in 1851, derives its name from an Indian chief, Sealth, who befriended the early settlers. Seattle was incorporated in 1865. By 1884 the residents had built a rail connection with the outside. In 1889, downtown Seattle burned but was rebuilt better than before.

The Gold Rush to Alaska in 1897 and 1898 gave Seattle, as the closest major port to Alaska, an impetus it never lost. Besides being an outfitter for Alaska, Seattle developed trade with the Orient, thereby gaining its name of "The American Gateway to Alaska and the Orient." Seattle is closer to Japan than any other major American city.

The estimated population (Apr. 1, 1968) was 587,000. Seattle's metropolitan area had 1,200,000. The city has only 91.6 sq. mi., on an isthmus between Puget Sound and Lake Washington. Seattle is noted for its mild climate and spectacular views of water and mountains. The city has a nonpartisan, mayor-council government.

Seattle is the home of the giant Boeing Co., world's largest producer of commercial jet passenger planes; more than 50% of the world's commercial jets were made by Boeing. Boeing employs almost 100,000 persons in the Seattle area.

Seattle also is noted for shipbuilding and forest-products industries, as a retail-trade and regional office center, for insurance headquarters and for tourism.

The city is served by 4 intercontinental railroads and 12 scheduled air lines, three of which began service June, 1967. The airlines served more than 3,800,000 passengers last year through the Seattle-Tacoma Internat'l Airport and Boeing Field.

The Seattle-Tacoma Airport is operated by the Port of Seattle, a \$126,000,000 public agency, which also operates 9 miles of port facilities and serves more than 55 ocean and coastal lines.

Seattle-King County is in midst of a capital-improvements-priority program called Forward Thrust, which will attempt to budget some \$1 billion of spending for the next 15 to 20 years. In Feb., 1968, voters approved seven of 12 proposed bond issues for a total expenditure of \$321,900,000 for major capital improvements, in-

cluding a \$40,000,000 domed multipurpose stadium. Other projects which failed to pass will be resubmitted in 1969.

The city has a \$40,000,000, 74-acre legacy from the 1962 Century 21 World's Fair known as the Seattle Center. The Center features a 3,100-seat Opera House, a 5,200-seat Arena, an 800-seat Playhouse, two huge exhibit halls, an 18,000-seat Coliseum, the world-famous 605-foot Space Needle and the Pacific Science Center in the U. S. Science Pavilion for the fair.

The Seattle Center buildings are used by the noted Seattle Symphony Orchestra directed by Milton Katims; the Seattle Opera Association; the Seattle Repertory, a professional theater; the Totems hockey team, and the Seattle SuperSonics pro basketball team of the National Basketball Ass'n.

Seattle has the Woodland Park Zoo and University of Washington Arboretum, a botanical laboratory featuring a Japanese tea house. Seafair, a citywide annual festival, is held in Aug., climaxed by unlimited hydroplane racing before crowds estimated up to 250,000 on Lake Washington.

In other sports, Seattle in 1968 had the Pacific Coast League Angels, baseball, but will begin play in 1969 in the American League with a new expansion franchise, the Pilots; the Rangers, Continental Football League; SuperSonics, National Basketball Ass'n; and Totems, Western Hockey League.

There are two major universities, University of Washington and Seattle University; Seattle Pacific College, and a number of community colleges.

Cultural institutions include Seattle Art Museum, Frye Art Museum, Henry Art Gallery, Burke Memorial Museum, Museum of History and Industry and Pacific Science Center.

Metropolitan Seattle department store sales totaled \$314,929,000 for April, 1967 through March, 1968, on revised basis; \$271,140,000 for 1966.

For specialized information, contact the Seattle Chamber of Commerce, the Seattle Area Industrial Council, or the Seattle Visitors Bureau, all of 215 Columbia St., or the Central Assn. of Seattle, Joseph Vance Building, Third Ave. and Union St.

Syracuse, New York

The World Almanac is sponsored in the Syracuse area by the Herald-Journal, 220 Herald Pl., Syracuse, N. Y. 13202; telephone (315) HA 2-0211; founded Jan. 15, 1877, by Arthur Jenkins; circulation 134,879 daily, 258,532 Sunday Herald-American/Post-Standard; publisher, Stephen Rogers; editor, William D. Cotter; business manager, Clarence H. Rinne; sponsors college scholarship fund for police, sponsors teacher at Newspaper in Classroom course, awards medals to fire and police heroes.

Syracuse, 4th largest city in New York State, is at the virtual geographic center of the state. The East-West Governor Thomas E. Dewey Thruway (Interstate Route 90) has 5 interchanges in the Syracuse area. The North-South Interstate Route 81 crosses the Thruway at Syracuse.

With an area of 25.82 sq. mi., Syracuse had an estimated 1968 population of 213,500. The city is in the heart of a Standard Metropolitan Statistical Area composed of Onondaga County (in which the city is located), Oswego and Madison Counties. Population of the area in 1968 was estimated at 628,000.

Historically, Syracuse always has been

a "crossroads," even before it became a city. The Iroquois Trail passed through the area from east to west, with tributary trails north and south. With the advent of the white man the trails became rough roads used for travel to the opening West.

The area first was explored in 1615 by the French under Samuel de Champlain. In 1654, Father Simon Le Moine, a Jesuit missionary, visited the area. It was then that large quantities of salt were discovered in the water in the area. This salt was to play an important part in the early development of Syracuse, and even today Syracuse is known as "The Salt City."

The first white settler was Ephraim

Webster, who established a trading post in 1786. In 1825 the village was incorporated and in 1847 Syracuse annexed the village of Salina to the north and was chartered as a city.

Although the salt industry gave Syracuse its early impetus, the city's growth over the years is attributed to its strategic location. With the opening of the Erie Canal in 1825—it ran through the heart of the city—Syracuse became a key water link between Buffalo and New York City.

After the canal came the railroads which gave Syracuse added stature as a transportation hub. And today, the crisscrossing super-highways have enhanced Syracuse's position in the transportation and service industries.

Syracuse has a mayor/common council form of government.

Major products of some 500 manufacturing plants in the Syracuse area are soda ash and by-products, candles, air conditioning, china and pottery, electrical goods, agricultural implements, quality shoes, auto accessories, special steel and pharmaceuticals. Largest employers are General Electric, Carrier Corp., Crucible Steel Co. and Crouse-Hinds Co.

Retail sales for the city for 1967 were estimated at \$369,000,000 and for Onondaga County at \$732,000,000.

Syracuse is served by two railroads, some 140 truck lines and 3 airlines. The Barge Canal system provides commercial

and recreational water transportation.

City-operated Hancock Airport handled 1,138,826 passengers in 1967, the first time it had gone over the million mark. Air traffic has doubled since 1961.

Recent improvements include a massive highway interchange that carries Interstate Route 81 non-stop through the city. Underway is a multi-million-dollar downtown Clinton Square Redevelopment Program to include a newspaper plant, department store, bank and other facilities. In partial operation is a new \$45,000,000 project carrying water 30 miles from Lake Ontario to Syracuse and Onondaga County.

The Everson Museum of Art boasts a new museum building, designed by I. M. Pei. Other attractions include an authentic restoration of a 17th Century French fort, the Salt Museum, Onondaga Historical Assn., Canal Museum, Burnet Park Zoo and the State Fairgrounds.

Syracuse is the home of Syracuse University, Le Moyne College, Maria Regina College, and Onondaga Community College. Sports arenas include War Memorial, Archbold Stadium, and MacArthur Stadium, home of the Syracuse Chiefs of the International League (baseball).

Specialized information is available from the Greater Syracuse Chamber of Commerce, One Mony Plaza, and Metropolitan Development Assn., State Tower Bldg., both Syracuse, N.Y. 13202.

Tampa, Florida

The World Almanac is sponsored in the Tampa Bay area by The Tampa Tribune and The Tampa Times, 507 E. Kennedy Blvd., Tampa, Fla. 33601, telephone (813) 229-7777; Times founded in 1893 by S. A. Smith, Tribune in 1895 by W. F. Stovall; combined circulation 205,201; Alan S. Donnahoe, president; J. C. Council, chairman of editorial board; R. F. Pittman, Jr., business manager; major awards: National Sigma Delta Chi awards, Broun Award, Green Eyesshade Award; sponsors Florida State Science Fair, Book Fair, Times honor student scholarships, all-city (AAU) Basketball Tournament.

Industrial and commercial hub of Florida, Tampa is located on Tampa Bay about midway between the north edge of the Gulf of Mexico and the tip of the Florida peninsula.

Third most populous city in Florida, 316,673, Tampa is the principal marketing center of a population area estimated at 907,000.

Gasparilla, in early February, features the pirate invasion of the old port city. Jose Gaspar's buccaniers seize the streets in an atmosphere of carnival. The event is coordinated with the Florida State Fair and a series of other events designed for the entertainment of residents and tourists.

Ybor City, Tampa's quaint Latin Quarter, is a site of historical interest and the location of some of the nation's leading Spanish restaurants.

Tampa's history dates back to 1545 when a Spanish caravel, in the gold trade, was shipwrecked in the bay.

Survivors told of the broad bay and safe anchorage they had almost found before their ship was lost. In subsequent years there were a number of attempts made to establish a permanent settlement, but Spain's retreat from empire left the area open for Anglo-Saxon settlement. During the Seminole Wars, Fort Brooke was established as a garrison near the mouth of the Hillsborough River and became the seed from which modern Tampa grew.

In the Civil War period Tampa was an attractive port for blockade runners, and in the 1880s railroad baron Henry Plant began developing the area as a railroad port and tourist center. During the Spanish-American War Tampa was a major

port of embarkation for U. S. troops.

Continued growth of Tampa as a center of transportation and industry has made the community's economy contrast sharply with the tourist and retirement oriented economies of most other Florida metropolitan areas.

Tampa's port is currently undergoing a major redevelopment, with more than \$7,000,000 in public funds being used to create new port lands, and public and private investment of more than \$30,000,000 anticipated in the future for creation of terminals and waterfront industry.

As a port, Tampa is the largest between Norfolk and New Orleans, handling more than 25,000,000 tons of cargo annually. Principal export cargo is phosphate, used for fertilizer material and industrial purposes. Rich phosphate mines, located only 40 miles from the port, have made Tampa the world's leading producer of this commodity.

Tampa International Airport, serving more than 2,500,000 air travelers a year, is in the process of building a \$60,000,000 "terminal city" of unique and radical design. The airport is served by 9 major airlines, with domestic and foreign service.

One major urban renewal project, near downtown Tampa, is nearing completion, and two others are in progress.

Within the past 10 years the central business district of Tampa has been the scene of vast change as high-rise office buildings and new hotels have replaced obsolescent structures.

Downtown Tampa is immediately adjacent to the junction of Interstate-75 and Interstate-4. A crosstown expressway is

also projected on the fringe of the business district.

Tampa's mayor and seven-member city council are elected in a non-partisan campaign.

The University of South Florida, started less than 10 years ago, has more than 12,000 students. The University of Tampa, a private 4-year college, has an enrollment of more than 2,000 students.

A \$1,700,000 library has recently been completed in downtown Tampa and holds

300,000 volumes. Eight branches serve neighborhoods throughout the city.

Tampa serves as spring training camp for the Cincinnati Reds, and is home of the Tampa Tarpons baseball team. A new football stadium has recently been completed. Major professional and collegiate football games are scheduled here.

Information on the city may be obtained from the Greater Tampa Chamber of Commerce, 801 E. Kennedy Blvd., Tampa, Fla., 33601.

Toronto, Ontario

The World Almanac is sponsored in the Toronto area by the Toronto Telegram, 440 Front St. West, Toronto, Ont., Canada; telephone (416) 367-4500; founded 1876; circulation daily 227,700, Saturday 307,208; publisher, John W. Bassett; editor-in-chief, J. D. MacFarlane; executive editor, A. H. Agnew; managing editor, A. W. MacFarlane; major awards received include Sigma Delta Chi prize to staff member; sponsors Telegram-Maple Leaf Indoor Games, Telegram Trophy Race, Christmas Fairyland.

Metropolitan Toronto sprawls over 240 sq. mi. along the north shore of Lake Ontario. Although clusters of high-rise apartment buildings pierce the skyline, in the suburbs as well as the downtown core, Toronto is still known as a city of homes.

The city had its beginnings in 1793 when Gov. John Graves Simcoe established a frontier community known as the town of York. Forty-one years later, "muddy York" achieved the status of a city and was renamed Toronto, "a meeting place," as it was known to the Indians. At that time the city had a population of 9,000—today it has 2,200,000.

Its government is unique and the system has been studied by other cities around the world. The city proper, which includes the business and commercial hub, comes under the jurisdiction of Mayor William Dennison. Then, the city joins with five boroughs to form the Metropolitan Council, with William R. Allen as chairman.

Toronto's importance to the Canadian economy is underlined by the fact that one-third of the nation's economic activity gravitates within a 50-mile radius of the city. Toronto is unusual in that no one industry or service dominates its economic life, giving it great stability in times of slumps or labor stoppages in certain segments.

Some 70% of the country's automobile production comes from Oshawa and Oakville, cities about 20 miles east and west respectively from the heart of Toronto.

The city is the eastern terminus of the Interprovincial Pipe Line, which brings western Canadian crude oil to Toronto refineries. Trans-Canada Pipe Lines performs the same function with natural gas.

Hydro power is supplied from two coal-burning plants on the lakeshore, while a nuclear-powered station is being erected at Pickering, just east of the city.

Basically, Toronto is the financial capital of Canada. Three of the country's 5 major chartered banks have head offices here. The Toronto-Dominion has just opened a new 56-story building, tallest in Canada. In addition, the city is headquarters for many of the country's finance, trust and loan companies.

Sixty-five of the 140 life insurance companies doing business in Canada have Toronto head offices. Imperial Oil Ltd., a Standard of New Jersey subsidiary, has its head office on St. Clair Ave. The company holds almost a third of the country's refined products market.

Not only is Toronto the hub of the Canadian business scene, but a number of

Toronto-based companies are leaders on a world-wide basis. Massey-Ferguson, for instance, operates 30 plants in 9 countries and sells its diverse line of farm and industrial machinery in 161 countries. A leader in the business-forms industry, Moore Corp., has its head office on University Ave. although it does 85% of its business in the U. S. Brazilian Light & Power, with offices on King St., controls much of Brazil's hydro capacity.

The Toronto Stock Exchange ranks right behind the New York and American exchanges in number of transactions and value of trading. The TSE handles some 70% of the brokerage business in all of Canada.

In addition to its network of superhighways and expressways, Toronto is well served by 3 major railroads—the privately-owned Canadian Pacific, which itself is a world wide complex of hotels, real estate, shipping, mining enterprises; the Federal Government's Canadian National, and the Provincial Government's Ontario Northland.

Toronto International Airport serves some half dozen major airlines and handles 3,000,000 passengers annually. The Island airport, just across the bay from the foot of Bay St., handles private aircraft, and is one of the busiest.

In addition, numerous truck and bus lines radiate from the city.

Since completion of the St. Lawrence Seaway, Toronto has also become an international port with tonnage handled growing every year.

Toronto's downtown is scheduled for a large injection of new life. The Toronto-Dominion Center and the New City Hall are destined to be part of a huge redevelopment which will stretch right to the water's edge. The whole complex will eventually be connected by underground malls, shops and walkways.

Toronto participates actively in just about every major sport, including hockey, curling and football.

In the field of entertainment, both private and publicly-owned television networks are headquartered in Toronto. The legitimate theatre is served well by the O'Keefe Center, the Royal Alexander Theatre, and Massey Hall.

Every summer, The Canadian National Exhibition, the continent's biggest annual fair, draws some 3,000,000 visitors to Toronto.

Additional information may be obtained from the Board of Trade of Metropolitan Toronto, 11 Adelaide St. W., Toronto.

Vancouver, Canada

The World Almanac is sponsored in the Vancouver area by The Vancouver Sun, 2250 Granville Street, Vancouver, British Columbia, Canada; telephone (604) 732-2111; founded 1886; Canada's second largest daily newspaper; circulation 252,000; publisher, Stuart Keate; editorial director, Bruce Hutchison; managing editor, William T. Galt; sponsors world's largest free Salmon Derby; free Swim Classes (enrol. 10,000 annually); Christmas Fairyland, and many other community services.

Canada's third largest city, Vancouver lies in a setting of natural beauty, at the foot of soaring mountains, fringed by beaches and evergreen forests.

The Spaniards saw the site first, tucked between the fjord of Howe Sound and the Olympic Peninsula, "at the mouth of a copious river," said Don Jose Maria Narvaez, who mapped the area in 1791. But the following year Spain surrendered its claim to Britain, and Capt. George Vancouver, sailing HMS Discovery in quest of the Northwest Passage, took possession. The Hudson's Bay Co. established trading posts and a company of Royal Engineers arrived in 1859 to set up civic administration. The city was incorporated in Vancouver's name in April, 1886, and burned to the ground within two months. But its population of 2,000, enchanted with the site, rebuilt.

Vancouver today is a city of 44 sq. mi. with an estimated population of 450,000. Surrounding suburbs, climbing the North Shore mountains and reaching into the rich agricultural valley of the Fraser—that "copious river"—boost the Greater Vancouver population to some 930,000, almost half that of the province of British Columbia, of which Vancouver is the economic capital.

The fine natural harbor has 98 miles of waterfront stretching up Burrard Inlet, is the largest cargo port on the Pacific and Canada's second busiest. Tonnage in 1968 was estimated at 25,000,000. Preliminary work has begun on a joint federal-provincial venture to build a superport linking Vancouver harbor with a site at Roberts Bank, 20 miles south, at an initial investment of \$50,000,000. Major cargo is grain, lumber and forest products, coal, mineral ore, chemicals and manufactured goods. The port is Canada's gateway to the Orient and the major importer of goods for Western Canada.

While service industries predominate in its economy, Vancouver has major wood product plants, a diversified secondary industry, fisheries and a major tourist trade which in 1967 brought 3,500,000 visitors and \$165,000,000. Retail sales in 1968 were estimated at \$1.25 billion.

Vancouver is the terminus of two trans-

continental railways, is linked by a third major line to the U. S. Northwest, and headquarters of the provincially owned Pacific Great Eastern Railway. The freeway to the U. S. border 20 miles south at Blaine, Wash., runs due south to Los Angeles. Vancouver International airport handles 2,000,000 passengers a year and a new terminal was opened in fall, 1968.

Government and private ferry services link Vancouver with Seattle and Vancouver Island and cruise ships ply the northern coast to Alaska.

Vancouver's downtown core is currently undergoing a dramatic transformation with preliminary work under way on 3 major developments—the \$300,000,000 Project 200, the \$80,000,000 Pacific Centre, both shopping-office complexes, and a provincial government skyscraper which will house headquarters of the recently chartered Bank of British Columbia.

Center of education and the arts in B.C., Vancouver has two universities, the University of B.C. and Simon Fraser University, plus two two-year community colleges. Major arts center is the Queen Elizabeth Theatre complex and a new city museum and planetarium was opened in September, 1968. Year-round entertainment is provided by a symphony orchestra, opera company and professional theatre groups. There are 3 major summer features, the Sea Festival in July, the International Festival of the Arts in late July and August, and the Pacific National Exhibition in August.

Vancouver's natural beauty and temperate climate—a year-round mean of 50 degrees—encourage a strong accent on leisure and recreation, predominantly boating in summer and skiing in winter on mountains only minutes from downtown. A strong bid is being made for the 1976 Winter Olympics. There are 128 parks, the outstanding one being Stanley Park, 1,000 acres, much of it virgin forest, with a zoo and aquarium which features a performing killer whale.

Professional sports flourish year-round: football, soccer, baseball, horseracing, ice hockey (in the new Pacific Coliseum opened early in 1968 and expected to house a National Hockey League team by 1970)—there's even cricket, too.

Washington, D. C.

The World Almanac is sponsored in the Washington, D. C., area by the Washington Daily News, 1013 13th St. N.W., Washington, D. C. 20005; telephone (202) 347-7777; founded Nov. 8, 1921, by Scripps-Howard Newspapers; circulation 226,000; editor, Richard Hollander; business manager, Ray F. Mack; associate editor, Nicholas Blatchford; managing editor, David Stolberg; major awards received by the newspaper and staff members include two Pulitzer Prizes, two Ernie Pyle Awards, two Heywood Brown Awards.

Although Washington, D. C., is best known as the capital of the United States and as one of the leading tourist meccas of this country, it is also an important business and financial center in its own right.

Its standard metropolitan statistical area, which includes suburban Maryland and Virginia, is one of the fastest growing of the nation's 20 largest. Its population increased by 35.9% between 1950 and 1960, and by an estimated 30.9% between 1960 and 1967. The 1960 census gave the population at 2,064,090, and the Census Bureau estimated it at 2,615,000 in 1966. The Na-

tional Capital Regional Planning Council forecasts a population of 3,741,456 in 1980. Currently it is the 8th largest standard metropolitan statistical area in the U. S.

The Washington Metropolitan Transit Authority approved Mar. 1, 1968, a \$2.5 billion project to build a 97.2-mile urban rapid transit system for Washington and its suburbs over a 12-year period. The authority previously had been authorized by Congress and the District of Columbia to build 38.4 miles of subway and surface rail lines inside the city at a cost of \$188,000,000. The Federal share of the total cost was set at \$1.1 billion, with the re-

mainder to be provided by local jurisdiction, chiefly through bond issues, and from receipts of the system. Construction of the center-city tunnels was scheduled to start late in 1968, and it was hoped that trains on the first line would be running by 1972.

With millions of Americans converging on Washington annually, transportation to and from the city are of major importance. There are 3 airports—Washington National, Friendship, and Dulles In-

ternational. Highways radiate from the city in all directions. The 65-mile Capital Beltway rings the metropolis. There is frequent train and bus service at all hours of day and night.

Specialized information is available from the Metropolitan Washington Board of Trade, 1616 K St. N.W., Washington, D.C. 20006.

See also District of Columbia and other index listings under Washington, D. C.

Winnipeg, Canada

The World Almanac is sponsored in the Winnipeg area by the Winnipeg Free Press, 300 Carlton St., Winnipeg, Man., Canada; telephone (204) 943-9331; founded 1872; circulation daily 131,695; publisher and editor-in-chief, R. S. Malone; executive editor, Peter McIntock; managing editor, Albert Boothe; business manager, R. H. Shelford; the newspaper and its staff have received numerous awards for outstanding journalism.

Greater Winnipeg, Canada's fourth largest metropolitan area with an estimated population of 505,774, is located at the junction of the historic Red and Assiniboine Rivers near the geographical center of North America. The metropolitan area, covering 166.6 sq. mi., embraces 7 cities and 5 towns.

Winnipeg proper, heart of the metro area with an estimated population of 251,995, is the capital city of the Province of Manitoba. Winnipeg is named after Lake Winnipeg, 40 miles to the north, the 13th largest lake in the world. It is a Cree Indian name meaning muddy water.

The area attracted its first settlers, the Lord Selkirk colonists, in 1812. A fur-trading post, Winnipeg was incorporated as a city in 1812. It had a population of 1,869.

A metropolitan government was established in 1960 to look after inter-municipal services in the area. The metro government is responsible for public transportation including the major bridges and thoroughfares, the water supply, sewage collection and disposal, area planning and zoning, and the major parks.

Manufacturing is one of the important factors in the area's economy and the largest single source of employment and income. Greater Winnipeg is the 6th largest manufacturing employment area in Canada, with 37,000 persons earning \$150,000,000 and producing \$825,000,000 in manufactured goods a year. One of Canada's largest investment dealers has headquarters in Winnipeg, along with one of the largest insurance companies. The Canadian Wheat Board, charged with the responsibility of selling Canada's large wheat crop, also has headquarters in Winnipeg.

Construction of new buildings in the area totals about \$100,000,000 a year. An urban renewal scheme to redevelop the downtown area is under way.

Utility services, except natural gas for heating, are government or municipally owned. The Provincial Government owns the hydro and telephone systems in the area while the City of Winnipeg owns the hydro distribution system in the city proper.

Winnipeg is western headquarters of Canadian Pacific Railway and Canadian National Railways, Canada's two transcontinental rail systems, with connecting lines to the United States.

Winnipeg International Airport handles about 600,000 passengers and 25,000,000 pounds of freight and express annually. A modern \$12,000,000 terminal was opened in 1963 to service the 4 major airlines that have daily service to Canadian and U. S. points. In addition, 3 airlines use the airport for refueling and servicing planes on polar flights.

An amateur sports center, Winnipeg is the home of the Canadian national amateur hockey team. The 1967 Pan-American Games were held in Winnipeg, which will be host to 15 games of the 1970 World Amateur Hockey Championship. A professional team, the Winnipeg Blue Bombers, plays in the Canadian Football League.

Winnipeg's cultural life is highlighted by the Royal Winnipeg Ballet and the Winnipeg Symphony. A fine concert hall was opened in 1968 and a 6-story museum is being built.

Additional information is available from the Winnipeg Chamber of Commerce, 177 Lombard Avenue, Winnipeg, Man., Canada.

New York City Museums, Libraries, Centers of Interest

THE NEW YORK AQUARIUM, in Coney Island, exhibits marine life from all climes, with over 2,500 live specimens including whales, sharks, seals, sea lions, fish, penguins, etc.

THE NEW YORK BOTANICAL GARDENS, founded in 1891, occupies 230 acres of Bronx Park adjacent to Pelham Parkway. An 11-greenhouse Main Conservatory features seasonal shows and permanent exhibits of palms, jungle and desert plants, ferns and orchids.

THE FRICK COLLECTION, 1 E. 70th St., was founded by Henry Clay Frick (1849-1919). The principal part of the Collection consists of 14th-19th Century paintings as well as sculpture.

THE GALLERY OF MODERN ART including the Huntington Hartford Collection is at Columbus Circle. The building, designed by Edward Durrell Stone, was opened in 1964. It houses mainly 19th and 20th-Century representational art.

THE SOLOMON R. GUGGENHEIM MUSEUM, Fifth Ave. and 89th St.; permanent collection contains over 3,000 paintings, drawings, sculptures

and graphic works by 19th and 20th Century artists. The Museum's unique circular building was designed by Frank Lloyd Wright.

THE HAYDEN PLANETARIUM, facing 81st St., near Central Park W., presents dramatic reproductions of the night skies inside a large hemispheric dome with a Zeiss planetarium projector and other instruments; about 9,000 stars are shown. There are weather, time, space exhibits.

THE HISPANIC SOCIETY OF AMERICA is a free public museum and reference library devoted to the art and literature of Spain and Portugal. It occupies two buildings on Audubon Terrace, between 155th and 156th Sts., west of Broadway. Paintings run from primitive to modern.

THE JEWISH MUSEUM, Fifth Ave. at 92nd St., offers exhibitions of Jewish ceremonial objects, as well as contemporary art and architecture. The permanent collection of Judaica is considered the most comprehensive in the world. There are lectures, gallery talks and a gift shop.

THE METROPOLITAN MUSEUM OF ART, Fifth Ave. at 82nd St., was founded in 1870. With more than 365,000 works of art, the Museum's collection is the largest of its kind in the Western Hemisphere.

Great masters of all the ages of art are included in the collections: Egyptian, Greek and Roman, Ancient Near Eastern, Islamic, Far Eastern, Medieval, Arms and Armor, European, Pre-Columbian, American, Musical Instruments, Costume Institute and Junior Museum.

The Cloisters, in Manhattan's Fort Tyron Park, is a branch of the Metropolitan devoted to Medieval art and architecture in 5 cloisters and other early European structures.

THE MUSEUM OF THE AMERICAN INDIAN, Heye Foundation, Broadway at 155th St., maintains the world's largest collection of American Indian materials, extensive archeological and ethnological displays and pre-Columbian arts, as well as study and photographic facilities.

THE MUSEUM OF MODERN ART, 11 W. 53rd St., est. 1929, presents 20th Century painting, sculpture, drawings, prints, architectural and industrial design, photography and film.

The library contains about 25,000 vols. and a reference collection of more than 100,000 photographs. The Film Dept. has more than 12,000,000 ft. of film. Bookstore, restaurant and gift shop.

THE AMERICAN MUSEUM OF NATURAL HISTORY occupies a group of buildings at Central Park West between 77th and 81st Sts. Here are large exhibits of man and beast from the most primitive times to the present, with extensive reconstruction of fossilized remains, dioramas of men and animals in their natural settings, dinosaurs, birds, Indians, Eskimos and glass models of protozoa, rotifers and coelenterates.

Noteworthy are the collections of minerals and gems, fossil fishes and marine life.

THE MUSEUM OF THE CITY OF NEW YORK on Fifth Ave. at 104th St., illustrates the history and life of the city. Its collections include dioramas, paintings, prints, maps, photographs, portraits, miniatures, vehicles, ship models, costumes, silver, furniture, theatrical and musical memorabilia, rare books and manuscripts.

THE NEW-YORK HISTORICAL SOCIETY (founded 1804) is at 170 Central Park W. between 76th and 77th Sts. The society maintains a library, museum and gallery of art. The library contains 400,000 volumes and large collections of pamphlets, newspapers, prints, cartoons, broadsides, maps and mss. of American and New York history.

The Gallery of Art has more than 2,000 paintings, including American portraits and the original water color drawings made by John James Audubon for his *Birds of America*.

THE AMERICAN NUMISMATIC SOCIETY, founded 1858, maintains a museum of coins and other currency, ancient and modern medals and decorations at Broadway and 156th St.

THE PIERPONT MORGAN LIBRARY, 29 E. 36th St., is a research-library museum based on collections formed by J. Pierpont Morgan (1837-1913). Main collections comprise medieval and renaissance illuminated and textual mss., incunabula, letters and documents, autograph mss., bookbindings, master drawings and Rembrandt etchings.

THE NEW YORK PUBLIC LIBRARY: In Jan. 1968, its resources were placed at approximately 30,000,000 items of which 8,250,000 were books, 9,425,000 manuscripts, 6,800,000 pictures, 3,500,000 posters, photographs and broadsides, 6,000,000 pamphlets, scrapbooks and clippings. Of this total, 3,500,000 books and the pictures are in the collections of the Branch Libraries which are maintained by the City of New York and which operate 80 branch libraries in Manhattan, the Bronx, and Staten Island and 4 bookmobiles. The Research Libraries, based at Fifth Ave. and 42nd St., comprise one of the great research libraries in the world.

The Library & Museum of the Performing Arts at Lincoln Center has books, scores, recordings and exhibits of the performing arts.

SEAMEN'S CHURCH INSTITUTE, facing Manhattan's Battery Park, has dining room, cafeteria, collections of sailing ship models, ships' bells, marine paintings, tattoo designs, gym, sauna, showers, all open to public.

THE STATEN ISLAND INSTITUTE OF ARTS AND SCIENCES, founded 1881, has a museum of art, natural science, archeology, conservation and Indian life at 75 Stuyvesant Pl., St. George, S. I., and a library at 51 Stuyvesant Pl. It offers lectures, concerts and classes for children and adults.

WHITNEY MUSEUM OF AMERICAN ART, Madison Ave. at 75th St., holds exhibitions of group and individual artists, historical and contemporary. Its 1966 building was designed by Marcel Breuer.

Brooklyn Centers

BROOKLYN BOTANIC GARDEN, Eastern Parkway, Washington and Flatbush Aves., has 50 acres of gardens, including rose, herb, wild flower and Japanese, and a fragrance garden for the blind.

THE BROOKLYN MUSEUM, Eastern Parkway and Washington Ave., estab. 1897, has comprehensive exhibitions in all major fields of art. An Outdoor Sculpture Garden contains ornaments from razed N. Y. area buildings.

BROOKLYN ACADEMY OF MUSIC, 30 Lafayette Ave., is the Brooklyn Center for the Performing Arts. It presents concerts, operas, etc., and has a program of films, lectures and workshops.

THE BROOKLYN PUBLIC LIBRARY occupies the Ingersoll Building, Grand Army Plaza, and 53 branches. It operates two bookmobiles. The Ingersoll Building has administrative offices and 5 major-subject divisions, a Young Teens division, Children's Room, Browning Room, Student's Room and Micromaterials Room.

Churches

ARMENIAN CATHEDRAL (Armenian Church of America), 2nd Ave. and 35th St. Steel arches support a gilded, conic, Armenian-style dome.

JOHN ST. METHODIST CHURCH, 44 John St., erected 1841, on site of Wesley Church of 1768, "first Methodist preaching-house in America," houses oldest Methodist Society, formed 1766. Has noontime services for office workers.

PLYMOUTH CHURCH OF THE PILGRIMS (Congregational), Orange St., Brooklyn, is a Nat'l Historic Landmark, built 1847, present structure 1849. Has windows illustrating Puritan influence on America and pew where Lincoln sat to hear Henry Ward Beecher, the first minister. In 1890 Beecher raised funds at an auction here to purchase the freedom of a slave girl, Pinky.

RIVERSIDE CHURCH (Interdenominational—American Baptist and United Church of Christ), Riverside Drive and W. 122nd St. The chief donor was John D. Rockefeller, Jr. The tower, reminiscent of Chartres, is 100 ft. square, rises 392 ft.

CATHEDRAL OF ST. JOHN THE DIVINE on Morningside Heights, Amsterdam Ave. and W. 112th St. (Protestant Episcopal), was begun 1892 as a Romanesque building; the design was changed to Gothic. The church is 601 ft. long, 146 wide at nave and will be 330 ft. wide at transept. Two front towers will rise to over 250 ft.

ST. MARK'S-IN-THE-BOUWERIE (Protestant Episcopal), 2nd Ave. and E. 10th St., originally a chapel built on the farm of Director General Peter Stuyvesant in 1660, rebuilt in 1799. A statue of Stuyvesant in the churchyard was presented by Queen Wilhelmina of the Netherlands in 1915.

ST. PAUL'S CHAPEL OF TRINITY PARISH (Protestant Episcopal), Broadway and Vesey St., is the oldest colonial church edifice in New York. It was opened Oct. 30, 1766. Much of the interior decoration was by L'Enfant, who laid the plans for Washington, D. C. There is a unique collection of 14 Waterford Irish cut glass chandeliers.

ST. PATRICK'S CATHEDRAL (Roman Catholic) occupies a block facing Fifth Ave., between E. 50th and E. 51st Sts., opposite Rockefeller Center. It was begun in 1858 in granite and marble in a Gothic revival style designed by James Renwick. It was opened in part in 1877 and dedicated May 25, 1879. It has two spires, 330 ft. tall, and a 26-ft. rose window. St. Patrick's is the cathedral church of the Archdiocese of N. Y.

ST. PETER'S CHURCH (Roman Catholic), Barclay and Church Sts., has the form of a Greek temple with large porch, wide steps and granite pillars, erected 1835 to replace the original church of 1785 of the first Catholic parish of New York.

TEMPLE EMANU-EL, Fifth Ave. and 65th St., was erected 1929 by Congregation Emanu-El (Reform), which dates from 1845. It was built of limestone in early Romanesque style, its auditorium 77 ft. wide by 150 ft. long and 103 ft. high, the largest temple in the country. Noteworthy are the high arch at the entrance, the rose window and 3 bronze doors. Open to visitors 10 a.m.-5 p.m.

TRINITY CHURCH (Protestant Episcopal) faces Broadway at the head of Wall St. It was built 1841-46 of brown sandstone in perpendicular Gothic, designed by Richard Upjohn, is 78 ft. wide by 202 ft. long and has an octagonal brownstone spire 280 ft. high. The first church was opened in 1698. In the churchyard are buried Alexander Hamilton, Robert Fulton, Capt. James Lawrence and Revolutionary soldiers who died in British prisons.

Historic Sites

EDGAR ALLAN POE COTTAGE, Grand Concourse and Kingsbridge Road, Bronx, is a restored cottage, built 1812, in which Poe lived 1846-49, and in which his wife, Virginia Clem, died, 1847.

FEDERAL HALL NATIONAL MEMORIAL, Wall and Nassau Sts., is a Greek Revival structure of 1842, originally the Custom House, later the U. S. Sub-Treasury. On the site stood the Colonial City Hall and later Federal Hall, where the Stamp Act, Continental and U. S. Congresses met and George Washington took the oath of office as President.

FRANCES TAVERN, Broad and Pearl Sts., was erected 1719 as the DeLancey mansion, acquired 1762 by Samuel Fraunces and operated as the Queen's Head Tavern. The Long Room was the scene of Washington's farewell to his officers, Dec. 4, 1783. It was restored by the Sons of the Revolution in the State of New York and is their headquarters. It contains a Revolutionary War museum and art gallery, free to the public.

GOVERNORS ISLAND, in New York harbor south of the Battery, contains 173.35 acres. The picturesque old fort, Castle Williams, was built 1807-1811 by Col. Jonathan Williams, nephew of Benj. Franklin. It is 200 ft. in diameter, was used as a prison for Confederates during the Civil War. Fort Jay built 1794-1806, marks the site of Revolutionary fortifications.

For many years the headquarters of the First U. S. Army, Governors Island was turned over to the U. S. Coast Guard July 1, 1966. The island is now the Coast Guard's largest base.

GENERAL GRANT NATIONAL MEMORIAL (GRANT'S TOMB), Riverside Dr. and W. 122nd St., is a formal Roman-style mausoleum in which Gen. U. S. Grant, 18th President, and Mrs. Grant are buried. The tomb is 165 ft. tall.

THE ROGER MORRIS-JUMEL MANSION, W. 160th St. and Edgecombe Ave., is a 3-story colonial mansion with 4-pillared portico built in 1765 by Col. Roger Morris of the British Army. From Sept. 15-Oct. 19, 1776, it was the headquarters of Gen. George Washington.

In 1810 Stephen Jumel bought 63 acres of the property. In 1833, the widowed Mrs. Jumel married Aaron Burr. He lived there briefly.

WASHINGTON SQUARE, at the foot of Fifth Ave., is the best known landmark of Greenwich Village, distinguished for homes of artists, writers, and attractive small shops. Facing Fifth Ave. is the marble Washington Arch, designed by Stanford White to commemorate the centenary of the first inauguration and completed in 1895. At the east are buildings of New York University, which also owns many of the old redbrick houses of Federal design on the north side.

Important Buildings

THE CITY HALL, headquarters of the Mayor, the City Council and the Board of Estimate of the City of New York, is in City Hall Park (the original Common), bounded by Broadway, Park Row and Chambers St. Erected 1803-1812, it is an adaptation of French Renaissance with a clock cupola surmounted by a figure of Justice.

Other public buildings in the vicinity are Hall of Records, north of Chambers St., and Municipal Bldg., 40 stories arched over Chambers St. North of these bldgs. is Foley Square, the site of Collect Pond of colonial days. It is boxed by public buildings: United States Court House, built 1936, designed by Cass Gilbert, 32 stories; the hexagonal State Supreme Court Bldg.; the State Office Bldg.; the Health Dept. Bldg. and the new Federal Bldg., 46 stories. North on Centre St. are the Civil Court, Criminal Court and City Prison.

THE COLISEUM, facing Columbus Circle betw. W. 58th and W. 60th Sts., is New York's principal center for national and international exhibitions. Opened Apr. 28, 1956, it cost about \$35,000,000.

The Coliseum has over 9 acres of floor space. Its main halls can accommodate 8,000 people.

COOPER UNION FOR THE ADVANCEMENT OF SCIENCE AND ART, at Cooper Square, 7th St. and 4th Ave., was founded 1859 by Peter Cooper, ironmaster and public benefactor. Its college-level School of Engineering and Science and School of Art and Architecture are tuition-free to undergraduate students selected by competitive examination. Graduate courses in engineering are also tuition-free. Cooper Union is noted for the free Forum lectures and performances held from Oct. to Mar., on Mon., Wed. and Fri. evenings in the Great Hall where Abraham Lincoln made his famous Cooper Union address Feb. 27, 1860.

EMPIRE STATE BUILDING, Fifth Ave., between W. 33rd and 34th Sts., is the tallest building in the world, 1,472 ft. high including a 222-ft. television and FM radio transmitting tower. The building was completed May 1, 1931. More than 1,500,000 persons annually visit the 86th and 102nd floor Observatories. On a clear day viewers can see a distance of 80 mi.

LINCOLN CENTER FOR THE PERFORMING ARTS was opened Sept. 23, 1962, with a concert in Philharmonic Hall. The Center is located between W. 62nd and 65th Sts., Amsterdam and Columbus Aves. It is a private, nonprofit tax-exempt corporation of 7 constituent organizations. The New York State Theater, facing Philharmonic Hall, opened in 1964. The Vivian Beaumont Theater, for repertory, capacity 1,140, and the Library-Museum of the Performing Arts opened in 1965. The Metropolitan Opera House opened in 1966. The Julliard School of Music is to open in 1969.

MADISON SQUARE GARDEN CENTER, Pennsylvania Plaza (7th-8th Aves., 31st-33rd Sts.), opened in the 1967-68 season. The huge development, above the modernized underground Pennsylvania RR station, includes a 29-story office building and the Sports and Entertainment Center which has an arena seating over 20,000, the 5,000-seat Felt Forum, 48 bowling lanes, the Garden Hall of Fame, the National Art Museum of Sport, an Exposition Rotunda for trade and walk-around shows, and a 500-seat Cinema.

PAN AM BUILDING, north of Grand Central Terminal Bldg., is the world's largest commercial office building. It has 59 floors rising 808 ft., with a rooftop heliport, and was erected over the tracks of the Grand Central Station. It covers a ground area of 3½ acres; est. office population is 17,000.

ROCKEFELLER CENTER, the largest privately owned business and entertainment center in America was started Sept., 1931. Its area includes the three blocks from 48th to 51st Sts. between Fifth Ave. and the Ave. of the Americas, a large portion of the 51st-52nd St. block and two blockfronts on the west side of the Ave. of the Americas between 48th and 51st Sts. There are 18 buildings with two more under construction. It has 160,000 daily visitors; 48,500 work there.

The surface area of Rockefeller Center covers 17 acres, most of which are leased for a long period from Columbia University. Rockefeller Center pays Columbia an annual rental of \$3,800,000. The lease with options for renewal runs until 2069.

The part of Rockefeller Center comprising theaters and radio and television studios is often referred to as Radio City. Studios of the National Broadcasting Co. are located in the 70-story RCA building (850 ft. tall). There is an Observation Roof on the 70th floor.

RADIO CITY MUSIC HALL, Ave. of the Americas and W. 50th St., largest indoor theater in the world, seats 6,200 people. Its stage, 144 ft. wide by 67 ft. deep, has a proscenium arch 60 ft. high and 100 ft. wide. Has first-run films and stage spectacles featuring the Rockettes, Ballet Company, Symphony Orchestra and guest artists.

UNITED NATIONS HEADQUARTERS occupies 18 acres between 1st Ave. and E.D.R. (East River) Drive, E. 42nd and E. 48th Sts. Most unusual is the Secretariat Bldg., 550 ft. tall, 289 ft. long and only 72 ft. wide. The 2 sides have 5,400 windows; the end walls are of 2,000 tons of Vermont marble. General Assembly Bldg. has a hall 165 ft. long, 115 ft. wide. Conference Bldg. houses 3 Council chambers, etc. There are guided tours daily.

NEW YORK STOCK EXCHANGE, 20 Broad St., has visitors' gallery, films, guided tours, Monday through Friday, 10 a.m. to 3:30 p.m.

Washington, Capital of the United States

The Capitol

The Capitol (building) since 1961 has presented an entirely new East Central front, the central portion having been reconstructed and extended. It was moved forward 32½ ft. The former facade of Virginia sandstone was reproduced in Georgia marble, the original wall becoming an interior wall. The new section added 78 offices and other important facilities. The cost of the extension project was \$11,400,000; improved illumination and other work brought the total to \$24,000,000.

The Capitol stands 88 ft. above the level of the Potomac River and covers approximately 4 acres. Its length, from north to south, is 751 ft. 4 in.; its width, including approaches, is 350 ft., and its height above the base line on the east front to the top of the statue of Freedom is 287 ft., 5½ ins.

The original plan for the Capitol was drawn by Dr. William Thornton, of Tortola, West Indies, and accepted April 5, 1793. It had a central section, nearly square, a low dome and rectangular buildings north and south, 126 by 120 ft. The southeast cornerstone of the north section was laid by President Washington with Masonic ceremonies Sept. 18, 1793. Sandstone from Aquia Creek, Va., was used. The northern wing was completed first. The Congress occupied it in Nov. 1800. The Supreme Court met in Feb. 1801, and other local courts also used the Capitol. In charge of early construction were architects Stephen H. Hallet, Geo. Hadfield, and James Hoban who was architect of the White House. Benjamin H. Latrobe was architect of the South or House wing which was occupied in 1807, but not completed until 1811. All the interiors were burned by the British in 1814. Latrobe had charge of the rebuilding until 1818 when Charles Bulfinch became the Architect for 11 years or until 1829. Congress reoccupied the Capitol in 1819 and the central rotunda area was finished in 1829.

The present Senate and House wings were designed and constructed under the architect Thomas U. Walter in 1851-1863. The wing extensions are white marble from Lee, Mass., and the columns are from Maryland. Daniel Webster spoke at the laying of the cornerstone.

The Senate Chamber is 113 ft. 3 in. long and 80 ft. 3 in. wide. The Hall of Representatives (House) is 139 ft. long and 92 ft. wide.

The House moved in Dec. 16, 1857; the Senate Jan. 4, 1859. In 1860 the Supreme Court moved into the former Senate Chamber, and in 1864 the old Hall of the House was designated Statuary Hall. The Court moved into its own building in 1935.

The original dome of the Capitol, wood covered with copper, was replaced, 1856, by the present dome of cast iron, completed 1865. Its greatest exterior diameter is 135 ft. 5 in. The rotunda is 96 ft. diameter, height from floor to base of lantern, 180 ft. 3 in. The dome has 108 windows and there are 365 steps from the Architect's Office to the top of the dome. In the "eye" of the dome is a fresco by Constantino Brumidi, the "Apotheosis of Washington." Below the dome runs a 300-ft. frieze in fresco, portraying history from Columbus, 1492, to Kitty Hawk, 1903. Brumidi painted part of it by 1880. Costaggini added panels by 1888. Allyn Cox completed the frieze in 1953 and it was dedicated in 1954.

The Statue of Freedom on the dome, 19½ ft. tall, is of bronze and weighs 14,985 pounds. At its base are the words "E Pluribus Unum" (Out of Many One). It was modeled in plaster by Thomas Crawford in Rome and cast in bronze. It cost \$23,796 exclusive of erection.

Inaugurations of Presidents and Vice Presidents take place Jan. 20 following a national election. They are usually held on a platform erected over the great steps on the East front. The oath of office of the President is usually given by the Chief Justice of the United States.

PRAYER ROOM

A nondenominational room for meditation and prayer is located off the rotunda. Decorated in blue, it has a white oak altar with an open Bible, and candelabra, 10 seats and 2 kneeling benches. A stained-glass window depicts Washington at prayer, while panels show the obverse and reverse of the Great Seal. Also depicted are a candle and an open book, and a sentence from the 119th Psalm: "Thy word is a lamp unto my feet and a light unto my path." The 13 original states have stars; other states appear in a laurel border.

NATIONAL STATUARY HALL

Statuary Hall was created in 1864 to occupy

the former Hall of the House of Representatives. States were invited to contribute not more than two statues of distinguished persons judged worthy of national commemoration by the States. In 1933 the number of statues in Statuary Hall was limited to one statue from each state, others to be placed in other parts of the Capitol. To date 88 statues have been contributed by 48 states. A plaque in the floor marks the spot where John Quincy Adams was fatally stricken Feb. 21, 1848. The statues in Statuary Hall:

Alabama—Gen. Jos. Wheeler, USA, CSA.	Montana—Charles Marion Russell, artist.
Arkansas—Uriah M. Rose, jurist.	Nebraska—Wm. Jennings Bryan, statesman.
Arizona—John C. Greenway, U. S. A.	Nevada—Patrick A. McCarran, senator.
California—Junipero Serra, mission founder.	New Hampshire—Daniel Webster, statesman.
Colorado—Dr. Florence Rena Sabin, scientist.	New Jersey—Richard Stockton, statesman.
Connecticut—Roger Sherman, statesman.	New York—Robt. R. Livingston, statesman.
Delaware—Caesar Rodney, statesman.	North Carolina—Zebulon B. Vance, governor.
Florida—Dr. John Gorrie, inventor.	North Dakota—John Burke, U. S. Treasurer.
Georgia—Alex. H. Stephens, statesman.	Ohio—William Allen, senator, governor.
Idaho—Geo. L. Shoup, first governor.	Oklahoma—Sequoyia, Cherokee leader.
Illinois—Frances E. Willard, WCTU head.	Oregon—Rev. Jason Lee, pioneer.
Indiana—Lew Wallace, USA, author.	Pennsylvania—Robert Fulton, inventor.
Iowa—Saml. J. Kirkwood, governor.	Rhode Island—Roger Williams, founder.
Kansas—John J. Ingalls, senator.	South Carolina—John C. Calhoun, statesman.
Kentucky—Henry Clay, statesman.	South Dakota—Gen. W. H. Beadle, educator.
Louisiana—Huey P. Long, senator.	Tennessee—John Sevier, first governor.
Maine—Hannibal Hamlin, vice president.	Texas—Sam Houston, pioneer leader.
Maryland—Charles Carroll, signer, D. of I.	Utah—Brigham Young, Mormon leader.
Massachusetts—Samuel Adams, statesman.	Vermont—Ethan Allen, Revolutionary leader.
Michigan—Lewis Cass, statesman.	Virginia—Robt. E. Lee, USA, CSA.
Minnesota—Henry M. Rice, senator.	Washington—Dr. Marcus Whitman, pioneer.
Mississippi—Jefferson Davis, statesman.	West Virginia—Francis H. Pierpont, statesman.
Missouri—Thos. H. Benton, senator.	Wisconsin—Robt. M. LaFollette Jr., statesman.
	Wyoming—Esther Hobart Morris, suffragette.

Under the dome in the Great Rotunda are statues and busts of Washington, Lincoln, Jefferson, Hamilton, Jackson, Lafayette, Grant, Garfield and Baker.

Adjoining it, the South Small Rotunda has statues of George Clinton (N. Y.), Stephen P. Austin (Tex.) and John Peter Muhlenberg (Pa.). The corridor leading from Statuary Hall to the House has statues of Jonathan Trumbull (Conn.), Wm. King (Me.), Father Jacques Marquette (Wis.), Wade Hampton (S. C.), Will Rogers (Okla.), and Dr. John McLoughlin (Ore.). At the foot of the grand East and West stairways on the House side are a statue of Jefferson (by Hiram Powers) and the bronze bust of Beesheke, Chippewa chief.

In the foyer of the former Senate and Supreme Court Chamber are statues of John Stark (N. H.) and Nathanael Greene (R. I.). In the corridor leading to the Senate wing are statues of Dr. Ephraim McDowell, (Ky.) and Dr. Crawford W. Long (Ga.), first to use ether as anaesthetic; John Hanson (Md.), 9th president of the Continental Congress, and John M. Clayton (Del.), Secy. of State; Wm. E. Borah (Idaho), Edward D. White (La.) and Maria L. Sanford (Minn.). In the east corridor of the Senate wing is Benjamin Franklin by Hiram Powers. Other statues and busts in the Senate wing are of John Hancock, signer of the Declaration; Thos. Crawford, sculptor; Chas. Sumner, senator; Abraham Lincoln, Zachary Taylor, James Bryce and John Paul Jones with Kosciuszko, Pulaski and Garibaldi on the first floor, east side.

In the Hall of Columns on the first floor, House wing are statues of E. Kirby Smith (Fla.), Zachariah Chandler (Mich.), Jas. Harlan (Ia.), Francis P. Blair, Jr. (Mo.), Gen. Philip Kearny (N. J.), Gen. Jas. Shields (Ill.), John Winthrop (Mass.),

Oliver P. Morton (Ind.), J. Sterling Morton (Neb.), Rev. Thos. Starr King (Calif.), J. L. M. Curry (Ala.), J. P. Clarke (Ark.), Geo. W. Glick (Kan.), Jas. Z. George (Miss.), Chas. B. Aycock (N. C.), Jacob Collamer (Vt.), John E. Kenna (W. Va.), Joseph Ward (S. D.), and Eusebio F. Kino, S.J. (Ariz.). A statue of Dennis Chavez, U. S. Senator (New Mexico) was unveiled Mar. 31, 1966.

OFFICE BUILDINGS FOR MEMBERS

Members of Congress meet constituents and transact other business in five office buildings on Capitol Hill, two for the Senate and three for the House.

The original Senate building was completed in 1909, enlarged in 1933; the second Senate building was completed in 1958. Both are connected with the Capitol by subway.

The original House building (1908) was named for former Speaker Joseph G. Cannon (R.-Ill.), the second (1933) for former Speaker Nicholas Longworth (R.-Ohio), and the third (1964) for former Speaker Sam Rayburn (D.-Tex.). The Rayburn Building has underground transportation to the Capitol.

Also on Capitol Hill is the bell tower and statue memorial to Sen. Robert A. Taft of Ohio (1889-1953). It was erected by popular subscription and dedicated Apr. 14, 1959 by President Eisenhower.

HOURS FOR VISITING

The Capitol is normally open from 9 a.m. to 4:30 p.m. daily, but from Easter to Labor Day it stays open until 6 p.m. The Rotunda, Crypt and Statuary Hall sections remain open to the public until 10 p.m. The only exceptions are Christmas, New Year's Day and Thanksgiving Day. Should either the House or the Senate remain in session beyond closing time, the wing of the Capitol in use will stay open until the session closes.

Tours, through the Capitol, including the House and Senate Galleries, are conducted from 9 a.m. to 3:45 p.m. for a nominal charge. During the extended summer hours tours are accepted until 5:15 p.m.

It is not necessary to take a tour to see the Capitol. Visitors desiring to hear debate in either chamber for a longer period than the tour allows must obtain a visitor's card from their Senator or Representative.

The White House

The White House, the President's residence, stands in tree-shaded grounds (18 acres) on the south side of Pennsylvania Avenue, between the Treasury and the Executive Office Building. The main building, 170 by 85 ft., has 6 floors, with the East Terrace, 135 by 35 ft., leading to the East Wing, a 3-story building, 139 by 82 ft., used for offices and as an entrance for official functions. The West Terrace, 174 by 35 ft., contains offices and a swimming pool, and leads to the Executive Office, 3 stories high, 148 by 98 ft., erected in 1902 and enlarged several times since.

The White House was designed by James Hoban, an Irish-born architect, in a competition that paid \$500. The main facade resembles the Duke of Leinster's house in Dublin. He based it on plans for Georgian country houses popular in the 18th century. President Washington chose the site, which was included on the plan of the Federal City prepared by the French engineer, Major Pierre L'Enfant. The cornerstone was laid Oct. 13, 1792. President Washington never lived in the house. President John Adams entered in November, 1800, and Mrs. Adams hung her washing in uncompleted East Room.

The walls are of sandstone, quarried at Aquia Creek, Va. The exterior walls were painted during the course of construction, causing the building to be termed the "White House." For many years, however, it was generally referred to as the "President's House" or the "President's Palace." Thos. Jefferson developed the east and west terraces and built one-story offices, woodsheds and a wine cellar. On Aug. 24, 1814, during Madison's administration, the house was burned by the British. James Hoban completed rebuilding by Dec., 1817, and President Monroe moved in.

The south portico was added in 1824 and the north colonnade and porch in 1829 by Benjamin Latrobe, Surveyor of Public Buildings, based on sketches by Hoban, approved by Jefferson. In 1948 President Truman had a second-floor balcony built into the south portico. In 1948 he had Congress authorize complete rebuilding because the White House was unsafe. During its reconstruction he lived in Blair House, 1651 Pennsylvania Ave.

Reconstruction cost \$5,761,000. The interior was

completely removed, new underpinning 24 ft. deep was placed under the outside walls and a steel frame was built to support the interior. All original trim and metal work were preserved.

The Green Room, used for informal receptions, is in American Federal style, with green silk moire on the walls, a white marble fireplace and white enamel wainscoting and door trim. Over the fireplace hangs a portrait of Benjamin Franklin, painted in 1767. A pair of rare American settees and two armchairs are in front of the fireplace. There is also a sofa once owned by Daniel Webster.

The Blue Room, an oval drawing room, is the main reception room. The parquet floor is exposed; the walls are hung in white satin and blue taffeta. There are portraits of the first seven Presidents, and original chairs, a pier table, a French clock and candlesticks of gilt bronze, from James Monroe's 1817 furnishings.

The Red Room, used as a parlor, is furnished in the Empire period, hung in cerise silk with gold scroll borders. There are a Savonnerie carpet of the period, a marble-topped gueridon labeled by Charles Honore Lannuier, and a bronze inlaid used by Thomas Jefferson. There are portraits of Presidents Pierce, Van Buren, Truman, Theo. Roosevelt, Wilson and F. D. Roosevelt; also of Hamilton and John Marshall.

The State Dining Room has a large chief table and smaller tables capable of seating 140 at formal dinners. Centerpiece of the main table is a French bronze-doré plateau purchased by Monroe in 1817. China in use was ordered during the Lyndon B. Johnson Administration. Chairs are in Queen Anne style. The room is paneled in oak with Corinthian pilasters, painted white.

The Family Dining Room is used for breakfasts and luncheons. It has the Healy portrait of President Tyler. The President's Dining Room is on the second floor. It has scenic wallpaper and is furnished with American Federal furniture, an 18th Century chandelier and blue silk window hangings. There is a mahogany sideboard once owned by Daniel Webster.

The Diplomatic Reception Room, an oval room on the ground floor, is used as the entrance to the mansion at state functions. It has scenic wallpaper based on 1820 engravings and an Aubusson style rug with the seals of 50 states presented during the Eisenhower administration.

The Library, on the ground floor, has the painted decor of an early American room. On August, 1963, 2,780 titles were selected to be placed in the library. All but a few are by American authors. They were chosen by a committee headed by James T. Babb, librarian emeritus of Yale University.

The Lincoln Bedroom, which contains an ornately carved bed and furniture of his period, is at the east end of the second floor. It served as Lincoln's cabinet room and in it he signed the Emancipation Proclamation of Jan. 1, 1863. A portrait of Jackson, admired by Lincoln, hangs there today. Seven pieces of furniture have Lincoln associations. The bed was used in the State Bedroom during the Lincoln administration. In the room is a copy of the Gettysburg Address, written out by Lincoln and donated to the White House by the will of Oscar B. Cintas, one-time Cuban ambassador, who died in 1957.

The Treaty Room, one door removed from Lincoln's cabinet room was used by Andrew Johnson as his cabinet room, and so used until 1902, when it became a sitting room. Here in 1899 was signed the peace protocol treaty, a forerunner to the final treaty of peace with Spain. It is now a waiting or meeting room for the President and contains some of the original Victorian furniture. There are portraits of Presidents A. Johnson, Grant and Taylor and paintings of McKinley observing the signing of the treaty and of Lincoln and Grant in conference.

The Queen's Bedroom is assigned to distinguished women guests, and has sheltered five queens—Queen Mother Elizabeth, and Queen Elizabeth II of Britain, Wilhelmina and Juliana of the Netherlands, Queen Mother Frederika of Greece. The English overmantel mirror was presented by Princess Elizabeth in 1951.

The Yellow Oval Room, directly above the Blue Room, is used as a private sitting room by the President and Mrs. Johnson.

The Empire Guest Room has a "sleigh bed" probably owned by John Quincy Adams. Walls and upholstery are in red-and-white printed cotton showing scenes from the life of Franklin.

The President's Office in the West Wing, looks

out on the rose garden. Theodore Roosevelt built the West Wing in 1902. Previously the President's office had been on the second floor of the White House. The West Wing also contains the Conference Room and the Cabinet Room.

VISITING HOURS

The White House is open from 10 a.m. to 12 noon, Tuesday through Friday, except on holidays. Also Saturdays, 10 a.m. to 2 p.m. Apr. 1 through Labor Day, and 10 a.m. to noon Labor Day through Mar. 31. Only the public rooms in the basement and the first floor rooms, may be visited. No permit is required.

PRESIDENT'S GUEST HOUSE

Blair House, the President's Guest House, fronts on Pennsylvania Ave., nw of the White House grounds. It is supervised by the Dept. of State and is the official residence of heads of state who visit Washington. Built 1824, it was the home of Francis Preston Blair (1791-1876), political leader and Lincoln advisor. President Truman lived there 1948-1952 during rebuilding of the White House, and two Puerto Rican fanatics tried to shoot their way in Nov. 1, 1950, killing one guard and wounding two others.

Restoration and refurbishing began in 1963 and the house was reopened Jan. 14, 1964, on the occasion of the visit of President Antonio Segni of the Italian Republic. The Blair House Fine Arts Committee is continuing providing for the house.

Arlington National Cemetery

Arlington National Cemetery, on the former Custis-Lee estate in Virginia, is the site of the Tomb of the Unknown Soldier and the final resting place of John Fitzgerald Kennedy, President of the United States, who was buried there Nov. 25, 1963. A torch burns day and night over his grave. The remains of his brother Sen. Robert F. Kennedy (N. Y.) were interred on June 8, 1968 in an area adjacent. Many other famous Americans also are buried at Arlington, as well as American soldiers from every major war.

Arlington National Cemetery, administered by the Department of the Army, was established June 15, 1864, on land originally the estate of George Washington Parke Custis. The land was a part of the District of Columbia, 1791 until 1847, when Arlington County was returned to Virginia.

The Unknown Soldier of World War I was entombed on the East front of the Arlington Memorial Amphitheater, Nov. 11, 1921, in the presence of President Warren G. Harding. The tomb is inscribed: *Here rests in honored glory an American soldier known but to God.* The body had been chosen at Chalons-sur-Marne from unidentified dead in Europe. On Memorial Day, May 30, 1958, two unidentified servicemen, one of whom died in World War II and one in the Korean War, were placed in crypts beside the first, in ceremonies led by President Eisenhower and Vice President Nixon. The President placed the Medal of Honor on each of the two coffins.

As of Mar. 31, 1968, a total of 146,467 interments had been made in Arlington National Cemetery. Among the unknown dead are 2,111 who died on the battlefields of Virginia in the Civil War and 167 who lost their lives when the battleship Maine was blown up in Havana Harbor Feb. 15, 1898. The total of unknown dead interred in Arlington National Cemetery is 4,724.

Large memorial structures include the monument of the Unknown Dead of the Civil War, the Canadian Memorial, gift of Canada in honor of Americans who served with Canadian forces in World War I; a monument to the Confederate Dead, given by the United Daughters of the Confederacy, 1914; the Spanish-American War Memorial, a granite pillar surmounted by an eagle; the Coast Guard Memorial, and the USS Maine Memorial, with the mast of the Maine set in a granite base.

CUSTIS-LEE MANSION

On the hilltop stands Arlington House, the former home of Robert E. Lee, which was officially designated the Custis-Lee Mansion by an act of Congress in 1955. The house has a portico 60 ft. wide, with 8 Doric columns and faces the Potomac. With its two wings the house extends 140 ft. It was built by George Washington Parke Custis, grandson of Martha Washington and father of Mary Ann Randolph Custis, who married Lee in this house

in 1831. Here Lee wrote his resignation from the U. S. Army, Apr. 20, 1861. The house became a military hq. and was confiscated by the Government. The U. S. Supreme Court restored it to the legal heir, grandson of the builder, and he sold it to the Government in 1883 for \$150,000.

The mansion and grounds, administered by the National Park Service of the Dept. of the Interior, are reached by Arlington Memorial Bridge, a wide roadway over the Potomac.

Library of Congress

Established by and for Congress in 1800, the services of the Library of Congress have been extended over the years to other Government agencies and other libraries, to scholars, and to the general public, and it now serves as the national library. Two buildings, an ornate Italian Renaissance structure (1897) and a modern annex (1939), cover 6 acres of the 15½-acre Library site, contain 35 acres of floor space, and have 270 miles of book shelves. In October, 1965, Congress passed a law authorizing construction of a third Library building, the James Madison Memorial Building.

L. Quincy Mumford, the 11th Librarian of Congress, took office September 1, 1964.

The Library had over 3,000 volumes when it was destroyed in the burning of the Capitol, August 24-25, 1814. In January 1815, Congress bought Thomas Jefferson's library of some 6,000 volumes. In 1851 fire destroyed about half the collections. In 1866 the science library of the Smithsonian Institution was transferred to the Library, and in 1870 the Library became the repository for materials deposited for copyright.

Many treasures of the Library are usually on exhibit, including the Gutenberg Bible, the first and second drafts of the Gettysburg Address, and Jefferson's so-called "rough draft" of the Declaration of Independence.

Some important recent additions to the Library's collections are the libretto of Handel's Messiah; some 185,000 separate plates or sheets of Sanborn fire insurance maps to supplement Sanborn materials acquired earlier; also papers of J. Robert Oppenheimer, Alan T. Waterman, John Glenn, Shirley Jackson, Truman Capote, John Toland, and Representative Emanuel Celler; works of the 19th Century French lithographer Charlet; and several rare volumes with Jeffersonian associations. Placed on deposit were the autograph manuscripts of Stravinsky's Petrouchka and Prokofiev's Classical Symphony, and the papers of Edna St. Vincent Millay.

In addition to its own world-wide acquisitions programs, the Library acquires nearly 2,000,000 publications a year from 8 foreign countries for some 300 American libraries through U. S.-owned foreign currencies under Public Law 480 as amended. Under the Higher Education Act of 1965, the Library also launched the National Program for Acquisitions and Cataloging (NPAC) in 1966 to solve a national cataloging problem in research libraries by obtaining all foreign books of value to scholarship and cataloging them promptly for all libraries needing such catalog data.

By fiscal 1968, the Library was obtaining foreign cataloging information from 20 countries for use in publishing the Library's famous 3 x 5 printed catalog cards. As part of its automation program, the Library also is distributing machine-readable cataloging (MARC) on magnetic tapes to libraries subscribing to this service.

Tours in the Library of Congress begin at the office of the Captain of the Guard, Main Building, Monday through Friday.

Thomas Jefferson Memorial

The Thomas Jefferson Memorial stands on the south shore of the Tidal Basin in West Potomac park. It is a circular stone structure, with Vermont marble on the exterior and Georgia white marble inside and combines architectural elements of the dome of the Pantheon in Rome and the rotunda designed by Jefferson for the University of Virginia. The central circular chamber, 86.3 ft. in diameter, is dominated by a full-length figure of Thomas Jefferson 19 ft. tall, by the American sculptor Rudolph Evans. The architects were John Russell Pope and his associates Otto R. Eggers and Daniel P. Higgins. The Memorial was dedicated by President F. D. Roosevelt Apr. 13, 1943, the 200th anniversary of Jefferson's birth.

The exterior is surrounded by a peristyle of 26 Ionic columns, each 41 ft. tall, and 5 ft. 3 in. in diameter. Exterior of the dome is 95 ft. 8 in. from the floor. The interior columns are each 5 ft. in diameter and 39 ft. 2 in. tall. The Me-

morial stands on a circular stylobate of steps and terraces 183 ft. 10 in. in diameter.

On the pediment over the portico is a sculptured group by Adolph A. Weinman showing Jefferson standing before the committee appointed by the Continental Congress to draft the Declaration of Independence. On the interior walls are four panels with inscriptions from Jefferson's writings: (1) sentences from the Declaration; (2) the right of man to a free mind and liberty of religious opinion; (3) the duty of the state to bring bodily freedom and education to the common man; (4) the need of changes in laws and institutions to keep step with progress of the human mind and new circumstances. On the frieze of the main entablature are Jefferson's lines: "I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man."

The Memorial is open daily from 8 a.m. to midnight, except Christmas Day.

John F. Kennedy Center

John F. Kennedy Center for the Performing Arts, under construction on an 18-acre site on the Potomac River, is the sole official memorial to Pres. Kennedy in the capital and is expected to open in 1970. Financed by both Government and private funds, the marble building designed by Edward Durell Stone will house a 2,200-seat opera hall, a 2,700-seat concert hall, a 1,100-seat theater, a 500-seat studio playhouse, and other facilities. The building will be 630 ft. long, 300 ft. wide, 100 ft. high.

Lincoln Memorial

The Lincoln Memorial in West Potomac Park, on the axis of the Capitol and the Washington Monument, consists of a large marble hall enclosing a heroic larger-than-life statue of Abraham Lincoln sitting as if in meditation on a large armchair. It was dedicated on Memorial Day, May 30, 1922. The Memorial was designed by Henry Bacon. The statue was made by Daniel Chester French. Murals and ornamentation on the bronze ceiling beams are by Jules Guerin.

The Memorial built on bedrock, is of white Colorado-Yule marble. It is 79 ft. 10 in. tall and is approached by a flight of steps 80 ft., 3 in. wide. The east and west walls are 155 ft., 6 in. long, and the north and south walls are 85 ft., 8 in. wide. The walls are enclosed by a continuous colonnade, 188 ft., 4 in. long and 118 ft., 6 in. wide. There are two Doric columns at the entrance and 36 others in the colonnade, each 44 ft. tall, 7 ft. 4 in. in diameter at the base, and the frieze above 36 columns bears the names of the 36 states existing at the time of Lincoln's death. On the attic parapet are recorded names of the 48 states existing in 1922.

Inside are three memorials to Lincoln. The seated figure of Lincoln is 19 ft. from head to foot and the classic armchair is 12½ ft. tall. Over the back of the chair a flag is draped in marble. The statue was fashioned out of 28 blocks of Georgia white marble.

On the north wall is inscribed the Second Inaugural Address. On the south wall is the Gettysburg Address.

Greek Ionic columns 50 ft. high and 5 ft. 6 in. in diameter at the base divide the interior of the Memorial into three chambers. The walls of the interior are Indiana limestone, and the ceiling, 60 feet above the floor, is designed with bronze girders ornamented with laurel and oak leaves. The panels between the girders are of Alabama marble saturated with melted beeswax to produce translucency. The interior floor and the wall base are of pink Tennessee marble. The central chamber, containing the statue, is 58 ft. wide and 74 ft. deep. The cost of the Memorial was \$2,957,000 and of the statue \$88,400.

The Memorial is open daily from 8 a.m. to midnight, except Christmas Day.

Mount Vernon

Mount Vernon on the south bank of the Potomac, 16 miles below Washington, D. C., is part of a large tract of land in Northern Virginia which was originally included in a royal grant made to Lord Culpepper, who in 1674 granted 5,000 acres to Nicholas Spencer and John Washington. The division between Spencer and Washington put John Washington's son Lawrence in possession of the Washington half in 1690. Later it became the property of Lawrence Washington's son Augustine, the father of George Washington.

The present house is an enlargement of one apparently built on the site of an earlier one by Augustine Washington, who lived there 1735-1738. His son Lawrence came there in 1743, when he re-

named the plantation Mount Vernon in honor of Admiral Vernon under whom he had served in the West Indies. Lawrence Washington died in 1752 and was succeeded as proprietor of Mount Vernon by his half-brother, George Washington.

To Mount Vernon in 1759 Washington brought his wife, Martha Dandridge Custis, having previously enlarged the house from 1½ to 2½ stories. Here he cultivated a farm and employed a shoemaker, a tailor, a dozen textile workers and other help. Just before the Revolution he planned additions, and when he was called away to war his kinsman Lund Washington supervised the work, which was completed after Washington returned in 1783. During the Revolution Washington visited Mount Vernon only twice, on the way to and from Yorktown in 1781. His wife often stayed with him at headquarters. He returned to the house on Christmas Eve, 1783. In 1789 he left to become President and lived in New York and Philadelphia, with brief visits to the plantation. He came back in 1797 and died in Mount Vernon Dec. 14, 1799. He was buried in the old family vault. He had made plans for a new burial vault and this was built in 1831. Both his remains and those of Martha, who died in 1802, were transferred there.

Mount Vernon was left to Washington's nephew, U. S. Supreme Court Justice Bushrod Washington, and by him to his nephew, John Augustine Washington, whose son, John A. Washington, Jr., was the last private owner. In 1853, when the place was run down, Miss Ann Pamela Cunningham of South Carolina organized the Mount Vernon Ladies' Assn., which bought the mansion and 200 acres, since extended to 487 acres. The Association reassembled original Washington furniture and repaired the buildings. It restored the kitchen garden, flower garden and experimental botanical garden, reconstructed the greenhouse and built a museum. Several trees planted by Washington still exist, and the boxwood dates from 1798.

The Association preserves house and tomb with the visitor's fee. The Regent of the Mount Vernon Ladies' Association is Mrs. Francis F. Beirne. About 30 states are represented by vice regents. The Resident Director is Chas. C. Wall; the assistant to the Director is Walter C. Densmore.

National Archives

The Declaration of Independence, the Constitution of the United States and the Bill of Rights are now enshrined in the National Archives Exhibition Hall. They are sealed in glass-and-bronze cases filled with inert helium gas. They can be lowered at a moment's notice into a large shock-proof and fireproof safe.

Readable facsimiles of the three documents are available in an inexpensive 16-page publication. Charters of Freedom, and other historical documents are also available. Certain records of research value are available on microfilm.

The National Archives and Records Service is a part of the General Services Administration. It consists of the Offices of the National Archives, Administration and Technical Services, Federal Records Centers, Records Management, the Federal Register, and Presidential Libraries. The last-mentioned Office administers the Franklin D. Roosevelt Library at Hyde Park, N. Y., the Harry S. Truman Library at Independence, Mo., the Dwight D. Eisenhower Library at Abilene, Kan., and the Herbert Hoover Library at West Branch, Iowa. The John Fitzgerald Kennedy Library in Boston, Mass., and the Lyndon Baines Johnson Library in Austin, Tex., also will be administered by the National Archives and Records Service when they have been completed.

The National Archives is headed by Dr. James B. Rhoads, Archivist of the United States.

National Gallery of Art

The National Gallery of Art, situated on the area bounded by Seventh Street, Constitution Avenue, Fourth Street, and Madison Drive on the Mall in Washington, D. C., was established by Joint Resolution of Congress Mar. 24, 1937 and opened Mar. 17, 1941. Attendance during fiscal 1967 was 1,577,108.

The building, costing about \$15,000,000, was erected with funds given by the late Andrew W. Mellon. It was completed under the direction of Paul Mellon, Donald D. Shepard, and David K. E. Bruce, trustees of the A. W. Mellon Educational and Charitable Trust. The architects were John Russell Pope and associates, Otto R. Eggers and Daniel Paul Higgins. The building is of rose-white Tennessee marble, 785 feet long.

The central architectural feature of the Gallery

is the rotunda, covered with a coffered dome supported by 24 columns of dark green marble. The diameter of the rotunda and the height of the dome from the marble floor both measure 100 feet. Flanking the rotunda on either side are two long galleries for larger pieces of sculpture. At the end of each of these galleries is a garden court, with a colonnade of 16 monoliths of Indiana limestone. In the center of each court has been installed a 17th Century fountain from the park of Versailles. Across from the Gallery on Constitution Ave. is the Andrew W. Mellon Memorial Fountain, designed by Eggers and Higgins, dedicated 1952.

In addition to providing the building, Andrew Mellon also gave his collection, consisting of 126 paintings and 26 pieces of sculpture, the latter largely from the Dreyfus Collection. The paintings cover the various European schools from the 13th Century to the 19th, and include such masterpieces as Raphael's *Alba Madonna*, the *Niccolini-Copper Madonna*, and St. George and the Dragon; Van Eyck's *Annunciation*, Botticelli's *Adoration of the Magi*; nine Rembrandts, and three Vermeers. Twenty-one paintings came from the Hermitage in Leningrad. Also in this collection are the Vaughan Washington, by Gilbert Stuart, and the Washington Family, by Edward Savage.

The Samuel H. Kress Collection of paintings in the National Gallery at its opening in 1941 included Giorgione's *Adoration of the Shepherds*, Raphael's portrait of *Bindo Altoviti*, *Madonna by Giotto*, and 9 paintings by Giovanni Bellini. Later additions include the great tondo of the *Adoration of the Magi* by Fra Angelico and Fra Filippo Lippi, the *Lacoon* and the early Christ Cleansing the Temple by El Greco, and fine examples by Giorgione, Titian, Grünewald, Dürer, Memling, Bosch, Pieter Bruegel the Elder, Juan de Plandel, Francois Clouet, Poussin, Watteau, Chardin, Boucher, Fragonard, David and Ingres. Also included are a number of masterpieces of sculpture, especially of the Italian and French schools.

The Jos. E. Widener Collection of over 100 paintings includes 14 Rembrandts, 8 Van Dycks, 2 Vermeers and examples of Italian masters; also Renaissance and French sculpture and examples of the decorative arts.

The Chester Dale Collection includes masterpieces by El Greco, Zurbarán, Boucher, Manet, Cezanne, Renoir, Monet, Modigliani, Pissarro, Degas, van Gogh, Gauguin, Toulouse-Lautrec, Matisse, Picasso, Braque, and a group of American paintings, sculpture, prints and drawings.

Many other masterpieces have been donated by foundations and individuals, and the names of Booth, Bliss, Carstairs, Frelinghuysen, Havemeyer, Hutton, Lewisohn, Timken, Whitney and Garbisch are prominent in the lists. Lessing J. Rosenwald has given over 20,000 prints and drawings.

Acquisition announcements for recent times by all museums were overshadowed by the disclosure on Feb. 20, 1967 of the purchase of America's first painting by Leonardo da Vinci. No other generally acknowledged painting by Leonardo is known to exist outside Europe. The famous picture of the Florentine woman Ginevra de'Benici was purchased from the ruling house of Liechtenstein by the National Gallery for an undisclosed sum that is believed to be the highest in the history of art. (Reportedly over \$5,000,000.) After being reframed, the two-sided wooden panel painting was placed on view Mar. 17.

The Index of American Design, at the National Gallery of Art, is a collection of about 17,500 water color renderings and photographs of American crafts and folk arts. The Library has about 36,000 books and pamphlets.

The Gallery's Extension Service lends slide lectures, exhibits and other materials without charge to schools and groups throughout the nation.

Open every day except Christmas and New Years. Hours 10 a.m. to 5 p.m. weekdays, 2 p.m. to 10 p.m. Sundays. Summer hours: April 1 through Labor Day, 10 a.m. to 9 p.m. weekdays, 12 noon to 10 p.m. Sundays.

National Geographic Society

The National Geographic Society, founded in 1888 "for the increase and diffusion of geographic knowledge," is the world's largest nonprofit scientific and educational institution. The Society produces the illustrated monthly *National Geographic*, books, maps, globes, atlases, other educational materials, and television programs. Its worldwide activities are supported by the dues of more than 6,100,000 members.

The Society's new 10-story headquarters building in Washington, D. C., dedicated by President Johnson in 1964, has attracted more than 2,000,000

visitors. Explorers Hall offers exhibits, artifacts, and mementoes depicting the research and exploration activities of the Society around the world.

In 1967, construction was started on the Society's new Membership Center Building on a 100-acre tract near Gaithersburg, Md. The five-story building, expected to be occupied in late 1968, will accommodate 1,100 employees charged with handling membership files, correspondence, changes of address, receipt of dues, and other clerical operations. Each floor will be more than 7 times the size of an average city lot.

Executive officers are: Melville Bell Grosvenor, editor-in-chief and chairman of the Board of Trustees; Thomas W. McKnew, advisory chairman of the Board; Melvin M. Payne, president of the Society; Hilleary F. Hoskinson, treasurer; Frederick G. Vosburgh, vice president and editor; Leonard Carmichael, vice president for research and exploration; Robert E. Doyle, vice president and secretary; Thomas M. Beers, vice president and associate secretary; Gilbert M. Grosvenor, vice president and associate editor.

The Pentagon

The Pentagon is the world's largest office building. It is situated on the Virginia side of the Potomac River, and covers 34 acres, including a 5-acre center court. It houses personnel of the Dept. of Defense, which includes the Depts. of the Army, Navy and Air Force. The Secretary of Defense, the Secretaries of the three departments and the military Chiefs of Staff have offices here. The building does not accommodate all the personnel of the Dept. of Defense.

The Pentagon was completed Jan. 15, 1943, at a cost of about \$83,000,000. It covers 34 acres and has 204 acres of lawns and terraces. It is 5 stories high and consists of 5 rings of buildings connected by 10 corridors, with a 5-acre pentagonal court in the center. Each of the outermost sides of the building is 921 ft. long and the perimeter is seven-eighths of a mile. Total length of corridors is 17½ miles. There is a mezzanine below the first floor and a partial basement below that.

Population is 27,000, 60% civilians. Parking space, 67 acres, can hold 10,000 cars.

Many facilities for daily use, such as bank, drug store, medical and dental clinics, ticket agency, are located in the Pentagon. It has a switchboard console with approx. 175,000 calls a day over 30,000 phones. It has 4,200 clocks, 685 water fountains, 1,900 toilets and 280 rest rooms and 672 hose cabinets for fire protection.

Some of the workers eat 2 or 3 meals in the building. A staff of over 600 prepares and serves meals from 3 kitchens to 2 dining rooms, 6 cafeterias, 9 beverage bars and an outside snack bar. During an average day Pentagon personnel consume about 30,000 cups of coffee, 2,255 quarts of milk and milk products and 5,000 soft drinks.

Smithsonian Institution

Smithsonian Institution is one of the world's great historical, scientific and cultural establishments. It comprises numerous facilities, mostly in the metropolitan Washington area. It was founded by an Act of Congress in 1846, pursuant to a bequest of James Smithsonian, a British scholar-scientist, to the United States to found at Washington "an establishment for the increase and diffusion of knowledge among men." The Smithsonian, ever since its founding, has been a center for basic scientific research; it is also the largest museum-gallery complex in the world. More than 18,000,000 persons visited its halls in fiscal 1967. S. Dillon Ripley became the 8th secretary of the Smithsonian Feb. 1, 1964.

The Museum of History and Technology. On Jan. 22, 1964, President Lyndon B. Johnson dedicated this museum. More than 5,000,000 visitors stream into the museum annually to enjoy the permanent, special and visiting exhibits illustrating the cultural and technological development of the United States. The museum consists of 3 floors of exhibitions, and convenient food facilities for its visitors in the basement. In the rotunda the visitor will find the original Star-Spangled Banner. The Growth of the United States exhibit portrays American civilization from its inception to modern times and includes such items as an early 18th-Century printing press used by Benjamin Franklin, a portion of a 17th-Century house from Ipswich, Mass., Eli Whitney's model of the cotton gin, the locomotive John Bull, a uniform worn by Gen. George Washington and the writing desk on which Thomas Jefferson drafted the Declaration of Independence. Large exhibits in-

clude Petroleum Hall, the history of transportation, machine and hand tools, American political and military history, numismatics, philately, ceramics and glass, heavy machinery, timekeeping, physical and medical sciences, graphic arts and electricity.

The Museum of Natural History abounds in the fields of natural history—zoology, botany, geology, paleontology and anthropology. The Hall of Asia, Africa and the Pacific contains exhibits illustrating aspects of the life and cultures of Southeastern Asia, India, Australia, New Zealand, the Pacific Islands and Africa. Exhibits include fossil plants and invertebrate animals, fishes, amphibians, dinosaurs, primitive reptiles, mammals in North America. Here also are animals collected by Theodore Roosevelt on his 1910 African safari, the Hall of Birds, the Fenykovi Elephant and the Hall of Gems and Minerals, including the 44½ carat blue Hope diamond.

The National Collection of Fine Arts, in its first permanent home in 122 years, opened its doors in 1968 in the renovated Old Patent Office Building, noted for its classical Greek architecture. In addition to its Two-Century Survey of American Art, there are special and loan exhibits of American sculpture and painting. The museum also sends the work of American artists abroad and exhibits the art of other countries.

The National Portrait Gallery, a new museum, traces America's history through the portraits of its people, in paintings, sculpture and photographs.

The Renwick Gallery, in process of restoration to be completed by early 1969, will house American arts, crafts and design.

The Joseph H. Hirshhorn Museum and Sculpture Garden, still in the planning stage, will house works in the Hirshhorn collections donated to the Smithsonian in 1966.

The National Zoological Park is noted for its outstanding collection of small mammals and for its pigmy hippopotamuses, which are on the endangered list. It also has the only white tiger in the Western hemisphere, and the only Komodo dragon, the largest species of lizard.

The Astrophysical Observatory in Cambridge, Mass., performs research in 9 principal areas: radio astronomy; gamma-ray astronomy; meteorites and cosmic dust; theoretical astrophysics; optical observatory and observation; flight experiments; planetary and lunar science; meteors and comets; historical astronomy.

The Smithsonian Institution Press publishes books and scholarly papers in natural science, anthropology, history, astrophysics, geology, art.

The Freer Gallery of Art, the gift of Detroit industrialist Charles Lang Freer, is an outstanding center for research in the art of the Far and Near East. Major new accessions are added annually. The gallery also houses the Whistler Peacock Room and his etchings and paintings.

The Science Information Exchange was established to aid in closing the information gap between the time when a research project is started and when its results are published in scientific journals. Information on the scientist, his organization, and the subject on which he is working can be rapidly retrieved from the Exchange's computer system.

The Smithsonian Institution Traveling Exhibition Service (SITES) aids museums, libraries, universities, and other educational institutions in the development of their exhibition programs. In 1967, 108 exhibitions were sponsored.

The National Air and Space Museum. Pending new construction, the Arts and Industries building and the temporary Air and Space building house the historic Wright Brothers' airplanes, Charles A. Lindbergh's "Spirit of St. Louis," space satellites and missiles.

Cooper-Hewitt Museum of Design, in New York City, was formerly the Cooper Union Museum for the Arts of Decoration. It officially became a component of the Smithsonian on July 1, 1968.

Washington National Monument

The Washington National Monument is a tapering shaft or obelisk of white marble, 555 feet, 5½ inches in height and 55 feet, 1½ inches square at the base. Eight small windows, two on each side, are located at the 500 foot level, where Washington points of interest are indicated.

The erection of the monument by the Washington National Monument society with funds obtained by popular subscription was authorized by Congress in 1848. The cornerstone was laid July 4

of the same year. Work progressed slowly until 1854 when \$300,000 had been subscribed and 156 feet of the shaft erected. In that year the enterprise became controversial and contributions ceased. Work was resumed in 1880 at Government expense by the Corps of Engineers.

The capstone weighs 3,300 lbs. and was placed Dec. 6, 1884. The monument was dedicated Feb. 21, 1885, and opened Oct. 9, 1888. It weighs 81,120 tons. It is dressed with white Maryland marble in 2-ft. courses. The first 150 ft. are backed by rubble masonry. From that point to 452 ft. Maine granite was used as backing, and above 452 ft. marble was used. The face of the monument is marble, the first 5 courses from Sheffield, Mass., the rest from Maryland. Set into the interior wall are 190 memorial stones from states, foreign countries and organizations. An iron stairway has 50 landings and 898 steps. A modern elevator takes sightseers to the 500-foot level in one minute, compared with 12 "precarious minutes" in 1888.

The Monument is open 8 a.m. to 11 p.m. from March 20 to Labor Day, and 9 a.m. to 5 p.m. the rest of the year. It is closed Christmas Day.

Famous Churches

The National Shrine of the Immaculate Conception, at Fourth St. and Michigan Ave., NE, Washington, D. C., is the largest Catholic Church in the United States and the 7th largest in the world. Built by all the Bishops and Catholics of the U. S., it honors the Blessed Virgin Mary as Patroness of the United States. The Shrine is impressive not only in size but also in beauty, its blue and gold dome and soaring bell-tower having become Washington landmarks. Open daily from 7 a.m. to 8 p.m., Sunday masses, 7, 8, 9, 10, 11 a.m. and noon, 1:15 and 4:30 p.m. Free guided tours are on the half-hour 9 a.m. to 5 p.m., daily—Sunday tours 2 p.m. to 4 p.m. Carillon concerts Sat. and Sun. 3:30 p.m. (except May through Aug. at 6:30 p.m.). Organ recitals every Sun. at 7:30 p.m. (May through Aug.).

Washington National Cathedral, Massachusetts and Wisconsin Aves., NW, is atop Mt. St. Alban, the highest point in Washington, D. C. It is the seat of the Presiding Bishop of the Episcopal Church and of the Bishop of Washington. Started in 1907, it is only three-quarters complete, and when finished in 1985 is expected to be the 6th largest church in the world. Notables buried in the Cathedral include Woodrow Wilson, Adm. George Dewey, Cordell Hull and Frank B. Kellogg. The Cathedral is considered one of the finest examples of Gothic architecture in the country. On its 57 acres are the Bishop's Garden and Herb Cottage and five educational institutions.

Several Protestant churches commemorate the association of Presidents with their congregations. St. John's Episcopal Church, across Lafayette Sq. from the White House, designed by Benj. Latrobe in 1815, was regularly attended by Madison and F. D. Roosevelt and at times by other Presidents. New York Ave. Presbyterian Church, 1313 New York Ave., NW, preserves the pew in which Lincoln sat, also an original manuscript of the first draft of his first proposal to abolish slavery. Church rebuilt on same site in 1950-51.

President Eisenhower became a member of the National Presbyterian Church Feb. 1, 1953. The Church buildings were located then at Connecticut Ave. at N St., NW. The cornerstone for the new National Presbyterian Church and Center was laid by former President Eisenhower on his 77th birthday, Oct. 14, 1967. The main Chapel will be known as "The Chapel of the Presidents" in tribute to Dwight D. Eisenhower. The Chapel will contain the pew occupied by Pres. and Mrs. Eisenhower, and 15 or 16 other pews occupied by, or assigned to, former Presidents. It is under construction on a 12½-acre tract at Nebraska Ave. and Van Ness St., NW, and will incorporate all of the historical elements from the preceding buildings. This church was founded on two historic congregations, the First Presbyterian Church, which originated in a carpenter shop on the White House grounds in 1795, and the Church of the Covenant, formed in 1883. The old President's pew, brought from the First Church, was occupied by Presidents Jackson, Polk, Pierce, Buchanan, and Cleveland. Other pews were used by Presidents Grant and Benjamin Harrison.

The Islamic Center, 2551 Massachusetts Ave., NW. A magnificent monument of Islamic culture and outstanding landmark for visitors, a Mosque for worship, and an Institute for higher study of Islamic culture.

Few Know Why Famous Mason-Dixon Line Was Drawn

The Mason-Dixon Line, drawn over 200 years ago, is probably America's most famous boundary—yet few know why it was established.

In popular belief, the boundary separated Confederate States from the Union during the Civil War. It remains the symbolic division between South and North.

The line was drawn earlier, however, to end a bitter colonial land dispute, the National Geographic Society says. Completed in 1767, the line extends from east to west between Pennsylvania and Maryland, with a shorter branch reaching southward then east between Maryland and Delaware. All three states were on the Union side.

The English surveyor-astronomers Charles Mason and Jeremiah Dixon wound up four years of arduous work in the summer and fall of 1767. Working westward through wilderness, they reached the "top of the Great dividing Ridge of the Alleghany Mountains" in July.

The Englishmen and their assistants and guides, all fearful of Shawnee and Delaware Indians, reached the so-called War Path on Oct. 9. The Indians with them refused to go any farther. Thus a point 230 miles 18 chains and 21 links from the beginning of the line formed its western terminus.

The boundary controversy flared in the mid-1600s when the Dutch Government and the Calverts of Maryland both claimed the big fertile peninsula between the Delaware and Chesapeake Bays.

After the Dutch were pushed out of the region.

William Penn inherited the dispute. The bickering, kindled by conflicting interpretations of the Penn and Calvert charters, continued for generations.

At last the case came before England's Court of Chancery. A compromise decision gave Maryland the bulk of the peninsula. Pennsylvania retained the northeast portion that later attained independence as Delaware State.

The American disputants signed the agreement in 1760, and work was begun by local surveyors. They made so little progress that Mason and Dixon were invited to the Colonies to "mark, run out, settle, fix, and determine" the line. Mason, 35, was assistant astronomer at England's Greenwich Observatory. He recently had been abroad with Dixon, 30, a quiet-mannered Quaker, to observe a transit of Venus.

Mason and Dixon arrived in Philadelphia in 1763. They set to work checking and correcting the peninsula lines, then took the westward trail with a large party of assistants, axmen and guides.

Handsome boundary stones, inscribed with the arms of Penn and Calvert on opposite sides, were set at five-mile intervals. Simpler intermediary stones bore the letters P and M.

The 4-year project cost \$75,000. When Mason and Dixon sailed back to England, they left behind them the largest engineering-surveying achievement of 18th-century America. The job they did in trackless wilderness with crude instruments was astonishingly accurate. Modern surveyors have found a difference in latitude of only 2.3 seconds (232 feet) from the Mason-Dixon figure.

From the Prime Minister of Canada:

The World Almanac has been in publication for just a year less than Canada has been a nation. In 1868 it was a slim volume indeed, but the facts and figures of the 20th Century have built it into a robust tool of reference.

For Canadians, the 1969 edition of the World Almanac will be particularly significant. A special section on Canada has been added, and the city section now includes material from 9 major Canadian cities.

In thus serving as a Canadian as well as an American reference work, the World Almanac takes on a truly North American character and is another reflection of the intimate relationship which exists between our two countries.

We welcome the 1969 edition of the World Almanac to the Canadian scene.

Pierre Elliott Trudeau
Prime Minister of Canada

Canada—A Nation Come of Age

See Index for Calgary, Edmonton, Montreal, Ottawa, Regina, Saskatoon, Toronto, Vancouver, Winnipeg.

Capital: Ottawa. Area: 3,851,899 sq. mi. Population (Govt. est. July 19, 1968): 20,789,390. Monetary unit: Dollar (1.0781 per U. S. \$1).

Canada stood, at the threshold of 1969, as one of the world's leading industrial and political states. Its people felt a new pride and purpose as the country's social and cultural achievements began to catch up with its potential and its promise.

At the beginning of this century, the famed Canadian Prime Minister, Sir Wilfrid Laurier, proclaimed that "the 20th Century belongs to Canada." He was undoubtedly thinking that while Canada had been forged into a nation by the 1867 act of Confederation which united 4 of the British colonies of North America, the land was still sparsely settled and only modestly productive. The neighboring United States had survived a great Civil War and had emerged stronger than ever, pushing its borders to the Pacific Coast. Canada at the beginning of the 20th Century also had become a continental state extending from Atlantic to Pacific; now the challenge was to fill in the immense emptiness of its heartland.

World War I, while it began an industrial expansion which goes on to this day, drained off much of the best young blood of the nation; its young men either did not come back at all from the battlefields of Europe, or came back tired and shell-shocked, in no condition mentally or physically to conquer new frontiers. The brief prosperity of the 1920s faded quickly in the dust bowls of the '30s, a decade which virtually depopulated much of the prairie provinces and which was followed by an even greater World War.

But the second war let loose new creative energies at home; returning soldiers vowed that the Canada they had fought for would this time be rebuilt, that time would not again drag endlessly on with little achievement or accomplishment.

World War II had fired the furnaces of Canadian industry, had seen a million men and women take up arms in the nation's defense, and had shown Canadians that their country was no insignificant British colony lost in the mainstream of North American development.

A vast natural resources boom echoed through the empty forests and mountain ranges in the 1950s. On the Pacific Coast, a great chain of rivers and lakes was reversed to flow backwards through the mountains and so power electric generators for the vast aluminum smelters of Kitimat. Oil wells sprouted like some new crop on the prairies; in Alberta oil gushed and gurgled out of wheat fields and poured so much wealth into the province's treasury that it became one of the few (if not only) debt-free governments in North America, and which to this day doesn't have a sales tax.

Canada shared with the U. S. the construction of the St. Lawrence Seaway and after years of stops and starts finally completed the 4,860-mile Trans-Canada Highway, longest in the world.

Immense iron ore developments in Labrador paved the way for the harnessing of Churchill Falls, a mighty cataract whose energy will soon help light the electric bulbs of New York City. Uranium deposits which rank among the world's largest were developed in Ontario. More secondary

industry was added to the picture in the 1960s so that the Canadian living standard today rivals that of Sweden and the U. S. and in some respects, exceeds all the rest of the world.

Population, through natural growth and encouragement of immigration, passed the 20,000,000 mark for Canada's 1967 Centennial and stood, according to official government estimate, at 20,789,390 on July 19, 1968, the day the Bureau of Statistics unveiled in Ottawa a "pop clock"—an electric clock ticking off the population changes minute by minute.

The 1967 Centennial was immensely successful, featuring such special events as Expo '67 in Montreal, and the results left it clear to Canadians that their nation had come of age.

Canadians recognized that, while the country faced many problems, not the least of them a resolution of its political and economic ties with the U. S., their land was nevertheless favored by history and geography as perhaps no other country on earth.

CANADA: THE OUTLINES. Second largest nation in the world, Canada extends north from the U. S.-Canadian boundary to the North Pole. It includes all the islands of the Arctic from near Greenland to near the Alaska border. Its seacoast, one of the longest in the world, comprises 17,860 mi. of mainland and 41,810 mi. of islands. The 3,986-mi. border between Canada and the U. S. has been unfortified for more than a century. Canada's southernmost point, Point Pelee in Lake Erie, is further south than is the California-Oregon border.

Canada's continental climate, while generally temperate, includes extremely cold winter weather through the prairie provinces and much of Ontario and Quebec. British Columbia and the Atlantic provinces, where the weather is moderated by the oceans, are milder.

Beginning on the West Coast, the Pacific region is a mountainous area which includes the Rockies. The prairie region extends from there to the Great Lakes. Ontario and Quebec are areas of forest and farmland, while the Atlantic coast region has gently rolling valleys and hills. A great sweep of the nation, stretching through northern Quebec and Ontario and glancing off Lake Superior to run out across the plains and into the northern territories, is known as the Canadian Shield, where past ice ages scraped most soil and vegetation off the land.

This is the world's oldest surface rock, and it is among these outcroppings that most Canadian mining discoveries have been made, including gold, uranium, lead, silver, zinc and iron ore.

A NATION'S STORY. French explorer Jacques Cartier is generally regarded as the founder of Canada, although his 1534 voyage up the St. Lawrence followed by 37 years the 1497 sighting of Newfoundland by Italian navigator John Cabot, sailing for the English king. Even further back, as increasing evidence being unearthed today shows, the Vikings sailing from Scandinavia or the northern islands had reached Newfoundland and Canada's Atlantic Coast.

The French pioneered Canadian settlement, with the result that today about one-third of the nation remains of French descent. Quebec was

For Population and Area of Canada by Provinces see index.

settled in 1608, Montreal in 1642 and New France became a colony in 1663.

Britain and France clashed over the Canadian colony as a result of European rivalries and British expansion from the original American colonies. Britain obtained Acadia (later Nova Scotia) in 1713 and the Acadian expulsion followed in 1755.

Britain obtained control of the rest of New France in 1763 by the settlement of the Seven Years' War in Europe, the North American phase of which saw French and Indian tribes (except some Iroquois) fighting the British and American colonists.

However, by terms of the peace the French were guaranteed their language, religion and civil rights. This is regarded as one of the main reasons why French Canadian settlers did not join American colonists farther to the south in the War of Independence in 1776.

Following the American War of Independence, many settlers loyal to Britain moved north to the Canadian territories; the chief influx became known as United Empire Loyalists.

Years of relative peace, highlighted by trans-continental exploration, followed. Alexander MacKenzie scrawled on a rock washed by the Pacific "From Canada, by land, 1793." An elected legislative assembly was permitted in 1791. The peace, however, was interrupted by the War of 1812. The war ended in stalemate, but not before heavy battles had been fought in Upper Canada—the last military action ever to occur on Canadian soil.

Political agitation for more democratic government culminated in ill-fated rebellions led by William Lyon Mackenzie in Upper Canada (Ontario) and Louis Joseph Papineau (Lower Canada) in 1837. It was not until complete democratic freedom was won in 1867 with the passage by the British Parliament of the British North America Act, that a start was made in uniting the various British colonies into a self-governing Canadian Confederation.

Since then, Canada has remained a self-governing nation in what was the British Empire and is now the Commonwealth.

CANADA: ITS HOW AND WHY: Essentially, the Queen reigns but does not rule over her Canadian domain. The Queen's representative in Canada and Head of State is the Governor-General, chosen by the Federal Cabinet.

Under Canada's parliamentary system, modeled on the British system, the party securing the largest number of seats in elections to fill the House of Commons forms the government. The party leader, who becomes Prime Minister, chooses his Cabinet from members of the House of Commons (and sometimes from the Senate, to which the Prime Minister holds exclusive rights to make appointments).

The system ensures that at no time will the Cabinet be of a different party than that which controls Parliament. No regular date is set for elections, as the government can call an election any time it chooses. Normally, however, elections are held every 4 years, or more often when no party has a clear majority in the House.

Because Canada is technically a monarchy, and yet also a North American democracy in which the trappings of monarchy are seldom seen, the country has been referred to as a "crowned republic."

Sentiment toward the ideas of a republic have

been growing in Canada and arise partly from the split between English-speaking and French-speaking Canadians. As might be expected, more French-speaking Canadians appear inclined toward the idea of making Canada a republic than do English-speaking Canadians. The proposal has been advanced that Canada could abolish its monarchical constitution and yet retain its parliamentary forms. Under such a scheme, the Governor General might remain Head of State.

Public opinion polls have shown in past years that as much as one-third of the electorate favored Canada joining the U. S. This element has declined sharply in recent years, however.

Under the British North America Act, which created the Canadian Confederation and remains as the country's constitution, certain rights were given over to the provincial governments with all remaining jurisdictions going to the Federal authorities.

The Federal Government is responsible for all matters of national concern, including defense and foreign affairs, banking and the money system, criminal law, transportation, and trade and commerce. Provinces are responsible for civil rights, education, direct taxation, hospitals, welfare and municipal institutions. Education is compulsory to age 16.

Government conferences have been held on proposals to effect constitutional change and it is expected that the British North America Act will ultimately be replaced or substantially modified by a Canadian-written constitution.

The Federal Government proposed that a "Charter of Human Rights" be written into the BNA Act as a constitutional guarantee of certain individual freedoms which now are protected only by common law and could be suppressed by legislation. Not all provinces were agreeable to this, however, and as civil rights are a provincial responsibility, little change could be effected under the present Act.

The greatest political problem facing Canada is the future role of French-speaking Quebec in Confederation. Beginning in the late 1950s, a "quiet revolution" transformed Quebec from a classical, semi-industrial society to a modern, progressive province in which the French majority has been securing greater control over the economy and tax structure. While most Quebec leaders based their appeal on remaining within Confederation, extremists such as former Quebec cabinet minister Rene Levesque demand complete independence. Levesque led a group of separatists to form a party dedicated to the secession of Quebec from Canada under some type of economic "common market."

The search for harmony between French and English-speaking Canadians was not limited to Quebec, however. French-speaking Canadians insisted on educational rights wherever in Canada they were in sufficient numbers to warrant such facilities. They also insisted on the right to deal with the Federal Government in their own language. All political parties have endorsed these proposals and a government royal commission on bilingualism and biculturalism has recommended further recognition of French culture across Canada. Canada is officially bilingual.

From 1962 to 1968, Canada had a series of minority federal governments as neither the Conservatives, led until 1968 by former Prime Minister John Diefenbaker, nor the Liberals, were

Canadian Winners Of The Victoria Cross

The Victoria Cross is Britain's highest military honor. It has been accorded to 94 Canadians since its inception in 1856. The cross was originally cast from metal of a Russian cannon captured during the Crimean War. Canadian winners in World War II:

Name	Unit	Theater of War & Date
Sgt. Mjr. J. R. Osborn	Winnipeg Grenadiers	Hong Kong, Dec. 19, 1941

able to gain a majority. The Liberals replaced the Conservatives in 1963 with Lester B. Pearson as Prime Minister.

Majority government returned in 1968 with the election of a Liberal government under Prime Minister Pierre Elliott Trudeau, 48-year-old "new look" politician.

Trudeau, whose personality captivated much of the nation, is of French-Canadian stock but is fluently bilingual and opposes any special status for his native Quebec Province.

The Undeclared Border. The biggest fact in Canadian life is the U. S. The two countries are each other's best trading partners. With closely related historic and racial backgrounds, they are also probably the world's closest allies.

However, many Canadians have become increasingly uneasy over the control by U. S. industry of large segments of the Canadian economy. This ranges from a bare majority in some fields up to nearly 100% in such important fields as auto manufacturing and the oil industry. Canadian governments have rejected policies which would discriminate against U. S. investment in Canada, recognizing the contribution such investment makes toward the nation's high living standards. But Canadians may well be encouraged to invest more themselves in their own industries to ensure that economic partnership does not turn into political partnership.

Tourists do not require visas or passports to visit back and forth between the two countries. U. S. immigration laws have been tightened in recent years, however, which is expected to reduce the number of Canadians emigrating to the U. S. There is now considerable movement the other way.

Canada and the World. Canadian foreign policy appears aimed primarily at supporting the Western alliance between Britain and the U. S., while developing increasing contacts with Communist countries. Substantial trade, especially in the sale of Canadian grain, is carried on with Communist China and the Soviet Union. There is also a steady trade with Cuba.

Canada was one of the original signatories to the UN and NATO but she has resisted invitations to join the Organization of American States. Foreign affairs are carried on by the Department of External Affairs, which in 1968 began a study of Canada's future role in NATO and of whether the country should recognize Communist China.

Canada also participates in NORAD (North American Air Defense agreement) in which the U. S. and Canada maintain joint air defenses involving the U. S. Air Force and the air branch of the Canadian Armed Services.

Defense is directed by the Department of National Defense, which in 1964 united the separate army, navy and air force into the Canadian Armed Forces. Army ranks were adopted for both naval and air branches. Combined strength in mid-1968 was about 110,000.

A MIXED ECONOMY. The Canadian economy features a blend of private ownership, public co-operatives, and government ownership. Electric utilities are owned by both provinces and municipalities in many areas, as are some telephone com-

panies. In Saskatchewan, automobile insurance is government-operated.

Air Canada, which operates throughout North America and in Europe, is government-owned while the competing Canadian Pacific Airlines, operating chiefly in the Pacific and Latin America, are privately-owned. The Canadian National Railway System is government-owned and the Canadian Pacific Railway Co. is privately owned.

In broadcasting, the chief radio-TV network, Canadian Broadcasting Corp., is government-owned. But many private stations carry its broadcasts, while an independent network, Canadian Television Network, also links other privately-owned stations.

SOCIAL WELFARE. There is a complex apparatus of social welfare in Canada. Most provinces and municipalities provide for welfare, or assistance payments for unemployed and others without income, including mothers' allowances. A program of contributory unemployment insurance provides benefits for most workers who become jobless. Allowances are paid to blind and disabled persons and workmen injured by accident receive compensation.

Two universal programs are the federally-sponsored Family Allowances, and Old Age Security. Under the former, monthly allowances of from \$6 to \$10 per month are paid to mothers for each child. Under the latter, minimum old age pensions of up to \$105 per month are paid to persons over 66; this will be lowered to 65 in 1970.

A contributory pension program, the Canada Pension Plan, was established in 1966, with workers paying in 2% of their earnings between \$600 and \$5000. Pensions are paid at age 65.

Two Canadian provinces, with others expected to join later, inaugurated universal medical insurance programs July 1, 1968. Government-sponsored hospital insurance programs have operated throughout Canada for many years.

AN ETHNIC DIVERSITY. Canadian citizenship policies have never been aimed at producing a "melting pot" or assimilating all immigrants. Rather, individual national ethnic groups are encouraged to maintain their identity while giving loyalty to an over-all Canadian unity.

There are about 80,000 persons of Negro descent, most of whom originated either in the U. S. or the West Indies or are descendants of immigrants from those areas. There are no immigration quotas, but prospective immigrants must meet educational and job standards to enter the country.

Canada has some 225,000 native Indians and some 13,000 Eskimos. The Eskimos, inhabiting the Arctic or sub-Arctic, seldom come in contact with large Canadian communities. Most Indians live on reserves where their lands are held in trust. However, the Federal Government has been charged with being sharply neglectful of the conditions and opportunities affecting these peoples and it is certain that increased efforts will be made to win for them a better role in Canadian life.

Canadian health standards are extremely high and public service and facilities are among the most advanced in the world. Air and water pollution is a growing problem, however.

The Government of Canada

Canada is a federal state and a constitutional monarchy whose Head of State is Queen Elizabeth, proclaimed Queen of Canada in 1952 as well as of the United Kingdom and her other realms. The Queen is represented in Canada, a self-governing member of the Commonwealth of Nations, by a resident Governor-General appointed by Her Majesty on the advice of the Canadian federal cabinet. The cabinet is drawn from members of the party holding the largest number of seats in the Canadian House of Commons and the Senate. The cabinet, together with the Governor-General, comprises the executive branch of the government with a Prime Minister as head of the government. Ottawa is the federal capital.

Head of State

Queen Elizabeth—Succeeded to throne 1952.

Governor-General—Rt. Hon. Roland Michener, appointed 1967.

The Cabinet

Sworn in July 6, 1968:

Prime Minister—Pierre Elliott Trudeau.
Government leader in the Senate—Sen. Paul Martin.

Minister of Transport, Acting Prime Minister—Paul Hellyer.

Secretary of State for External Affairs—Mitchell Sharp.

President of the Privy Council—Donald Macdonald.

Solicitor-General—George McIlraith.

Minister of Public Works—Arthur Laing.

Minister of Manpower and Immigration—Allan MacEachen.

President of the Treasury Board—Charles Drury.

Minister of Finance and Receiver-General—Edgar J. Benson.

Minister of National Defense—Leo Cadieux.

Minister of Industry, Trade and Commerce—Jean-Luc Pepin.

Minister of Forestry and Rural Development—Jean Marchand.

Minister of Energy, Mines and Resources—J. J. Greene.

Minister of National Revenue—Jean-Pierre Cote.

Minister of Justice and Attorney-General—John Turner.

Minister of Indian Affairs and Northern Development—Jean Chretien.

Minister of Labor—Bryce Mackasey.

Minister of National Health and Welfare—John Munro.

Secretary of State—Gerard Pelletier.

Minister of Fisheries—Jack Davis.

Minister of Agriculture—Horace Olson.

Minister for Veterans Affairs—Jean-Eudes Dube.

Minister of Consumer and Corporate Affairs—Ron Basford.

Postmaster-General, Minister of Communications—Eric Klerans.

Minister of Supply and Services—Donald Jamieson.

Minister without portfolio—Robert K. Andras.

Minister without portfolio—James Richardson.

Minister without portfolio—Otto Lang.

House of Commons

The House of Commons is the lower but more important body in Canada's bi-cameral Parliament. Members are elected to the 264 seats at federal elections held at least every five years; four years is the traditional term. The government of the day (the party with the most seats in the House) chooses the date of the election, with voting by universal suffrage over the age of 21.

The House of Commons is controlled by the government party through the cabinet. The business of the House, however, is directed by an impartial Speaker who until 1968 had always been a member of the governing party. In that year, by agreement between the two largest parties, the former Speaker, Lucien Lamoureux, successfully stood for election as an Independent and on resumption of Parliament, became the first non-party speaker.

Legislation becomes law by receiving three "readings" in the House of Commons, passing the Senate, or upper chamber, for approval, and ob-

taining Royal Assent from the Governor-General. Only in the House of Commons can legislation be introduced requiring the spending of public monies.

Hon. Robert L. Stanfield, leader of the Progressive Conservative party, is Leader of the Official Opposition in the House of Commons. Other opposition party leaders are T. C. Douglas of the New Democratic party (who failed to win a seat in the 1968 election) and Real Caouette of the Creditiste party.

1968 FEDERAL ELECTION

Party	Seats	% of Vote
Liberal	155	45.7%
Progressive Conservative	72	31.4%
New Democratic	22	17.2%
*Creditiste	14	4.4%
Independents	1	1.3%
TOTAL	264	100.0%

*French-Canadian splinter of Social Credit party, which failed to elect any members outside Quebec.

Seats Won in Federal Elections by Provinces, 1968

Party	B.C.	Alta.	Sask.	Man.	Ont.	Que.	P.E.I.	N.B.	N.S.	Nfld.
Liberal	16	—	2	5	88	74	—	5	1	1
Prog. Cons.	—	15	5	5	17	4	4	5	10	6
N.D.P.	7	—	6	3	6	—	—	—	—	—
Creditiste	—	—	—	—	—	14	—	—	—	—

Note: Liberals won Northwest Territory seat; Progressive Conservatives Yukon Territory seat. One Independent elected in Ontario.

The Senate

The Senate comprises 102 members appointed by the Prime Minister for life, but with automatic retirement at age 75. The British North America Act requires that membership be divided 24 to Quebec, 24 to Ontario, 30 to the Atlantic provinces, and 24 to the Western provinces.

Hon. Paul Martin is government leader in the Senate. Sen. Jacques Flynn, Prog. Cons., is leader of the Opposition in the Senate.

GOVERNORS-GENERAL

Since 1952, the Governors-General of Canada have been native-born, replacing the former practice of appointing distinguished Britons. Canadian-born appointees have been:

Rt. Hon. Vincent Massey 1952-1959
Gen. Rt. Hon. Georges Vanier ... 1959-1967
Rt. Hon. Roland Michener 1967-

Mayors of Canada's Largest Cities

Montreal	Jean Drapeau	Winnipeg	Stephen Juba	Quebec	Gilles Lamontagne
Toronto	William Dennison	Ottawa	Donald Reid	Edmonton	Vincent M. Dantzer
Vancouver	Tom Campbell	Hamilton	Victor Copps	Calgary	J. C. Leslie

Supreme Court of Canada

Canada's chief judicial bodies are the Supreme Court of Canada, which sits in Ottawa and hears civil and criminal appeals from lower courts, and the Exchequer Court of Canada which hears claims made by or against the Crown and also serves as a Court of Admiralty. The nine members of the Supreme Court and the five members of the Exchequer Court are appointed by the federal cabinet.

As the Supreme Court does not interpret legislation in respect to constitutional statutes (except to determine whether an act falls within the jurisdiction of a provincial or the federal government), it does not figure nearly as prominently in national life as does the Supreme Court in the United States. The Chief Justice of the Supreme Court of Canada is Hon. J. R. Cartwright.

Prime Ministers Since Confederation

Name	Party	Term
Sir John A. Macdonald	Conserv.	1867-1873, 1878-1891

Lester B. Pearson	Conserv.	
Pierre Elliott Trudeau	Liberal	1963-1968 1968-

Canada's Provincial Governments

Each Canadian province except one maintains a single legislative assembly, the exception being Quebec which also has an appointive Consultative Council. The parliamentary system applies in each province, the head of the government bearing the title of Premier (or Prime Minister in Quebec and Ontario). The Queen's representative in each province is a Lieutenant-Governor, appointed by the federal cabinet.

Province	Premier	Party Affiliation	Party in Power Since
Newfoundland	Joseph E. Smallwood	Liberal	1949
Prince Edward Island	Alexander Campbell	Liberal	1966
Nova Scotia	G. I. Smith	Prog. Cons.	1956
New Brunswick	Louis J. Robichaud	Liberal	1960
Quebec	Daniel Johnson	Union Nationale	1966
Ontario	John Robarts	Prog. Cons.	1943
Manitoba	Walter Weir	Prog. Cons.	1958
Saskatchewan	Ross Thatcher	Liberal	1964
Alberta	E. C. Manning	Social Credit	1935
British Columbia	W. A. C. Bennett	Social Credit	1952

Canadian Taxation Structure

The Government of Canada levies corporate and personal income taxes; old age security tax; excise (import) taxes; and a federal sales tax. Provincial governments levy personal income taxes and sales taxes. Municipalities levy commercial and private property taxes. Some rates:

Personal Income Tax

In all provinces except Quebec, taxpayers receive an abatement of their federal personal income tax equal to the amount of their provincial income tax. Quebec levies and collects its own income tax in addition to the federal levy. For a Canadian resident in most provinces, married, with two children, his basic tax rate will be as follows (slightly higher in Saskatchewan, Manitoba and Quebec):

Weekly Earning	Income Tax
\$ 75.00	\$ 3.55
100.00	8.45
125.00	13.95
150.00	20.80
175.00	27.20
200.00	34.20

Corporate Income Tax

The federal corporate income tax rate in Canada is 18 per cent on taxable income up to \$35,000 annually, and 47 per cent on any amount in excess of \$35,000. There is a federal abatement of 10 per cent on these taxes, but provincial corporate income taxes range from 10 to 12 per cent. In addition, there is a federal old age security tax of 3 per cent. These taxes provide a total corporate income tax, in Ontario as an example, of 23 per cent under \$35,000 and 52 per cent over \$35,000.

Sales Taxes

The federal sales tax of 12 per cent is applied at the wholesale level. Provincial sales taxes, mostly 5 per cent, are applied at the retail level. Alberta is the only province without a retail sales tax.

Canadian Postal Information

The Canada Post Office, reorganized in 1968 as part of the newly-created Department of Communications, employs more than 40,000 and operates more than 11,000 Post Offices.

Postal Rates

First Class

Five cents for the first ounce, 3¢ each additional ounce. Local delivery, 4¢ first ounce, 2¢ each additional ounce. Postcards, 4¢ to Canadian destinations.

Air Mail

All first class mail up to 8 oz. goes automatically by air at the standard rates where such will speed delivery. Air mail exceeding 8 oz. is 7¢ for the first oz. and 5¢ for each oz. after.

Printed Matter

Books, newspapers, magazines, etc. mailed by the public, including unsealed Christmas, Easter and other such greeting cards, 3¢ first two oz., 2¢ each additional 2 oz. up to 1 lb., 1¢ each additional 2 oz. over 1 lb.

International

Surface: To Great Britain and northern Ireland and other places in the Commonwealth, Republic of Ireland, France, Spain, United States and rest of North, Central and South America—Letters, 5¢ for first oz. and 3¢ each oz. after. Postcards, 4¢. All other countries—4¢ first two oz., 2¢ each two oz. after.

Air Mail: To United States and all of North, Central and South America—Letters, 8¢ first oz., 6¢ each oz. after. Postcards, 10¢. All other countries—Letters, 25¢ each half oz. Postcards, 10¢. Aerogrammes to all countries, 10¢.

Registration Fees

To Canada and U. S.—50¢ for \$50.00 indemnity; 75¢, \$100.00 indemnity. All other countries, 50¢, \$8.83 indemnity. Acknowledgement of receipt, 15¢.

Special Delivery

Additional fee of 40¢ on first class mail, 50¢ on parcels, to Canada, Australia, France, Germany, Great Britain, Netherlands, Switzerland, United States only.

Canadian Agriculture—Income And Employment

Source: 1966 Census

Although some 70% of Canadians live in urban centers, agriculture remains the nation's largest single industry. According to the 1966 census, Canada had a total of 430,522 farms, providing direct employment to some 600,000 persons.

However, according to a 1958 survey, one-third of total farm family income is obtained from off-the-farm work.

Ontario accounts for more total farm production than any other province but Saskatchewan, noted for its wheat, is Canada's greatest grain producing province.

Most Canadian farms are large—50.1% over 200 acres, 24.2% from 100 to 200 acres, and 25.7% under 100 acres. Only 4.5% are less than 10 acres.

Value of Agricultural Products Sold Annually

Field crops	\$8,24,150,150	Livestock	753,114,440
Vegetables, fruits, greenhouse and nursery products	123,684,700	Dairy products	402,944,560
Poultry and eggs	195,905,950	Other (includes wool)	46,891,430
		Total agricultural products sold	\$2,346,691,230

Livestock and Poultry

Corn cut for fodder	366,358	Small fruits	54,539

Labor Unions In Canada

Canadian industry is highly unionized, in most cases through Canadian branches of international unions having their headquarters in the United States. Most of these unions, with a total membership of about 1,200,000, are affiliated in the Canadian Labor Congress. A Quebec-based labor body, the Confederation of National Trade Unions, has about 150,000 members. Two smaller groupings of independent Canadian unions are the 11,000-member National Council of Canadian Labor and the 20,000-member Council of Canadian Unions.

Canada's Chartered Banks

The Canadian banking system is built around nationwide banking chains, chartered by acts of Parliament. Local banks are thus branches and are not locally owned. The government-owned Bank of Canada has been the sole authority to issue paper money since 1945. It does not operate as a commercial bank, but sets fiscal policy and controls the money supply through the chartered banks.

In addition to the chartered banks, the Post Office operates a savings bank as do the provincial governments in Ontario and Alberta. There are also two independent savings banks in Quebec.

Trust companies have assumed an increasingly active role in public savings in the recent years. Thousands of credit unions also provide savings

and loan facilities to their members. As of April 30, 1968, the chartered banks held 14,497,017 savings accounts.

Assets of chartered banks:

Bank	Assets (1967)
Royal Bank	\$7,779,659,283
Canadian Imperial Bank of Commerce	7,481,582,256
Bank of Montreal	6,132,452,838
Bank of Nova Scotia	4,138,719,179
Toronto-Dominion Bank	3,458,300,753

Canada's Population Clock Hits 20,800,000

The new population clock at the Dominion Bureau of Statistics in Ottawa hit the unprecedented mark of 20,800,000 on July 29, 1968. At the current rate, one new Canadian is added to the estimated population when the clock's illuminated figures change every 82 seconds. The totals reflect the bureau's calculations of births, immigration, deaths and emigration.

Public Days in Canada, 1969

New Year's Day, Jan. 1; Good Friday, April 4; Easter Monday, April 7; Sovereign's Birthday, May 19 (always first Monday preceding May 25); Dominion Day, July 1; Labour Day, Sept. 1; Thanksgiving Day, Oct. 13 (the second Monday of October); Remembrance Day, Nov. 11; Christmas Day, Dec. 25.

When the statutory holidays fall on Sunday, the following day is observed. Although the general observation of holidays on Mondays, in order to give people long weekends, has been a matter of discussion, no legislation has yet been passed on this regard, with the exception for Victoria Day.

Civic Holiday is not a statutory holiday, but any city, town or municipality may appoint any day as such by resolution of the Council or the statutory body. However, the first Monday in August is generally observed throughout Canada as Civic Holiday (August 4, in 1969).

NATIONS OF THE WORLD

The nations of the world are listed in alphabetical order, except for Canada and the United States, about which separate articles and other information and statistical tables appear in other sections of the Almanac (see Index for listings).

The article on Rhodesia, whose independence has been an unsettled question, will be found under United Kingdom among other states not completely independent. These also include Bahrain, Qatar, the Trucial States and Brunei, all British Protected States. Sikkim, an Indian Protected State, is described under India.

Some international groups, of which various nations are members, are referred to, in the following articles, by initials (such as NATO). Articles on these groups may be found through the Index.

See special color section for maps and flags of all nations.

Note—Exchange rate of foreign currencies in terms of U. S. dollars is latest available, but in some cases is subject to frequent fluctuation.

Afghanistan

DOULAT I PADSHAHI YE AFGHANISTAN

Capital: Kabul. Area: 253,861 sq. mi. Population (UN est. 1967): 15,751,000. Monetary unit: Afghan (45 per U. S. \$1, official rate).

Afghanistan is a landlocked constitutional monarchy occupying a mountainous area much of which is 4,000 ft. and more above sea level. It is slightly smaller than Texas. Its neighbors are Iran, Pakistan, India and the USSR. The north-east tip of the country just touches China's Sinkiang Province.

The Hindu Kush mountains tower 16,000 ft. above the capital of Kabul and reach a height of more than 25,000 ft. some 200 miles to the east of the capital. Trade with India flows through the 35-mile long Khyber Pass from Kabul to Peshawar. The climate is dry, with extreme temperatures.

Ninety percent of the country's exports are agricultural products. Chief items are cotton, wool, karakul pelts, hides, casings, oil seed and fresh and dried fruit. Handwoven carpets are the only manufactured goods exported. Some 4,000,000 head of broad-tail Karakul sheep are raised, as well as goats and camels. The sheep provide the principal meat item in the Afghan's diet and the tightly curled, glossy black coats of the newborn lambs are a valuable fur. Minerals include copper, lead, zinc, iron, silver, asbestos and oil. The country has received considerable economic aid from the U. S., USSR and Communist China.

History and Government. Afghanistan was so named in about the middle of the 18th Century. In ancient times it was known as Aryana, in the Middle Ages as Khurasan. Pukhtuns (Pashtuns) comprise 53.5% of the population; Tajiks 36.7%; Uzbeks 6%; Hazaras 3%.

On Sept. 19, 1964 a Grand Assembly approved a new constitution providing for an elected Lower House, partly-elected Upper House, an independent judiciary, a prime minister chosen by the King and barring relatives of the King from important posts—reforms the King had sought. Under the old government, legislative power was vested in a parliament consisting of the King, a Senate appointed by the King for life, and a National Assembly. The reigning King is Mohammed Zahir Shah, born Oct. 15, 1914, who ascended the throne Nov. 8, 1933, on the assassination of his father, Mohammed Nadir Shah. Afghanistan is a member of the UN.

Bordering on both Russia and China, Afghanistan has been traditionally neutral. Student riots in 1965 were followed by appointment of a new Prime Minister, Mohammed Hasim Malwandai, who appointed at least 4 Afghans educated in the U. S. to his Cabinet, along with the first woman Cabinet minister. In 1966 the government refused to condemn U. S. policy in Vietnam as urged by visiting Communist Chinese leaders.

Education and Religion. Education is free and, where facilities are available, compulsory. The University of Kabul was established in 1932. Principal languages are Pushtu and Persian. English is taught. Islam is the predominant religion.

Defense. There is compulsory military service for a two-year period.

Albania

SHQIPERIA

REPUBLIKA POPULLORE E SHQIPERISE

Capital: Tirana. Area: 11,100 sq. mi. Population (1968 Govt. est.): 2,000,000. Monetary unit: Lek (5 per U. S. \$1, basic rate).

Albania, a Balkan communist republic, is a narrow mountainous land, slightly larger than Maryland, extending for 225 mi. along the E coast of the Adriatic. Yugoslavia and Greece are its neighbors. Off the E coast in the Strait of Otranto is the island of Saseno. The Buna is the principal navigable river. Mt. Korab, 9,066 ft. is the tallest peak.

Resources and Industries. There are important forest resources and some mineral wealth, the latter not fully developed. Chief products of the country are tobacco, timber, wool, hides, furs, cheese, and dairy products, fish, olive oil, corn and cattle. Industrial output in 1964 increased 7%. Minerals, including chromite, petroleum, iron and copper, account for over half the value of exports. Durazzo is the main seaport.

History and Government. Albania has been overrun by warring armies for over 2,000 years. It declared its independence from the Turks in 1912; this was backed by a conference of European powers which placed Prince William of Wied on the throne in 1914. He died within months because of uprisings. During World War I armies of several nations occupied the land by turns. In 1920, a republic was set up. In 1925, Ahmed Zogu seized the presidency; in 1928 he proclaimed himself King, assuming the title Zog I.

King Zog fled in 1939 when Italy invaded and annexed Albania. When Italy surrendered to the Allies in 1943, German troops took over; they left in 1944 and Communist partisans seized power. Gen. Enver Hoxha was named provisional president; a Communist front won a 1945 election; in 1946 a new constitution, modeled on that of the USSR, was adopted under Hoxha's leadership.

Albania requested U. S. recognition early in 1945, and a U. S. mission was sent to the country to make arrangements. Albania did not agree to one condition, that it recognize pre-war treaties between the U. S. and Albania. The U. S. mission was withdrawn in Nov. 1946.

Britain recognized Albania in 1945 but broke off relations in 1946. The U. S. and Britain voted against Albanian admission to the UN in 1948; it finally won admission in 1955 with Britain voting "yes" and the U. S. abstaining. In 1955 it was admitted to the Warsaw Pact. Its policies have been strongly pro-Stalinist, anti-Khrushchev, pro-Communist China and hostile to Tito's Yugoslav regime. The USSR broke relations with Albania in Dec. 1961 and blocked its participation in the Jan. 1962 meeting of the Warsaw Pact nations in Prague.

Ties with Communist China were strengthened in 1966 as the Premiers of the two countries exchanged visits, and Albania, like China, abolished the insignia of rank in its armed forces.

Education and Religion. There is no state religion. The largest segment of the population is Moslem, followed by Orthodox Christians (Church of Albania), and Roman Catholics. Primary education nominally is compulsory and free under the constitution.

Racially the Albanians are mainly Ghegs in the north and Tosks in the south.

Defense: Service is compulsory between 19 and 35. The Army numbers about 25,000. The Navy has 3,000 men and the Air Force, under the command of the army, has 7,000 men.

Algeria

ALGERIE REPUBLIC OF ALGERIA

Capital: Algiers. Area: 919,591 sq. mi. Population (UN est. 1967): 12,540,000. Monetary unit: Dinar (4.937 per U. S. \$1).

Algeria, an independent republic more than 3 times the size of Texas, is located in northern Africa extending for 640 mi. along the Mediterranean Sea between Tunisia and Morocco. The southern Saharan Departments extend into the Sahara Desert and border on Niger, Mali and Mauritania. The Tell, located on the coast, comprises fertile plains from 50 to 100 mi. wide. Several chains of the Atlas Mtns., running roughly E-W and reaching altitudes of 7,000 ft., separate the coast regions from inland plateaus and the Sahara. Algiers, the capital, is the largest city.

Resources and Industries. Agricultural products include wheat, barley, oats, corn, potatoes, artichokes, flax and tobacco. Wine and olive oil are produced. Dates, pomegranates and figs grow abundantly. Cattle raising is paramount. There are large deposits of iron, zinc, lead, mercury, copper and antimony.

Exports consists chiefly of wines, cereals, skins, fruits, iron and zinc ores, phosphate rock, cork, esparto grass, manufactured tobacco products, vegetables and petroleum. Production of the latter is valued at over \$470,000,000 a year. Trade is mainly with France.

Exploitation of the Sahara's vast oil and gas deposits and its tourist potentiality is being pressed.

On Aug. 30, 1967 the government nationalized 5 U. S.-owned oil companies which had been seized June 3, at the outbreak of the Israeli-Arab war. In 1968, several British and French industries were nationalized. Foreign observers reported unemployment had risen to 50%.

History and Government. The fertile Tell plains have attracted a succession of conquerors to Algeria from before the time of Christ. Once ruled over by Carthage, the country after 146 B.C. came under control of the Roman Empire and it was not until the incursions by the Vandals, 430-51 A.D., that the Roman hold was fully broken. The Byzantines regained part of Roman Africa in 534, but it was the Arabs, who arrived in the 7th Century who were to have the most lasting influence on the country, forging it into the Moorish Empire. But local control was lax and local potentates rose and fell, and in 1518 Algiers and the coastal area came under Turkish domination. The country did not become a political entity until France took control in 1830, annexed it in 1842 and began to develop the land.

From 1954-62 growing Arab nationalism led to outright warfare between the French and the Algerians. The political impasse was not broken until French President Charles de Gaulle negotiated with the Front de Libération Nationale (FLN). Algeria in a referendum July, 1962, voted overwhelmingly for independence; De Gaulle proclaimed it independent July 3.

Internal strife continued, however, between opposing Algerian factions, and Ahmed Ben Bella, with Army support, assumed control in Aug. 1962.

A constitution was approved Sept. 8, 1963, and Premier Ben Bella, sole candidate, was elected President for a 5-year term Sept. 15. Nationalization of lands and industries proceeded rapidly. Algeria received a \$100,000,000 long-term industrial loan from the USSR in Sept. 1963, and continues to receive French aid.

President Ben Bella was arrested and deposed June 19, 1965, in a bloodless, army-backed coup d'état led by Col. Houari Boumedienne (born Mohammed Boukharouba), Defense Minister and Vice President. Col. Boumedienne assumed leadership of a new 26-man Revolutionary Council and, on July 11, announced a new Cabinet with himself as President and Defense Minister and including 9 members of the former Cabinet. U. S. Government aid, which had tapered off as Ben Bella's alignment with the Communist world grew, was stepped up after his ouster.

Algeria is a member of the UN and Arab League.

Education and Religion. The population before independence included approx. 1,000,000 Europeans, 80% of them Algerian-born, since reduced to about one-tenth of that total. The natives are Arabs and Berbers, of Moslem faith. There is a university at Algiers. French and Moslem primary schools have been amalgamated.

Defense. The Army and Air Force are being expanded and modernized with aid from USSR and UAR.

Andorra

PRINCIPAT D'ANDORRA

Capital: Andorra la Vella. Area: 179 sq. mi. Population (est. 1968): 17,216. Monetary units: Franc, Peseta (4.9371 and 69.76 per U. S. \$1).

Andorra is a tiny principality of valleys and mountains set high in the Pyrenees on the border of France and Spain. It has two Co-Princes, the President of France and the Spanish Catholic Bishop of Urgel, whose representatives are charged with the administration of justice, but the country has enjoyed practical sovereignty since 1278. It pays an annual tribute of 960 francs to France and 460 pesetas to the Bishop of Urgel.

Actual government is in the hands of a Council-General of 24 elected members (suffrage is for men only) who enact laws and elect a Syndic General, the top administrator.

The main industry is tourism (150 hotels), followed by sheep-raising. Andorra has considerable iron, lead, alum, stone and timber. Sking, trout fishing and chamois hunting are among tourist attractions.

The official language is Catalan; principal religion is Roman Catholicism.

Argentina

REPUBLICA ARGENTINA

Capital: Buenos Aires. Area: 1,072,068 sq. mi. Population (UN est. 1967): 23,031,000. Monetary unit: Peso (350 per U. S. \$1, free rate).

Argentina, 4 times the size of Texas, extends from Bolivia 2,300 miles to Tierra del Fuego and from the Andes to the South Atlantic, and is the 2nd largest and 2nd most populous country in South America, next to Brazil.

The mountains are grouped into 4 isolated systems: the Andean, Central, Misiones and Southern. Aconcagua is the highest peak in the Western Hemisphere, altitude 22,834 ft. (Official Arg. figure.) The southern Andes have lakes, trout and salmon streams.

East of the Andes are great plains, heavily wooded and called the Gran Chaco in the north, and the fertile, treeless Pampas, given over to wheat and cattle raising, in the central region. Patagonia, in the south, is bleak and arid; petroleum and sheep are its main products.

Rio de la Plata is the estuary of one of the world's great drainage systems. It is a wide gulf of mostly fresh water, 170 mi. long, 140 mi. wide at its mouth. On its banks are 3 important cities, Buenos Aires and La Plata in Argentina and Montevideo in Uruguay. Emptying into it are the Parana River, 2,500 mi. long, and the Uruguay, 1,000, both starting far to the north in Brazil. Further south, other large rivers flow from the Andes, in the west, to the Atlantic, including the Colorado, Negro and Chubut.

Buenos Aires, the capital, is one of the largest cities in South America.

Resources and Industries. The mountains of Argentina contain deposits of coal, lead, zinc, iron, sulphur, silver, copper and gold. Petroleum is produced by the government and by private companies; production in 1967 was 18,200,000 metric tons.

Cotton, wheat, barley, rye, linseed, oats, alfalfa are important. Sugar, wine, confection, and fruit industries are large. Sunflower seeds, tobacco and peanuts are cultivated. Sheep, cattle, horses, goats and pigs form the chief wealth of the ranches. In 1968, there were 55,000,000 cattle, 5th highest in the world, and 51,000,000 sheep. Meat processing is the chief industry. Flour milling is 2nd.

Railroads and one domestic airline are state-owned. Three other domestic airlines are privately owned.

Foreign trade (in U. S. dollars):

	Imports	Exports
1966	\$1,124,000,000	\$1,593,200,000
1967	\$1,096,000,000	\$1,464,000,000

History and Government. Discovered 1515-16 by

Spanish explorers headed by Juan Diaz de Solis, Argentina remained under Spanish domination until the provinces, in a successful revolt May 25, 1810, established an independent republic. In 1853 a liberal constitution was adopted.

The present constitution, proclaimed May 1, 1950, is essentially that of 1853.

There are 22 provinces which elect their own governors and legislatures, and a Federal District, Buenos Aires (area 72 sq. mi.), whose Mayor is appointed by the President.

The President and Vice President must be Roman Catholic and Argentine by birth. They are elected for six-year terms by direct popular vote. Congress consists of a Senate of 46 and a House of Deputies. Voting is compulsory for both men and women.

Beginning in 1944, and after the election of Juan D. Peron, an army officer, as President in 1946, Argentine democracy was replaced by a dictatorship. By concessions to labor Peron built a following; he then suppressed freedom of speech and of the press, religious schools and ran the country deeply into debt. Civilians, clericals and part of the armed forces unseated Peron Sept. 16, 1955, and he went into exile. A provisional government was replaced November, 1955, by a military junta, which chose Maj. Gen. Pedro Aramburu provisional President. He restored civil liberties, dissolved the Peronist party and returned expropriated property.

In the first free elections in 12 years, Feb. 22, 1958, Dr. Arturo Frondizi was elected President. Dissension among military leaders, democratic parties and the Peronist unions which had supported Dr. Frondizi resulted in a bloodless military coup Mar. 29, 1962. He was succeeded by Jose Maria Guido, head of the Senate. Elections were ordered and Dr. Arturo Illia was elected President, July 7, 1963, taking office Oct. 12, 1963.

Early in 1966 Peronists won several provincial elections. On May 30 inflation brought the 7th devaluation of the peso within two years.

On June 28, 1966, a 3-man military junta ousted Dr. Illia and named retired Lt. Gen. Juan Carlos Onganía President; the junta dissolved Congress and all political parties and temporarily closed national universities in a move against leftist activities. Gen. Onganía had accused the Illia government of allowing Peronists and Communists too much freedom.

In March, 1967, the peso was devalued from 255 to 350 per U. S. \$1. And in June, Argentina announced a new oil law inviting private companies to return after a 3½-year absence.

Argentina is a member of the UN and OAS.

Education and Religion. The population is about 90% Roman Catholic, the constitutional religion since 1810. Primary education is free, secular, and compulsory. There are national universities in Cordoba (founded in 1813), Buenos Aires, Mendoza, La Plata, Tucuman, Santa Fe, Bahia Blanca and Cuyo. Private universities have been founded in Buenos Aires, Cordoba, Mar del Plata, Mendoza and San Juan. The language is Spanish. The people are of Spanish and Italian descent, with Basques, Swiss, Germans and British represented.

Defense. Service in the Army is compulsory from 20 years to 45. In addition to the Army of about 85,000, there is a trained reserve of 300,000 of whom 250,000 are members of the National Guard and 50,000 the Territorial Guard.

The Navy includes an aircraft carrier, several cruisers, destroyers and submarines and other craft; total personnel is about 20,000. The Air Force includes fighter, fighter-bomber and transport groups.

Australia

COMMONWEALTH OF AUSTRALIA

Capital: Canberra. Area: 2,967,902 sq. mi. Population (Govt. est. 1967): 11,928,889. Monetary unit: Australian dollar (.8962 per U. S. \$1).

The continent of Australia, a huge island 5 times the size of Alaska, is situated SE of Asia proper and below the islands of Indonesia. The Indian Ocean is W and S, the Pacific E and their waters meet N of Australia in the Timor and Arafura Seas. The Great Barrier Reef extends along the NE coast. About 150 mi. S of the state of Victoria lies the island state, Tasmania. Branches of the Pacific are the Coral Sea, NE, and the Tasman Sea, SE.

The Tropics of Capricorn bisects Australia. The Great Dividing Range along the E coast has Mt.

Kosciusko, 7,316 ft., in New South Wales. The W plateau rises to 2,000 ft., with arid areas in the Great Sandy and Great Victoria Deserts. The NW part of Western Australia and Northern Territory are arid and torrid; Arnhem Land, in the latter, is a rugged wooded area reserved for aborigines. The NE has heavy rainfall and Cape York Peninsula has jungles. The Murray River rises in New South Wales, flows 1,600 mi. into the Indian Ocean and supplies hydroelectric plants.

States and territories of the Commonwealth with their areas in sq. mi. and populations, Dec. 1967, were:

	Area	Population
New South Wales	309,433	4,347,309
Victoria	87,884	3,303,631
Queensland	667,000	1,718,266
South Australia	380,070	1,118,477
Western Australia	975,920	892,763
Tasmania	26,383	379,628
Northern Territory	520,280	60,639
Australian Capital Territory	939	108,176
Totals	2,967,909	11,928,889

The capitals are: New South Wales, Sydney; Victoria, Melbourne; Queensland, Brisbane; South Australia, Adelaide; Western Australia, Perth; Tasmania, Hobart; Northern Terr., Darwin; Capital Territory, Canberra.

Home of the kangaroo, Australia also is the habitat of other strange flora and fauna: the koala, or living teddy bear; the platypus, wombat, dingo, Tasmanian devil, a blind mole, and barking and frilled lizards.

By 1968, Australia had added more than 2,150,000 population from immigration since World War II. About one-half was British. Australia's aborigines in the tribal state are primitive and nomadic, but most now are detribalized. Programs are directed toward their ultimate assimilation.

The Melbourne Cup horse race is the biggest annual sports event; cricket, tennis and football also are played extensively. Excellent beaches are numerous and surf riding is popular.

Resources and Industries. Almost from earliest days of settlement a primary producing country, Australia has become highly industrialized. More than 25% of the total labor force of approx. 4,750,000 work in factories; about 15% are engaged in rural occupations.

Wool is Australia's greatest industry. With an annual clip of more than 1.7 billion lbs. Australia produces 30% of the world's wool, 50% of its merino wool. The continent also is one of the world's largest wheat producers, reaching 290,000,000 bu. annually. About one-half is exported. Other important products are sugar, wine, fruit, vegetables, meat, grains, minerals, including uranium, gold, coal, copper, iron, silver, lead, bauxite, rutile and petroleum products.

Discovery of vast iron ore deposits in Western Australia brought a mining boom to desolate areas in the northwest in 1965. New oil and gas fields were discovered 1965-1968, including a major oil field on Barrow Is., off the NW coast.

Principal manufactures include iron and steel, textiles, electrical and radio equipment, drugs, chemicals, paints, machinery, metal work, clothing, motor cars and engines, aircraft and ships. Unemployment in 1967 was est. at 1% of the work force. Gross national product in 1967 was est. at \$22.7 billion, up 5%; per capita income was \$1,600, 38% above 1958.

In recent years exports of industrial products have increased considerably. Main imports: Metals, textiles, machinery, paper and drugs (United Kingdom); metals, machinery, paper and timber (Canada); machinery, tobacco, drugs, optical and surgical instruments, paper (United States); tea, rubber, silk, cotton, linen, burlap (Asia).

Australia changed its currency from pounds-shillings-pence to dollars and cents Feb. 14, 1966, with its dollar worth \$1.12 U. S., or half the old Australian pound.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$3,246,000	\$3,157,000
1967	\$3,410,000	\$3,386,000

Tourism is a rapidly expanding industry. In 1967 Australia had 255,221 overseas visitors, more than double the number 5 years earlier.

History and Government. Australia has been settled since 1788. The Commonwealth, proclaimed Jan. 1, 1901, is a self-governing federation of six

states and two territories. Parliament consists of the Crown (represented by the Governor-General), the Senate and House of Representatives.

In 1966 elections, the Liberal-Country party coalition increased its majority in the House of Representatives from 71 seats to 81, while the Labor party (which favored withdrawal of Australian forces from Vietnam) dropped from 51 seats to 41.

Prime Minister Harold E. Holt was lost at sea while swimming Dec. 17, 1967, and presumed drowned. John McEwen served briefly in his place until Jan. 10, 1968, when John G. Gorton became Prime Minister.

Australia is a member of the UN, Commonwealth and SEATO; and has had a Mutual Defense Assistance Agreement with the U. S. since 1951.

Pension acts provide for payments of war, old age and invalid pensions; also cover the blind, the unemployed, victims of tuberculosis and, in some cases, dependents of former soldiers. The National Health Scheme provides free drugs and subsidizes hospital and medical expenses.

A maternity act provides for the payment of a maternity allowance for every child born in Australia. Social security for children includes child endowment payments for children under 16.

Education and Religion. Education is free and compulsory. There are 10 universities and two university colleges. The Church of England claims 37.7% of the population, the remainder being Roman Catholic, 23.3%; Presbyterian, 9.7%; Methodist, 10.8%, and others.

Defense. Australia has expanded its small Army, Navy and Air Force, adopting its first peacetime draft in 1966. By 1967 the armed forces totaled over 79,000 plus 35,000 in volunteer Citizens Forces. Troops fighting alongside the U. S. in Vietnam were increased from 1,350 in 1965 to 4,500 in 1966 and to 8,500 in 1967-68.

AUSTRALIAN TERRITORIES

The jointly administered Territory of Papua and New Guinea, originally two separate territories, is governed by a 1949 Act placing New Guinea under the UN Trusteeship system, but retaining the status of Papua as a Crown territory. Combined pop. of the two was est. in 1967 at 2,200,000.

New Guinea, once German New Guinea, later a League of Nations mandate and UN Trust Territory of Australia, occupies the NE quarter of the island of New Guinea, N of Australia, and includes nearby island groups: New Britain, New Ireland and the Admiralty Islands of the Bismarck Archipelago; Bougainville, 3,880 sq. mi.; Buka, 220 sq. mi., and smaller islands of the Solomons. Total area of the territory is about 93,000 sq. mi., with a population est. in 1966 at 1,576,000.

Papua is the southeastern part of the island. Area, 90,540 sq. mi.; population est. 1965, 573,000.

Papua-New Guinea is governed by an Administrator, a cabinet and a legislative House of Assembly, popularly elected for the first time in 1964; native members outnumbered whites, 38-26. Its acts are subject to veto by Australian authorities.

Principal products are copra, cacao, rubber and coffee.

Norfolk Island was taken over by Australia, 1914. It has an area of 13.5 sq. mi. and a population (est. 1966) of 1,152. The soil is very fertile and is suitable for the cultivation of citrus fruits, bananas and coffee. Many of the inhabitants are descendants of the Bounty mutineers; some descendants moved to Norfolk in 1856 from Pitcairn Is.; some stayed, some returned to Pitcairn.

Territory of Ashmore and Cartier Islands in the Indian Ocean came under the authority of Australia May, 1934 and are administered as part of Northern Territory. Heard and McDonald Islands are governed by Capital Territory.

Cocos-Keeling Islands, 27 small coral islands in the Indian Ocean 1,300 miles NW of Australia, formerly administered from Singapore, are important for aviation use. Pop. (est. 1966): 684.

Christmas Island, 64 sq. mi., pop. est. 1966, 3,381, 230 mi. S of Java, was taken over from Singapore in 1958. It has phosphate deposits.

Australian Antarctic Territory came under the authority of Australia in 1933. It claims 2,472,000 sq. mi. of territory S of 60th parallel S. Lat. and between 160th-45th meridians E. Long. except for French-claimed Adelle Land.

(Nauru, former UN trust territory, became independent Jan. 31, 1968. See separate article, Nauru.)

Austria

REPUBLIK OESTERREICH

Capital: Vienna. **Area:** 32,374 sq. mi. **Population** (UN est. 1967): 7,323,000. **Monetary unit:** Schilling (25.90 per U. S. \$1).

Austria is a republic in the mountainous region of central Europe, 360 mi. long, 160 mi. wide—slightly smaller than Maine. It is bounded by Switzerland with the Rhaetian Alps, Liechtenstein, Italy's South Tyrol, Carnic Alps and Dolomite Mts., Yugoslavia and the Karawanken Mts., Czechoslovakia with the Little Carpathians, Bavaria (Federal Republic of Germany) and Hungary.

Near Switzerland are the Oetzal Alps, with Wildspitze, 12,309 ft. tall. The Hohe Tauern range has Gross Glockner, 12,457 ft., and a 6-mile glacier. Mountain passes cross frontiers; the Brenner, below the Stubai Alps, has been a major route to Italy since ancient times. Austria has many forests, rich in conifers; the Wiener Wald is a forest belt near Vienna.

Principal river, the Danube, flows from Bavaria in NW to Czechoslovakia. E. Others are the Enns, Inn, Drau, Ill, Mur and Salzach, some furnishing hydroelectric power. There are numerous lakes and popular spas, such as Bad Gastein and Bad Ischl.

Resources and Industries. Austria produces iron ore, oil, timber, magnesite, aluminum, coal, lignite, cement and copper. It is an important source of high-grade graphite. Hydroelectric power, with high potential, is under extensive development. It manufactures steel, machinery, vehicles, electrical and optical instruments, glassware, sporting goods, paper, yarns, textiles, fertilizers, chemicals and artistic leather goods.

Although farmland is limited, Austria produces about 90% of its foodstuffs. It grows wheat, rye, barley, oats, corn, potatoes, sugar beets. Vineyards flourish in Lower Austria and in Burgenland. Principal livestock: cattle, sheep, pigs, horses, goats.

Tourism, largest source of foreign funds, earns about \$400,000,000 annually. The annual Mozart festival at Salzburg and the Vienna State Opera are internationally famous.

Principal exports are iron, steel, paper, textiles, machinery, chemicals, metal products, vehicles, aluminum, electric power. Trade is heavy with West Germany, Italy and United States.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$2,328,000	\$1,684,000
1967	\$2,309,000	\$1,809,000

History and Government. Austria, the East Mark (Ost Mark) of Charlemagne (788 A. D.) came under the Hapsburgs in 1278. Tyrol was added 1363, Bohemia (Czech) and Hungary, 1526. The Turks were twice turned back at Vienna, 1529 and 1683. Austrian dominance of German lands was challenged in the 18th century and Empress Maria Theresa (ruled 1740-1780) lost Silesia to Frederick II (the Great) of Prussia. Austria took slices of Poland in the partitions of 1772, 1793 and 1795. Austria was the scene of major Napoleonic battles and helped defeat him. The Congress of Vienna, 1815, awarded it Istria, Illyria, and the Italian provinces of Lombardy and Venetia. Austria lost Lombardy to Italy 1659 and Venetia 1866, after Prussia defeated Austria in the Seven Weeks' War.

Under the Dual Monarchy of Austria-Hungary, estab. 1867, to recognize the aspirations of the Magyars, Francis Joseph was Emperor of Austria and King of Hungary. The country had an area of 261,259 sq. mi., population c. 51,000,000. It contained Austria, Hungary, Bohemia, Transylvania, Polish Galicia, Trentino, Slavonia, Croatia, Bosnia, Herzegovina, Banat. After Archduke Francis Ferdinand, heir to the Austrian throne, and his consort were assassinated in Sarajevo, Bosnia, June 28, 1914, Austria declared war on Serbia, which helped precipitate World War I. It was dismembered after that war; became a republic comprised of nine states in 1918.

Between the two world wars Austria had a turbulent political history. Socialists introduced some socio-economic changes. These were checked by Chancellor Engelbert Dollfuss, 1934. Dollfuss was murdered by Nazi conspirators July 25, 1934. Adolf Hitler, German Fuehrer, occupied Austria Mar. 13, 1938, and proclaimed its union with Germany. It was re-established as a republic in 1945, consisting of the states of Burgenland, Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and the city of Vienna.

Dr. Karl Renner was elected President of the provisional government after liberation by the

Allies, 1945 (died 1950). After 17 years of occupation, delayed by tactics of the Soviet Union, a treaty of May 15, 1955 restored the frontiers existing Jan. 1, 1938, prohibited economic or political union with Germany, required support of democratic institutions. With final ratification July 27, 1955, Austria formally regained sovereignty.

Austria was relieved of reparations payments to the Soviet Union under the treaty of 1955 on Feb. 20, 1964. It had delivered 10,000,000 tons of crude oil and goods valued at \$150,000,000 to buy back its wells, refineries, factories and Danube shipping.

The President is elected by secret ballot for a 6-year term. He appoints the Chancellor and approves the ministers.

Parliamentary elections Mar. 6, 1966, gave the conservative People's party of Chancellor Josef Klaus a majority of 85 of the 165 seats; the Socialists won 74, the right-wing Freedom party 6. Dr. Klaus formed a conservative cabinet, ending 21 years of conservative-Socialist coalition governments. The Communists had lost their last 3 seats in 1959.

Austria is a member of the UN and EFTA.

Education and Religion. The predominant religion is Roman Catholicism. Elementary education is free and compulsory between the ages of 6 and 14. There are universities in Vienna, Graz, Innsbruck and Salzburg. The language is almost entirely German.

Defense. Under agreements after World War II, Austria may not possess atomic or other major offensive weapons. The armed forces presently comprise an Army and Air Force totaling about 60,000 men. By a law of Oct. 26, 1955, Austria declared its permanent neutrality.

Barbados

Capital: Bridgetown. **Area:** 166 sq. mi. **Population** (UN est. 1967): 246,000. **Monetary unit:** West Indies Dollar (2 per U. S. \$1).

Barbados achieved full independence from Great Britain Nov. 30, 1966. It became a member of the UN Dec. 9, 1966. Furthest east of the West Indies, the island is about 2½ times the size of the District of Columbia; it lies alone in the Atlantic almost completely surrounded by coral reefs. Its highest point is Mt. Hillaby, 1,115 ft. The name Barbados (bearded) was believed given it by Portuguese or Spanish sailors, referring to bearded fig trees.

An English ship visited the island in 1605; English settlers arrived in 1627. Slaves were imported, but freed in 1834. Most of the islanders are Negroes, the language is English and the religion of most is Anglican.

A charter of 1652 provided for a governor-general, council and assembly. Self-rule was achieved gradually; universal suffrage was granted in 1950, cabinet government in 1958, full internal self-government in 1961.

Sugar, molasses, rum, cotton and building lime are the main products; there is a lively flying fish industry and, thanks mainly to the attractions of excellent beaches, the tourist business is booming.

With about 1,506 persons per sq. mi., the population density is one of the world's highest. Barbados also has one of the world's lowest illiteracy rates—less than 1%.

Belgium

ROYAUME DE BELGIQUE—
KONINKRIJK BELGIE

Capital: Brussels. **Area:** 11,781 sq. mi. **Population** (UN est. 1967): 9,581,000. **Monetary unit:** Franc (49.63 per U. S. \$1).

Belgium's seacoast of 40 mi. borders on the North Sea at the Strait of Dover. Slightly larger than Maryland, the country shares borders with the Netherlands, Germany, Luxembourg and France. The Meuse (Maas) River crosses the country from France to the Netherlands. The Scheldt (Escaut/Schelde) makes Antwerp an ocean port via the Netherlands. Annual mean temperature in the capital, Brussels, is 49°: summer 65°, winter 37°.

Brussels, Bruges, Ghent and Antwerp are noted for art and architecture; Liege and Charleroi are important industrially. Antwerp is the world's 4th largest port. Total net tonnage entering the harbor in 1965 was 55,383,000 tons.

Resources and Industries. Coal is the nation's only important mineral. Although Belgium is essentially a manufacturing country, agriculture and forestry are profitable industries. The principal crops are oats, rye, wheat, potatoes, barley and sugar beets.

Important industries are mining, steel manufacture, glassware, diamond cutting, food and beverages, fishing, textiles and chemicals. Beurs voor Diamant in Antwerp is the world's largest diamond trading center.

Belgium lives by its foreign trade; about 40% of its entire production is sold abroad (75% of steel and glass). The Belgium-Luxembourg Economic Union is the world's foremost exporter of steel.

The gross national product rose from \$17.9 billion in 1965 to \$19.7 billion in 1966 (U. S. dollars). Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$7,054,000	\$6,811,000
1967	\$7,118,000	\$7,037,000

History and Government. Belgium, land of the Belgae conquered by Julius Caesar, has a 2,000-year history during which it was ruled by the Romans, Merovingian Franks, Burgundy, Spain, Austria and France. After the fall of Napoleon, 1815, Belgium was made a part of the Netherlands. Its citizens demanded separation from the Dutch in 1830. Belgium became an independent constitutional monarchy in 1830 and chose Prince Leopold of Saxe-Coburg King, as Leopold I.

By the treaty of London, Apr. 19, 1839, Austria, France, Great Britain, Netherlands, Prussia and Russia guaranteed the inviolability of Belgium; this was the "scrap of paper" repudiated by Germany when its troops entered Belgium, Aug. 2, 1914. After World War I the Treaty of Versailles gave Belgium the cantons Eupen, Malmédy and Moresnet, 382 sq. mi., 64,250 population, added to the province of Liège in 1925.

Leopold II, son of Leopold I, was King 1865-1909, succeeded by his nephew, Albert I. Albert was killed while mountain climbing, Feb. 17, 1934; Leopold III, his son, succeeded.

During World War II, Leopold surrendered to Germany, May 28, 1940, to avoid further bloodshed. His cabinet maintained a government-in-exile in London. Nevertheless, Belgium suffered heavily. Ancient churches, houses and records were ruined at Nivelles, Mons, Tournai, Liège, Louvain; the University Library at Louvain, burned in 1914, restored with American aid, was again burned with 900,000 vols. About 50,000 Belgians died, some in Nazi prison camps.

Bastogne, in the Ardennes, became famous as the site of the heroic defense by the 101st U. S. Airborne troops, Dec. 20-26, 1944, during the Battle of the Bulge. Called upon to surrender Maj. Gen. McAuliffe replied: "Nuts." The defenders were rescued.

In 1950 Belgians voted 57% in favor of recalling Leopold III (who had been in Switzerland since being freed from German internment), but Socialist opposition was so vehement that the King abdicated and his son became King Baudouin I July 17, 1951. Born Sept. 7, 1930, he is the son of Leopold's first wife, Princess Astrid of Sweden. Baudouin married (Dec. 15, 1960) Dona Fabiola de Mora y Aragon of Spain.

Universal suffrage is in force and those who fail to vote are fined. Women have voted since 1949.

Parliament consists of a Senate with members elected for four years, partly directly and partly indirectly; the number elected directly is equal to half the number of members of the House of Representatives. The members of Parliament are directly elected, for four years, by proportional representation (one for every 40,000 population).

Flemish, a form of Dutch, is the language of northern Belgium and French is the language in the south. The language difference has been a perennial source of controversy, particularly as it affects education, with Flemish parents unwilling to have their children taught in French.

Disagreement between the two groups became embittered in Mar. 31, 1968, elections in which minority extremist parties increased their strength. Dr. Gaston Eyskens, named Premier June 12, 1968, headed a center-left coalition and sought to end the crisis by naming a Cabinet of 14 Flemings and 14 Walloons.

Belgium is a member of the UN, NATO, EEC and the Benelux economic union.

On June 30, 1960, Belgium granted full independence to its colony, Belgian Congo. See *Democratic Republic of Congo*. In 1962 Ruanda and Urundi, former Belgian UN trusteeships, became independent nations. See *Index for Rwanda and Burundi*, their new names.

Education and Religion. The population is divided into two well defined groups, the Flemings and the Walloons. Roman Catholicism is the

religion of the great majority. Part of the income of the ministers of the Catholic, Jewish, Church of England and Protestant Evangelical religions is paid by the government. There are universities in Ghent, Liege, Brussels and Louvain and agricultural, technical, art and music schools.

Defense. Universal military training has been in force since World War I. Conscription service term was reduced from 18 to 12 mos. in 1957 except for officers on reserve. The Navy comprises small warcraft.

Bhutan

DRUK-YUL

Capital: Thimbu. Area: 18,147 sq. mi. Population (est. 1966): 750,000. Monetary unit: Indian rupee (7.539 per U. S. \$1).

The tiny kingdom of Bhutan is a semi-independent state in the eastern Himalayas, adjoining Tibet, Sikkim and the Indian provinces of West Bengal and Assam. It is 190 mi. long from east to west and 90 mi. across at its widest point. Punakha, winter residence of the king, is a great natural fortress. The inhabitants are Mongolians and adhere to a form of Buddhism.

Agriculture is the chief industry. The principal products are rice, corn, yak butter, lac, wax, cloth, musk, elephants, ponies and chowries.

The ruler of the kingdom is the Dragon King, Jigme Dorji Wangchuk (born 1929), who ascended the throne Oct. 27, 1952. The 130-member Tsongdu (Assembly) is an advisory body. By a treaty signed with India, Aug. 8, 1949, Bhutan receives an annual cash subsidy of 500,000 rupees and transportation rights through India, the state's only avenue to the outside. India controls its external relations.

Modernization has begun, including the country's first road network usable by automobiles, linking central Bhutan and India.

Bolivia

REPUBLICA DE BOLIVIA

Capital: Sucre. Seat of gov't: La Paz. Area: 424,163 sq. mi. Population (UN est. 1967): 3,801,000. Monetary unit: Peso (11.88 per U. S. \$1).

Bolivia is a landlocked nation, over 8 times the size of N.Y. State. It lies across the Andes, and its chief topographical feature is the great central plateau at an altitude of 12,000 ft., over 500 mi. long, lying between two great cordilleras having three of the highest peaks in America. More than 50% of the population are Indians; 13% are white, and 25% are mixed.

Lake Titicaca, on the Peruvian-Bolivian border, is the highest lake in the world on which steamboats ply (12,506 ft.), and is the 2nd largest lake in South America (est. 3,200 sq. mi.).

The legal capital is Sucre, but La Paz, a city more accessible, is the actual seat of government. La Paz lies in the heart of a gigantic canyon about 3 mi. wide, 10 mi. long and 1,500 ft. deep, at an altitude of about 11,800 ft., and framed with high Andean peaks. Its huge cathedral seating 12,000, begun 1835, was dedicated 1933.

Resources and Industries. Agriculture claims 70% of the population. Products include potatoes, cacao, sugar, coffee, barley, cocoa, highland rice, corn, bananas, citrus, rubber and cinchona bark. Much rubber is exported and some raw sugar.

The most important industry is mining. There are large deposits of tin, silver, copper, lead, zinc, petroleum, antimony, bismuth, wolfram, gold, iron, cadmium, borate of lime and natural gas. More than 15% of the world's output of tin is produced in Bolivia, running to 25,000 tons or more annually. The three largest tin producers—Patio, Hochschild and Aramayo companies—were nationalized Oct. 31, 1952. The country ranks high in the mining of antimony and tungsten. Oil and natural gas are growing industries. In 1966 a pipeline was constructed to carry oil 360 mi. from Santa Cruz in the eastern lowlands across the Andes, nearly 2½ mi. high, to join another pipeline carrying it 210 mi. to the Chilean port of Arica on the Pacific.

Bolivia receives economic aid from the U. S. and the Inter-American Development Bank, the World Bank and the International Monetary Fund. It is a member of the UN and OAS.

History and Government. Once part of the ancient Inca empire, Bolivia was under Spanish domination for centuries before it gained independence Aug. 6, 1825, naming itself after Simon Bolivar, famed liberator.

Bolivia's 16th constitution, adopted in 1967, provides for strong executive power, nationalization

of mines, and agrarian reform. The President is elected for 4 years by direct popular vote. Congress is composed of a Senate of 27 members elected for 6 years, one-third renewable every 2 years, and a Chamber of Deputies of 102 elected for 4 years, one-half renewable every 2 years.

Dr. Victor Paz Estenssoro, elected to a 3rd term as President May 31, 1964, was ousted Nov. 4 and the government was taken over by a military junta headed by Gen. Rene Barrientos Ortuño. On July 3, 1966, Gen. Barrientos was elected President in a constitutional election and was inaugurated Aug. 6.

Communist guerrillas, led by Ernesto Che Guevara, once Cuban Premier Fidel Castro's right-hand man, began operating in Bolivia in March 1967. Guevara was captured and executed by the Bolivian Army Oct. 9, 1967.

Bolivian tin-miners' attempts to negotiate better working conditions with the Government-owned Bolivian Mining Corp. were led during 1967-68 by a group of Roman Catholic priests. An agreement was reached in March 1968 in which the corporation agreed to permit union activities and provide better working conditions and more housing and hospitals for the 23,000 workers.

Education and Religion. Primary education is free and compulsory. Adult illiteracy, estimated at 58%, is being lowered. There are 7 universities. Roman Catholicism is the predominant religion. Spanish is the official language.

Defense. There is compulsory military service beginning at 19 years of age.

Botswana

(FORMER BECHUANALAND)

Capital: Gaborone. Area: 275,000 sq. mi. Population (UN est. 1967): 593,000. Monetary unit: South African rand (.7143 per U. S. \$1).

This former British protectorate received full independence Sept. 30, 1966 and joined the UN Oct. 17, 1966.

In the center of southern Africa and populated predominantly by Negroes, Botswana shares borders with the Republic of South Africa, South-West Africa (administered by South Africa) and Rhodesia. It is slightly larger than Texas.

The Kalahari Desert, supporting only nomadic Bushmen and a few wild animals, spreads over the southwestern areas of Botswana; there are swamplands and farming areas in the north, and rolling plains in the east where livestock are grazed.

Cattle raising is the largest industry but in 1966-67 it was suffering the effects of a 5-year drought. Large copper and nickel deposits were discovered in 1967. Corn, sorghum, beans and peanuts are raised in the north. Tourism is flourishing; black-maned lions and swamp antelopes are hunted by safaris.

Many Bechuana work as migrant labor in South Africa and much of the country's chief export, meat, goes to that country. British grants also provide much of the country's income.

In 1885, Bechuanaland was made a British protectorate after local chiefs appealed to Great Britain for aid to halt encroachment on their territories by Boers of South Africa's Transvaal. In March, 1965, the British granted Bechuanaland internal self-rule as a step toward independence.

Its new constitution forbids any form of racial discrimination.

Brazil

BRASIL

Capital: Brasilia. Area: 3,286,473 sq. mi. Population (UN estimate 1967): 85,655,000. Monetary unit: Cruzeiro (3.22 free market rate per U.S. \$1).

Brazil is the largest nation in South America in area and population. Larger in area than the 48 states in continuous U. S., it is smaller than the 50 states. It has a coastline on the Atlantic Ocean of 4,603 mi., and extends approximately 2,689 from N to S and 2,684 from E to W. The northern part is the great, heavily-wooded basin of the Amazon (1,465,637 sq. mi. in Brazil) which rises in the Peruvian Andes and empties into the Atlantic at the Equator.

The Amazon basin has a network of rivers which are navigable for 15,814 mi. The Amazon River by itself is navigable for 2,093 mi., the extent of its course in Brazilian territory. In all its rivers, Brazil possesses 27,318 mi. of navigable waterways. The majestic falls of the Iguazu, 230 ft. high but extremely wide, are on the Brazil-Argentina

border: Glass Falls, in Bahia west of Salvador, are 1,325 ft. high. Tallest mountain is Pico da Neblina, 10,046 ft., on the Venezuela border.

The south central region, favored by climate, resources and communications, has 45% of population and produces 75% of agricultural goods and 80% of industrial output.

Brasilia, the capital city, was inaugurated Apr. 21, 1960, superseding Rio de Janeiro.

Resources and Industries: Brazil has vast mineral wealth and exploitation is being spurred. It leads the world in output of quartz crystal and beryl; is 2nd in sheet mica; 3rd in manganese, columbium and tantalum; 8th in iron ore. It has large deposits of iron (one-third of the world's reserves) and monazite, a source of thorium, alternate to uranium as a supplier of fissionable material. Gold output is about 142,000 Troy oz. annually. Also important are oil, nickel, chrome, diamonds, coal, tungsten, bauxite, various gem stones.

Hydroelectric power potential is est. at more than 80,000,000 kw (4th in the world).

Cotton weaving is the most important manufacturing industry, occupying 25% of workers. Brazil produces more than 3,000,000 tons of steel annually, about 40% in the Volta Redonda national mills. Automotive, aluminum, petrochemical, cement, pharmaceutical, plastics, food and beverage, electrical appliances, shipbuilding, ceramics, glass and heavy machinery industries are growing.

Brazil, world's greatest coffee grower, supplies about 30% of coffee consumed in the U. S. Paranaguá, Santos, Rio and Vitoria are the largest coffee ports. Brazil has become a world leader in sugar. There also are large crops of bananas, cotton, oranges, pineapples, rice, cotton and corn.

Brahman (zebu) cattle of India thrive in Brazil, which is among world leaders with 91,000,000 cattle, 63,000,000 hogs and 22,000,000 sheep.

Rice, cocoa, pinewood, castor beans, cotton, sugar, coffee, tobacco, hides and oiticica oil are important agricultural exports. The country is the only producer of Carnauba wax.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,496,000	\$1,742,000
1967	\$1,668,000	\$1,654,000

History and Government. Pedro Álvares Cabral, a Portuguese navigator is generally credited as the first European to reach Brazil, 1500.

Brazil was developed as a colony of Portugal until the royal house of Bragança, fleeing from Lisbon before Napoleon's army in 1807, transferred the seat of government to Rio de Janeiro, March, 1808. Brazil thereupon became a kingdom under Dom João VI. After his return to Portugal, his son Pedro I, proclaimed the independence of the country, Sept. 7, 1822, and was acclaimed emperor, Oct. 12, 1822. The second emperor, Dom Pedro II, was driven from the throne Nov. 15, 1889, by a revolution which established a republic, the United States of Brazil, which was the country's official name until Jan. 1967 when a new constitution shortened it to Brazil.

There are 22 states, with limited autonomy, a federal district and four territories: Roraima (formerly Rio Branco), Rondonia (formerly Guapore), Amapá, and Fernando de Noronha Island.

Brazil took part in World Wars I and II on the Allied side. It is associated with the U. S. in the Mutual Security Agreement for Hemisphere Defense (1953) and the Inter-American Treaty of Reciprocal Assistance (1947).

It is a member of the UN and OAS.

Since 1930, when a military junta took control, Brazil has fought depression, inflation and economic crises. Getúlio D. Vargas (Labor party) became provisional President until 1933, when he was elected President under a new constitution. Out in 1945, he was reelected in 1950, but in 1954 the army forced him to retire; he immediately committed suicide.

President Janio Quadros, elected in Oct. 1960, became President Feb. 1, 1961, resigned Aug. 25, 1961, blaming "reactionary forces." In Sept. 1961, a constitutional amendment gave Brazil a parliamentary government and Vice President João Goulart succeeded to the presidency with reduced powers. The amendment was repealed Jan. 6, 1963, and Brazil returned to the presidential form of government.

Pres. Goulart, whose regime was criticized as leftist, was ousted Apr. 1, 1964, and Gen. Humberto Castelo Branco was elected Pres. Apr. 11. In 1966 his government decreed that elections of national, state and municipal executives would be in-

direct, by legislative bodies, rather than by direct popular vote as provided in the 1946 constitution.

Under this decree, Arthur Costa e Silva, an anti-Communist and former Army marshal, was elected Pres. by Congress Oct. 3, 1966 and inaugurated Mar. 15, 1967.

A new constitution adopted in 1967, strengthened the powers of the presidency, reducing those of Congress.

Education and Religion. Roman Catholicism is the predominant religion.

There are 32 official universities including the Univ. of Brazil, established in 1920; in addition, there are 3 Catholic universities and 466 others of high rank. Primary education is free and compulsory. The language is Portuguese.

Defense. All males between the ages of 18 and 45 are subject to military duty under a selective service system. There is one year of service in the first line and five years in the reserve. The Air Force, largest in South America, is equipped with American-built planes.

Bulgaria

BULGARIYA

NARODNA REPUBLIKA BULGARIA

Capital: Sofia. Area: 42,729 sq. mi. Population (UN est. 1967): 8,309,000. Monetary unit: Lev (1.17 official rate per U. S. \$1).

Bulgaria, fronting on the Black Sea, is about the size of Ohio. It is bounded by Romania, Turkey, Greece and Yugoslavia. The Balkan Mts. stretch across the center of the country with the Danubian Plain in the north and the Rhodope Mts. and Thracian Plain in the south.

Resources and Industries. The principal crops are wheat, rye, barley, oats, corn, potatoes and tobacco. Fruit is exported. Agriculture claims a large percentage of the population, but the country is being industrialized under a nationalized planned economy which emphasizes electric power, chemicals, coal, machinery, metals, textiles, building materials, fur, leather goods and oil. A socialized economy embraces 98% of industry, 95% of agriculture and 99% of retail trade. Rich oil and gas fields were discovered near Pleven in 1964.

New economic reforms were launched Jan. 1, 1966, to decentralize planning and management. Industrial output rose 12.2% in 1966, 13.2% in 1967. Exports were also up. About 1,000,000 tourists now visit Bulgaria each year.

About 80% of trade is with nations of the Communist bloc. Exports include maize, wheat, vegetables, chemicals, silver, textiles, hides, tobacco, rose attar, lead, zinc, cement, machinery.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,478,000	\$1,305,000
1967	\$1,572,000	\$1,458,000

History and Government. The Bulgars, a Slavic people, settled Bulgaria in the 7th Century and became Christians in 865 A.D. The Turks conquered Bulgaria in 1393. It revolted in 1875 and in 1878 was made a principality. In 1908 it became an independent kingdom and Ferdinand of Saxe-Coburg-Gotha became Czar Ferdinand I of Bulgaria. It expanded after the first Balkan war but lost its Aegean coastline in World War I, when it sided with Germany.

Under the influence of King Boris III, Bulgaria joined the Axis in World War II, occupying considerable Balkan territory. King Boris died 1943 and a regency ruled for Simeon II, born 1937. In 1944 Bulgaria withdrew from the war, but the USSR refused to recognize its neutrality, declared war Sept. 5, Bulgaria asked for an armistice and declared war on Germany Sept. 7. In a one-ticket plebiscite Sept. 8, 1946, the monarchy was abolished and a republic voted, which was established one week later. Georgi Dimitrov, Communist party leader, became premier.

Present premier is Todor Zhivkov who is also first secretary of the Communist party.

The constitution of Dec. 4, 1947, modeled after that of the USSR, provides that the unicameral National Assembly shall be the supreme organ of government. The National Assembly is elected for a four-year term and chooses the Presidium and Premier.

It was admitted to the UN in 1955 and is a member of the Warsaw Pact.

Education and Religion. Bulgarian is a Slavonic language. Elementary education is obligatory from seven to 14 years of age. There are 21 universities

and colleges, including the University of Sofia. The main religion is Eastern Orthodox. The National Church is disestablished and may not have schools or hospitals. There are over 750,000 Moslems.

Defense. Army service is compulsory between the ages of 17 and 65 and usually is for two years.

Burma

PYEE-DAUNG-SU MYANMA NAINGGAN-DAW UNION OF BURMA

Capital: Rangoon. **Area:** 261,789 sq. mi. **Population** (UN est. 1967): 25,811,000. **Monetary unit:** Kyat (4.778 per U. S. \$1).

The Union of Burma, slightly smaller than Texas, is a republic in the western part of the former Indo-Chinese peninsula. It is bounded by China, Laos, Thailand, India, Pakistan and the Bay of Bengal. Rivers flowing from the rugged mountains in the north provide habitable valleys down the peninsula. The largest is the Irrawaddy River which is navigable for 900 mi. A tributary, the Chindwin, is navigable for 300 mi.

The **Burma Road**, extending from Lashio to Kunming in Yunnan province, China, was the principal military supply line from Burma into China 1938-1942. It winds for 700 mi. over an airline distance of 260 mi. It was completed by American help and protected by Gen. Claire Chennault's Flying Tigers. The **Ledo Road** was used when the Japanese closed the Burma Road.

Rangoon, on the Gulf of Martaban is the chief port; Mandalay is on the Irrawaddy River. Mingaladon airport, near Rangoon, handles international traffic.

Resources and Industries. Mineral wealth is great; included are petroleum, lead, silver, tin, tungsten, zinc, and gem stones. The rubies, sapphires and jade are of highest quality. The principal products are rice, cotton, maize, teakwood, tobacco, tin, silver and petroleum. In value of exports, rice accounts for 70%.

Large expenditures are being made on agriculture, water resources, mining, power, transport, and communications. The country has an unfavorable balance of trade. Both exports and imports fell off in 1965, 1966 and 1967.

History and Government. Burma was a Buddhist monarchy in the Middle Ages and came under the influence of the East India Co. (British) about 1612. Britain gained control of Lower Burma in 1824 and of Upper Burma in 1884 and administered them as part of India until 1937, when Burma became a self-governing unit of the British Commonwealth. It was overrun by the Japanese in World War II. Burma became an independent nation outside the Commonwealth by treaty effective Jan. 4, 1948 and a member of the UN 1948.

Constituent units of the Union, resulting from amalgamations of a number of smaller states, are Shan State, Karen, Kachin, Kayah (former Karen states), Special Division of the Chins (Chin Hills District and Arakan Hill Tracts).

A constitution, adopted 1947, guarantees private property but forbids monopolies and provides for nationalization of certain enterprises. The Union Parliament, elected for four-year terms, consists of the Chamber of Deputies, comprising about 250 members, and a Chamber of Nationalities of 125 members. The President is elected by Parliament for a five-year term and may be reelected once.

The government of Premier U Nu, elected in 1960, was overthrown Mar. 2, 1962, by a military coup by Gen. Ne Win, Chief of Staff, who formed a junta. Parliamentary rule was dissolved and a new constitution promised. Gen. Ne Win had previously ruled, Oct. 28, 1958, to Feb. 6, 1960.

The Ne Win government pursues a socialistic program and has nationalized many industries. It holds to a neutralist foreign policy.

In June, 1967 Rangoon was placed under martial law for a month to control riots against local Chinese who had provoked the attacks by holding pro-Communist China rallies. Communist China discontinued its aid program in Burma in July as the Sino-Burmese friendship became a casualty of Mao Tse-Tung's "cultural revolution."

Education and Religion. The indigenous races of Burma are of Mongoloid stock, allied to the Thais, Tibetans, Malays, Chinese and others of eastern Asia. Burmese or one of its variants is spoken by nearly three-fourths of the population. Higher education is provided at the Universities of Rangoon, Mandalay and constituent colleges. A

state-controlled and homogeneous system of schools was introduced after 1948. The Burmese language is preferred, with English second.

The chief religion is Buddhism (about 90%), adopted as the state religion Aug. 18, 1961.

Defense. Compulsory military service was voted 1959 for men between 18 and 46, and women between 18 and 36; technical specialists 18-56.

Burundi

Capital: Bujumbura. **Area:** 10,747 sq. mi. **Population** (UN est. 1967): 3,340,000. **Monetary unit:** Franc (87.5 per U. S. \$1).

Burundi, a country the size of Maryland in east central Africa, became independent July 1, 1962. Formerly part of the Belgian UN Trusteeship of Ruanda-Urundi, it is bordered by Rwanda, Tanganyika, Lake Tanganyika and the Democratic Republic of Congo. Much of the country is grasslands and mountains.

For 3 centuries in the present Burundi and Rwanda area, the Batutsi, a minority tribe, were overlords and political masters of the Bahutu. (The Batutsi are an extremely tall race; the Bahutu, the vast majority, are of average height; a 3rd tribe, the Batwa, are pygmies.) Under German control in the late 19th Century, the area was taken over by Belgium in World War I; the League of Nations in 1923 gave the king of Belgium a mandate over the combined Ruanda-Urundi territory; Belgium received a UN Trusteeship in 1946.

Burundi became an independent constitutional monarchy in 1962 with Mwami Mwambutsa IV as King; there are a premier and cabinet, an Assembly elected by universal suffrage and a Senate. The government was mainly supported by the Uprona party, a coalition of moderate Batutsi and Bahutu. Two premiers were slain by extremists and in Oct. 1965 a 3rd, Leopold Biha, was severely wounded. Bahutu extremists opposed the power of the minority Batutsi in the government; Batutsi extremists, accused of receiving Chinese Communist aid, opposed the government as too moderate.

In July 1966 the King's son, Prince Charles, 19, deposed him and ousted Premier Biha, appointing Michael Micombero Premier. Extremist Batutsi returned to power; on Sept. 1 Prince Charles was proclaimed King Mwami Ntare V. But in a coup d'etat Nov. 28, King Ntare was overthrown by Col. Micombero, who declared himself president. Micombero reportedly had the backing of the Communist Chinese, whose embassy and staff had been ousted from Burundi in 1966.

The economy is agricultural, with 90% of the people farmers or livestock raisers. Coffee is the main crop and export. Much of the land is overgrazed and eroded. The nation receives aid from Belgium and the UN. It is a member of the UN and OAU.

About half the population is Christian, mostly Roman Catholic. Many others believe in a supreme deity, Imana, called the Principle of Good. Kirundi, a Bantu tongue, and French are the official languages; Swahili is also widely used. (See also *Rwanda*.)

Cambodia

PREAH REACH ANA CHAK KAMPUCHEA

Capital: Phnom Penh. **Area:** 69,898 sq. mi. **Population** (UN est. 1967): 6,415,000. **Monetary unit:** Riel (35 per U. S. \$1).

Cambodia is a constitutional monarchy in southern Asia which, with Vietnam and Laos, comprised the former associated states of French Indo-China. It is slightly larger than Utah. It is bordered by Laos, Thailand, the Gulf of Siam and Vietnam. About three-fourths is forested; the central part is level, forming a huge basin for the Mekong River. The climate is tropical. Sihanoukville is the principal seaport.

Resources and Industries. The country is largely undeveloped; 50% of the land is virgin forest. Main industries are forestry, fishing, and agriculture, rice occupying about 80% of the land usage. Other products are rubber, maize, pepper, kapok, palm-sugar, tobacco, cotton, silk, oil seeds, beans. Cattle flourish; the forests have valuable hardwoods. Some iron, copper, manganese and gold exist. Industry is developing, featuring textiles, paper, plywood.

History and Government. Early kingdoms dating from that of Founan in the 1st Century A.D. culminated in the great Khmer civilization which flourished from the 9th Century to the 14th. The

Khmer "God-Kings" built a series of monumental cities, distinguished for their temple tower architecture and striking wall sculptures. Abandoned and overgrown by jungles, the cities remained lost until one of the greatest, Angkor Wat, was found by French explorer Henri Mouhot, 1860.

Cambodia came under French protection in 1863. A national constitution promulgated May 6, 1947, replaced the former absolutism. It became an associated state within the French Union by a treaty of Nov. 8, 1949, but declared its independence from France, Nov. 9, 1953. It is a UN member.

Prince Norodom Sihanouk was King, 1941-55; he abdicated in favor of his father, Norodom Suramarit, who died Apr. 3, 1960. On June 13, 1960, Sihanouk, refusing to become King again, was named Chief of State with wide powers.

The legislature consists of a National Assembly of 77 members elected for 4-year terms and a Council of the Kingdom (upper house) of 24.

Cambodia severed its economic and military ties with the United States Nov. 20, 1963, charging U.S. intervention in its affairs, and in March, 1964, sent military missions to Communist China and the USSR to purchase arms. Because of an attack by South Vietnam planes on Cambodian villages, Sihanouk broke off diplomatic relations with U. S. in May 1965. Cambodia has also accused the U. S. and Thailand of border violations; South Vietnam and the U. S. have charged that Vietcong forces attacked their troops from Cambodian soil.

In 1967 and 1968 Sihanouk charged that Vietnamese and Thailand Communists were supplying arms to Cambodian insurgents who were terrorizing remote villages. He also charged that Communist China was "behind" these troubles. Further, he invited the U. S. to send a special envoy to discuss problems of "hot pursuit" of Communist forces from Vietnam into Cambodia.

In Jan. 1968, Chester Bowles, U. S. Ambassador to India, met with Sihanouk in Phnom Penh. The two announced agreement on proposals to strengthen the 1954 Geneva International Control Commission so it might investigate any foreign infiltration into Cambodia.

Education and Religion. The national language is Cambodian, or Khmer; French is widely spoken and English is taught. In 1965 there were over 4,000 schools and 37 faculties of higher learning. Buddhism is the state religion.

Cameroon

REPUBLIQUE FEDERALE DU CAMEROON FEDERAL REPUBLIC OF CAMEROON

Capital: Yaoundé. **Area:** 183,581 sq. mi. **Population** (UN est. 1967): 5,470,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

Cameroon, which became a republic in 1960, lies on the western coast of Africa, bounded N and NW by Nigeria, NE by Chad, E by Central African Republic, S by Congo (Brazzaville), Gabon and Rio Muni, W by Gulf of Guinea. It is larger than California.

Cameroon is comprised of two states: East Cameroon, formerly Republic of Cameroon, previously a French mandate and trusteeship; and West Cameroon, formerly British Southern Cameroons. Douala is the principal seaport and one of nine airports.

The population comprises some 200 tribes, including Bantus, Semitic and Sudanese peoples, Kirdi Animists, Foulbes and Bamilekes. There are about 600,000 Christians and 800,000 Moslems.

Resources and Industries. Mainly agricultural. Cameroon exports cocoa, coffee, palm products, leather, timber, rubber, peanut oil, tea, bananas, ginned cotton. Livestock includes cattle, horses, donkeys, pigs, sheep and goats.

Aluminum processing is the most important manufacturing industry. Trade is heavy with France and United Kingdom. Import and export totals are each over \$135,000,000 annually.

To combat a rural exodus, a program of resettlement of unemployed persons on farms was under way in 1968, along with modernization of agriculture.

History and Government. Cameroon embraces the larger part of the former German colony of Kamerun which was occupied by France and Britain in 1916, and placed under trusteeship, 1919. France passed a statute Dec. 31, 1958, conferring internal autonomy on the French trusteeship as a step toward complete independence which took effect Jan. 1, 1960.

Following a referendum by the UN in former

British Cameroons, the southern section joined the Republic to form the Federal Republic of Cameroon, Oct. 1, 1961. The republic, composed of two federated states, is a member of the UN. (The northern section of British Cameroons voted to become part of Nigeria.)

The 50-member Federal Assembly is elected by direct universal suffrage, 40 from the eastern zone and 10 from the western portion. President: Ahmadou Ahidjo, elected May 5, 1960, reelected March 20, 1965.

Canada

See Index and special article preceding this section.

Central African Republic

Capital: Bangui. **Area:** 236,293 sq. mi. **Population** (UN est. 1967): 1,459,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

The former French Overseas Territory of Ubangi-Shari in Equatorial Africa is 350 mi. NE of the Gulf of Guinea and is bounded by Chad, Sudan, the two Congos and Cameroon. Slightly N of the Equator, it is mostly rolling plateau, average alt. about 2,000 ft., with rivers draining S to the Congo and N to Lake Chad. Landlocked, it is slightly smaller than Texas.

It achieved partial self-government in 1958. Complete independence was proclaimed Aug. 13, 1960, and the Republic became a UN member Sept. 20. It is a member of the French Community.

A few months after his election in 1960, Pres. David Dacko dissolved all political parties. He was re-elected Jan. 1965, running as the sole candidate. The country became a center for Chinese Communist activities.

On Jan. 1, 1966, the Army Chief of Staff, Col. Jean Bedel Bokassa, deposed Pres. Dacko; a few days later Pres. Bokassa broke off diplomatic relations with Peking.

Diamonds are the main export, amounting to over \$15,000,000 or half the total outgoing trade in 1967. Cotton, coffee and peanuts are also important. Some 90% of the pop. earns its living from farming. There are thick forests and lumber exports are increasing. Manufacturing showed a 20% gain in 1967 and a large textile mill was under construction in Bangui in 1968.

In 1968, the nation joined Chad and the Democratic Republic of Congo in a common market plan, the Union of Central African States.

French is the official language; Sangho is a lingua franca of the 4 ethnic groups: Banda, M'Baka, Zande, Mandjia-Baya.

Ceylon

SRI LANKA

Capital: Colombo. **Area:** 25,332 sq. mi. **Population** (UN est. 1967): 11,741,000. **Monetary unit:** Rupee (5.928 per U. S. \$1).

Ceylon, an independent nation within the Commonwealth, is an island in the Indian Ocean 31 mi. off the southern tip of India at its closest point. Its greatest length from N to S is 270 mi., and its greatest width, 140 mi. The coastal area of the island is flat, but the central part is mountainous with the highest peak, Pidurutalagala, 8,281 ft. The climate is hot, with high relative humidity. There are many mountain streams, which are navigable only by small river craft. Colombo is served by world airlines.

Resources and Industries. Minerals and metals include graphite, limestone, iron, precious and semi-precious stones, limonite, monazite, zircon, quartz. Manufactures include plywood, paper, glassware, ceramics, cement, chemicals, textiles, fertilizers and vegetable oil products.

Principal agricultural products are tea, rubber, coconuts, rice, cacao, cinnamon, citronella, tobacco. Ceylon produces over 500,000,000 lbs. of tea annually, equal to about 60% of India's production. But Ceylon exports more tea than India or any other country.

A major source of precious stones, the island produces about 20 varieties including sapphires, star sapphires, rubies, alexandrites, topaz, tourmalines and cat's-eyes. Most are mined at pits in Ratnapura.

History and Government. Ceylon was known to the ancient Romans as Taprobane (copper-colored). It was first settled by colonists from the valley of the Ganges in India who immigrated about 543 B.C. and whose descendants, the Sinhalese, still form three-fourths of the population.

Descendants of Tamil immigrants from Southern India account for one-tenth of the population. Parts of the maritime areas were occupied in turn by the Portuguese in 1505 and by the Dutch in 1658. The British annexed the island to the presidency of Madras, India, in 1796 and it became a Crown colony in 1802. Universal suffrage was granted in 1931 and a new constitution on the British model in 1946.

Ceylon became an independent member of the Commonwealth in 1948. It is a member of the UN.

The constitution provides for a parliament composed of a Senate, with 30 members, and a House of Representatives currently with 151 members. The administration of the island is in the hands of the Cabinet of Ministers, headed by the Prime Minister and responsible to the legislature.

Prime Minister W. R. D. Bandaranaike, appointed Apr. 12, 1956, was assassinated Sept. 25, 1959. After two short-lived regimes, new elections were held in which the Sri Lanka Freedom party was victorious. Its leader, Mrs. Sirimavo Bandaranaike, widow of the former Prime Minister, was sworn in to the office.

The regime pledged itself to a neutralist policy and nationalized a number of industries. In April, 1962, the government expropriated service and terminal facilities of one British and two U. S. oil companies and announced contracts to purchase oil from the USSR and the UAR. In March 1965 elections the conservative, pro-Western United National party won the largest number of seats and its leader, Dudley Senanayake, became Prime Minister.

In Dec. 1965, the new government agreed to pay compensation for the seized oil companies. The U. S., in Feb. 1966, agreed to resume economic aid, which had been cut off when the oil companies were expropriated.

In 1966, with financial aid from a group of Western nations, the government launched a 5-year plan to expand the tea, rubber and coconut industries which together account for 98% of Ceylon's export income.

Private industry has been growing, with gains in 1967 in food processing and confectioneries, chemicals and machinery.

On Jan. 1, 1966, Parliament abolished Sunday as a legal holiday, substituting "pooya" days—which mark the 4 phases of the moon in the Buddhist lunar calendar.

Education and Religion. All education is free in government schools from kindergarten to university. The majority of the population, Sinhalese, numbering over 6,000,000 belongs to the Buddhist faith. The Tamils, mostly Hindu, are est. at about 1,000,000. Sinhalese became the official language in 1961 but in Jan. 1966 Parliament amended the law to permit the Tamil minority to transact business in its own language.

Defense. Organized in Oct., 1949, Ceylon's armed forces comprise a regular force, a reserve, a volunteer force and volunteer reserves, a small Navy and an Air Force.

Republic of Chad

LA REPUBLIQUE DU TCHAD

Capital: Fort-Lamy. **Area:** 495,753 sq. mi. **Population** (Govt. est. 1967): 3,500,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

A former French Overseas Territory in Equatorial Africa, 500 mi. NE of the Gulf of Guinea, 550 mi. S of the Mediterranean, Chad is bounded N by Libya, E by Sudan, S by Central African Republic, W by Cameroon, Nigeria, Niger. It is four-fifths the size of Alaska.

Moslem groups predominate in the north, and Negro Animists and others in the south. The country is completely rural, its geographic zones including a southern wooded savannah, a steppe and a desert region, part of the Sahara, in the north. On the west is Lake Chad, the dwindling remains of what was once a large inland sea.

There is a wide variety of wild animals, particularly in the southeast.

Chad proclaimed complete independence Aug. 11, 1960, and joined the UN Sept. 20. President: Francois Tombalbaye, appointed Aug. 12, 1960. It is a member of the French Community, OAU and UN. French is the official language.

Cotton is the main export; others are cattle, meat, hides, fish and natron (sodium carbonate), the country's only mineral product.

With UN aid, land is being reclaimed from Lake Chad, 17th largest lake in the world, for wheat growing. Dikes are being built across the shallow

lake; water is then pumped out of the enclosed polder. In 1966, the 4,900 acres in the first polder produced 1,800 tons of wheat.

The UNESCO Chad Basin Commission was hoping in 1968 to tap a large, natural reservoir beneath the lake for irrigation of neighboring areas.

Chile

REPUBLICA DE CHILE

Capital: Santiago. **Area:** 286,396 sq. mi. **Population** (UN est. 1967): 8,935,000. **Monetary unit:** Escudo (official rate 6.53 per U. S. \$1).

The Republic of Chile lies along the southern half of the west coast of South America, a narrow strip of land 2,620 mi. long between the towering Andes and the South Pacific.

Most of Chile lies in the temperate zone, but the Atacama Desert in the north is one of the world's driest regions, with little or no rainfall. Chile itself is slightly larger than Texas; it also claims sovereignty over a large area of the Antarctic Continent, some 500,000 sq. mi.

The Andes have many lofty peaks, notably Aconcagua in Argentina near the Chilean border, the highest peak in the Americas (23,081 ft. acc. to Chile, 22,834 acc. to Argentina); Ojos Del Salado (Argentina-Chile, 22,539 ft.); Tupungato (Argentina-Chile, 22,310 ft.).

The Christ of the Andes, a heroic-size statue in Uspallata Pass, symbolizes peace between Chile and Argentina.

Tierra del Fuego is the largest (18,800 sq. mi.) island in the archipelago of the same name at the southern tip of South America, an area of majestic mountains, tortuous channels and high winds. It was discovered 1520 by Magellan, who sailed through the strait (named after him) which separates the main island from the mainland; he named the island Land of Fire because of its many Indian bonfires. Two-thirds of the island are in Chile, the eastern third in Argentina. Punta Arenas, on a mainland peninsula in Chile, is a center of sheep-raising and the world's southernmost city (pop. over 44,500); Puerto Williams, pop. 350, at a Chilean naval base on Navarino Is., is the southernmost settlement. Beagle Channel, between Navarino and the main island, and Mt. Darwin were named after Chas. Darwin's visit to the area aboard the ship Beagle. The area's tallest mt. is Sarmiento, 7,546 ft. Cape Horn, about 1,400 ft., is a tiny island, named Horn by Dutch explorers after a town in the Netherlands.

Possessions in Pacific: Sala y Gomez and Easter Is. (Rapa Nui), with its huge stone statues, both over 2,000 mi. west; San Ambrosio and San Felix, 600 mi. west, and Juan Fernandez Islands (2 large, 1 small), center of lobster fishing and place where Alexander Selkirk, whose life reputedly was the inspiration for Defoe's Robinson Crusoe, lived 4 years.

Resources and Industries. The arid deserts of northern Chile contain incalculable mineral wealth. Mining industries account for approx. 65% of Chile's exports. Nitrate production is about 100,000 metric tons a month. About 47% of the world's supply of iodine is a by-product of Chilean nitrate works. Chile is the world's 3rd largest copper producer, behind the U. S. and Canada; estimated annual output is 780,000 tons.

The provinces of Atacama and Coquimbo have enormous iron deposits estimated at a billion tons. Coal reserves are estimated at 2 billion tons. Oil wells, mostly in Tierra del Fuego, supply Chile's needs and offer an export potential. Other minerals are gold, silver, molybdenum, cobalt, zinc, manganese, borate, mica, mercury, iodine, salt, sulphur, marble, onyx. Chile has abundant water-power. Patagonia, the sparsely-populated southern third of the nation, is undergoing extensive industrial development.

Agriculture is an important industry. There are many large dairy farms. Wheat, rice, barley, oats, beans, lentils, apples, melons, peaches, plums, nectarines, peas and potatoes are grown in abundance. Sugar beet, automotive, aviation and textile industries are being developed. Vineyards cover 250,000 acres and much wine is exported. Forests have large reserves of hard and soft woods. Coastal waters have shellfish, lobster, tuna, swordfish, sardines.

Manufacturing industries have developed greatly. With the creation of the Corporacion de Fomento de la Produccion (Chilean Development Corporation) with a capital of \$40,000,000, agricul-

tural and factory production has vastly increased. Huachipato, steel plant near Concepcion, is second only to Brazil's Volta Redonda plant in Latin America.

Besides minerals the exports are mainly fishmeal, barley, oats, wine, lentils, fruits, fish, sea-food, cellulose, newsprint, wood.

Chile has many airports and is served by 11 international airlines. About 85% of Chile's 6,700 mi. of railroads is state owned.

Since 1965 under an agrarian reform program more than 2,000,000 acres have been expropriated, with due compensation to the owners, to be distributed among rural workers. A new Agrarian Reform Law passed in 1967 will give 60,000 rural families land within the next 3 years.

In Santiago the Jesuit House of Christ housing program has provided, 1960-66, some 40,000 small homes, at low or no cost. Thousands of low-cost houses have been built by the government to meet an estimated shortage of 500,000 houses.

The government in 1966 set out to abolish the traditional two- or three-hour siesta, first for government workers, then for private businesses.

In 1968 Chile was struck by the worst drought in its history. More than 150,000 cattle died from lack of feed; lack of hydroelectric power caused industrial cutbacks.

History and Government. Diego de Almagro entered Chile for Pizarro 1536 and Valdivia completed Spanish conquest 1540. Sir Francis Drake raided the coast. A Captain General appointed by Spain ruled Chile until 1778, when it was made a separate colonial division under a governor.

Independence was gained, 1810-18, under Jose de San Martin and Bernardo O'Higgins; the latter as supreme director, 1817-1823, sought social and economic reforms until deposed. Chile defeated Peru-Bolivia in 1836-39 and 1879-84, taking Tacna and Arica provinces from Peru, returned Tacna, 1929, Arica (town) and Antofagasta are free ports for landlocked Bolivia.

Valparaiso, chief seaport, was founded in 1536; Santiago, the capital, in 1541.

Under the constitution the President is elected for 6 years, the 45 senators for 8 and deputies (1 for each 45,000 pop.) for 4, all by direct popular vote. President: Eduardo Frei Montalva, Christian Democrat, elected Sept. 4, 1964. Suffrage is universal for literate persons over 21. Chile is a member of the UN and OAS.

About two-thirds of the Chileans are of mixed Spanish and Indian descent; about one-fourth of Spanish only; a small percentage are Indian only; there are some of German and other European descent.

Education and Religion. Education is free and compulsory between 7 and 15. A National Library, the Univ. of Chile, State Technical Univ. and a Catholic Univ. are in Santiago. There are universities in Concepcion, Valparaiso, Antofagasta and Valdivia. A Council of Rectors of the 8 principal universities fosters research and teaching progress. The Roman Catholic religion is dominant though not state-supported. The language is Spanish.

Defense. All able-bodied citizens from 18 years to 45 are liable for army service. Service in the reserve of active Army is for 12 years and with the second reserve to the end of the 45th year. The Navy consists of two cruisers, 8 destroyers, 3 frigates, 3 corvettes, 2 submarines and auxiliary vessels. There is an Air Force of about 8,000 personnel, with modern equipment.

China

The ancient land of China is split into two hostile parts, with the Republic of China limited to Taiwan (Formosa) and the mainland controlled by a Communist regime called the People's Republic of China.

China, with about one-fourth of the world's population, occupies a territory in the eastern part of Asia about one-third larger than continental United States.

The mainland is of rolling topography, rising to high elevations in the N in the Khyngan Mtns., separating Manchuria and Mongolia; the Tarabagata Mtns. in Sinkiang; the Himalayan and Kunlun Mtns. in the SW in Tibet. Its length from N to S is 1,869 mi. and its breadth from E to W more than 2,000 mi.

The eastern half of China is one of the best-watered lands in the world. Three great river systems, the Yangtze, the Hwang (Yellow) and the Si (Si Kiang) provide water for vast farmlands.

Resources and Industry. Until Communism prevailed, China was chiefly agricultural. Wheat, barley, corn, kaoliang, and millet and other cereals, peas and soy beans are produced in the north; rice, sugar and indigo in the south. Rice is the staple food of the Chinese. Fruit is grown in abundance. Fiber crops are important and include abutilon, hemp, jute, ramie and flax. Cotton is produced mostly in the Yangtze and Yellow River valleys. Tea is cultivated principally in the west and south. One of the most important industries of prewar China was silk culture which has flourished 4,000 years. Livestock is raised in large numbers. In years before World War II flour and rice milling had become extensive, together with tanning, cement and glass manufacture.

China is one of the foremost coal countries in the world. Other minerals are iron ore, tin, antimony, petroleum, tungsten, molybdenum, salt.

Education and Religion. Buddhism had the largest following. Confucianism, which reveres God but stresses ethical and philosophical principles rather than divine revelation, had wide acceptance. Taoism (after Lao-Tze, b. 604 B.C.) is more metaphysical and looks to immortality. Islam, at one time, had 50,000,000; there were 3,280,000 Roman Catholics and 700,000 Protestants. On the mainland foreign missionaries and church schools are no longer tolerated.

Republic of China CHUNG-HUA MIN-KUO

Provisional Capital: Taipei, Taiwan. **Area** under control, 13,886 sq. mi. **Population** (UN est. 1967): 13,142,000. **Monetary unit:** Taiwan dollar (40.10 per U. S. \$1).

History and Government. One of the oldest of monarchies, with a history reaching back to 2205 B.C., China became a republic Jan. 1, 1912, following the Wuchang Uprising inspired by Dr. Sun Yat-sen, begun Oct. 10, 1911.

For a period of 50 years after the Sino-Japanese War, 1894-95, China was involved in conflicts with Japan. On Sept. 18, 1931, Japan seized the North-eastern Provinces (Manchuria) and set up a puppet state called Manchukuo. The border province of Jehol was cut off as a buffer state in 1933. Japan invaded China in the vicinity of Peiping (now Peking), July 7, 1937, precipitating war. After its defeat in World War II Japan returned all seized land.

After more than seven years of war with Japan ending Aug. 5, 1945, internal disturbances arose involving the Kuomintang, Communists and other factions. Manchuria was lost by the Chiang regime Oct. 30, 1948, and China proper came under domination of Chinese Communist armies during 1949-1950. The Nationalist government moved to Taipei, Taiwan (Formosa), 90 mi. off the mainland Dec. 8, 1949.

China concluded a treaty of friendship and alliance with the USSR, Aug. 14, 1945. After the Chinese Communists overran the mainland in 1949, the Soviet Union repudiated the treaty, withdrew its recognition of the Nationalist government, and signed a new treaty with the Communist regime, Feb. 15, 1950.

A new constitution became effective Dec. 25, 1947. The National Assembly is the supreme organ of the people. Members are elected on the basis of territorial and professional representation. They serve for a six-year term, subject to recall. The Assembly elects the President and Vice President, who likewise serve six-year terms; it also has the power to amend the constitution. A Yuan (Council), elected on the basis of regional and vocational representation, serves as the legislature. The cabinet, appointed by the President, is responsible to the Legislative Yuan.

Generalissimo Chiang Kai-shek, except for a period of semi-retirement, has been virtual ruler since 1927. He was elected President for a six-year term in April, 1948; reelected in 1954, 1960 and 1966. C.K. Yen was elected Vice President in April, 1966. The Nationalist government is a founding member of the UN.

Defense. Nationalist China has compulsory universal service. The regular Army requires service for 6 years. The armed forces had an estimated strength of about 600,000 on Taiwan and adjacent islands in 1966. Including a Navy and an Air Force, largely equipped by the U. S. The U. S. Navy maintains a peace patrol in Taiwan waters.

The Nationalist government signed a mutual defense treaty with the U. S., in force Mar. 3, 1955. It provides for consultation on threats of

attack and promises that if China is subject to unprovoked attack the U. S. will act according to its constitutional procedures.

The government broke off diplomatic relations with France Feb. 10, 1964, after the latter recognized the People's Republic.

TAIWAN (FORMOSA)

Taiwan is an island 110 mi. E of the mainland, but the term Taiwan is used by the Nationalist government to include 14 other islands nearby and 64 others comprising the Penghu group. Principal harbors are Keelung, Kaohsiung and Hualien.

Taiwan was ceded by China to Japan in 1895, after the Sino-Japanese War and was returned to China as a province, 1945, after the surrender of Japan. Japan renounced all claims to Taiwan and the Penghus in the Treaty of Peace, Sept. 8, 1951. China did not take part in the treaty, signing a separate treaty with Japan Apr. 27, 1952.

A range of mountains forms the backbone of the island. The eastern half is exceedingly steep and craggy but the western slope is flat, fertile and well cultivated, yielding two rice crops a year. The principal crops, besides rice, are tea, sugar, sweet potatoes, ramie, jute, turmeric and camphor. Minerals include gold, silver, copper and coal. A joint U. S.-Chinese commission aids agriculture, rural health, forestry, irrigation and food.

Taiwan's economic growth rate in recent years has been 8-10% annually. Index of industrial production in 1967 (1963-100) was 171. Industries include flour-milling, tobacco, oil, lumber products, textiles, machinery, glass and other manufactures.

Foreign trade has shown steady gains.

U. S. economic aid, begun in 1951 and totaling \$1.5 billion, terminated June 30, 1965 (with exception of some funds previously committed through 1967). Military aid, which totaled \$2.5 billion, continued, but at a reduced scale of about \$90,000,000 a year. During the 15 years, industrial production went up 300%, agricultural 70%; exports nearly tripled. Switching roles, the republic has begun extending technical assistance to some 30 countries in Asia, Africa and Latin America.

The Penghus (Pescadores), 50 sq. mi., pop. (1964) 108,800, lie between Taiwan and the coast of China, by which they were ceded to Japan in 1895. The islands remained under Japanese rule until restored to China, 1945.

The islands of Quemoy and Matsu, near the mainland, have been under Communist artillery fire at intervals since 1958.

People's Republic of China

CHUNG-HUA JEN-MIN KUNG-HO KUO

Capital: Peking. Area under control: 3,746,453 sq. mi. Population (U. S. est. 1966): 760,300,000. Monetary unit: Yuan (basic rate 2 per U. S. \$1).

The People's Republic of China was proclaimed in Peking (Peiping) Sept. 21, 1949, by the Chinese People's Political Consultative Conference under Mao Tse-tung, Communist leader. Chou En-lai was named premier and foreign minister Oct. 1, 1949. With defeat of the Nationalist armies, the Chinese mainland, the islands of Hainan and Chusan and the principal cities fell to the Communists.

Under the Communist regime, China comprises 22 provinces, including Taiwan, which it claims; 5 autonomous regions (Inner Mongolia, Sinkiang-Uighur, Kwangsi-Chuang, Ningxia-Hui, Tibet-Chamdo) and two municipalities—Peking and Shanghai. Government estimate of population in 1964 approached 750,000,000. The government pressed birth control programs; without them experts said, China's population would reach 1 billion by 1980.

Communist party chairman: Mao Tse-tung. Chief of State or President: Liu Shao-chi, elected Apr. 27, 1959 re-elected 1965. Premier: Chou En-lai, app. 1949, reapp. 1965.

The Communist regime and the USSR signed a 30-year treaty of "friendship, alliance and mutual assistance," Feb. 15, 1950, repudiating the 1945 treaty between the Soviet Union and Nationalist China authorized by the Yalta Agreement. Great Britain recognized the People's Republic Jan. 1, 1950; the two countries have embassies in each other's capitals headed only by charge d'affaires. Recognition has been granted by about 20 nations.

United States Policies. The U. S. refused recognition, and after its consular officers met with

abuse, withdrew them. On Nov. 26, 1950, when U. S. military forces and those of certain other UN members had the North Korean Communist rebels virtually defeated, the People's Republic sent armies of "volunteers" into Korea and, with the help of limitations on U. S. offensive action, forced a stalemate.

The U. S. has led opposition to the entry of Communist China in the UN as representative of all China and, in concert with its major allies, restricts trading with Communist China, but Great Britain and Canada resumed trade. In 1966, U. S. President Johnson, Vice Pres. Humphrey and Secy. of State Rusk all suggested in speeches that the U. S. and Communist China might eventually be reconciled. The suggestions were rebuffed.

France recognized the Peking regime in Jan. 1964 and Nationalist China broke off relations with France Feb. 10, 1964.

Peking Foreign and Domestic Policies. On Feb. 27, 1957, Mao Tse-tung, then Chief of State, condemned the Stalinist terror but admitted an est. 800,000 anti-Communist Chinese were executed 1949-54. Leniency for political criticism, proposed by Mao Tse-tung, led to anti-Communist disturbances among students and a quick return to repressive measures. In 1958 the regime announced all "rightists" in govt. service had been removed. It endorsed the Soviet attack on Hungary, condemned Yugoslavia's independence. It pursued a more rigid Communist ideology than the USSR and, with Albania, has maintained a continuous propaganda campaign against the USSR. The regime called on the international Communist movement Mar. 31, 1964, to repudiate Khrushchev's leadership.

It hailed Khrushchev's ouster, Oct. 14-15, 1964, as a victory for its own policies but soon attacked the new Soviet leaders for continuing a policy of "peaceful coexistence" with the West. A visit by Chou En-lai to Moscow in Nov. 1964 failed to heal the bitter rift between the two Communist powers. Vituperative Chinese attacks on Russian "revisionism" grew during 1966.

Early in 1966 a long, widespread purge of "anti-party intellectuals" was launched; it was viewed as a possible symptom of a struggle for power and the succession to the aging Mao. Premier Chou En-lai called the purge a "cultural revolution." Ousted from office and denounced were the Chief of the Army's General Staff, Minister of Culture, the party propaganda chief, 3 university presidents, newspaper editors and writers, opera producers, youth officials, economists, Peking's Mayor, atom experts and others.

In August, 1966 Defense Minister Lin Biao emerged as top deputy and heir apparent to Mao.

In the same month the "cultural revolution" took a new turn as thousands of Peking teen-agers, calling themselves the Red Guards and acting with official blessing, took over the city, ordering everyone to rid themselves of "western ways." Women took the curls out of their hair, streets were renamed, shopkeepers were ordered to remove foreign names from goods, the few churches in the city were defaced, bloodshed and beatings of old people were reported and the reign of terror spread to other cities.

The "cultural revolution" continued unabated in 1967 with reports of fighting in many provinces between pro and anti-Maoists.

In 1968 student unrest continued and the official press continued attacking President Liu Shao-chi, calling him an agent of Nationalist Pres. Chiang Kai-shek.

On Oct. 16, 1964, Communist China exploded a low-yield atomic bomb in Sinkiang Province, becoming the 5th nation to possess such power, and announced May 14, 1965, it had exploded a 2nd bomb. A 3rd was exploded May 9, 1966. An explosion of a hydrogen bomb was announced June 17, 1967.

Internationally, Communist China has sought to promote revolutionary movements in Africa, Asia and South America. The program suffered serious setbacks, 1965-66. An abortive Communist coup in Indonesia, Sept. 30, 1965, was followed by destruction of the party there and attacks on Red Chinese representatives. Three friends and a lot of influence were lost in the ouster of Algeria's Ahmed Ben Bella, June 19, 1965; in a squabble with Cuba's Fidel Castro over a cut in rice exports to Cuba; and in the overthrow of Ghana's Kwame Nkrumah, Feb. 24, 1966. Dahomey and the Central African Republic broke off relations with China in Jan. 1966 and the Ivory Coast

accused it of plotting a rebellion in that country.

Application of radical theories to industry and agriculture have resulted in erratic economic development. Serious food shortages have existed since 1959 after more than 148,000,000 acres of farm land were damaged by storms, floods, drought and mismanagement. The regime has been forced to obtain grain from Tibet, Argentina, Mexico, Canada and Australia. Light industries dependent on agriculture for their raw materials also were affected—cotton textiles, knitted goods, vegetable oils, sugar and cigarettes. The "people's commune" system of agriculture, in effect since 1958 and which had disrupted family life, was drastically modified in 1960-61 to increase individual incentives to stimulate production, but the collectivization drive was renewed in 1963-1964. Many thousands fled to overcrowded Hong Kong.

Vast hydroelectric and irrigation projects are under construction or in partial operation. Largest of 11 major water projects is the Sanmen Gorge project on the Yellow River in Honan, expected to store 84.6 billion cu. yds. of water, with power stations to have capacity of 1,100,000 kw. The nation plans a new canal system with four trunk routes spanning China from south to north, to connect the Yangtze with the Yellow River. Industrial progress was hampered, 1960-1964 by the withdrawal by the USSR of technicians and equipment. Steel production in 1963 was est. 9-10,000,000 metric tons, 50% below that of 1960.

Institutes of higher education include 15 universities, 48 engineering colleges and 31 agricultural colleges. English and Russian are required in high schools.

The regular Army is estimated at approx. 2,600,000, formed into 160 divisions—3 armored, one air-borne, a number of cavalry and the remaining in infantry divisions. Air Force equipment and training were originally furnished by the USSR. The Air Force has an est. 3,000 planes of Soviet design. The Navy, with est. 135,000 personnel, has 2 light cruisers, 5 destroyers, 24 submarines, 32 frigates and smaller craft.

Manchuria, 404,428 sq. mi., is administered as part of Communist China. Seized by Japan in 1931, it was renamed Manchukuo, a puppet "independent" nation, Mar. 1, 1932. In 1945 it was returned to China.

Kwantung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria. Russia in 1898 forced China to lease it Kwantung and constructed the strongly fortified city of Port Arthur and the nearby commercial ice-free port of Dairen (Talien).

Japan seized Port Arthur in 1905, and at the close of the Russo-Japanese War took over the lease in the Treaty of Portsmouth. It was restored to the USSR by the Yalta Agreement, Feb. 11, 1945, which also internationalized Dairen. Following the 1950 Soviet-Chinese treaty the USSR returned the Changchung railroad, Port Arthur and Dairen to Communist China.

INNER MONGOLIA

Inner Mongolia was organized by the People's Republic as an Autonomous Region in May 12, 1947. Its boundaries have undergone frequent changes. In 1950 it comprised northern Chahar and parts of former Manchuria. Suiyuan province was incorporated June 1954, and parts of Jehol in Aug. 1955. Population is about 6,200,000 of which less than 20% are Mongol. Capital: Huhehot (Kweisui).

Outer Mongolia: For People's Republic of Mongolia, see Mongolia in Index.

SINKIANG

Sinkiang (New Dominion), in Central Asia, comprising Chinese Turkestan, Kulia and Kashgaria, is 633,802 sq. mi.; pop. (est. 1958), is 6,000,000, of whom 75% are Uighurs, a Turkic Moslem group, with a heavy Chinese increase in recent years. Tihwa (Urumchi), the capital, and Kuldja are the chief cities.

Sinkiang is considered China's richest region in strategic materials, including tungsten, wolfram, molybdenum, copper, zinc, coal, uranium and oil. The province was declared autonomous in 1953.

TIBET (PO)

Tibet, 470,000 sq. mi., is a thinly populated region of high plateaus and massive mountains, almost twice the size of Texas. The Himalayas ring it on the S, the Kunluns on the N. Lofty passes link it with India and Nepal to the S; roads and a railroad lead into China proper. The capital is Lhasa. The average altitude is 15,000 ft.

Gartok, 15,100 ft., is believed to be the highest inhabited town on earth. Agricultural methods are primitive. Cereals are the main crops. The religion is Lamaism, a form of Buddhism. Pop. (1964 est.) 1,300,000.

With only token resistance, Tibet accepted suzerainty of the Chinese Communist regime under a pact signed May 23, 1951. A communist Tibetan Autonomous Government was announced Dec. 20, 1953, revising the quasi-religious administration of the Dalai and Panchen Lamas.

A revolt against the Communists occurred in 1959, when the latter attempted to arrest the Dalai Lama. The Tibetan cabinet denounced the 1951 treaty. The Communists crushed the revolt and placed the Panchen Lama on the Tibetan throne. The Dalai Lama fled to India. The Panchen Lama was demoted Dec. 1964. A new ruler was sponsored by Peking Sept. 9, 1965, when it announced election of Ngapo Ngawang Jigme as chairman of the newly-established Tibet Autonomous Region. Revolts continued in 1965 and 1966.

A reform program, including land redistribution and abolition of serfdom (assertedly practiced in some monasteries) was announced July 3, 1959.

The International Commission of Jurists at Geneva in 1961 charged the Communist regime with genocide in Tibet. About 20,000 Tibetans have fled to India since the Chinese takeover.

Colombia

LA REPUBLICA DE COLOMBIA

Capital: Bogota. Area (UN est.): 455,335 sq. mi. Population (Govt. est. 1968): 19,300,000. Monetary unit: Peso (16.30 per U. S. \$1).

The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama. It has a coast line of 913 mi. on the Pacific Ocean, and 1,094 mi. on the Caribbean Sea. It has as neighbors Venezuela and Brazil on the E, and Ecuador and Peru on the S. It is 4 times the size of Arizona.

Three great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from N to S. The eastern range consists mostly of high table lands, cool and healthful, and densely populated. The Magdalena River, in the NE, rises in the high Andes and flows N into the Caribbean Sea near Barranquilla. It is navigable over 800 mi. The Magdalena Valley is a plain of rich alluvial land.

Snow-crested mountains standing almost directly over the Equator are one of many examples of scenic splendor in Colombia. Tourists are also attracted by the famous Tequendama Falls, a natural wonder near Bogota, 427 ft. high.

The Salt Cathedral of Zipaquirá, 32 mi. N of Bogota, is an actual church carved with Gothic arches 1,300 ft. underground in a salt mine. It can accommodate 10,000 worshippers.

Bogota, the capital founded in 1538, is in the Andes, 8,660 ft. alt.

Resources and Industries. Colombia is second to Brazil in exports of coffee, annually shipping approx. 6,600,000 bags of 132 lbs. each, accounting for 70% of export trade. Rice, tobacco and cotton are cultivated, besides cocoa, sugar, tegua, wheat and bananas. Dyewoods, rubber, balsam and copaiba trees are important.

The country is rich in minerals. It has become a heavy producer of petroleum, with more than 72,670,000 bbl. in 1965. Seventy-five miles from Bogota are the Muzo emerald mines which have been in operation for four centuries. Colombia produces 95% of the world's gem emeralds. Other minerals are gold, silver, copper, lead, mercury, cinnabar, manganese, platinum, coal, iron, limestone, salt. Colombia is accelerating expansion of its hydro-electric power which has est. potential of 40,000,000 kw. Food processing leads industry; other products are textiles, rubber goods, steel, and chemicals. Colombia has received loans from the Inter-American Development and World Banks.

An Atlantic railroad, completed in 1961, running from Santa Marta on the Caribbean Sea to Salgar, opened the Magdalena Valley to cultivation and improved travel between the coast and industrial cities of the interior. Aviation has done much to unify the country. An oil pipeline from the new Orito field in the SE, across the Andes to the Pacific port of Tumaco, was to be finished in late 1968.

History and Government. The country, conquered and ruled by Spain for 300 years, won its freedom

in the revolt of the Spanish-American colonies 1810-1824, the liberator, Simon Bolivar, establishing the Republic of Greater Colombia in 1819 from which Venezuela and Ecuador withdrew in 1829-1830. From the remainder of the confederation evolved New Granada, Confederation Grana-dina, and finally the Republic of Colombia under a constitution dated Aug. 5, 1886. Panama with-drew, Nov. 3, 1903, becoming a separate republic.

The Congress consists of a Senate of 106 mem-bers, elected for a term of four years, and a House of Representatives (one to every 90,000 pop.), elected directly by the people every two years. The President is elected by direct vote for four years and is ineligible for the following term.

Dr. Carlos Lleras Restrepo, a Liberal, was in-augurated Colombia's 110th President Aug. 7, 1966. He was the candidate of the National Front coalition (started in 1958 to run to 1974) under which Liberals and Conservatives agreed to al-ternate the Presidency and share other govern-ment posts equally.

The government has sought to reduce vast land-holdings and increase the size of small farms. From 1961 to 1968 the Institute for Land Reform acquired or developed 6,000,000 acres; more than 60,000 families were given title to farm plots.

Education and Religion. Most of the people are of mixed Indian and white descent; the next largest group is white; the smallest groups are Indians and Negroes. Education is free but not compulsory. The National Univ., founded 1572, is in Bogota. Roman Catholicism is the prevailing religion, but others are tolerated. Spanish is the language.

Defense. Military service is compulsory between the ages of 21 and 30 with actual service for one year. The Navy consists of 4 destroyers, 3 frigates, gunboats and others. The Air Force is equipped with American and Canadian fighters, fighter-bombers, transports and a number of heli-copters. Member: UN, OAS.

Republic of Congo—Brazzaville (FORMER FRENCH CONGO)

Capital: Brazzaville. **Area:** 132,046 sq. mi. **Popu-lation** (UN est. 1967): 860,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

Formerly the French Middle Congo Overseas Territory, the Republic of Congo (Brazzaville) straddles the Equator. It is bounded on the E and S by the Democratic Republic of Congo; on the W by Cabinda (Port.), the Atlantic and Gabon; on the N by Cameroon and Central African Republic. It is twice the size of Missouri.

Complete independence was proclaimed Aug. 15, 1960, and the Republic joined the UN Sept. 20. Fulbert Youlou was elected President Nov. 21, 1959, and resigned in Aug. 1963 in a coup sparked by trade unions. In March 1965 he escaped house arrest and fled the country. Under his successor, Pres. Alphonse Massamba-Debat, the country moved into the Red Chinese sphere of influence and announced a "scientific Socialist state" with one-party control.

In Aug. 1965 the U. S. withdrew its embassy staff, a step short of breaking off relations, charg-ing harassment of American officials.

A member of the French Community, the nation receives aid from France and Communist China.

Forests are a prime resource, covering 54,000,000 acres, and wood products form a major export. Chief commercial agricultural products are palm oil and kernels, cacao, bananas, and peanuts. In-dustrialization has progressed and its output now accounts for 11% of the total national product. Petroleum reserves are extensive. Brazzaville and Pointe-Noire have modern airports.

Democratic Republic of Congo REPUBLIQUE DEMOCRATIQUE DU CONGO (FORMER BELGIAN CONGO)

Capital: Kinshasa (former Leopoldville). **Area** (estimated): 905,563 sq. mi. **Population** (UN est. 1967): 16,353,000. **Monetary unit:** Zaire (.5 per U. S. \$1).

Until June 30, 1960, the Congo was a colony of Belgium in Equatorial Africa, entirely inland ex-cept for 25 mi. on the Atlantic Ocean, N of the mouth of the Congo River. It is larger than Texas and Alaska combined.

Along the eastern border lie several of Africa's Great Lakes: Albert, Edward, Kivu, Tanganyika and Mweru. North of the Equator on the Uganda

border, stand the Ruwenzori Mtns., believed to be the "Mountains of the Moon" of ancient legend. Mt. Margherita is 16,763 ft.

The Congo River, one of the world's longest, rises near the Zambian border in the SE and flows 2,718 mi. N, then W and finally SW, emptying into the South Atlantic.

Wildlife is abundant and includes most of the species Africa is famous for: elephant, lion, gorilla, hippopotamus, crocodile, python, etc.

Resources and Industry. There are extensive mineral deposits in the Katanga, Ituri and Kivu highlands. The Congo normally produces 6% of the world's copper and over 50% of its cobalt and industrial diamonds. Also produced are cadmi-um, gold, silver, tin, germanium, zinc, iron, tung-sten, manganese, uranium and radium.

Tropical rain forests cover much of the land; trees often are 150 to 200 ft. tall. They include ma-hogany, ebony, teak, copal, palms, cedars and gum and resin trees. Some livestock is raised in insect-free areas. Bananas, coffee, rubber, mangoes, plantain, coconuts are grown. Chief agricultural exports normally are fats and oils, timber, coffee, cotton, rubber and bananas.

History and Government. Leopold II, King of the Belgians, formed an international group to ex-ploit the Congo in 1876. In 1877 Henry M. Stanley explored the Congo and in 1878 the King's group sent him back to organize the region and win over the native chiefs. Claims having been advanced by Portugal and others, the Conference of Berlin, 1884-85, organized the Congo Free State with Leopold as King and chief owner. Exploitation of native laborers on the rubber plantations caused international criticism and led to granting of a colonial charter, Oct. 18, 1908, whereby the state became a Belgian colony.

Belgian and Congolese leaders agreed Jan. 27, 1960, that the Congo would become independent June 30. In the first general elections, May 31, the National Congolese movement of Patrice Lumumba won 35 of 137 seats in the National Assembly, lower House of Parliament. He was appointed Premier June 21, and formed a coalition cabinet. Bel-gium's King Baudouin formally proclaimed the territory's independence at Leopoldville (now Kinshasa) June 30, 1960.

Widespread violence in which mutinous Congo-lese troops took part caused Europeans and others to flee the country. Pres. Moise Tshombe of Katanga seceded from the republic July 11, but ended the secession Jan. 15, 1963. Katanga was the seat of the copper-mining operations of the Union Minière, which paid taxes formerly sufficient to de-fray one-half of the costs of the government. The UN Security Council Aug. 9, 1960, called on Belgium to withdraw its troops and sent a UN contingent to guard against civil war. Pres. Kasavubu removed Lumumba as premier and Lumumba fought for control with the backing of Ghana, Guinea and India. On Feb. 12, 1961, Lumumba was murdered by tribesmen in Katanga and Antoine Gizenga, vice premier, attempted to succeed him.

The last UN troops left the Congo June 30, 1964, and Cyrille Abdoula, Premier since Aug. 1, 1961, resigned, succeeded by Tshombe.

On Sept. 7, 1964, leftist rebels set up a "Peoples Republic" in Stanleyville with Christo-pher Gbenye as president. Premier Tshombe hired foreign mercenaries and sought to rebuild the Congolese Army. In Nov. and Dec. 1964 rebels slew scores of white hostages and thousands of Congolese; Belgian paratroops, dropped from U. S. transport planes, rescued hundreds. By July 1965 the rebels, though supplied with smuggled arms, had lost their effectiveness.

Growing rivalry between Pres. Kasavubu and Premier Tshombe ended when the former ousted the latter from office Oct. 13, 1965. Evariste Kimba became Premier but both he and Pres. Kasavubu were ousted Nov. 25 by Gen. Joseph D. Mobutu who named himself President. Tshombe went into exile.

In March 1966 Pres. Mobutu took over from Parliament all of its legislative powers. On July 1 he renamed Leopoldville Kinshasa; Stanleyville, Kisangani; and Elisabethville, Lubumbashi.

On June 2 ex-Premier Kimba and 3 former Cabinet ministers were ousted on charges of plotting to kill Pres. Mobutu.

In 1967 Tshombe was kidnapped in a private plane over the Mediterranean and flown to Algeria, where attempts were made to extradite him to the Congo where he faced execution. Shortly after-ward, a revolt, led by Belgian and French mer-cenaries, broke out in the eastern Congo.

This revolt died and most of the mercenaries fled the country; the government was aided by 3 large U. S. transport planes sent to the Congo to help transport government troops and supplies.

Education and Religion. The population is principally Bantu. More than 200 tribes are represented. Swahili, Lingala, Tshiluba and Kikongo are most widely spoken languages. There are an estimated 5,000,000 African Christians, predominantly Roman Catholic. Most schools are operated by church missions.

Costa Rica

REPUBLICA DE COSTA RICA

Capital: San Jose. **Area:** 19,575 sq. mi. **Population** (UN est. 1967): 1,594,000. **Monetary unit:** Colon (6.6¢ per U. S. \$1).

Costa Rica, in Central America, has Nicaragua for its neighbor on the N and Panama on the S. The lowlands by the Caribbean have a tropical climate. The interior plateau, with an altitude of about 4,000 ft., is temperate.

San Jose, the capital, situated inland—103 mi. by rail from Puerto Limon on the Atlantic; 93 by rail from Puntarenas on the Pacific—is the country's industrial and cultural center. Limon and Puntarenas are the principal ports. The crater atop Poas Volcano is the largest in the world. Puerto Limon occupies one of the sites where Columbus landed on his fourth and last visit to America.

Resources and Industries. A 1962 law giving new industries a tax holiday of up to 10 years has brought a wide variety of factories. The Irazu volcano near San Jose erupted from March 1963 to Dec. 1964, dropping millions of tons of ash which severely damaged coffee, vegetable and dairy crops, but higher world coffee prices aided the economy. Coffee of a high quality is the chief crop and export, followed by bananas, cocoa, cattle, cotton, fish and hemp.

New industries include fiberglass products, aluminum, fertilizer, roofing and cement.

The forests are extensive, and the lumber industry is important. Gold and silver are mined on the Pacific slope. Other minerals are quartz, alabaster, granite, oil, alum, slate, onyx, mercury, sulphur, copper.

Chief imports are flour, textiles, industrial machinery, gasoline, leather, hardware and tools. Three-fourths of foreign trade is with U. S. The balance of trade is adverse although increasing light industry and membership in the Central American Common Market have improved the situation.

Costa Rica was one of the Central American nations visited and promised aid in July 1968 by U. S. President Johnson.

The nation has a comparatively high standard of living and of social services.

History and Government. Although once a part of the Confederation of Central America, 1824-1829, Costa Rica has been independent since 1821.

An unusual Constitution was adopted Nov. 8, 1949. It abolishes the Army as a permanent institution. The legislative power is vested in a Chamber of Deputies, 57 in number, with four-year terms, under universal suffrage. The President, elected for four years, appoints a Cabinet of nine. Deputies may not serve successive terms but may be reelected after an intervening 4 years. A President may not be reelected until two succeeding terms have elapsed. There is a fine for not voting.

Religion and Education. Primary education is compulsory. Higher education is free; its institutions include the University of Costa Rica in San Jose; Inter-American Institute of Agriculture Sciences in Turrialba. The language of the country is Spanish. English is taught in the public schools. Roman Catholicism is the predominant religion, but the nation has religious liberty.

Defense. Order within the country is kept by a Civil Guard force of about 3,500. Costa Rica is a member of the UN and OAS.

Cuba

REPUBLICA DE CUBA

Capital: Havana. **Area:** 44,218 sq. mi. **Population** (UN est. 1967): 8,033,000. **Monetary unit:** Peso (1 per U. S. \$1).

Cuba, the Pearl of the Antilles, is both an island, the largest in the West Indies, and, including its offshore islands, a nation which is about the area of Pennsylvania. The Straits of Florida lie to the

N, the Gulf of Mexico to the W, the Caribbean to the S.

Key West, Fla., is about 90 mi. N. The Windward Passage, 50 mi. wide, separates Cuba from Haiti to the E, and Jamaica lies 90 mi. to the S. Cuba's length is 790 mi., its breadth averages 50 mi. The coastline, including the larger keys, is about 2,500 mi. It has numerous harbors, notably that of Havana, one of the finest in the world. The Isle of Pines (Isla de Pinos) is 1,180 sq. mi. in area.

Mountains rise in Pinar del Rio Province in the W, and in Oriente in the E where they reach a general elevation of about 3,000 ft., with Pico Turquino, 6,467 ft., the highest.

Havana (La Habana), pop. over 1,000,000, is the busiest port. Santiago de Cuba, on the SE coast, is next largest port.

Resources and Industries. Chief barometer of the nation's economy is the sugar industry which represents about 85% of exports. U. S. sugar mills, seized by the revolutionary regime in 1960, represented an investment of approx. \$275,000,000, producing about 40% of Cuba's output.

In 1968 the government indicated sugar production would fall short of the 1967 total.

Tobacco raising and the manufacturing of cigars and cigarettes rank second. Other products are molasses, coffee, pineapples, bananas, citrus fruit and coconuts. Textiles, cabinet woods (mahogany and cedar), dyewoods, fibers, gums, resins and oils are important. Iron, copper, manganese, nickel and salt are some of the minerals. Industries include rayon, cement, naphtha and gasoline, chemicals.

Cuba was discovered by Christopher Columbus, Oct. 28, 1492. Its name derives from the Indian Cubanacan. Except for British occupation of Havana, 1762-63, Cuba remained Spanish until 1898.

Under Spanish governors Cubans were denied citizenship, slavery was retained until 1886, and patriots who revolted were executed. On Oct. 10, 1868, Carlos Manuel de Cespedes led Cubans in a proclamation of independence. Their ten-years' war ended in 1878 with guarantees of rights by Spain, which Spain failed to carry out. A full-scale movement for independence began Feb. 24, 1895, under Jose Marti, with the military under the command of Maximo Gomez, Antonio Maceo and Calixto Garcia. By 1897 over half the island was in Cuban hands. The Spanish governor, Valeriano Weyler, destroyed sugar plantations, banned export of tobacco and held patriots in "reconcentration camps." A U. S. offer to mediate was rejected by Spain.

The movement to help Cuba gain its independence was speeded up by the sinking of the U.S.S. Maine in Havana harbor. The U. S. declared war on Spain Apr. 25, 1898, and defeated it in the short Spanish-American War. In the Treaty of Paris, Dec. 10, 1898, Spain gave up all claims to Cuba. The U. S. formally withdrew May 20, 1902, when Tomas Estrada Palma was inaugurated first president of the republic.

Under 1903 and 1934 agreements, the U. S. leases a site for its naval base at Guantanamo Bay, on the SE coast.

In 1952 Fulgencio Batista seized control of the government and imposed a dictatorship.

Opposition to the corrupt Batista regime became vigorous in 1956 under leadership of Fidel Castro, born 1927, lawyer and former leader of student opposition. Known as the 26th of July Movement, the revolutionists in 1958 carried on intensified guerrilla warfare. Batista resigned Jan. 1, 1959, and fled to Lisbon.

Castro proclaimed Dr. Manuel Urrutia Lleo Provisional President and Urrutia dissolved the Cuban Congress, Jan. 6. Castro became Premier Feb. 16.

Pes. Urrutia resigned after accusing Communists of plotting treason. Dr. Osvaldo Dorticos Torrado was made Provisional President July 17, 1959.

The government, quickly dominated by left-wing extremists, began a program of sweeping economic and social changes, led by an agrarian reform law approved May 18, 1959. It executed hundreds of dissidents, and ousted moderates.

The National Institute of Agrarian Reform, principal agent for economic control, nationalized cattle and tobacco lands and instituted a system of cooperatives. All private enterprise was brought under control by a Central Planning Board created Feb. 20, 1960. By the end of 1960 all Cuban banks and industrial companies had been nationalized, including an est. \$1 billion worth of U. S. owned properties.

Soviet, Communist Chinese and Czechoslovakian

economic penetration was extended by trade and credit agreements, including sugar purchases and a USSR credit equiv. to \$100,000,000 for construction of factories and other installations.

Citing the open hostility of the regime, the U. S. cut back Cuba's remaining 1960 sugar quota by 700,000 tons. The U. S., Oct. 19, imposed an extensive embargo on exports to Cuba and, Feb. 4, 1962, Pres. Kennedy ordered a total embargo. Another U. S. order, July 8, 1963, halted virtually all financial transactions.

The OAS nations voted July 26, 1964, 15-4, resolution for mandatory sanctions against Cuba and for strengthening defenses against Cuban subversion efforts.

In 1962-1964 deficiency in the sugar crop and food shortages resulted in collectivization of farming and stringent labor controls. As the economic crisis deepened, food, shoes, clothing, gasoline were rationed.

In 1963, restrictions similar to rationing were in effect for eggs, bread, sugar, milk, etc.

Bay of Pigs Raid. In April, 1961, Jose Miro Cardona, pres., Cuban National Revolutionary Council, called on Cubans to unite to overthrow the Castro regime. On Apr. 17 about 1,400 Cuban patriots, who had trained in the U. S. and Guatemala, landed in the Bahia de Cochinos (Bay of Pigs) on Cuba's southern coast. They were overwhelmed by Castro forces and killed or imprisoned. The attempt created severe criticism in Congress of activities of the U. S. Central Intelligence Agency. Pres. Kennedy previously had declared there would be no intervention by the U. S. On Dec. 21, 1962, Castro agreed with James B. Donovan, representing welfare agencies, to release 1,113 prisoners in exchange for medical supplies worth a reputed \$53,000,000. American drug concerns and religious groups raised the supply. Eventually Donovan was able to effect the transfer of nearly 10,000 Cubans, including families of exiles.

Kennedy vs. Soviet Missiles. In the fall, 1962, the U. S. ascertained that the Soviet Union was delivering nuclear missiles and other weapons to Cuba and building bases. On Oct. 22 Pres. Kennedy warned that any missile launched from Cuba would be regarded as an attack by the Soviet Union and would call for full retaliation. He asked Premier Khrushchev to halt this "clandestine, reckless and provocative threat to world peace." Khrushchev removed the missiles.

Cuba complained of numerous raids by infiltrators, 1964-66. The U. S. said a Guantanamo Base sentry fired on an armed Cuban soldier who infiltrated base territory, May 21, 1966, Castro charged the Cuban was killed on Cuban soil.

In Feb. 1966, Castro denounced Communist China for "blackmail and extortion" for slashing rice exports to Cuba.

In 1968, Anibal Escalante, leader of a pro-Soviet party clique, was sentenced to 15 years and 34 followers drew lesser terms.

Cuba is a member of the UN.

Education and Religion. Education is compulsory between the ages of 6 and 14. Among the institutions of higher learning is the University of Havana, founded in 1721. The Roman Catholic religion is dominant. The language is Spanish with English widely understood.

Education was nationalized June 7, 1961, and many Catholic schools were seized. Many Catholic priests of Spanish origin were deported.

Defense. Compulsory military service was established Jan. 5, 1942. A large defense force, including women, has been trained by the Castro regime and arms have been supplied by Communist countries.

Cyprus

KYPRIAKE DIMOKRATIA
KIBRIS CUMHURİYETİ

Capital: Nicosia. **Area:** 3,572 sq. mi. **Population** (UN est. 1967): 614,000. **Monetary unit:** Pound (.4167 per U. S. \$1.).

Cyprus, former British Crown Colony, became a republic Aug. 16, 1960, and joined the Commonwealth, UN and Council of Europe. It is the third largest island in the Mediterranean Sea, 40 mi. S of Turkey, 60 mi. W of Syria, and 350 mi. E of Crete. Two mountain ranges run E-W, separated by a wide, fertile plain. It is smaller than Connecticut.

Four-fifths of the inhabitants are Greek Orthodox Christians, nearly all the rest are Turkish Moslems. Greek and Turkish are official languages; English is widely spoken.

Chief ports are Limassol, Larnaca and Famagusta.

Resources and Industries. Cyprus is mainly agricultural, with cereals, grapes, wine, carobs, citrus fruits, potatoes and olives as principal crops. Agricultural products account for about 50% of the island's exports, but minerals are the mainstay—cupreous and iron pyrites, asbestos, gypsum, chrome and amber—making up 36% of total exports. Manufacturing is limited mainly to light industries. Cement and oil refining industries are under development.

The nation suffers an unfavorable balance of trade. Value of imports (in U. S. dollars) rose from \$159,000,000 in 1966 to \$167,000,000 in 1967. Exports in 1966 totaled \$82,000,000; in 1967, \$83,000,000.

History and Government. Cyprus was inhabited as early as the New Stone Age in the 4th millennium B.C. Achaeans from Greece traded with the early Cypriots from 1600 B.C., set up colonies after the end of the Trojan War (c. 1184 B.C.). From the middle of the 8th Century B.C., Cyprus was dominated successively by Phoenicians, Assyrians, Egyptians, Persians, Alexander and the Ptolemies, Romans, Byzantines, Moslems, Crusaders, Venetians and Turks. Great Britain took over administration in 1878 under an agreement with Turkey, annexed the island in 1914, made it a Crown Colony in 1925.

Agitation for enosis (union) with Greece resulted in the British abolishing the legislative council in 1931. Demands for enosis were renewed after World War II; the Turkish minority, about 100,000, was opposed. Widespread violence in 1955-56, led by EOKA, an underground organization, brought harsh disciplinary measures, including the temporary exiling of Archbishop Makarios III, patriarch of the Orthodox Church in Cyprus and leader of the enosis movement.

In 1959, conflict was brought to a temporary halt by an agreement signed by British, Greek, Turkish and Cypriot leaders; under which Cyprus would become a republic, with a President elected from and by the ethnic Greek community, and a Vice President from and by the corresponding Turkish community. A 70-30% proportion of the Greek and Turkish communities was to be represented in the House of Representatives. Britain retained 2 military enclaves, Akrotiri and Dekelia, approx. 99 sq. mi.

Separate Greek and Turkish Communal Chambers dealt with religious, educational and other communal affairs.

Archbishop Makarios was elected President for a 5-year term and Dr. Fazil Kutchuk Vice President, Dec. 14, 1959. The constitution was approved April 6, 1960; independence became final Aug. 16, 1960, and Pres. Makarios took office.

Communal strife again broke out in December, 1963, following proposals by Pres. Makarios to make changes in the constitution which the Turkish minority felt would reduce their rights.

The UN Security Council approved Mar. 4, 1964, a resolution providing for an international peace-keeping force and UN troops began action Mar. 27.

Tension worsened after Turkey charged that Turkish Cypriots had been massacred in a Greek push against the northwest coast and bombed and strafed Greek positions Aug. 7-10, 1964. Both sides accepted a UN appeal for a cease-fire Aug. 10.

During a 1965 crisis, the UN Security Council urged all parties to avoid increasing tensions.

Another crisis ended in Aug. 1966 when Pres. Makarios, on an appeal from UN Sec. Gen. U Thant, lifted a blockade imposed on Turkish Cypriots which had led to a threat of "counter-measures" by Turkey.

War between Greece and Turkey over Cyprus appeared imminent in Nov. 1967 but was averted mainly because of mediation work by Cyrus R. Vance, special envoy of U. S. President Johnson.

Archbishop Makarios, whose term as Pres. had been twice extended by Parliament, was reelected Feb. 25, 1968, by an overwhelming popular vote. Vice Pres. Kutchuk was returned to office unopposed.

Czechoslovakia

CZECHOSLOVAK SOCIALIST REPUBLIC

Capital: Prague (Praha). **Area:** 49,370 sq. mi. **Population** (UN est. 1967): 14,305,000. **Monetary unit:** Koruna (7.2 official rate per U. S. \$1.).

Czechoslovakia is a central European socialist republic about 600 mi. long and 50 to 100 mi. wide—about the size of New York State. It is bounded

by West Germany (Bavaria), East Germany (Saxony), Poland, the Soviet Union, Austria and Hungary.

The Vltava (Moldau) and Labe (Elbe) flow from Bohemia to Germany; the Danube separates Slovakia from Hungary. The Carpathian Mts. are in the E and NE; tallest are the Tatras, with Gerlachovka peak 8,737 ft. The Ore Mts. (Ger. Erzgebirge) are on the Saxon border. The Great Bohemian Forest, rich in game and timber, lies on the Bavarian border.

Resources and Industries. Czechoslovakia has considerable natural resources, developed by farming, mining and industry. About one-third is agricultural, with about 60% in grain. Sugar beets and hops are grown and beer is exported from Pilsen (Pilsen).

Coal is mined in the Ostrava-Karvina basin and at Pilsen and Brno. Much iron is found in the Beroun basin and Slovakia. Oil, imported mainly from the USSR via the "Friendship Pipeline," is refined at Bratislava on the Danube. Jachymov (Joachimsthal), has Europe's richest deposits of pitchblende (for radium) and uranium, extensively mined by the USSR under contract. Czechoslovakia is a major exporter of arms and machinery. Ostrava and Kosice are important steel centers.

Glass crystals and kaolin support a large glass and china industry; other products include light aircraft, wood pulp, textiles, shoes.

The nation bettered its balance of trade in 1967. Imports in 1967 were worth \$2.68 billion (\$2.736 billion in 1966). Exports in 1967 were worth \$3.013 billion (\$2.745 billion in 1966).

History and Government. Since February, 1948, Czechoslovakia has been a unitary socialist republic composed of two Slav nations—the Czechs and the Slovaks—with a socialist constitution, nationalized industry and one-slate elections. The Czechs number over 8,000,000 and Slovaks about 4,000,000. In addition, there are some 450,000 Hungarians, 200,000 Germans, 300,000 gypsies, 100,000 Ruthenian-Ukrainians and 100,000 Poles. Large numbers of Hungarians were moved out of Slovakia and many Slovaks were moved from Hungary to Slovakia in 1945-46. An estimated 3,000,000 Sudeten Germans were transferred to Germany under the Potsdam Agreement.

Bohemia, Moravia and Slovakia were part of the Great Moravian Empire when overrun by the Magyars 906 A.D. Bohemia and Moravia later became part of the Holy Roman Empire. Under the kings of Bohemia Prague in the 14th Century was the cultural center of Central Europe. The Hussite religious wars were fought here, 1420-36. In 1526 Ferdinand, brother of Emperor Charles V, became king of Bohemia and Hungary and began Germanization of the Slavs, never fully successful. In 1618 the Thirty Years' War opened in Prague.

In 1914-1918 Thomas G. Masaryk and Eduard Benes formed a provisional government with the support of Slovak leaders, of whom Milan Stefanik organized freedom fighters in foreign countries. When Austria fell, Oct. 28, 1918, they proclaimed the republic of Czechoslovakia Oct. 30. Masaryk became President, Benes Foreign Minister and Stefanik Minister of War. Benes succeeded Masaryk in 1935.

By 1938 Adolf Hitler of Nazi Germany had worked up disaffection among German-speaking citizens in Sudetenland and demanded its cession. To avoid war Prime Minister Neville Chamberlain of Great Britain, with the acquiescence of France, signed an agreement with Hitler at Munich, Sept. 30, 1938, agreeing to the cession, with a guaranty of peace by Hitler and Mussolini. Nazi Germany occupied Sudetenland Oct. 1-2. President Benes resigned Oct. 5, Germany and Italy agreed Nov. 2 to convey 4,000 sq. mi. of Czechoslovakia to Hungary. Other parts of the nation were sliced off to benefit Poland.

Hitler on Mar. 15, 1939, dissolved Czechoslovakia, made protectorates of Bohemia and Moravia, and supported the autonomy of Slovakia, which was proclaimed independent Mar. 14, 1939, with Jozef Tiso as President.

In May, 1942, the German governor, Reinhard Heydrich, was assassinated near Prague; Hitler in reprisal leveled the village of Lidice, shot the men, interned the women and sent the children to Germany.

Soviet troops with some Czechoslovak contingents entered eastern Czechoslovakia in 1944 and reached Prague in May 1945; Benes returned as President. In May 1946 elections, the Communists won 38% of the votes, largest for a single party,

and Benes accepted Klement Gottwald, a Communist, as Prime Minister. Tiso was executed in 1947.

In Feb. 1948 a crisis resulted in the resignation of 12 anti-Communist ministers and Benes accepted a new Gottwald Cabinet Feb. 25. Jan Masaryk, son of Thomas Masaryk, had not resigned as Foreign Minister. He was found dead March 10, apparently a suicide but there was widespread speculation he was murdered.

In May 1948 a new constitution was approved by the constituent assembly; Benes refused to sign it. On May 30 the voters were offered a one-slate ballot and the Communists won full control. Benes resigned June 7, Gottwald became President and Benes died Sept. 3.

The present constitution, announced in July, 1960, reorganized the nation into a highly centralized state. It has a National Assembly of 300 and a Slovak National Council, the latter limited to regional matters.

In Jan. 1968 a liberalization movement spread explosively through Czechoslovakia. Antonin Novotny, long the Communist boss of the nation, was deposed as party leader and succeeded by Alexander Dubcek, a Slovak, who declared he intended to make Communism democratic. On Mar. 22 Novotny resigned as President and was succeeded by Gen. Ludvik Svoboda. On Apr. 6, Premier Joseph Lenart resigned and was succeeded by Oldrich Cernik, whose new cabinet was pledged to carry out democratization and economic reforms.

In July 1968 the USSR and 4 hard-core Warsaw Pact nations demanded an end to liberalization. At summit meetings held in Czechoslovakia, it was apparently agreed the nation could continue these policies. But on Aug. 20, Russian, Polish, East German, Hungarian and Bulgarian military forces invaded Czechoslovakia. (See Index for further details.)

Education and Religion. An estimated 75% of the population is Roman Catholic, the rest are Protestant (Hussite), Greek Orthodox, etc.

Institutions of higher learning are the Czech University in Prague, founded in 1348; the Universities of Brno, Bratislava, Kosice, Hradec, Kralove, Plzen; also technical universities. Czech and Slovak are official languages.

Defense. Universal military service for all between 20 and 50 was re-established in 1945, with service for two years. Since 1950 the Army has been trained by Soviet advisers. Its strength is est. at 185,000, with an additional 45,000 men in security forces and frontier guards. The Air Force is believed to have 25,000 personnel and about 1,500 Soviet-type jet planes.

Dahomey

REPUBLIC OF DAHOMEY

Capital: Porto-Novo. Area: 43,483 sq. mi. Population (UN est. 1967): 2,505,000. Monetary unit: CFA franc (246.85 per U. S. \$1).

The Republic of Dahomey, former Overseas Territory in French West Africa, is a narrow strip 415 mi. long and 77 mi. wide, bounded by the Republics of the Niger and Upper Volta, Nigeria, Gulf of Guinea and the Republic of Togo. It is about as large as Tennessee.

In accordance with the 1958 French constitution, Dahomey became fully independent Aug. 1, 1960, and became a member of the UN Sept. 20. It is a member of an economic alliance known as the Council of the Entente, formed May 29, 1959, the other members being Ivory Coast, Niger and Upper Volta. Dahomey signed agreements Apr. 24, 1961, providing for close ties with France outside of the French Community proper.

Under the constitution the President and National Assembly are elected for five-year terms. Pres. Hubert Maga, elected Dec. 11, 1960, was deposed Oct. 28, 1963, and replaced by a provisional government headed by Gen. Christophe Soglo. The constitution of the second republic was adopted Dec. 19, 1963. Sourou Migan Apithy was elected Pres. Jan. 24, 1964; he was deposed by Soglo Nov. 27, 1965; Tahirou Congacou was named Provisional Pres.; he was ousted by Soglo Dec. 22 and Soglo took over the Presidency.

Principal products: palm oil, kernels and nuts; peanuts, cotton, kapok, coffee, tobacco.

Gen. Soglo was ousted Dec. 17, 1967, by a military group. Lt. Col. Alphonse Alley became head of state. A constitution providing for a one-party state for 5 years was approved Mar. 31, 1968. An

election for President in May was boycotted by most voters and was declared void.

The military leaders installed Emile Derlin Zinsou, a civilian, as President June 27, 1968.

Small industries were under construction in 1968, including a bicycle plant, cotton mill and peanut-oil plant.

Denmark

KONGERIGET DANMARK

Capital: Copenhagen. Area: 16,619 sq. mi. Population including Faeroe Islands and Greenland (UN est. 1967): 4,839,000. Monetary unit: Krone (7.466 per U. S. \$1).

Denmark, a kingdom, occupies the peninsula of Jutland, thrusting out to the North from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, and adjacent islands. The Skagerrak separates it from Norway; the Kattegat and Oresund from Sweden. The country consists of low undulating plains. It is about the size of New Hampshire and Massachusetts combined.

The Faeroe Islands in the North Atlantic, about 300 mi. NE of the Shetlands, and 850 mi. from Denmark proper, 18 inhabited, have an area of 540 sq. mi. and pop. (est. 1967) of 37,000. They are part of the kingdom as is Greenland, described below.

Resources and Industries. About 25% of the population lives by agriculture on more than 70% of the usable land. Denmark normally exports more butter and produces more bacon than any other country except the U. S. Fisheries are valuable. Tourist trade accounts for 5% of foreign exchange. Denmark exports machinery, ships, textiles, furniture, iron and steel goods. Most raw materials and fuels have to be imported, but manufactures have increased; industrial exports jumped 228%, 1956-66, surpassing agricultural exports. Danish furniture has a large sale in the U. S.

The first cooperative consumers' society was established 1866; the system currently has about 1950 affiliated societies and includes 517,000 households, about 45% of the whole population.

More than 1,000,000 tourists visited Denmark in 1966. Many tourists leave their children in Danish camps while visiting other countries.

Denmark's merchant fleet comprises an est. 335 vessels over 1,500 gross tons aggregating more than 2,250,000 gross tons.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$3,002,000	\$2,454,000
1967	\$3,152,000	\$2,537,000

History and Government. The origin of Copenhagen dates back to ancient times, when the fishing and trading place named Havn (port) grew up on a cluster of islets in the Sound, but Bishop Absalon (1128-1201) is regarded as the actual founder of the city. On one of the islets he built a stronghold against the pirating Wends and the remnants of this still exist underground in front of Christiansborg. Elsinore (Helsingør) contains the reputed grave of Hamlet, the Danish prince immortalized by Shakespeare.

The King and Parliament jointly hold legislative power. A new constitution, signed June 5, 1953, made women eligible to succeed to the throne, substituted a unicameral Parliament (the Folketing) of 179 members for the former two-chamber Rigsdag, made Greenland a full member of the Danish Realm with representatives in Parliament.

The King of Denmark is Frederick IX (born March 11, 1899) who succeeded to the throne on the death of his father, King Christian X, April 20, 1947. He married Princess Ingrid of Sweden and they have three daughters: Princess Margrethe, heir (born April 16, 1940), Princess Benedikte (born April 29, 1944, married Feb. 3, 1968, to Prince Richard-Casimir of Sayn-Wittgenstein) and Princess Anne-Marie (born Aug. 30, 1946, Queen of Greece). The King has one brother, Prince Knud (born July 27, 1900).

On Sept. 18, 1964, Princess Anne-Marie married King Constantine of Greece. On July 10, 1965, their 1st child, a daughter, Alexia, was born. A son, Paul, was born May 20, 1967.

Princess Margrethe was wed June 10, 1967, to Count Henri Marie Jean Andre de Laborde de Monpezat of France, now Prince Henrik of Denmark. A son, Frederik Andre Henrik Christian, was born May 26, 1968. He is 2nd in line to the throne.

Denmark has public assistance, health insurance, disability and old-age pensions, workmen's com-

pensation and unemployment insurance. If a worker refuses to take an offered job, aid ceases. A pension is paid to men aged 67, widows and single women aged 62.

Denmark is a member of the UN, NATO and EFTA.

Education and Religion. The Evangelical Lutheran is the established religion, but there is complete religious tolerance. Education is compulsory and includes vocational courses. Leading institutions are the Univ. of Copenhagen (1479), the Univ. of Arhus (1934), the Technical Univ. (1824), and the Univ. of Odense. Apprenticeship training and occupational training of unskilled workers are provided by law. State grants aid the nation's 1,460 libraries. Royal Library has more than 1,650,000 vols.

Defense: The Army has compulsory training ages 10-25. The Navy comprises fleet and coast defense forces. Mobilized strengths are: Army, 98,000; Navy, 12,000; Air Force, 7 fighter and fighter-bomber squadrons totaling 16,000, and a home guard of 71,000 men and women. Seven airfields come under the NATO program.

GREENLAND

Greenland, a huge island between the North Atlantic and the Polar Sea, is separated from the North American continent by Davis Strait and Baffin Bay. Its total area is 840,000 sq. mi., 705,234 of which are ice-capped. Most of the island is a lofty plateau 9,000 to 10,000 ft. in altitude. The average thickness of the ice cap is 1,000 ft. The population (est. 1965) is 39,615. The capital is Godthaab. Under the 1953 Danish constitution the colony became an integral part of the realm.

The deposits of cryolite are the largest in the world. Fish and fur are exported.

Denmark has built six Loran towers up to 1,345 ft. tall on Greenland and the Faeroe Islands to provide navigational aid to ships and planes.

Dominican Republic

REPUBLICA DOMINICANA

Capital: Santo Domingo. Area: 18,816 sq. mi. Population (UN est. 1967): 3,889,000. Monetary unit: Peso (1 per U. S. \$1).

The Dominican Republic occupies the eastern two-thirds of the Island of Hispaniola (discovered by Columbus in 1492), second largest of the Greater Antilles, lying between Cuba on the W and Puerto Rico on the E. The boundary between it and the Republic of Haiti, which occupies the western part of the island, is 241 mi. long. It has a coastline of 979 mi. It is twice the size of New Hampshire. Climate is generally sub-tropical.

The city of Santo Domingo, founded 1496, is the oldest settlement by Europeans in the hemisphere and has the supposed ashes of Columbus in an elaborate tomb in its ancient cathedral.

Resources and Industries. The land is fertile. Chief products are sugar, cocoa, coffee, tobacco, corn, peanuts, bananas and livestock products.

The country has gold, copper, iron, salt, chalk, bauxite, marble, amber, kaolin.

Chief manufactures are sugar, molasses, rum, alcohol, cement, peanut oil, chocolate, tobacco products, cordage, textiles, apparel, lumber, furniture. The U. S. buys more than 50% of its exports, mostly sugar, cocoa and coffee, and supplies about 50% of imports.

In 1968 a group of U. S., European and Japanese companies joined the Dominican government in a consortium designed to press industrial development and technical training.

History and Government. Spain ceded Santo Domingo to France, 1795. Toussaint L'Ouverture, Haitian leader, seized it, 1801. Spain returned intermittently 1803-1821, and several native republics came and went. From 1822 to 1844 Haiti governed it. The republic was formed 1844. Spain occupied it 1861-63.

The country was occupied by American Marines from 1916 until 1924, when a constitutionally elected government was installed.

In 1930, Gen. Rafael Leonidas Trujillo Molina was elected President. Trujillo remained in power, ruling the nation with an iron hand (though turning the Presidency over to his brother, Hector, in 1952 and to Joaquin Balaguer in 1960) until his assassination May 27, 1961.

Pres. Balaguer resigned under pressure Jan. 17, 1962. Pending general elections, the country was governed by a 7-member Council of State headed by Rafael F. Bonnelly who was named President

Jan. 18, 1962. He was succeeded by Juan Bosch, elected President Dec. 20, 1962, in first free elections in 38 years. Pres. Bosch was overthrown Sept. 25, 1963, and his regime replaced by an army-backed civilian triumvirate led by Donald Reid Cabral.

On April 24, 1965, a revolt was launched by followers of Bosch and others, including Communists, and led by Col. Francisco Caamaño Dengo. The Reid Cabral government was ousted, but the rebel regime was replaced Apr. 28 by a 3-man counter-revolutionary junta led by Gen. Elias Wessin y Wessin; on May 7 it was succeeded by a 5-man regime headed by Gen. Antonio Imbert Barreras, another anti-Bosch leader; fighting continued in Santo Domingo.

A force of 405 U. S. Marines landed by helicopter April 28, primarily, according to U. S. Pres. Johnson, to save American and other lives; U. S. forces were expanded to a high of 24,000 as the U. S. sought to restore order and prevent a Communist take-over.

At U. S. urging, the Organization of American States sent an Inter-American Peace Force to Santo Domingo starting May 23, under a Brazilian commander with the head of the U. S. forces as deputy commander. Some U. S. forces were withdrawn and the Inter-American Force consisted of 11,200 men, including 9,400 U. S. troops, 1,100 Brazilians, and units from Honduras, Nicaragua, Paraguay and Costa Rica.

On Sept. 3, Hector Garcia-Godoy became provisional President under sponsorship of the OAS with agreement by all major local groups. The junta and Col. Caamaño announced their resignations as heads of their rival governments.

An election was held June 1, 1966; former Pres. Balaguer defeated former Pres. Bosch, 754,409 votes to 517,783. The Balaguer Reformist party won control of both houses of Congress. The new President was inaugurated July 1. The Inter-American Peace Force began moving troops out and completed their departure Sept. 20.

Thousands of Dominicans had lost their lives in the communal strife; U. S. forces suffered 26 dead, 155 wounded.

Education and Religion. The population is mostly mixed white and Negro, plus about 15% white and a slightly larger number of Negro. The people are mostly Roman Catholics. Education is free and compulsory. The language is Spanish, but English is widely spoken. The University of Santo Domingo was established 1538 by Dominican fathers.

Defense. Active armed forces comprise approximately 25,000 officers and men. The Navy has modern units—2 destroyers, 4 frigates, 5 corvettes, patrol vessels and coast guards. The Air Force has fighters, light bombers, transport and rescue squadrons. The republic is a member of the UN and OAS.

Ecuador

REPUBLICA DEL ECUADOR

Capital: Quito. Area (govt. est.): 116,270 sq. mi. **Population** (UN est. 1967): 5,508,000. **Monetary unit:** Sucre (18.18 official rate per U. S. \$1).

On the northwestern coast of South America, Ecuador (Sp. for Equator) straddles the world's midsection, extending 100 mi. into the Northern Hemisphere, 400 into the Southern. It is bounded by Colombia, Peru and the Pacific. Two ranges of the Andes run N and S, splitting the country into 3 zones—hot, humid lowlands on the coast; temperate highlands between the ranges, and rainy, tropical lowlands to the E. There are 22 peaks over 14,000 ft.; highest is Chimborazo, 20,561 ft.; many are snowcapped; some volcanoes have erupted in recent years. It is larger than Arizona.

The Galapagos Islands, 600 mi. to the W, are the home of huge tortoises and other unusual animals. Charles Darwin visited the islands aboard the Beagle in 1835; his studies of wildlife there provided most of the facts for his theory of evolution.

Ecuador has claimed an est. 100,000 sq. mi. of Amazon valley land awarded to Peru in a 1942 treaty.

Guayaquil, Ecuador's largest city, is the chief seaport and, together with Quito, is served by major airlines. Rail lines link Quito with Guayaquil and San Lorenzo on the coast. Quito is famed for its 17th Century churches.

Resources and Industries. The country is rich in undeveloped minerals. Silver ore is found at Pillzhum in Cañar. Petroleum output is increasing. Large deposits of copper, iron, lead, coal and sul-

phur are known to exist. Modern farm methods have speeded agricultural growth and made Ecuador the world's largest exporter of bananas. Other agricultural products are rice, cereals, potatoes, fruits, cocoa, coffee, kapok, rubber, man-grove bark.

Industry now contributes 20% to the national income, with large production increases in cement, edible oils, textiles, sugar, chemicals. The U. S. is Ecuador's principal customer.

The so-called Panama hats, made of Toquilla straw, are hand-woven in Ecuador. It is also the chief source of extremely light but strong balsa wood. Ecuador was the original home of the Cinchona tree, source of quinine.

History and Government. Spain conquered the region, which was the northern Inca empire, in the 16th Century. Liberation forces defeated the Spanish May 24, 1822, near Quito. Ecuador became part of the Republic of Colombia but seceded, May 13, 1830, and became a republic. It has had a history of numerous coups and military rule.

Under the republic's constitution of 1967 the President is elected directly by the people for a 4-year term and is eligible for re-election after a 4-year interval. Congress consists of a Senate and a Chamber of Representatives.

A military junta seeking reforms ousted and exiled Pres. Carlos J. Arosemena Monroy July 11, 1963, and outlawed the Communist party. Anti-government demonstrations in July 1965 brought appointment of a new coalition Cabinet by the junta. More demonstrations brought ouster of the junta, Mar. 29, 1966, by military leaders and agreement by major political parties to name Clemente Yerovi Indaburu Provisional President. Yerovi convened a National Constitutional Assembly and elections were held Oct. 1966. The Assembly met Nov. 18, 1966 and elected Dr. Otto Arosemena Gomez Interim President.

In June 1968 elections, Dr. Jose Maria Velasco Barra, who had been elected Pres. 4 times but had been ousted 3 times by coups, was again chosen by the voters.

Ecuador's 17th Constitution was adopted May 25, 1967. It is a UN and OAS member.

Education and Religion. Roman Catholicism is the chief religion. Primary education is compulsory. The language is Spanish. The population is over one-third Indian and one-third mixed; whites are in the minority but American, British, Italian and Spanish immigrants are encouraged.

Defense. Military service is compulsory. The U. S. has a military assistance advisory agreement with Ecuador.

EGYPT

See Index for United Arab Republic

El Salvador

REPUBLICA de EL SALVADOR

Capital: San Salvador. Area: 8,260 sq. mi. **Population** (UN est. 1967): 3,151,000. **Monetary unit:** Colon (2.5 per U. S. \$1).

El Salvador, smallest of the six Central American or Middle American republics and the only one without an Atlantic seacoast, is bounded by Guatemala, Honduras, the Gulf of Fonseca and a Pacific coastline of about 160 mi. A country of mountains, including many volcanoes, and upland plains, it is entirely within the tropics, but tropic heat is modified by the elevation. It is about the size of Massachusetts.

La Libertad, Acajutla and La Union (Cutuco) are the principal seaports.

The three racial types are white, 10%; mixed white and Indian descent, 85%; Indian, 5%.

Resources and Industries. Mountain slope plantations make El Salvador the world's 7th largest producer and 4th largest exporter of coffee. Cotton production has made large strides; coffee represents 52% of the value of exports, cotton 21%. Primarily agricultural, the country is becoming industrialized; it produces cement, refined sugar and textiles.

In July 1968 U. S. President Johnson visited El Salvador and announced new financial aid to the 5 members of the Central American Common Market: El Salvador, Costa Rica, Honduras, Guatemala and Nicaragua.

History and Government. El Salvador became independent of Spain in 1821; member of the Central American Federation until 1839. The consti-

tution provides for a unicameral legislative system, the National Assembly of Deputies, elected by popular vote. Voting is compulsory for all over 18 years of age. Executive power is vested in the President who is elected for a 5-year term by direct, popular vote and is ineligible for immediate reelection. The President is assisted by a Council of Ministers who are named by him.

Education and Religion. Education is free and compulsory, but illiteracy rate is 50%. The language is Spanish. The dominant religion is Roman Catholicism.

Defense. There is military instruction between the ages of 18 and 40. The Army is organized in five divisions. There is one aviation corps, one marine corps, and a national guard. El Salvador is a member of the UN and OAS.

ESTONIA

See Index for Estonian SSR

Ethiopia

YE ITIOPIA NEGUSE NEGUEST MENGUST
(Abyssinia)

Capital: Addis Ababa. Area: 398,350 sq. mi., including Eritrea. Population (UN est. 1967): 23,457,000. Monetary unit: Ethiopian dollar (2.5 per U. S. \$1).

Ethiopia is a ruggedly mountainous, independent empire in NE Africa. It faces on the Red Sea, but its main rivers are important tributaries of the Nile; the Abbaï or Blue Nile, one of the two main branches of that mighty river, has its source in Ethiopia's Lake Tana. The country is as large as Texas and New Mexico combined.

Resources and Industries. Economy is some 70% agricultural but industrial resources are potentially great, including vast hydroelectric power, surveys of which are under way with aid of the International Bank. Modern industrial enterprises are conducted by American and other firms.

Fertile soil and abundant rainfall produce two crops annually. Coffee, wheat, barley, millet, tobacco, and sugar are principal crops. Coffee of extremely high quality from Kaffa, in SW Ethiopia, reputed birthplace of the coffee plant, accounts for half of the country's foreign exchange. Over 1,600,000 bags were produced in 1965.

An unfavorable balance of trade continued in 1967. Exports declined from \$112,000,000 to \$102,000,000. Imports dropped from \$163,000,000 to \$144,000,000.

Cattle, sheep, mules and goats are raised, cattle numbering an est. 25,325,000. Hides and skins, oils and pulses also are exported. Mineral resources include platinum, gold, silver, manganese, tin, copper, asbestos, potash, sulphur, mica, cement and salt. There are known deposits of coal and iron; tests are in progress for petroleum.

Ethiopia has used large credits from the World Bank and International Development Assn. for road building (it now has 3,200 mi. of all-weather roads). Aid and investment funds are received from the U. S. and other western nations and from Communist countries. Ethiopia is a member of the UN and Addis Ababa is hq. for the Organization of African Unity.

History and Government. Ethiopia is a constitutional monarchy derived from a number of earlier kingdoms, descendants of ancient Hamite and Semite tribes. Italy invaded the country in 1880 and acquired a sphere of influence and later organized its colony of Eritrea. In 1936 Italy invaded Ethiopia without declaring war. Emperor Haile Selassie fought until forced to withdraw. The League of Nations applied sanctions against Italy, which proved ineffective. Mussolini added Ethiopia to Italy with Victor Emmanuel III emperor. British forces freed Ethiopia 1941.

In 1964, armed clashes featured a border dispute with Somalia. A truce was arranged by the Org. of African Unity and foreign ministers of the two nations met in Khartoum, Sudan, and agreed to withdraw troops from the border. In 1965 Ethiopia set up camps for 70,000 refugees who crossed the border from former British Somaliland with 250,000 cattle, saying the Somali Government was discriminating against them.

The present Emperor, Haile Selassie I, 225th consecutive Solomonic ruler, was born July 23, 1892, crowned Nov. 2, 1930. He voluntarily established a parliament and judiciary system, 1931, and promulgated a new constitution 1955, incorporating a liberal bill of rights, and granting the franchise to all over 21. The Senate (Upper

House) of 105 is appointed for 6-year terms; Chamber of Deputies, approx. 250, is elected for 4 years. In April 1966, the Emperor made further moves toward democracy, including empowering the Premier to appoint his own Cabinet, a power formerly reserved by the Emperor.

Education and Religion. Ethiopian culture has been influenced by Greece and Egypt. Christianity is the predominant religion, embraced in 330 A.D.; the Coptic, Monophysite branch is practiced. Until 1952 the Egyptian Coptic Patriarch was the head of the Church, but the Emperor now appoints the Ethiopian Archbishop. The population is largely composed of a mixture of Hamites, Semites and Negroes. The largest number are Coptic Christians; next are Moslems; others practice tribal religions. There are two universities and a number of colleges. The official language is Amharic; English is widely taught.

Eritrea, which had been an Italian colony since 1890, was administered after World War II by Great Britain; the UN General Assembly voted to return it to Ethiopia and the action became effective Sept. 11, 1952.

Finland

SUOMEN TASAVALTA—REPUBLICEN FINLAND

Capital: Helsinki. Area: 130,119 sq. mi. Population (Govt. est. 1967): 4,678,000. Monetary unit: Mark (4.2 per U. S. \$1).

Finland is a republic in northern Europe, with Sweden, Norway and the USSR for neighbors. South and central Finland are mostly flat areas with low hills; there are mountainous areas, 3,000-4,000 ft., in the N. It is half the size of Texas.

About 70% of the land is forested. Lakes and canal waterways are navigable for 3,000 mi. Rail and air transport is well developed.

Aland Islands, constituting the autonomous department of Aland, is a group of small islands, 572 sq. mi., in the Gulf of Bothnia, 25 mi. from Sweden, 15 mi. from Finland. They are demilitarized. Mariehamn is the principal port.

Resources and Industries. Rapid industrialization has taken place, especially since World War II, but agriculture is still a vital factor. Principal crops are oats, barley, wheat, rye, potatoes, hay. Woodworking and paper and pulp products account for about 60% of total exports. Expansion is expected to increase pulp production to 5,430,000 metric tons annually. Other chief industries are shipbuilding, metals, machinery, food and beverages, textiles, leather, chemicals.

In 1967, 1,100,000 tourists visited Finland.

The merchant marine, Feb. 29, 1968, comprised 522 vessels totaling 1,099,919 gross tons.

The cooperative system is carried on in Finland with marked success.

Foreign trade (in thousands of U. S. dollars):

	Imports	Exports
1966	\$1,726,000	\$1,506,000
1967	\$1,694,000	\$1,531,000

History and Government. The original Finns lived thousands of years ago, probably in the Ural area, and were part of a larger Finno-Ugric (Hungarians etc.), group of peoples. The Finns migrated in a northerly direction, first to the Baltic area and then, at about the beginning of the Christian era, to what is today Finland. Swedish settlers brought the country into the kingdom of Sweden, 1154 to 1809, when Finland became an autonomous grand duchy of the Russian Empire. Russian exactions created a strong national spirit; on Dec. 6, 1917, Finland declared its independence and on July 17, 1919, became a republic. On Nov. 30, 1939, the Soviet Union invaded Finland, and although the Finns took heavy toll, they surrendered after 3 mos. and in March, 1940, were forced to cede 16,173 sq. mi., including the Karelian isthmus, Viipuri, and an area on Lake Ladoga. When Germany attacked the USSR June 22, 1941, Finland went to war to take back its lands. An armistice was signed Sept. 19, 1944, and the USSR exacted the former cessions, plus Petsamo in the North and a lease for 50 years on Porkkala, near Helsinki, for a military base. The treaty of Feb. 10, 1947, also exacted \$300,000,000 in goods in term payments. In April, 1948, Finland signed a 10-year treaty of mutual assistance and friendship with USSR, extended in 1956 until 1975, after the USSR agreed to return Porkkala, which it did Jan. 26, 1956.

The President is chosen for a term of six years by an Electoral College of 300 named by direct

vote: he appoints the Cabinet. The President is Dr. Urho Kekkonen, elected Feb. 15, 1956; re-elected 1962, 1968.

There is a single legislative chamber, the Eduskunta, numbering 200, elected to 4-year terms. The voting system is designed for proportional representation. In general elections Mar. 21-22, 1966, the Social Democrats, a moderate Socialist party, displaced the Center party as the largest single party. Seats won: Social Democrats 55, Center party 50, Communists 41, Conservatives 26, Swedish National 12, Liberals 8, Social Dem. Unionists 7, Small Farmers' party 1. A coalition Cabinet, headed by Dr. Mauno Koivisto, Social Democrat, took office Mar. 22, 1968.

Education and Religion. The Evangelical Lutheran Church is the leading religion, but there is freedom of worship. The nation is considered completely free from illiteracy. The Finnish language belongs to the Finno-Ugric group, which also includes Magyar and Estonian. Swedish is the 2nd national language. There are 6 major universities (the oldest founded 1640) and six colleges of university level.

Defense. Universal military service prevails from 17 years to 60. Males reaching 19 are called up for training. There are an Air Force and a naval force. Finland's effective force is limited by its World War II peace treaty to 41,900.

Finland is a member of the UN and the Nordic Council, and an associate member of EFTA.

France

LA REPUBLIQUE FRANCAISE

Capital: Paris. Area: 212,918 sq. mi. Population (Govt. est., Jan. 1, 1968): 50,662,000. Monetary unit: Franc (U. S. 20.2¢).

France has coastlines on the Atlantic and Mediterranean and is about four-fifths the size of Texas. It shares borders with Belgium, Luxembourg, Germany, Switzerland, Italy, Andorra and Spain. It is separated from England by the English Channel and the Strait of Dover. The Rhine River is on the German boundary, the Jura Mts. form the Swiss boundary and the Pyrenees Mts. rise along the borders of Andorra and Spain.

Mont Blanc, on the Franco-Italian border, is the tallest mtn. W of the Caucasus, 15,771 ft. The world's longest highway tunnel, 7.25 mi. under Mont Blanc, was opened July 16, 1965, linking France and Italy.

The island of Corsica, which lies in the Mediterranean W of Italy and N of Sardinia, forms an integral part of France. It has an area of 3,367 sq. mi. and a population of about 280,000. The capital is Ajaccio, birthplace of Napoleon.

There are four important rivers, the Seine, the Loire, the Garonne and the Rhône. France controls the left bank of the Rhine from Basel, Switzerland, to Lauterbourg, France. There are some 4,750 mi. of navigable rivers and canals. Major riverports are Bordeaux, Lyons, Paris, Rouen and Strasbourg.

Resources and Industries. Agriculturally, France is a country of small diversified farms occupying 45,800,000 acres and 18% of the employed, making France the biggest food producer in Western Europe. Agricultural exports are valued at more than \$1.7 billion annually. Leading crops are wheat, barley, corn, oats, rice, and a wide variety of fruits and vegetables. Cattle, poultry, forestry and fishing are large-scale. France is the world's 4th ranking producer of beef. Approx. 1,500,000 farmers belong to cooperative unions, including farm machinery and marketing cooperatives.

The country is rich in minerals, and the basins of Pas de Calais and Lorraine are noted for their huge coal deposits. Iron ore, bauxite, pyrites, mineral oils, auriferous ore, asphalt, rock salt and potash salts. The iron ore deposits in eastern France and the bauxite deposits in central France are among the richest in the world. Power stations produced about 114 billion kwh in 1967.

Southwest France became an important oil area with the discovery of the Lacq and Parentis fields. The Lacq gas field in Aquitaine has large reserves of natural gas and sulphur. Parentis field, near Bordeaux, yields approx. 1,374,000 metric tons of petroleum annually and the Sahara fields in Africa supply an est. 33,860,000 metric tons. In 1965, France and Algeria agreed on joint exploitation of oil and gas fields in the Sahara.

Some of the basic principles of atomic energy were discovered by French scientists. France is the foremost uranium producer in Western Europe, with output about 1,500 metric tons per year. Since

February, 1960, France has exploded 5 atomic devices in the Sahara, 4 above ground and one underground. On July 2, 1966, France exploded a small A-bomb over Mururoa, a tiny atoll 750 mi. SE of Tahiti; it was the 1st in a series of 6 explosions. In June 1967 and July 1968 new series of tests were started at Mururoa. France was not a signatory to the 1963 treaty banning such tests.

Manufacturers stress chemicals, silk and cotton textiles, perfumes, automobiles, aircraft, ships, instruments, electronic equipment. Index of industrial production (1963=100) was 120 in 1967.

France is the most important vinery in the world and its wines, of which it produces about 1.6 billion gallons a year, are of high value for export. Names of French provinces and regions, such as Bordeaux, Champagne, Burgundy, identify wines highly esteemed.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$11,843,000	\$10,889,000
1967	\$12,352,000	\$11,377,000

History and Government. The monarchical system was overthrown by the French Revolution (1789-1793) and succeeded by the First Republic; thereafter successively followed by the First Empire under Napoleon (1804-1814), a monarchy (1814-1848), the Second Republic (1848-1852), the Second Empire (1852-1870), the Third Republic (1871-1946), the Fourth Republic (1946-1958), Fifth Republic and French Community (1958). For list of rulers consult Index.

France suffered severe losses in manpower and wealth in the first World War, 1914-1918, when it was invaded by the German Empire. With Britain and the U. S. as its principal allies it threw back the Germans and by the Treaty of Versailles exacted return of Alsace and Lorraine. French provinces seized by Germany in 1871. As Allied controls on Germany were reduced Adolf Hitler and the Nazi party gained power, Germany invaded France in May, 1940, occupied Paris June 14, 1940, and signed an armistice with a government that made its hq. in Vichy, in unoccupied France. Marshal Philippe Petain became chief of state, but underground forces (Resistance) operated as guerrillas while Gen. Charles de Gaulle formed an army in Africa. After France was liberated by the Allies Sept., 1944, Gen. De Gaulle became Premier of the provisional government, serving from Nov. 1944 to Jan. 1946.

Gen. De Gaulle again became Premier June 1, 1958. His proposed constitution for the Fifth Republic and new French Community was approved by the voters by an overwhelming margin, Sept. 28, 1958, with the exception of the West African territory of Guinea which voted for immediate independence outside the Community, becoming a republic Oct. 2, 1958.

Gen. De Gaulle was elected first President of the Fifth Republic Dec. 21, 1958; inaugurated Jan. 8, 1959.

Pres. De Gaulle ran for reelection Dec. 5, 1965; he failed to win a majority of the votes, getting about 44% compared to 32% for Francois Mitterand, left wing candidate. In a runoff election Dec. 19, Pres. De Gaulle won with about 55%; Mr. Mitterand got 45%.

The constitution provides for a strong executive branch headed by the President, a legislature composed of a National Assembly and a Senate.

A constitutional amendment adopted by referendum Oct. 28, 1962, provided that future Presidents be elected by popular vote rather than by an electoral college. The President, elected for 7 years, appoints the Premier (formerly invested by the Assembly), and may dissolve the Assembly and call for new elections; he may call for referendums on specific issues and may assume full powers in a national emergency. An absolute majority vote of the Assembly is required to overthrow a government. The President is assisted by an Executive Council comprising the Premier, heads of states and certain Cabinet members.

Women, who had less than equal rights under provisions of the 1804 Code Napoleon, won the right to take jobs, open checking accounts and own their own businesses by a 1966 law.

In May 1968 rebellious students at the Sorbonne and elsewhere rioted, battled police and were joined by some 10,000,000 workers who launched nationwide strikes and took over many factories. The nation was almost completely paralyzed. On May 22 the Gaullist government narrowly defeated a censure motion in the National Assembly. The government awarded 35% minimum pay increases

to the strikers May 26; on May 30 Pres. De Gaulle dissolved the Assembly. A threat of civil war was eased as Army tank units, loyal to the government, maneuvered in Paris outskirts, and Pres. De Gaulle warned of a Communist dictatorship threat. By early June, normalcy was returned.

In elections June 23 and 30, 1968, Pres. De Gaulle's regime won its greatest victory; 291 Gaullists and 64 allied Independent Republicans were elected to the 487-seat Assembly; the Communists won 33 seats, a loss of 40 from their previous holding.

Education and Religion. Primary, secondary and higher education are free and instruction is compulsory between the ages of 6 and 16. There are 23 universities.

The country is predominantly Roman Catholic, only about 800,000 being Protestants. The state recognizes no religion and tolerates all.

Both employers and employees contribute to the old-age pension fund. There is provision for family allowances and compulsory social insurance for illness, maternity, disability and death. A profit-sharing agreement was signed Jan. 7, 1959.

Defense. Compulsory service for 20-year-olds was reduced from 24 to 18 months May 1, 1963. Compulsory military training has existed since 1798. The armed forces in 1966 numbered approx. 578,000 including 338,000 Army, 111,000 Air Force, 68,000 Navy, 61,000 Gendarmery. Gradual reduction of the forces was planned for 1965-1970, with emphasis on nuclear devices.

France is a member of the UN, NATO, SEATO, EEC and French Community.

Pres. De Gaulle announced Mar. 9, 1966, France would withdraw all its troops from the integrated military command of NATO and that NATO hq. and bases would have to be removed from France. But he said France would still be a member of the Atlantic Alliance.

The French Community (See Index). As provided in the 1958 Constitution and later amendments, the Community includes the French Republic and:

Six of 12 African republics which won complete independence in 1960: Central African Rep., Chad, Congo (Brazzaville), Gabon, Malagasy (Madagascar), Senegal. (See Index for individual articles.)

Four Overseas Departments, seven Overseas Territories and one Condominium (New Hebrides). (See descriptions below.)

Not members of the Community are former French possessions or trust territories such as Cambodia, Laos and Vietnam (former parts of French Indo-China), Tunisia, Algeria; also 9 African republics which won independence and decided to remain outside the Community but to retain certain economic and cultural ties with France—Cameroon, Dahomey, Guinea, Ivory Coast, Mali, Mauritania, Niger, Togo, Upper Volta. (See Index for individual articles.)

AFARS & ISSAS TERRITORY (Formerly French Somaliland)

The French Territory of the Afars and the Issas lies between Ethiopia and Somalia and is separated by the Straits of Bab-el-Mandeb from South Arabia.

The area is 8,880 sq. mi. and population (est. 1963): 86,000; the capital is Djibouti. France took control of the area in gradual steps, beginning in 1839.

The Territory has few industries, except fishing and livestock. Salt is its most valuable product. Half of Ethiopia's foreign commerce passes along the rail line from Addis Ababa and through the port of Djibouti.

In a referendum Mar. 19, 1967, the Territory elected to remain French and by a decree signed by the High Commissioner French Somaliland changed its name to the French Territory of the Afars and the Issas. It sends a Deputy and a Senator to the French Parliament.

COMORO ISLANDS

Comore Islands, an Overseas Territory, is an archipelago of small islands off SE Africa in Mozambique Channel NW of Madagascar. Chief islands are Grande Comore, Anjouan, Mayotte, Moheli. Total area, about 863 sq. mi.; population (est. 1964): 207,000. Capital: Moroni. Chief products are vanilla, coconuts and essential oils. It elects two Deputies, one Senator to the French Parliament.

REUNION

Reunion, Overseas Department is an island in the Indian Ocean, about 420 miles east of Madagascar, and has belonged to France since 1643. The

area is 969 sq. mi.; the population (est. 1964), 382,000 is 30% of French extraction. Capital: Saint-Denis. The chief products are sugar, rum, corn, perfume essences, vanilla and spices. It elects 3 Deputies, two Senators to the French Parliament.

GUADELOUPE

Guadeloupe, Overseas Department in the West Indies' Leeward Islands, consists of two large islands, Basse-Terre and Grande-Terre, separated by the Salt River, plus Marie Galante and the Saintes group to the S and, to the N, Desirade, Bathelemy and almost half of St. Martin (the Netherlands portion is St. Maarten). A French possession since 1634, the department is represented in the French Parliament by two Senators and 3 Deputies; administration consists of a Prefect (governor) and an elected General Council.

Area of the islands is 687 sq. mi.; pop. over 306,000 mainly descendants of slaves; capital is Basse-Terre on Basse-Terre Is. The land is fertile; sugar, rum and bananas are exported; tourism is an important industry.

MARTINIQUE

Martinique, one of the Windward Islands, in the West Indies, has been a possession since 1635, and a Department since March, 1946. It is represented in the French Parliament by two Senators and three Deputies. In Martinique is located the famous volcano, Mt. Pelee which erupted on May 8, 1902, destroyed the city of St. Pierre with more than 30,000 inhabitants. The island is the birthplace of the Empress Josephine.

Martinique has an area of 425 sq. mi. and a population of over 303,000 mostly descendants of slaves. The capital is Fort-de-France. It is a popular tourist stop.

The chief exports are sugar, rum, bananas, pineapples and cacao beans. Trade is mainly with France and the United States.

ST. PIERRE AND MIQUELON

St. Pierre and Miquelon, an Overseas Territory, are two groups of rocky barren islands close to the southwestern coast of Newfoundland, inhabited by fishermen. An administrator, assisted by a Council rules the islands. The exports are chiefly cod, dried and fresh, and other fish products. Imports consist of textiles, salt, wines, foodstuffs and meat. A regular boat service is maintained with North Sydney and Halifax. A telegraph cable connects St. Pierre with Europe and the American continent.

The St. Pierre group has an area of 10 sq. mi.; Miquelon, 83 sq. mi. Total pop. (est. 1963), 5,025. The capital is St. Pierre. A Deputy and a Senator are elected to the French Parliament.

FRENCH GUIANA

French Guiana, an Overseas Department, is on the NE coast of South America with Surinam (Netherlands Guinea) on the W and Brazil on the E and S. Its area is 35,135 sq. mi.; population (est. 1966) is 37,000. Guiana sends one Senator and one Deputy to the French Parliament. Guiana has a Prefect and a Council General of 15 elected members; capital is Cayenne.

In 1944 France closed the famous penal colony, Devil's Island, and repatriated 2,800 inmates.

Immense forests of rich timber cover 90% of the land. Very little of the land is cultivated. The principal crops are rice, corn, manioc, cacao, bananas, and sugar cane. Placer gold mining is the most important industry. Exports comprise cacao, bananas, various woods, gold, fish glue, rum, rosewood essence, lumber and hides.

FRENCH POLYNESIA

French Polynesia, Overseas Territory, comprises 130 islands widely scattered among 5 archipelagos in the South Pacific; administered by a Governor, Territorial Assembly and a Council with headquarters at Papeete, Tahiti, one of the Society Islands. A Deputy and a Senator are elected to the French Parliament.

Other groups are the Marquesas Islands, the Tuamotu Archipelago, the Gambier Islands, and the Austral Islands.

Total area of the islands administered from Tahiti is 1,544 sq. mi.; pop. (est. 1966) 90,000, more than half on Tahiti. Tahiti is picturesque and mountainous with a productive coastline bearing coconut, bananas and orange trees, sugar cane and vanilla.

Tahiti was visited by Capt. James Cook in 1769 and by Capt. Bligh in the Bounty, 1788-89. The beauty of its women and the landscape impressed Herman Melville, Paul Gauguin, Charles Darwin

and Robert Louis Stevenson who called Tahitians "God's sweetest works."

NEW CALEDONIA

New Caledonia and its dependencies, an Overseas Territory, are a group of islands in the Pacific Ocean about 1,115 mi. E of Australia and approx. the same distance NW of New Zealand. Dependencies are the Loyalty Islands, the Isle of Pines, Huon Islands, and the Chesterfield Islands.

New Caledonia, the largest, has 6,530 sq. mi. Total area of the Territory is 7,335 sq. mi.; population (est. 1966) 86,500. The group was acquired by France in 1854. A penal colony was maintained on Nou Island until 1896.

The Territory is administered by a Commissioner and government council. There is a popularly elected Territorial Assembly. A Deputy and a Senator are elected to the French Parliament. Capital: Noumea.

Mining is the chief industry. New Caledonia has the world's largest deposits of nickel. Other minerals found are chrome, cobalt, manganese, antimony, mercury, cinnebar, silver, gold, lead and copper. Agricultural products include coffee, copra, cotton, manioc (cassava), corn, tobacco, bananas and pineapples.

WALLIS AND FUTUNA ISLANDS

Wallis and Futuna Islands, two archipelagos raised to status of Overseas Territory July 29, 1961, are situated in the SW Pacific south of the Equator between Fiji and Samoa. The islands have a total area of 106 sq. mi. and population (est. 1963) of 11,000. Aloa, attached to Futuna, is uninhabited. Capital: Mata-Utu. Chief products are copra, yams, taro roots, bananas.

FRENCH ANTARCTICA

French Antarctica and Southern Lands, Overseas Terr., comprises Adelle Land, on Antarctica, and 4 island groups in the Indian Ocean. Adelle, discov. 1840, has 2 research bases, a coastline of 185 mi. and tapers 1,240 mi. inland to the South Pole. Heights rise to 8,200 ft. There are two huge glaciers, Ninnis, 22 mi. wide, 99 mi. long, and Mentz, 11 mi. wide, 140 mi. long. Climate varies from -36° F. to 40° F.

Kerguelen Archipelago, discov. 1772, has 300 islands. The chief is 87 mi. long, 74 mi. wide, and has Mt. Ross, 6,429 ft. tall. Principal research station is Port-aux-Francais. Seals often weigh 2 tons; there are blue whales, coal, peat, semi-precious stones. Crozet Archipelago (discov. 1772), covers 125 sq. mi. Eastern Indian rises to 6,560 ft. Saint Paul, in southern Indian Ocean, has warm springs and tropical climate, with earth at places heating to 120° to 390° F. New Amsterdam, nearby, has temperate climate, produces cod and rock lobster.

NEW HEBRIDES

New Hebrides, a condominium administered since 1906 by France and Great Britain, is a group of 11 main islands and about 69 islets 250 mi. northeast of New Caledonia and 500 mi. west of Fiji. It has an est. 5,700 sq. mi. and population (est. 1963) of 70,000, mostly Melanesian. It has two administrations—French and British. Chief products are copra, cotton, cacao and coffee.

Gabon Republic

LA REPUBLIQUE GABONAISE

Capital: Libreville. Area: 102,089 sq. mi. Population (UN est. 1967): 473,000. Monetary unit: CFA franc (246.85 per U. S. \$1).

A former French Overseas Territory, Gabon is on the west coast of Equatorial Africa, straddling the Equator and bounded by Cameroon and Continental Guinea (Sp.). The Republic of Congo—Brazzaville, and the Atlantic. Heavily forested, the country consists of coastal lowlands, plateaus in N, E and S, mountains in N, SE and center. It is about the size of Colorado.

Gabon's economy is thriving, with exports exceeding imports by about 30%. Forest products—timber, plywood and veneers, chiefly Okoume wood—were the chief export until 1965 when exports of manganese, valued at \$35,000,000, equalled the forestry exports. There are large iron ore and uranium deposits and oil production is increasing.

Agriculture, roads, port facilities and hydro-electric power are being extensively developed. Main crops are cocoa, coffee, rice, peanuts, palm products, cassava, bananas.

Gabon proclaimed complete independence Aug. 17, 1960, and has been a UN member since Sept. 20, 1960. President: Leon M'Ba, elected Feb. 12, 1961. In Feb. 1964 French troops, airlifted into the country, restored Pres. M'Ba after an attempted coup. In April backers of Pres. M'Ba won 27 of the 47 seats in the National Assembly. Gabon is a member of the French Community.

Dr. Albert Schweitzer, Nobel Peace Prize winner, physician, philosopher, musicologist and theologian, founded a hospital for lepers and others in 1913 at Lambarene. He died Sept. 4, 1965, at the age of 90 and was buried at the hospital.

The Gambia

Capital: Bathurst. Area: 4,005 sq. mi. Population (UN est. 1967): 343,000. Monetary unit: Pound (.4167 per U. S. \$1).

Gambia, Africa's smallest country in both size and population, is a former British Colony and Protectorate in western Africa. It includes the island of St. Mary at the mouth of the Gambia River and a 10-mile wide strip of territory on each side of the river. Except for its Atlantic coastline, Gambia is surrounded by Senegal.

Gambia attained internal self-government Oct. 4, 1963. Its legislature comprises a speaker and 32 elected members. Britain agreed, July 30, 1964, to grant complete independence to the colony, which became effective Feb. 18, 1965. Gambia is a member of the Commonwealth and became a UN member Sept. 21, 1965.

In May 1966 Prime Minister Sir Dawda K. Jawara's People's Progressive party won 24 of the 32 legislative seats in the first general election since independence.

Peanuts are the main crop, along with rice and palm kernels. Gambia is receiving over \$1,000,000 annually in subsidies from Britain.

In 1968 Gambia joined 8 neighboring nations in forming the West African Regional Group, to promote mutual economic betterment.

Germany

DEUTSCHLAND

Area: 137,596 sq. mi. Population (UN est. 1967): 76,954,000. Now comprises two units: Federal Republic of Germany (West Germany), German Democratic Republic (East Germany). A large area of the former empire, east of the Oder-Neisse line 43,900 sq. mi., is occupied by Poland and USSR.

Germany is a central European nation composed of numerous states which had a common language and traditions but which did not become unified in one country until 1871; since World War II it has been split in two parts, West and East.

The climate and terrain are varied. West Germany includes large parts of the Rhine basin, with hilly sections adjoining both banks of the Rhine river filling center of the country. North of Bonn are the plains of the lower Rhine and lowlands of Cologne. East Germany is composed largely of the region of the Elbe river and its tributaries and part of the Oder basin. Most of the territory is level, except for the hilly Erzgebirge and Riesengebirge. Its climate is cooler than that of West Germany with long, cold winters and short summers.

Resources and Industries. Some of more important crops are wheat, rye, barley, oats, potatoes, sugar beets and hay. Other commercial products are fruit, tobacco, hops, nuts.

Principal minerals are coal, lignite, iron, zinc, lead, copper, salt, potash and petroleum. Bulk of mining is in North Rhine-Westphalia, Upper Silesia, Central Germany, the Harz, and Westerwald. Oil comes chiefly from Emsland near Netherlands border, and Lower Saxony. Iron and steel production is greatest in the Ruhr and Saar.

History and Government. Germanic tribes were defeated by Julius Caesar, 55 and 53 B. C. but Roman expansion north of the Rhine was stopped with the wiping out of 3 legions under Varus in 9 A.D. Charlemagne, ruler of the Franks, consolidated Saxon, Bavarian, Rhenish, Frankish and other lands; after him the eastern part became the German Empire. Consult *Rulers of Middle Europe*. The Thirty Years' War, 1618-1648, split Germany into small principalities and kingdoms. After Napoleon, Austria contended with Prussia for dominance, but lost the Seven Weeks' War to Prussia, 1866. Otto von Bismarck, Prussian chancellor, formed the North German Confederation, 1867.

In 1870 Bismarck maneuvered Napoleon III into declaring war. After the quick defeat of France Bismarck formed the German Empire (Deutsches Reich) and on Jan. 18, 1871, in Versailles, proclaimed King Wilhelm I of Prussia German Emperor (Deutscher Kaiser).

The German Empire reached its peak before World War I in 1914. At that time the homeland comprised 208,780 sq. mi., plus a colonial empire. After that war Germany ceded Alsace-Lorraine to France; Eupen and Malmédy to Belgium; parts of Silesia to Poland and Czechoslovakia; part of Schleswig to Denmark; lost all of its colonies as well as the ports of Memel and Dansig. *Consult World War I.*

Republic of Germany, 1919-1933. adopted the Weimar constitution, met reparation payments and elected Frederick Ebert and Gen. Paul von Hindenburg presidents.

Third Reich, 1933-1945. Adolf Hitler, born in Braunau, Austria, 1889, led the National Socialist German Workers' (Nazi) party after World War I. In 1923 with the help of Gen. Erich Ludendorff he attempted to unseat the Bavarian government in the "Beer Hall putsch," and was imprisoned. He wrote *Mein Kampf* while in prison. President von Hindenburg named Hitler chancellor Jan. 30, 1933; on Aug. 3, 1934, the day after Hindenburg's death, the cabinet joined the offices of President and Chancellor and made Hitler Fuehrer (Leader). Hitler abolished freedom of speech and assembly, and began a long series of persecutions climaxed by the mass extermination of Jews and opponents. Hitler repudiated the Versailles treaty and reparations agreements. He remilitarized the Rhineland 1936 and annexed Austria (Anschluss, 1938). At Munich he made an agreement with Neville Chamberlain, British Prime Minister, enabling him to annex Czechoslovakia's Sudetenland. He signed a non-aggression treaty with the Soviet Union, 1939. He declared war on Poland Sept. 1, 1939, precipitating World War II.

With total defeat near, Hitler committed suicide in Berlin Apr. 29, 1945. The victorious Allies voided all acts and annexations of Hitler's Reich.

Postwar Changes.—The zones of occupation administered by the Allied Powers and later relinquished gave the Soviet Union Saxony, Saxony-Anhalt, Thuringia, and Mecklenburg, and the former Prussian provinces of Saxony and Brandenburg. The United States administered territory bounded on the East by the Russian zone and Czechoslovakia, on the North by the British zone, on the West by the French zone, and on the South by Austria, including Bavaria (except Lindau district), Wurttemberg (northern), Baden (northern), most of Hesse and Hesse-Nassau, and the city state of Bremen.

The territory east of the Oder-Neisse line within 1937 boundaries comprising the provinces of Silesia, Pomerania, West Prussia and the southern part of East Prussia, totaling about 41,220 square miles, population (1939) 9,600,000, is under Polish administration; northern East Prussia is under Soviet domination. The United States has not recognized these changes nor the East German regime.

The Western Allies ended the state of war with Germany in 1951. The USSR did so in 1955.

There was also created the area of Greater Berlin, within but not part of the Soviet zone, administered by the four occupying powers under the Allied Command. In 1948 the Soviet Union withdrew and established its single command in East Berlin. The Communists cut off supplies, whereupon the Allies utilized a gigantic airlift to bring food to West Berlin during 1948-1949. In Aug. 1961 the East Germans built a wall dividing Berlin.

In June 1968 East Germany imposed restrictions on travel from West Germany to West Berlin, including transit visas and fees, and transport taxes on trucks, buses and barges. The U. S., Britain and France denounced the action and, with approval of their NATO partners, imposed a ban on travel by East German political figures and journalists to NATO countries and a \$5 tax on other East German travelers. West Germany barred a group of 700 East Germans from visiting Munich.

West Germany BUNDESREPUBLIK DEUTSCHLAND FEDERAL REPUBLIC OF GERMANY

Capital: Bonn. Area (including West Berlin): 95,937 sq. mi. Population (UN est. 1967): 59,872,000. Monetary unit: Deutsche Mark (U. S. \$1).

The Federal Republic of Germany was pro-

claimed May 23, 1949 (effective Sept. 1, 1949), in Bonn, after a constitution had been drawn up by a consultative assembly formed by representatives of the 11 Laender (states) in the French, British and American zones. Later reorganized into 9 units, the Laender number 10 with the addition of the Saar Jan. 1, 1957; Schleswig-Holstein, Hamburg, Lower Saxony, Bremen, North Rhine-Westphalia, Hesse, Rhineland-Palatinate, Baden-Wuerttemberg, Bavaria, Saarland. Berlin also was granted Land (state) status, but the 1945 occupation agreements render it inoperative.

The occupying powers, the United States, Britain and France, restored the civil status, Sept. 21, 1949. The U. S. resumed diplomatic relations July 2, 1951. The powers lifted controls and the republic became fully independent May 5, 1955.

Parliament has two chambers, serving 4-yr. terms. The Bundestag, lower house, is elected. It has 496 voting members from the republic and 22 non-voting observers from West Berlin. The Bundesrat, upper house, represents the states; it has 41 delegates from the Laender and 4 nonvoting members from West Berlin. The Bundesrat President serves one year and acts as deputy to the federal President.

The federal President is elected for a 5-yr. term by the Federal Assembly, convened for this purpose only and made up of deputies of the Bundestag and an equal number of delegates from the Land parliaments. Re-election is possible only once. The President concludes treaties with foreign states, and signs laws, which must be countersigned by the Chancellor and the minister in charge. On proposal of the President the Chancellor is elected by majority vote of the Bundestag. Ministers are named by the President at the instance of the Chancellor. The President appoints and dismisses judges, civil servants and officers and non-com. officers of the armed forces and exercises power of pardon.

Theodor Heuss, Free Democrat, was chosen first President Sept. 12, 1949, re-elected July 17, 1954. Succeeded by Heinrich Lübke, elected July 1, 1959, reelected July 1, 1964.

Dr. Konrad Adenauer, Christian Democrat, was made Chancellor Sept. 15, 1949, reelected 1953, 1957, 1961. Dr. Ludwig Erhard, Christian Democrat, was elected 1963, 1965. Kurt Georg Kiesinger was elected Chancellor Dec. 1, 1966, heading a coalition government of Christian Democrats and Social Democrats.

West Germany is a member of NATO, EEC, European Coal and Steel Community and Council of Europe. It also has been admitted to UNESCO, International Monetary Fund, and EURATOM.

The Western Allies have sought unification of Germany by free elections. The USSR has blocked action, demanding direct negotiation between East and West Germany, which would imply recognition of the East German puppet state and troop withdrawal.

Resources and Industries. West Germany has experienced tremendous economic growth since 1950. Gross national product rose from \$23.1 billion in 1950 to \$120 billion in 1967. The index of industrial production (1963=100) was 114 in 1967.

West Germany leads Western Europe as a steel producer. Shipyards annually produce more than 1,000,000 gross registered tons of shipping, more than half of it for export. The oil industry has a refining capacity of more than 10,500,000 tons annually.

Germany lost most of its merchant marine during World War II. However, the merchant fleet recovered rapidly and on Jan. 1, 1964 comprised 2,626 vessels aggregating 5,500,000 gross tons.

The total foreign debt on Jan. 1, 1968, was \$125,000,000, reduced from \$3.05 billion of prewar and postwar liabilities determined by the London Agreement of 1953.

Frankfurt Rhine-Main airport, 3rd largest in Europe, handles annually 4,850,000 passengers and is 2nd largest in freight shipments.

Foreign trade (in thousands of U. S. dollars):

	Imports	Exports
1966	\$18,023,000	\$20,135,000
1967	\$17,352,000	\$21,737,000

Education and Religion. The Federal Republic and West Berlin have 22 universities 9 technical universities and 91 musical, theological and other institutions of higher education. School attendance is compulsory, ages 6 to 14.

Complete religious freedom is guaranteed by the constitution. The country is 51% Protestant, 45% Roman Catholic. The Evangelical Church in Ger-

many (EKD) was formed by the Lutheran, United and Reformed churches after World War II, supplanting an earlier group.

Defense. The German Armed Forces (Bundeswehr) are civilian-controlled. Conscription of 18-year-olds for 12-month terms began in Jan. 1957; raised to 18-month terms in 1962. Volunteers are enlisted for 3 or more years. Most Air Force and Navy personnel are volunteers. Strength of the Bundeswehr in 1968 was 460,000 including 317,000 Army, 97,000 Air Force, 33,000 Navy, plus Territorial Defense Forces.

The Army has 12 Divisions—7 infantry, 3 armored, one airborne, one mountain. It has U. S. Honest John and Sergeant ground-to-ground rockets.

The Air Force (Luftwaffe) has 20 squadrons of F-104-G jet Starfighters and other craft, ground-to-air Nike and Hawk rockets and Pershing missiles.

The Navy has 10 destroyers, 11 submarines, 6 frigates, 45 torpedo boats and other craft. The naval air arm has Starfighters, anti-submarine planes and helicopters.

Helgoland, an island of 130 acres in the North Sea, was taken from Denmark by a British Naval Force in 1807 and later ceded to Germany to become a part of Schleswig-Holstein province in return for rights in East Africa. The heavily fortified island was surrendered to Great Britain, May 23, 1945, demilitarized in 1947 and returned to West Germany, Mar. 1, 1952. It is a free port.

The Saar (Fr. Sarre), 10th Land (state) of the Federal Republic, is an industrial and mining area north of Lorraine, originally 738 sq. mi., now extended to about 991 and population (est. 1967) of 1,132,800, mostly German. Capital: Saarbrücken. It was separated from Germany after World War I and administered by the League of Nations through a commission. The Saar was returned to the Reich by the League of Nations, Mar. 1, 1935.

After World War II, the Saar came under French administration and following an election, Oct. 5, 1947, was attached economically to France. It had semi-autonomy from Jan. 3, 1948, until West Germany and France signed the Luxembourg Agreement, June 4, 1956, providing that the Saar should be united politically with the Federal Republic Jan. 1, 1957, and economically Jan. 1, 1960.

East Germany

GERMAN DEMOCRATIC REPUBLIC Deutsche Demokratische Republik

Capital: East Berlin (Soviet Sector). **Area:** 41,659 sq. mi. **Population** (UN est. 1967): 17,082,000. **Monetary unit:** Ostmark (2.22 official rate per U. S. \$1).

The German Democratic Republic was proclaimed in the Soviet sector of Berlin Oct. 7, 1949. Wilhelm Pieck was named President, reelected Oct. 7, 1953, and Oct. 7, 1957 (died Sept. 7, 1960); Willi Stoph, Minister-President, or prime minister; Walter Ulbricht, Communist party secretary; deputy prime minister. A ministry of state security, the SSD, and a militarized People's Police were organized.

The Soviet Union proclaimed East Germany a sovereign republic Mar. 26, 1954, but kept Soviet troops there on grounds of security and the four-power Potsdam agreement.

Parliament approved a constitutional amendment Sept. 12, 1960, that abolished the Presidency, replacing it with a new Council of State designated as East Germany's highest governing body, with Walter Ulbricht as Chairman.

Ulbricht negotiated a treaty with Poland placing Poland's boundary at the line formed by the Oder and Neisse Rivers. The United States registered its disapproval, declaring that it violated the Potsdam agreement and that no boundaries could be settled "unilaterally or bilaterally" outside a peace treaty. The Republic also ratified an agreement with Czechoslovakia, accepting the expulsion of over 2,000,000 Germans from Sudetenland as "permanent and just." Its industry was integrated with that of the Soviet Union.

Parliament abolished, 1952, the five traditional provinces of East Germany as administrative units in favor of 14 districts of 217 counties. Brandenburg, Mecklenburg, Saxony and Thuringia were divided into three districts each, Saxony-Anhalt into two.

Coinciding with the entrance of the Federal Republic into the European Defense Community, May 27, 1952, the East German Government decreed a

prohibited zone three miles deep along its 600-mile border with West Germany, separated Berlin's telephone system into two sections and cut many of its lines to the West. Berlin was further divided, 1953-1961, by reduction of crossing points and erection of a fortified wall, but the exodus of refugees from East Germany into Western sectors continued though on a much smaller scale.

In elections to the Volkskammer, 1965, the single list of National Front candidates received 99.89% of the eligible vote.

The regime signed a 20-year treaty of friendship and cooperation with the USSR June 12, 1964. The treaty stated that it did not constitute a formal peace treaty.

East Germany suffered severe economic problems until the mid-1960s. A "new economic system" was introduced, easing the former central planning controls and allowing factories to make "profits" provided they were reinvested in operations or distributed to workers as bonuses. By 1967, East German figures showed the gross national product had risen to \$52 billion from \$35 billion in 1960. But living standards were still far below those of West Germany.

On Apr. 8, 1968, a new constitution, announced as approved by 94.49% of voters, went into effect. It reaffirmed Communist one-party rule and close ties with the USSR and declared German reunification could "take place only on the basis of Socialism."

In East Germany the school system has been reorganized on a Communist basis, with centralized control over education. Religious instruction no longer is part of the public school curriculum, but is imparted by the churches.

Creation of a National People's Army was authorized by Parliament, Jan. 18, 1956. Service is compulsory. Armed strength of the People's Army reached 195,000 in 1965, organized in two corps and equipped with Soviet tanks, jet planes and artillery. Another 320,000 militiamen are organized in combat groups. Navy and Air Force have about 10,000 each and there is a police force numbering 42,500.

An est. 20 Soviet divisions totaling approx. 400,000 also are stationed in East Germany.

The Navy includes 5 destroyers, 5 frigates, 8 corvettes and numerous minesweepers, patrol vessels and other craft.

Ghana

FORMER GOLD COAST STATE

Capital: Accra (Ghana). **Area:** 91,843 sq. mi. **Population** (UN est. 1967): 8,143,000. **Monetary unit:** New Cedi (1.0204 per U. S. \$1).

The Republic of Ghana, a member of the UN and the Commonwealth, is composed of the former British Gold Coast colony with its territories of Ashanti and Northern Territories, and British Togoland, former UN trusteeship. Slightly smaller than Oregon, it faces on the Gulf of Guinea in Western Africa, bounded N by Republic of Upper Volta, E by Togo Republic and W by the Ivory Coast Republic.

Resources and Industries. Ghana is rich in mineral wealth. Ghana ranks 5th in the world in production of diamonds (mostly industrial type), 7th in manganese, 6th in gold, 18th in bauxite.

Ghana is the world's leading cocoa producer; it exports over 400,000 tons annually, about 40% of world output. Timber is 2nd in value, including mahogany and rare woods.

The huge Akosombo hydroelectric project on the Volta River, partly financed by U. S., was completed in 1965 and began serving Ghana's 1st giant industry, an aluminum reduction plant near the port of Tema, built and owned by U. S. companies. The dam was to create the world's largest artificial lake, covering 3,275 sq. mi.

History and Government. Named after an earlier African state along the Niger River, 800-1076 A.D., Ghana has long been settled by the Adansi, Akwamu, Ga and other tribes, and was ruled by Great Britain for 113 years. Its independence was gained by rapid steps after 1951 when Britain granted the colony a new constitution and its chief spokesman, Kwame Nkrumah, was elected Prime Minister. The UN General Assembly on Dec. 13, 1956, approved termination of the British Togoland trusteeship and merger of the territory with the new state following a 1956 plebiscite.

Full independence within the Commonwealth, with a British Governor-General, was effective Mar. 6, 1957. It became a republic, July 1, 1960, but remained within the Commonwealth. Kwame

Nkrumah became Pres.

In May 1961 Pres. Nkrumah announced he had taken "absolute control" of his Convention Peoples party. On Sept. 7, 1962, Parliament voted to make him Pres. for life. In Jan. 1964 the government announced the result of a nationwide vote to give him dictatorial powers and make Ghana a one-party Socialist state was 99.9% "yes."

Pres. Nkrumah built hospitals and schools, raised the literacy rate, created a state-owned airline and ship line, but ran the country into debt, jailed hundreds of political dissenters and was accused of corruption.

On Feb. 24, 1966, a National Liberation Council of Army and police officers took over the government, freed over 400 political prisoners and jailed many Nkrumah regime officials. Lt. Gen. Joseph Ankrah, Council chairman, promised elections and a popularly approved Constitution within 18 mos. The Council expelled Communist Chinese and East German teachers and technicians. It promised a "balanced neutrality" and slashed expenditures. Ex-Pres. Nkrumah, on a trip to North Vietnam and Peking at the time of the coup, found asylum in Guinea.

In 1967 and 1968, civilians were added to the Cabinet, outnumbering the military and police members.

Defense: The army, navy and air force have undergone large-scale expansion since 1961.

Greece

VASILEION TIS ELLADOS— KINGDOM OF HELLAS

Capital: Athens. Area: 50,944 sq. mi. Population (UN est. 1967): 8,716,000. Monetary unit: Drachma (30 per U. S. \$1).

Greece occupies the southern part of the Balkan peninsula, reaching into the Mediterranean Sea with the Ionian Sea on the W and the Aegean Sea on the E. Its neighbors are Albania, Yugoslavia, Bulgaria and Turkey. The Pindus Mtns. run through the country N to S. Total length of the heavily indented coastline is 9,385 mi. Hundreds of islands account for 8,918 sq. mi. of the total land area, which is approx. that of Alabama; 166 islands are inhabited, among them Crete, Rhodes, Milos, Kerkira (Corfu), Chios, Lesbos, Samos. Principal seaport is Piraeus, near Athens.

Resources and Industries. Greece proper is chiefly agricultural. Only one-fourth of the total area is arable; 13,350,000 of the total of 16,074,000 acres are covered by mountains, lakes and rivers. Four-fifths of the forests are state-owned. Chief agricultural products are wheat, rye, barley, oats, corn, rice, cotton, tobacco, olives, citrus fruits, raisins and figs. Sheep are the most important livestock.

Heavily damaged in World War II, Greece's industrial and agricultural output has far surpassed pre-war levels thanks to economic development programs helped in part by U. S. aid. Hydroelectric development is remedying the lack of coal. Principal industries are textiles, food-processing, wine, cement, chemicals.

Greek-owned merchant marine tonnage totals 19,250,000 tons, actually third in the world, but most of it is registered under other flags.

Exports are mainly agricultural—tobacco, cotton, citrus fruits, raisins, vegetables. Ores, esp. bauxite, are also important. Aiding the economy is the tourist industry, with 1,000,000 visitors spending \$100,000,000 yearly.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,223,000	\$406,000
1967	\$1,186,000	\$495,000

History and Government. The achievements of Ancient Greece in art, architecture, science, mathematics, philosophy, drama, literature and democracy became legacies for succeeding ages. Greece reached the height of its glory and power, particularly in the Athenian city-state, in the 5th Century B.C.

Greece fell under Roman domination in the 2nd and 1st Centuries B. C. In the 4th Century A. D. it became part of the Eastern Byzantine Empire and, after the fall of Constantinople to the Turks in 1453, part of the Ottoman Empire.

Greece won its war of independence from Turkey 1821-1829, and became a kingdom under guarantee of Britain, France and Russia, 1830. A republic was established 1925; the monarchy was restored, 1935, and George II, King of the Hellenes, resumed the throne. In Oct., 1940, Greece rejected an ultima-

tum from Italy and when attacked Greece drove the Italians back into Albania. Nazi support resulted in the defeat and occupation of Greece by Germans, Italians and Bulgarians. By the end of 1944 the invaders withdrew. Armed Communists attempted to seize the country but were thwarted by British liberation troops.

A plebiscite recalled King George II. He died Apr. 1, 1947, and was succeeded by his brother, Paul I. King Paul died Mar. 6, 1964, succeeded by his son, Crown Prince Constantine, born June 2, 1940. The King married Princess Anne-Marie of Denmark Sept. 18, 1964. A daughter, Princess Alexia, was born July 10, 1965, and is heir to the throne.

Communists waged guerrilla war 1947-49 against the government but were defeated with the aid of the U. S. (acting under the Truman Doctrine). Communists kidnaped thousands of Greek children to neighboring Communist countries; after Yugoslavia broke with Moscow some were repatriated.

Greece is governed under a constitution effective Jan. 1, 1952. Women were granted suffrage, 1952.

In Feb. 16, 1964, elections the coalition Center Union led by George Papandreou won 174 of 300 seats in the Chamber of Deputies. A prolonged government crisis was precipitated July 15, 1965, when Premier Papandreou resigned; at issue was a Papandreou plan to purge the Army of right-wing officers. King Constantine opposed the purge saying it would expose the armed forces to Communist influence. Leftists and backers of Papandreou staged riots in Athens as the King sought a new Premier who could win a Parliamentary majority over the opposition of the Papandreou bloc and the extreme leftists. He finally won with Stephanos Stephanopoulos, who was sworn in Sept. 17, 1965.

Continuing political crises ended in a pre-election coup d'etat Apr. 21, 1967, by rightist Army officers under Col. George Papadopoulos. They jailed hundreds of monarchists, Communists and political leaders. King Constantine on Dec. 13 sought to oust the junta but failed to rally military support and fled with his family to exile in Rome. Dec. 14, Papadopoulos was named Premier and a general was appointed "viceroy." In 1968 the Papadopoulos government freed some political prisoners but tightened its hold, replacing many officials including judges. It also ordered curbs on teenagers' clothes and conduct and banned the sale of records by Melina Mercouri, a critic of the regime.

Education and Religion. Greek Orthodox is the official church. Nine years of education is compulsory. There are 6 schools of university rank in Athens, and others in Thessaloniki, Patras and Ioannina.

The rocky promontory of Mount Athos (121 sq. mi.) is occupied by 20 monasteries of the Greek Orthodox Church, forming an almost completely self-governing community of about 3,000 monks. No females may enter the territory.

Defense. Military service is compulsory between the ages of 21 and 50. There is an Air Force and a Navy of light craft.

Greece is a member of the UN and NATO and an associate member of EEC.

DODECANESE AND CRETE

The Dodecanese are a group of 13 islands in the southeastern Aegean Sea. They were occupied by Italy during the Balkan War of 1912 with Turkey and though claimed by Greece were retained by Italy. Rhodes is the capital.

After World War II the islands were ceded to Greece at the Paris Conference of Foreign Ministers, June 27, 1946, and annexed Mar. 7, 1948.

Crete, largest Greek island and 4th largest in Mediterranean, original site of Minoan civilization, lies south of the Peloponnese peninsula and is 160 mi. long, 35 mi. wide, with area of 3,324 sq. mi. and 482,021 population. Principal towns: Heraklion (Candia) and Khania (Canea).

Guatemala

REPUBLICA DE GUATEMALA

Capital: Guatemala City. Area: 42,042 sq. mi. Population (UN est. 1967): 4,717,000. Monetary unit: Quetzal (1 per U. S. \$1).

Guatemala is the most northerly country of Central America and about the size of Ohio. It faces on both the Caribbean and the Pacific. There are numerous volcanoes in the south, more than a half dozen over 11,000 ft.

More than 50% of the population is pure Indian

and most of the remainder is of mixed Spanish and Indian descent.

There are famous Mayan ruins in Uaxatun and Tikal, in Petén, northern Guatemala. Other Mayan ruins of temples and monoliths are at Zaculeu in the west and at Quirigua, about 140 mi. from Guatemala City.

Puerto Barrios, main port on the Atlantic, is connected by railroad with Guatemala City in the highlands and ports on the Pacific.

Resources and Industries. Agriculture is the most important industry, the Guatemalan soil being exceedingly fertile. Coffee accounts for bulk of the exports. Other important export crops are bananas, cotton, chicle gum. Sugar, maize, rice are domestic crops. Rare woods and cattle are important. Silver, gold, copper, iron, lead, zinc, and chrome are found. A search for oil is being pressed in the north, where natural gas has been found.

History and Government. The old Mayan Indian empire flourished in what is today Guatemala during the first 1,000 years of the Christian era.

Guatemala was a Spanish colony 1524-1821; briefly a part of Mexico and then of the U. S. of Central America; the republic was established in 1839.

Since 1945 when a labor government was elected to replace the long-term dictatorship of Jorge Ubico, the country has seen a swing toward Communism, an allegedly U. S.-sponsored revolt, renewed attempts at social reform and a military coup. Communist-led guerrillas have terrorized parts of the nation and kidnapped officials.

Col. Enrique Peralta Azurdia, who became Pres. in the 1963 coup, sponsored free elections in March 1966. Prof. Julio Cesar Mendez Montenegro, a left-of-center reformist, won and was inaugurated Pres. July 1. He launched agrarian reforms.

Two U. S. Embassy military attaches were shot to death Jan. 16, 1968 in what was called a leftist terrorist raid. In the same week, rightist terrorists slew a lawyer and Miss Guatemala of 1950, accused of leftist leanings. A state of siege was declared after the Archbishop of Guatemala was kidnapped by right-wingers Mar. 16 (he was freed). The emergency ended June 20 after terrorism eased.

Education and Religion. Roman Catholicism is the dominant religion. Education is compulsory. The University of Guatemala is in Guatemala City, with divisions in Quetzaltenango. The language is Spanish.

Defense. Military service is compulsory between the ages of 18 and 50. The strength of the Army is approximately 7,000 plus a 3,000-man police force and a small Air Force. Guatemala is a member of the UN and OAS.

Guinea

REPUBLIC OF GUINEA

Capital: Conakry. Area 94,925 sq. mi. **Population** (UN est. 1967): 3,702,000. **Monetary unit:** Guinea franc (246.85 per U. S. \$1).

Guinea, a former French Overseas Territory, is in western Africa with the Atlantic on the W; Portuguese Guinea, Senegal and Mali on the N; Ivory Coast on the E and Liberia and Sierra Leone on the S. Chief tribes are the Fullah, Malinké and Soussou. Guinea is about the size of Oregon.

Guinea has a variety of climates, from the humid coastal tropics (Conakry, the capital has an average annual rainfall of 169") to cooler plateaus and uplands. Wildlife is varied and abundant, including elephant, hippopotamus, buffalo, antelope, lion, leopard, chimpanzee.

Resources and Industries. Although Guinea is still primarily an agricultural country, the importance of minerals to its economy is growing. Bauxite, iron and diamonds (both gem and industrial) are the principal minerals. Harvey Aluminum, Inc., of the U. S., and the Guinean Government are engaged in a joint \$200,000,000 exploitation of one of the world's richest bauxite deposits, at Boké.

Guinea's second economic plan (1964-1971) is being aided by large grants from both Communist and non-Communist countries. Acceleration of agricultural output is a Government goal. Chief agricultural exports are bananas (to France, West Germany and the USSR), and pineapples. Production of rice, the staple food of the population, has been expanded. Other crops include corn, palm nuts, coffee and honey.

History and Government. Under provisions of the 1958 constitution of the Fifth Republic of France, Guinea voted Sept. 28, 1958, to secede from the French Community and proclaimed itself

an independent republic Oct. 2. Premier Sekou Touré became first President. The nation's first constitution was adopted Nov. 12, 1958. It provided for rule by a President with a term of 7 years and a National Assembly elected by universal suffrage. The Political Bureau of the single legal party, the Parti Democratique de Guinée, exercises great power in making governmental decisions. Guinea is a member of the UN.

It has agreements with Czechoslovakia, East Germany, Poland, USSR and Communist China, and criticized U. S. "colonial" attitudes in Africa, but continues to avow a neutral course.

Kwame Nkrumah, deposed President of Ghana, was given asylum in Guinea, Mar. 2, 1966.

Guinea signed an agreement with France, May 22, 1963, providing for French technical assistance and development of cultural relations. It also receives U. S. aid. French is the official language.

On Apr. 24, 1968, Guinea and 8 other nations formed the West African Regional Group to promote economic cooperation.

Guyana

(FORMER BRITISH GUIANA)

Capital: Georgetown. Area: 83,000 sq. mi. **Population** (UN est. 1967): 680,000. **Monetary unit:** Guyana Dollar (2 per U. S. \$1).

A British colony for 152 years, Guyana became independent May 26, 1966, the first South American country to do so since Venezuela in 1830.

Fronting on the Atlantic in NE South America, Guyana borders on Venezuela, Brazil and Dutch Guiana. The nation is about the size of Kansas. The population is about 50% of East Indian (from India) descent, 31.5% of African descent, 12% of mixed descent, 4.6% American Indian descent, and small numbers of Chinese or European descent.

Dense tropical forests cover much of the land, although a flat coastal area about 50 mi. wide, where 90% of the population lives, provides space for agriculture.

The country is basically agricultural but only about 6.5% of the land is cultivated. Sugar and rice are the main cash crops and account for about half of the total exports. Other products are: coconuts, coffee, cocoa, citrus fruits, timber and livestock.

The main industry is the mining of bauxite ore; Guyana is the 4th largest producer of the mineral, supplying about one-tenth of the world's needs. Also exported are manganese, gold and diamonds. Deposits of a wide range of other minerals have been found but not yet exploited.

Manufacturing has shown an average 5% annual growth, products include cigarettes, rum, clothing, furniture, drugs and insecticides.

Guyana was discovered in 1499 by Spanish sailors. The country became a British possession in 1814. African slaves and indentured servants from India were brought in to work on plantations. The Indians soon outnumbered the Negro population and still do today. Racial tension is a major problem for the nation.

Guyana is a parliamentary democracy, with universal adult suffrage, a Governor General representing the British Queen, a Prime Minister and Cabinet. Guyana is a member of the UN and Commonwealth.

Haiti

REPUBLIQUE D'HAÏTI

Capital: Port-au-Prince. Area: 10,714 sq. mi. **Population** (UN est. 1967): 4,581,000. **Monetary unit:** Gourde (5 per U. S. \$1).

Haiti, only French-speaking republic in the Americas, occupies the western third of the island known as Hispaniola, the second largest of the Greater Antilles, lying between Cuba on the W and Puerto Rico on the E. The boundary which separates Haiti from the Dominican Republic to the E is 241 mi. long. Haiti is a little larger in area than Maryland.

Negroes form the majority of the population, the remainder being mulattoes descended from former French settlers and slaves.

Resources and Industries. Major mineral exports are bauxite (to U. S.) and copper (to Japan). Other minerals, largely undeveloped, are gold, silver and cement.

Coffee is the chief product, along with sisal, cotton, raw sugar, bananas, cocoa, tobacco and rice. Molasses and rum are produced; valuable woods are exported.

Haiti encourages tourism and is served by several major airlines, with an international jet airport at Port-au-Prince. However, tourist spending and private foreign investment in Haiti have dwindled under the regime of Pres. Francois Duvalier.

History and Government. Haiti, discovered by Columbus, 1492, and a French colony from 1677, attained its independence, 1804, following the rebellion begun by Toussaint L'Ouverture and has been a republic since 1820. Following a period of political violence, 1910-1915, the United States occupied the country and restored order. The occupation terminated Aug. 14, 1934.

Five regimes failed between 1950-1957. On Sept. 22, 1957, Dr. Duvalier was elected President for a 6-year term.

During widespread Haitian opposition to Duvalier's repressive regime in 1963, Haitian police broke into the Dominican Republic Embassy in Port-au-Prince and seized 22 Haitian political refugees there. Dominican armed reprisals were threatened; Haiti withdrew its police and released the refugees. Haiti severed diplomatic relations with the Dominican Republic. They were not resumed until July 22, 1966.

A new constitution, making Dr. Duvalier President for life, was approved by referendum June 14, 1964. Haiti is a member of the UN and OAS.

A reported invasion attempt May 20, 1968, resulted in the arrest of 10 Haitians by the Duvalier government.

Education and Religion. Roman Catholicism is the main religion and the clergy are largely French and Canadian. Education is compulsory, but illiteracy rate is high. French is the official language of the country, but French Creole, a dialect, is spoken by the majority. The teaching of English in the schools is obligatory.

Honduras

REPUBLICA DE HONDURAS

Capital: Tegucigalpa. **Area** (Govt. est.): 43,277 sq. mi. **Population** (UN est. 1967): 2,445,000. **Monetary unit:** Lempira (2 per U. S. \$1).

Honduras is a republic in Central or Middle America, bounded on the N by the Caribbean; E and S by Nicaragua; S by Pacific Ocean and El Salvador; W by Guatemala. It is about the size of Pennsylvania.

The coast line on the Caribbean is 500 mi. long. On the Pacific side it has a coast line of 40 mi. on the Gulf of Fonseca. There are ports on both coasts. The country is mountainous, very fertile, though mostly uncultivated, and covered with rich forests. The inhabitants are of Spanish and Indian extraction.

At Copan, near the western border, are the imposing remains of a large Mayan city which flourished from the 4th Century A.D.; there are numerous statues, stelae, pyramids, temples, etc.; the city had a pop. of about 150,000; it had declined by the time of its discovery by Spaniards in 1576.

Resources and Industries. Mineral resources are abundant but undeveloped, and include gold, silver, copper, lead, zinc, iron, antimony and coal. The chief export (65%) is bananas, grown on the Caribbean coast. Coffee, timber, cotton, maize, tobacco and cattle raising are important. The mountainous terrain has hindered development but membership in the Central American Common Market has boosted foreign trade considerably.

Honduras was one of the Central American nations visited and promised additional aid in July 1968 by U. S. President Johnson.

History and Government. Honduras became independent after freeing itself from Spain, Sept. 15, 1821, and from the Federation of Central America, 1838. The country is divided into 18 departments containing 31 districts.

Pres. Ramon Villeda Morales, elected Nov. 15, 1957, was overthrown in a military coup Oct. 3, 1963, and replaced by a regime headed by Col. Oswaldo Lopez Arellano.

The country returned to constitutional government and Lopez Arellano was inaugurated President June 6, 1965, after elections for a new Constituent Assembly.

Municipal elections Mar. 31, 1968, resulted in overwhelming approval of candidates of the President's National party and charges of fraud were made by the Liberal party.

Honduras is a member of the UN and OAS.

Education and Religion. Education is compul-

sory, secular and free. National University is located in Tegucigalpa. Roman Catholicism is the prevailing religion. The language is Spanish.

Hungary

MAGYAR NEPKOZTARSASAG HUNGARIAN PEOPLE'S REPUBLIC

Capitol: Budapest. **Area:** 35,918 sq. mi. **Population** (UN est. 1967): 10,212,000. **Monetary unit:** Forint (11.73 official rate per U. S. \$1).

Hungary, a Communist republic in Central Europe, is bounded by Czechoslovakia, the USSR, Romania, Yugoslavia and Austria. It is about the size of Indiana.

The Danube forms the Czech border in the NW, then swings S to bisect the country. The eastern half of Hungary is mainly a great fertile plain, the Alföld; the west and north are hilly.

Resources and Industries. Before World War II, Hungary was primarily agricultural, but industry is becoming increasingly important. Its share in national income rose to 66% in 1966 compared to 49.9% in 1949.

Major economic reforms were launched early in 1968, switching from a central planning system to one where market forces and a profit principle control much of production. The change boosted farm incomes 20% and industrial wages 6% by mid-1968.

About 64% of foreign trade is with Eastern bloc countries. Value of imports rose from \$1.6 billion in 1966 to \$1.8 billion in 1967. Exports rose from \$1.6 billion to \$1.7 billion.

In addition to a wide range of grains and vegetable crops, fruit production has been expanded. Near Tokay, in the northeast, the most famous Hungarian wines are vinted.

Hungary's bauxite deposits are very large. About three-quarters of its oil comes from the southwest corner. Industries include iron and steel, machines, machine tools, chemicals, vehicles, railways and communications equipment, milling and distilling. Hungary has become an important supplier of industrial products to Communist-bloc countries.

History and Government. Earliest settlers, chiefly Slav and Germanic, were overrun by Huns and Magyars from the east. Stephen I (997-1038) was made King by Pope Sylvester II in 1001 A.D. The country suffered repeated Turkish invasions in the 15th-17th centuries. After the defeats of the Turks, 1686-1697, Austria dominated, but Hungary obtained concessions until it regained full independence in 1867, with the Emperor of Austria as King of Hungary in a dual monarchy with a single diplomatic service. Defeated with the Central Powers in 1918, Hungary lost Transylvania to Romania, Croatia and Backa to Yugoslavia, Slovakia and Carpatho-Ruthenia to Czechoslovakia. A republic under Michael Karoly and a bolshevist revolt under Bela Kun were followed by a vote for a monarchy in 1920 with Admiral Nicholas Horthy as regent.

Hungary joined Germany in World War II; Horthy was removed and Nazi supporters put in power, 1944. Russian troops captured most of the country, 1945. By terms of an armistice with the Allied powers Hungary agreed to give up territory acquired by the 1938 dismemberment of Czechoslovakia and to return to its borders of 1937.

Hungary declared for a republic Feb. 1, 1946, and elected Zoltan Tildy President. In 1947 the Communists forced Tildy out.

A Soviet-type constitution was adopted Aug. 18, 1949, which vests power in Parliament and a Presidium. Parliament since 1953 consists of a group of deputies numbering one to every 32,000 population, elected for 4-year terms. Hungary is a member of the UN and Warsaw Pact.

Since Communism gained control, all industries have been nationalized and an intensive campaign has been conducted to establish cooperatives, and increase farm production. Since 1962 the regime has encouraged privately owned farm plots which produce 63% of total farm production as essential to the country's well-being.

Premier Imre Nagy, in office since mid-1953, was ousted for his moderate policy of favoring agriculture and consumer production, April 18, 1955; succeeded by Andras Hegedus.

In 1956, popular demands for the ousting of Erno Gero, Hungarian Communist party secretary, and for formation of a new government by Imre Nagy, resulted in the latter's appointment Oct. 23, but demonstrations against Communist rule in Buda-

pest developed into open revolt when the security police fired on the people. Gero called in Soviet armed forces to crush the rioting as Revolutionary Councils spread through the country. The insurrection appeared halted by Oct. 28 when Premier Nagy announced the Soviet Union had agreed to withdraw its troops from Hungary. However, by Nov. 1 Soviet forces again surrounded Budapest and, despite Nagy's protests to the USSR and the UN, launched a massive surprise attack against the city Nov. 4 with an estimated 200,000 troops, 2,500 tanks and armored cars.

The bid for free government was crushed. Estimates of casualties varied from 6,500 to 32,000 dead. Many rebels were reported executed and thousands deported. Between 170,000 and 196,000 persons fled the country. The U. S. received 38,248 under a refugee emergency program. In the spring of 1963 the regime freed many anti-Communists and captives from the revolution in a sweeping amnesty.

Premier Nagy was removed in November, 1956, and Janos Kadar installed as the Soviet-sponsored Premier. Kadar also became first secretary of the Patriotic People's Front (Communist party) in 1957. He stepped out of the Premier's post in June 1965 and was succeeded by Deputy Premier Gyula Kallai but remained party leader. In April 1967 Kallai became Pres. of Parliament and Jeno Fock became Prime Minister.

Education and Religion. There is no state religion and all are tolerated, but under the Communist regime the church has been restricted. A law effective April 6, 1959, requires government approval of direct Papal appointments. About two-thirds of the population are Roman Catholics; most of the remainder are Calvinists.

Public school education is compulsory and free for 8 years. Church schools were nationalized in 1948. There are 91 institutes of higher learning. The language, Hungarian (Magyar), is one of the Finno-Ugric group.

Defense. Since 1963 all males at age 18 are liable for military service.

Iceland

LYDVELDID ISLAND

Capital: Reykjavik. **Area:** 39,768 sq. mi. **Population (Govt. est. 1968):** 200,000. **Monetary unit:** Krona (57 per U. S. \$1).

The Republic of Iceland is an island of volcanic origin, close to the Arctic Circle in the North Atlantic. There are geysers and hot springs and the climate is modified by the Gulf Stream. Iceland is about the size of Virginia.

Natural hot water from many of Iceland's volcanic springs is piped into towns and provides heat for office buildings, homes and hot houses. Keflavik is an important airport.

Resources and Industries. Agriculture engages about 13.5% of the population; industry and services 70%; fishing 10%. About six-sevenths of the land is unproductive and only about 65,000 acres are under cultivation, producing potatoes, turnips and hay. The fishing industry is most important and has led Iceland to extend its exclusive fishery limits to 12 mi. The catch, of which herring comprises about 50%, also includes cod and haddock. Fish products, in salted, smoked, canned or frozen form, account for 95% of exports.

Iceland's largest industrial plants include an ammonium nitrate factory and a cement factory.

History and Government. Iceland was an independent republic, 930-1262; then it joined with Norway. The two came under Danish rule in 1380. When Norway separated from Denmark, 1814, Iceland remained under Denmark. Denmark acknowledged Iceland as a sovereign state, 1918, united with Denmark only in that the Danish King Christian X, was also King of Iceland. In 1941 the Althing (Parliament) voted to dissolve all ties with Denmark, elect a regent and adopt the constitution of a republic. This was endorsed by popular vote, and the republic proclaimed June 17, 1944.

Iceland celebrated the 1,000th anniversary of the Althing, the oldest parliamentary assembly in the world, June 23-28, 1930. Under a constitutional amendment of 1959, the Althing increased from 52 to 60 members. The Prime Minister and his cabinet are responsible to the Althing. There is universal suffrage for men and women over 21.

On May 26, 1968 the country switched to driving on the right side of the road.

Education and Religion. The Icelandic language has maintained its purity, as in Eddas and Sagas,

for 1,000 years. Danish and English also are taught. Eight years of elementary education is compulsory. There is no illiteracy. There are 3 colleges and a university. The national church is Evangelical Lutheran, but there is complete religious freedom.

Defense: Iceland has no Army, Navy, Air Force or forts. It is a charter member of NATO which maintains an air-radar base in Keflavik. It is also a member of the UN, Council of Europe and Nordic Council.

India

BHARAT

Capital: New Delhi. **Area:** 1,261,597 sq. mi. **Population (UN est. 1967):** 511,115,000. **Monetary unit:** Rupee (7.579 per U. S. \$1).

India, an independent republic since 1950 and a member of the Commonwealth, occupies the larger part of the subcontinent of India. It is one-third the size of the U. S.

India's climate varies from tropical heat in the south to the nearly Arctic cold of the Himalayas. Approximately 22.3% of the area is forested.

Main communities, 1961 census, are: Hindus, 366,162,693; Moslems, 46,911,731; Christians, 10,498,077; Sikhs, 7,846,074. Of the population 82.2% is rural and 17.8% urban. The annual rate of increase of 2½% continued to harass economic planners with food and housing shortages.

A severe 2-year drought in Bihar and other northern areas threatened mass starvation and brought large shipments of grain from the U. S.; in July, 1967, plentiful rains gave promise of better harvests. In 1968 there was a bumper wheat crop.

Also in 1967 the Government supplemented its birth control programs with monetary inducements to men to volunteer for sterilization. In 1968 the government reported 3,500,000 persons had undergone sterilization operations.

Sikkim, Indian state bordered by Tibet, Bhutan, Nepal and India, formerly British protected, became a protectorate of India in 1950. **Area,** 2,744 sq. mi.; **population** 1967, of 179,700. The ruler is Chogyal (Maharaja) Palden Thondup Namgyal; in 1963, with Crown Prince, he married Hope Cooke, a New York debutante. He became ruler in 1964 but was not coronated until April 4, 1965, a date chosen as auspicious by court astrologers. **Capital,** Gangtok. **Buddhism** is the state religion.

Kashmir, a predominantly Moslem region in the northwest, has been in dispute between India and Pakistan since 1947 when British rule was ending and Indian and Pakistani troops entered the area. A cease-fire was negotiated by the UN, effective Jan. 1, 1949; it gave Pakistan control of one-third of the area, in the west and northwest, and India the remaining two-thirds, the Indian state of Jammu and Kashmir. In late Aug. 1965, clashes broke out along the line and soon involved the armed forces of the two nations in a spreading war. Pakistan later claimed its forces killed 7,000 Indian troops. India said its troops killed 5,000 Pakistani soldiers. Several hundred civilian deaths were also reported.

On Sept. 20, 1965, the UN Security Council demanded a cease-fire and both sides agreed Sept. 22, to stop the fighting, but did not comply with a call for them to withdraw their forces across the old cease-fire line.

USSR Premier Alexsei N. Kosygin invited Indian Prime Minister Lal Bahadur Shastri and Pakistan Pres. Ayub Khan to a conference at Tashkent, USSR, and on Jan. 10, 1966, the two signed the "Tashkent Declaration," pledging to withdraw their armed forces in Kashmir to behind the cease-fire line by Feb. 28.

Prime Minister Shastri died of a heart attack in Tashkent a few hours after signing the agreement.

The U. S. announced it would resume both economic and "nonlethal" military aid, suspended when the war broke out, to both India and Pakistan.

There were also clashes in April 1965 along the Assam-East Pakistan border and in the Rann (swamp) of Cutch area along the West Pakistan-Gujarat border near the Arabian Sea.

An international arbitration commission on Feb. 19, 1968, awarded 90% of the Rann to India, 10% to Pakistan.

France, 1952-54, peacefully yielded to India its 5 colonies on the Bay of Bengal, former French India, comprising Pondicherry, Karaikal, Mahe, Yanam and Chandernagor, totaling 196 sq. mi. and 346,000 pop.

Goa, 1,426 sq. mi., pop., 1962, 626,978, which had been administered by Portugal as a colony since 1505 A.D., was taken by India by military action Dec. 18, 1961, together with two other Portuguese enclaves, Damão and Diu, located about 250 mi. S of Bombay. The World Court, Apr. 12, 1960, had rejected Portugal's claim to sovereignty by a 1979 treaty over Dadrā and Nagar Haveli, subsidiaries of Damão. India's Parliament, Mar. 14, 1962, incorporated Goa, Damão and Diu in the Indian Union. Following elections for an assembly Dec. 9, 1963, Goa became internally self-governing.

India is a union of 16 federated states and 8 centrally administered union territories:

State	Capital	Sq. mi.	Pop. 1960
Andhra Pradesh.	Hyderabad....	106,052	39,602,400

Resources and Industries. Agriculture occupies 70% of the people and is being helped by government planning to reach eventual self-sufficiency. Cooperative farms societies have been formed with state support, as well as a committee to supervise development and marketing of rice. The government is supporting the cooperative cotton, silk and woolen handloom industry with appropriations to the states for providing capital, supplies and housing for weavers, and sales depots.

Principal food products are rice, corn, millet, wheat, barley, coffee, sugar cane, spices, tea, cashew nuts. Other important products include cotton, copra, coir, jute, linseed, rubber, lumber.

India's 4th 5-year plan, launched Apr. 1, 1966, was to spur agriculture and industry toward self-sufficiency.

Chief industries are textiles, with a wide variety of woolen, cotton and silk products; steel and cement. The Tata Iron & Steel works in Jamshedpur is the largest in Asia, with capacity of 800,000 tons a year and expanding.

Also manufactured were rayon yarn, plywood, ammonium sulphate, soda ash, caustic soda, sheet glass, ball bearings, transformers, sewing machines, bicycles.

The 1967 index of industrial production (1963=100) was 118.

Industrial production, distribution and prices are regulated by law. Practically all utilities are state-owned, including railroads and airlines.

India is a leading producer of iron ore, mica and manganese; also important are salt, coal, bauxite and gypsum.

Exports include tea, sugar, raw and processed jute, cotton fabrics and other textiles, tanned hides and skins, manganese ore, pepper, tobacco. Imports: mineral oils, machinery, millwork, food grains, raw cotton, metals. Largest trade is with the U. S., which purchases tea, spices, burlap, wool, psyllium seed, gum, nuts, and hides.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$2,730,000	\$1,577,000
1967	\$2,718,000	\$1,614,000

History and Government. India has one of the oldest civilizations in the world. Excavations trace the Indus Valley civilization back for at least 5,000 years. Beautiful paintings in the mountain caves of Ajanta in South India, richly carved temples, the Taj Mahal in Agra, and the Kutab Minar in Delhi are among relics of the glorious past.

Vasco da Gama established Portuguese trading posts 1498-99, 1502-03. The Dutch followed. The English East India Co. sent Capt. Wm. Hawkins, 1609, to get concessions from the Mogul emperor for spices and textiles. The English founded Madras and Calcutta and acquired Bombay from Portugal. Operating as the East India Company the British gained control of all of India. Warren Hastings, first Governor-General (1774-1785), set up civil government, later India Civil Service. The British Parliament assumed political direction. Under Lord Bentinck, 1828-35, misrule by rajahs was abolished, infanticide stopped, suttee—suicide of a widow on her husband's funeral pyre—made illegal.

Liberal policies were set back when the Sepoy troops mutinied, 1857-58. Thereafter the British supported the native rulers. During the Boer War India supplied an ambulance corps. During World War I India provided 800,000 troops; 24,000 were killed, 70,000 wounded. The National Congress of India refused to support the Allies in World War II, but about 2,000,000 men served in the Indian Army, chiefly against Japanese in Burma.

Indian nationalism grew rapidly after World War I. The National Congress and the Moslem League demanded constitutional reform. A leader emerged in Mohandas K. Gandhi (called Mahatma, or Great Soul), born Oct. 2, 1869, assassinated Jan. 30, 1948. A Hindu, trained in law in England, he first championed rights of Indians in South Africa. In 1919 in India he began advocating self-rule, non-violence, pursuit of native handicrafts, removal of untouchability (which forced millions of poor to remain menials by heredity). In 1930 he launched "civil disobedience," including boycott of British goods and rejection of taxes without representation. Gandhi and about 60,000 were jailed.

In 1935 Britain gave India a constitution providing a bicameral federal congress, with a council of states and an assembly. Suffrage was granted about 30,000,000 in separate electorates. The Moslems objected that Hindu dominance injured their culture and freedom. Mohammed Ali Jinnah, head of the Moslem League, sought creation of a Moslem nation, Pakistan.

Following more than 40 years' active struggle for freedom by both Hindus and Moslems, the British government announced Feb. 20, 1947, its intention to partition India into two dominions and set June, 1948, for British withdrawal from India. Aug. 15, 1947, was designated Indian Independence Day. India became a self-governing member of the Commonwealth and assumed charter membership British India had held in the UN. The dominion became a sovereign democratic republic under a constitution adopted Nov. 26, 1949, effective Jan. 26, 1950, but elected to remain a member of the Commonwealth. (See *Pakistan*.)

It has been estimated that more than 11,000,000 refugees (Hindus and Moslems) crossed the India-Pakistan borders in a mass transferral of some of the two peoples during 1947.

The constitution provides for a President, elected for a five-year term by an electoral college consisting of members of both houses of Parliament (Council of States and House of the People), and elected members of the lower houses of the federating states. A Vice President elected by members of both houses presides over the Council of States. A Council of Ministers (cabinet), headed by a Prime Minister, aids and advises the President. The federating states have governors, appointed by the President, at the head of state organizations similar to the federal system.

The Council of States is a permanent body, not subject to dissolution, but one-third of its members retire at the end of every second year. The House of the People may be dissolved by the President and new elections called.

The Congress party has been in power since India's first general election, 1951-52. In general elections Feb., 1967, for the lower house (Lok Sabha), the Congress party won 278 seats; opposition parties won 234.

Prime Minister Mrs. Indira Gandhi, named Jan. 19, 1966, succeeded Lal Bahadur Shastri, who on June 2, 1964, succeeded India's first Prime Minister, Jawaharlal Nehru. Shastri died Jan. 11, 1966, hours after signing the "Tashkent Declaration" on Kashmir. Mrs. Gandhi, Nehru's daughter, was no relation to Mahatma Gandhi. Nehru, Prime Minister from the beginning of India's independence in 1947, died May 24, 1964.

President Dr. Zakir Husain, a Moslem, was elected May 9, 1967.

Education and Religion. The constitution pro-

vides for free, compulsory education through age 14. There are now 62 universities, 1,946 colleges, and 27 research institutes.

There are 14 main languages, 12 originating from Sanskrit, with several hundred varied dialects. Hindi is spoken by nearly 50%, with Urdu, the principal Moslem language, spoken by 10%. Hindi became the official language in Jan. 1965 with English the associate official language. Much official government work and instruction at universities continues to be done in English.

The religion of more than 85% of the people is Hinduism. The constitution guarantees freedom of worship. Moslems are the largest minority, est. at 50,000,000 in 1965; there are about 10,000,000 Christians, 8,000,000 Sikhs, 100,000 Parsis (chiefly around Bombay) and 30,000 Jews.

Defense. All recruitment for India's armed forces is voluntary. Army, navy and air force are headed by chiefs of staff under the Defense Minister. The navy consists of one aircraft carrier, 2 cruisers, 3 destroyers, 5 anti-submarine frigates, 3 anti-aircraft frigates, 7 frigates, 12 minesweepers and other vessels.

Indonesia

REPUBLIK INDONESIA
(Former Netherlands Indies)

Capital: Jakarta (Djakarta). **Area:** 735,865 sq. mi. **Population** (UN est. 1967): 116,100,000. **Monetary unit:** Rupiah (10 per U. S. \$1 official rate, open market rate 340 per \$1).

Indonesia, world's largest archipelago, formerly the Netherlands East Indies, lies along the Equator SE of Asia, N and NW of Australia. Indonesia comprises about 3,000 islands, the 5 largest being Java (one of the most densely populated areas in the world with 1,000 persons to the sq. mi.), Sumatra, Kalimantan (most of Borneo), Sulawesi (Celebes) and West Irian (west half of New Guinea). Among others are Bangka, Billiton, Madura, Bali, Lombok, Sumbawa, part of Timor. The land area is 6 times that of New Mexico.

Many races are included, the principal ones being Achinese, Bataks, Menangkabaus, Javanese, Sundanese, Madurese, Balinese, Sasaks, Menadonese, Buginese, Dayaks, and Papuans.

Areas and population of the principal divisions:

	Sq. mi.	Pop. 1962
Kallimantan (West Borneo)...	208,286	4,101,475
Sumatra	182,859	15,739,363
Java and Madura	51,032	63,059,575
Sulawesi (Celebes)	72,986	7,079,349
Bali and Nusa Tenggara	35,000	5,557,656
Moluccas and West Irian	182,308	1,547,930

The capital, called Batavia by the Dutch, is Jakarta (Djakarta), on the island of Java.

Indonesia's national airways system covers 17,000 mi., linking 30 cities plus international service.

Resources and Industries. Indonesia is one of the richest countries in natural resources. There are vast supplies of tin, oil and coal, and sizable deposits of bauxite, manganese, copper, nickel, gold and silver.

Agriculture occupies 80% of the population. Products include rice, maize, casava, ground nuts, soya beans, tobacco, coffee, rubber, cinchona, pepper, kapok, coconuts, palm oil, tea, sugar and indigo.

Inflation and the cost of living spiraled during the Suharto regime. High prices continued to plague the new government in 1968.

History and Government. Until March, 1942, Indonesia was a Netherlands overseas territory. Following Japanese military occupation, 1942-1945, Nationalists, led by Dr. Sukarno and Dr. Hatta, proclaimed a republic Aug. 17, 1945. Four years of intermittent warfare between Netherlands and Indonesian forces ended with agreements signed Nov. 2, 1949, transferring sovereignty over all Indonesia, except Netherlands New Guinea (Irian) to a new interim government effective Dec. 27, 1949. Dr. Sukarno was elected President, Dec. 16, 1949. On July 20, 1950, the member states agreed to form a strongly centralized government; a unitarian state with an amended constitution was proclaimed Aug. 15 and its name formally changed to Republic of Indonesia. It joined the UN 1950.

After the UN, Nov. 29, 1957, rejected a proposal for new negotiations over West New Guinea, Indonesia's government stepped up the seizure of Dutch plantations, shipping, banks, railways, electrical

facilities and mercantile concerns. A U. S. mediator's plan was adopted in 1962, providing that West Irian be turned over temporarily to the UN, then to Indonesia. Under the agreement Indonesia pledged to hold a plebiscite by the end of 1969 allowing the people of West Irian the choice of staying with Indonesia or separating from it. The UN turned the area over to Indonesia May 1, 1963. In April 1965 Pres. Sukarno announced no plebiscite would be held.

Pres. Sukarno suspended the original elected 257-member Parliament Mar. 5, 1960, and announced a new 261-member appointed group, Mar. 27, and swept aside anti-Leftist criticism. He was named President for life May 18, 1963.

The USSR announced June 25, 1964, plans to step up its already large contributions of modern arms to Indonesia to aid in attempting to "crush" the new nation, Malaysia, formation of which Indonesia opposed. In 1964 and 1965 Indonesia staged numerous guerrilla raids into Malaysia.

Indonesia withdrew from the UN in Jan. 1965 and from the World Bank in Aug. Many anti-American demonstrations were staged at U. S. consulates, including stonings, during the year. In Aug. Pres. Sukarno announced plans for an Indonesian-Red Chinese axis aimed at driving the U. S. and Britain out of southwest Asia.

Indonesia's large, pro-Peking Communist party tried to seize complete control Sept. 30, 1965, taking strategic points and murdering 6 high generals. The army smashed the coup and later intimidated that Pres. Sukarno had played a role in it. Following the abortive putsch, anti-Communist rioters set fire to Communist hq. and a Red Chinese university and ransacked the Peking embassy in Jakarta. In Central and East Java, Reds seized control of several districts and fighting continued. It was later estimated that up to 400,000 Communists were executed.

Gen. Suharto was named head of the Army; on Mar. 12, 1966, Pres. Sukarno turned over all government powers to him but continued as Pres., apparently in name only. In 1967 Sukarno was reportedly stripped of all titles. Gen. Suharto was officially named President for a 5-year term by the Consultative Assembly Mar. 27, 1968.

On Aug. 11, 1966, Indonesia and Malaysia signed an agreement ending the Sukarno policy of hostility to Malaysia. On Sept. 28 Indonesia resumed membership in the UN. The U. S. resumed economic aid.

Under Sukarno, Indonesia in April 1965 announced seizure of control of all foreign-owned enterprises in the country. In Oct. 1967 the Suharto government returned a seized rubber plantation to the Goodyear Tire & Rubber Co.

Education and Religion. 90% of the inhabitants are Moslems, the remainder Christians, Hindus and Buddhists. There is compulsory primary education for children 6 to 12, plus optional secondary training and higher education. Major institutions of higher education are Univ. of Indonesia (Jakarta and Bandung), Gadjah Mada Univ., National Academy, Islam Univ., Pantja-sila Univ. Many languages are spoken; official language is Bahasa Indonesia, derived from Malay. Dutch and English are taught.

Iran

KESHVARE SHAHANSHAHIYE IRAN
(Persia)

Capital: Tehran. **Area:** 636,293 sq. mi. **Population** (UN est. 1967): 26,284,000. **Monetary unit:** Rial (75.75 per U. S. \$1).

The Kingdom of Iran is a mountainous land, much of it a high plateau region, in southwestern Asia. Slightly larger than Alaska, it has coastlines on the Caspian Sea, Persian Gulf and Gulf of Oman. For neighbors it has the USSR, Afghanistan, Pakistan, Iraq and Turkey. Large salt deserts comprise 25% of the land but there are many beautiful oases.

Tehran, Isfahan, Shiraz and Abadan have jet airports. Important ports are Bandar Shahpur, Bandar Pahlavi, Khurramshahr and Bandar Shah. Shiraz is noted for ancient ruins of Persepolis.

Resources and Industries. Iran is the world's 4th largest oil producer; petroleum provides most of its foreign exchange and government income. A \$92,000,000 oil loading terminal was opened in 1966 at Kharg Island in the Persian Gulf.

Other mineral wealth includes chromite, copper, iron, lead, manganese, zinc, barite, sulphur and coal. Also mined are emeralds and turquoise.

The first Iranian steel mill is planned near Isfahan, to be built by the Soviet Union and paid for by natural gas piped to the USSR. Iran has contracted with the French for development of a petrochemical industry.

Agriculture is a prime industry, wheat, barley, corn, rice, fruits, gums, wool, tobacco, raw silk, sugar beets and cotton being the chief products. Some wines are famous. Persian carpets, all made on hand looms, are produced in Kerman, Qum, Tabriz, Arak, Meshed, Isfahan and Kashan. Sturgeon fishing in Caspian Sea is important, especially for caviar. Three new major dams provide hydroelectric power and aid irrigation—Karadj (1961), in Tehran; Sefidrud (1962), north of Tehran; and Dez (1963), in Khuzestan.

Under Shah Mohammed Reza Pahlavi's leadership, Iran has undergone an economic and social revolution to become a vigorous modern state. His improvements included major land reform, introduction of industry to towns, the spread of literacy and drastic gains in women's rights.

On Nov. 29, 1967, the U. S. and Iran celebrated the end of American economic aid, begun in 1951; it had totaled \$605,000,000 plus other aid. Both countries agreed it was no longer necessary in view of Iran's growing prosperity.

History and Government. Iran, derived from Aryan, is the correct name of the country long referred to as Persia. The Iranians, who came from the East during the 2nd millennium B.C., were Aryans, an Indo-European people related to the Aryans of India, and included Medes, Persians and other groups. Use of the name Iran became widespread in the 1920s and 1930s.

In 549 B.C. Cyrus the Great united the Medes and Persians in the Persian Empire, conquered Babylonia, 538 B.C.; restored Jerusalem to the Jews.

Darius I began the invasion of Greece; crossed the Hellespont (Bosphorus), was defeated at Marathon, 490 B.C. Xerxes I crossed the Hellespont, fought Spartans at Thermopylae, was defeated at Salamis, 480 B.C. and Plataea, 479 B.C. Alexander of Macedon (the Great) invaded Persia, defeated Darius III at Issus, 333 B.C.

Subsequently Persia was ruled by the Seleucids; the Parthians beginning c. 250 B.C.; the Sassanians, c. 226 A.D.

Arabs brought Islam to Persia in the 7th Century and for over 600 years the religious-political Caliphate ruled the land. Omar Khayyam (c. 1050-c. 1123) wrote his famous Rubaiyat and created a calendar renowned for its accuracy.

Mongols invaded the country in 1250 and again under Tamerlane c. 1370. After the downfall of the Mongols in 1502 Persia became a monarchy under a Shah.

In 1906 a constitution was enacted. It provides for an executive with power vested in a cabinet and government officials who act in the name of the Shah. The legislature has a national assembly (Majlis) elected for 4 years and a senate of 60, 30 elected and 30 nominated by the Shah. Laws require the Shah's signature and he may dissolve the legislature. Women voted and were elected to the legislature for the first time in 1963.

The Shah is Mohammed Reza Pahlavi (born Oct. 26, 1919), ascended in 1941. He married Princess Fawzia, eldest sister of Farouk I of Egypt, March 15, 1939; divorced Nov. 19, 1942. A daughter, Princess Shahnaz, was born in 1940. The Shah married his 2nd wife, Soraya Esfandiary, Feb. 12, 1951, divorced Mar. 14, 1958. Both wives had failed to produce a male heir. The Shah married Farah Diba Dec. 21, 1959. Crown Prince Reza Pahlavi was born Oct. 31, 1960.

A two-year observance of Iran's 2,500th birthday culminated in October, 1967, with the coronation of the Shah. (No Shah can be crowned until a male succession is assured.)

British and Russian forces entered Iran Aug. 25, 1941, withdrawing later. Britain and the USSR signed an agreement Jan. 29, 1942, to respect Iran integrity and give economic aid. In 1946 a Soviet attempt to take over the Azerbaijan region in northeast Iran was defeated when a puppet regime was ousted by force.

In March, 1951, radicals in the Majlis voted nationalization of the oil industry. This led to closing of the Abadan refinery of the Anglo-Iranian Oil Co., a diplomatic break with Britain and wide unemployment. After a brief uprising, Aug. 1953, the royalists regained control and Dr. Mohammed Mossadegh, appointed Premier Apr. 29, was given 3 years in prison for treason. The oil dispute was

settled Aug. 8, 1954, by the signing of a contract with a consortium of British, American, Dutch and French companies for 25 years, plus 15 optional, to produce, refine and market Iran's oil, with 50% of the earnings going to Iran.

An increase in direct taxation on hitherto privileged landholders and people of high incomes is being developed to insure mass welfare. A Pahlavi Estates distribution program has operated since 1949. A new land reform law, passed Jan. 15, 1962, further increased opportunities for landless peasants to become owners, enhanced by the Shah's distribution of land from his own estates.

Education and Religion. The Shia branch of Islam predominates. Education is nominally compulsory. Higher education is available at the Universities of Tehran, Shiraz, Isfahan, Tabriz, Meshed, National Univ., and Ahwaz. A Literacy Corps is composed of high school and college graduates who teach in rural areas in lieu of military service. A Health Corps of graduate doctors and other graduates is patterned after the Literacy Corps. The language is Farsi (Persian), written in Arabic script.

Defense. Two years' service is compulsory. Iran is a member of the UN and CENTO.

Iraq

AL JAMHOURIYAH AL IRAQIYA (MESOPOTAMIA)

Capital: Baghdad. Area: 173,259 sq. mi. Population (UN est. 1967): 8,440,000. Monetary unit: Dinar (.3571 per U. S. \$1).

Iraq is the modern name for Mesopotamia, the area around the Euphrates and Tigris Rivers, about twice the size of Utah. It is bounded by Turkey, Iran, the Persian (also called Arabian) Gulf, Kuwait, Saudi Arabia, Jordan and Syria.

The country is mostly alluvial plain. The temperature varies widely: 120°F in the shade is common, contrasted with severe frosts in the winter.

The soil is of extraordinary fertility, but since destruction of an intricate system of canals during invasions, 700-1258, the Tigris and Euphrates have caused recurring damage. Modern irrigation systems are under construction.

Baghdad and Basra have jet airports.

Resources and Industries. Wheat, barley, rice, millet and cotton are the chief crops, with tobacco in the Kurdish hills. Dates are grown in the tidal stretches of the Shatt el Arab and beyond. Large flocks of sheep are raised in the north and wool and skins are exported.

Iraq is one of the leading oil-producing countries of the world. Native companies, and American and other interests comprising the Iraq Petroleum Co. operating the rich Kirkuk field, produced 400,000,000 bbl. in 1967, a drop of 100,000,000 bbl. from 1966. Iraq charged that the Western-controlled company had sabotaged one of its own pipelines in Dec. 1967. In the same month Iraq announced signing of an agreement with the USSR to develop rich new fields in southern Iraq; the step was regarded as an important breakthrough for the USSR in obtaining Middle East oil.

History and Government. The Tigris-Euphrates valley was the site of the ancient cities of Eridu, Ur, Nineveh and Babylon. The Sumerian culture of 3000 B.C. influenced Crete, Egypt and Greece.

Iraq, then known as Mesopotamia, was taken from Turkey in World War I. The League of Nations gave a mandate to Britain, which ended 1932 when Iraq was recognized as a sovereign state and member of the League of Nations.

Emir Faisal, then King of the Hejaz, was chosen ruler by a referendum in 1921. A constitutional monarchy was created in 1924. On his death, Sept. 1933, he was succeeded by his son, Ghazi Ibn Faisal. King Ghazi was killed in an automobile accident April 4, 1939, and was succeeded by his son, King Faisal II (born May 2, 1935).

King Faisal was assassinated July 14, 1958, when the Free Officers, led by Brig. Gen. Abdul Karim Kassem revolted and proclaimed Iraq "part of the Arab nation." Gen. Kassem became premier of a republic which would follow the policies of the United Arab Republic but honor its international obligations. The United States recognized the government Aug. 2 and Kassem's representatives took the seat of Iraq in the UN Security Council. Iraq received Soviet arms aid, withdrew from the Baghdad pact and 3 U. S. arms agreements.

1. Premier Kassem was deposed Feb. 8, 1963, by

military elements supporting UAR pan-Arab policies and executed Feb. 9.

A provisional constitution, announced May 3, 1964, provided for a 3-year transition period and strong ties with the UAR. Dr. Abdul Rahman al-Bazzaz became premier Sept. 21, 1965, after his predecessor Brig. Arif Abdel Razzak, had fled Iraq following an abortive coup. Bazzaz announced June 29, 1966, settlement of the 5-yr. guerrilla war with Kurdish rebels, who were to be granted local autonomy. Bazzaz resigned Aug. 6 and was succeeded by Najib Talib.

Lt. Gen. Abdel Rahman Arif was sworn in as President and Premier May 10, 1967.

On June 7, 1967, Iraq broke diplomatic relations with the U.S. following UAR charges that America was aiding Israel in the 6-day, 1967 war.

On July 17, 1968, Pres. Arif was ousted in a military coup by a group headed by Maj. Gen. Ahmed Hassan al-Bakr. He was a member of the right wing of the international Baath Socialist party, the leftist wing of which controlled Syria.

Education and Religion. Elementary and secondary education is free and compulsory. Arabic is the language of the majority. The people are predominantly Moslems, divided between the Sunni and Shia sects. Christians number 150,000.

Defense. Military service is compulsory between the ages of 18 and 25. The Iraq Army comprises 3 infantry divisions, an armored division and special troops, organized along modern lines. There is a small Air Force and a river flotilla.

Ireland

EIRE

POBLACHT NA hEIREANN

Capital: Dublin. **Area** 27,136 sq. mi. **Population** (UN est. 1967): 2,899,000. **Monetary unit:** Irish pound (.4195 per U. S. \$1).

Ireland, an island in the Atlantic near the European mainland, is a sovereign democratic republic about the size of W. Va. It is separated from Great Britain on the E by the Irish Sea and the North Channel and on the SE by St. George's Channel.

Ireland, the Emerald Isle, consists mainly of a central plateau surrounded by isolated groups of hills and mountains. Ireland's coastline is much indented by the sea, affording many inlets and coves. The mean annual temperature ranges from 48°F. in the N to 52°F. in the S. Dublin has an average temperature of 39 in the coldest month and 60 in the warmest. There are numerous lakes (called loughs); the best known are those of Killybegs. The most important river is the Shannon, about 250 mi. long. Tallest mountains are in SW; Carruntuohill, 3,414 ft., and Mangerton, 2,756 ft., are in Kerry; Brandon Hill on the coast, 3,127 ft.; Boggeragh, in County Cork, 2,118 ft.

Wildlife is scarce, and snakes are considered non-existent.

The famous Blarney stone is located in an old castle in the village of Blarney, 4 mi. NW of Cork. A legend says it confers oratorical powers on those who kiss it.

Emigration had been high and for years the population steadily declined. Since 1961, however, it has annually increased.

Resources and Industries. More than a third of the population works on farms. The nearness of the Gulf Stream causes considerable rainfall; lush pastures support valuable horse and cattle industries. Important crops are potatoes, wheat, oats, barley, rye, turnips, sugar beets, cabbage and flax.

A land rehabilitation project has reclaimed 1,410,000 acres in recent years. A Peat Board supervises drainage of bogs to recover peat and increase acreage. An Agricultural Institute was established in 1958 to coordinate and promote research.

Major industries are tobacco, food processing, vehicle assembly, metals, textiles, chemicals and brewing. Marked gains have been recorded in electrical and non-electrical machinery, fertilizers and metals.

A mining boom, following discovery of zinc, lead and silver deposits, brought new strength to the economy in the mid-1960s. The index numbers of industrial production (1963=100) showed that the mining index jumped from 105 in 1965 to 206 in 1967. The index for general industrial production rose to 129 in 1967.

Tourism, growing annually, provided Ireland

with earnings of \$232,000,000 in 1966.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,046,000	\$683,000
1967	\$1,081,000	\$785,000

A switch to the decimal coinage system is planned for 1971.

History and Government. Celtic tribes invaded the islands about the 4th Century B.C.; their Gaelic culture and literature flourished and spread to Scotland and elsewhere in the 5th Century A.D., the same century in which St. Patrick converted the Irish to Christianity. Invasions by Norsemen began in the 8th Century, but were ended by defeat of the Danes by the Irish King Brian Boru in 1014. English invasions started in the 12th Century; for over 700 years the Anglo-Irish struggle continued with bitter rebellions and savage repressions.

The Easter Monday Rebellion (1916) failed but was followed by guerrilla warfare and harsh reprisals by British troops, the "Black and Tans." The Dail Eireann, or Irish parliament in Dublin, reaffirmed independence in Jan., 1919. The British offered dominion status to Ulster (6 counties) and southern Ireland (26 counties), Dec., 1921, which Northern Ireland accepted. The constitution of the Irish Free State, a British dominion, was adopted Dec. 11, 1922. By treaty with Great Britain Northern Ireland could vote itself out, which it did, Dec. 12, 1922.

A new constitution adopted by plebiscite came into operation Dec. 29, 1937. It declared the name of the state Eire in the Irish language and Ireland in the English and declared in a sovereign democratic state.

On Dec. 21, 1948, an Irish law declared the country a republic rather than a dominion and withdrew it from the Commonwealth. In 1949 the British Parliament recognized both actions, but re-asserted its claim to incorporate the six north-eastern counties (Antrim, Armagh, Derry, Down, Fermanagh and Tyrone) in the United Kingdom. This claim has not been recognized by Ireland. See *United Kingdom—Northern Ireland*.

William T. Cosgrave was chosen President of the Executive Council, Dec. 1922. He was in office until Mar., 1932, when Eamon de Valera became President of the Executive Council and Minister for External Affairs, holding both offices until 1938. Leaders since 1938 have been:

Presidents: (7-year terms): Douglas Hyde, 1938-1945. Sean T. O'Kelly, first term, 1945-1952; re-elected 1952-1959. Eamon de Valera, 1959-1966; re-elected 1966.

Prime Ministers: Eamon de Valera, 1938-1948; John A. Costello, 1948-1951; Eamon de Valera, 1951-1954; John A. Costello, 1954-1957; Eamon de Valera, 1957-1959; Sean Lemass, 1959-66; John M. Lynch, chosen Nov. 10, 1966.

The parliament is composed of a house, Dail Eireann, of 144 elected members, and a senate, Seanad Eireann, of 60, 11 of them nominated by the prime minister, 6 by the universities and the rest elected from 5 panels of candidates representing public interests. The president, on nomination of the Dail, appoints the prime minister and on nomination of the latter with Dail approval names the other ministers.

Following the general election, April 7, 1965, seats were distributed as follows, compared with the previous Parliament:

	1965	1961
Fianna Fail	72	70
Fianna Gael	47	47
Labor	32	16
Clann na Poblachta	1	1
Independents	2	6
Nat'l Progressive Dem.	0	2
Clann na Taimhan	0	2

Education and Religion. Roman Catholicism is the prevailing religion, claiming more than 90% of the population.

Elementary education is free and compulsory, and the Irish language is a required study in all national schools. Institutions of higher learning include the National University, founded 1908, comprising the Constituent Colleges of Dublin, Cork, Galway and St. Patrick's, Maynooth; Trinity College, Dublin, founded 1591; the Dublin Institute for Advanced Studies; the Royal Irish Academy.

Defense. Recruitment is voluntary. Permanent force of the Army, Navy, and Air Force is set at 13,000; first and second line reserves number 25,000. The Navy consists of small vessels.

It is a member of the UN and Council of Europe.

Israel

MEDINAT ISRAEL STATE OF ISRAEL

Capital: Jerusalem. **Area:** 7,993 sq. mi. **Population** (UN est. 1967): 2,669,000. **Monetary unit:** Israeli pound (3.5 per U. S. \$1).

The nation of Israel was reestablished, as a republic, in 1948. It occupies part of the ancient land first called Canaan, then Israel, then Palestine. About the size of New Jersey, it faces the Mediterranean to the W, Lebanon to the N, Syria and Jordan to the E, and the United Arab Republic to the SE.

The coastal plain on the W is 120 mi. long, 15 wide, fertile and well watered. In the center is the plateau of Judea. A triangular-shaped semi-desert region, the Negev, extends from south of Beersheba to an apex at the head of the Gulf of Aqaba. The eastern border drops sharply into the depressed valley of the River Jordan and the Dead Sea, 46 mi. long, with an average width of 8 mi., 1,296 ft. below sea level, lowest point on the earth's surface.

Israel's area, as defined by armistices with the Arab nations, includes all the land assigned to it under the 1947 partition resolution of the UN General Assembly, as well as Western Galilee and a corridor to Jerusalem. By the terms of the armistice with Syria, July 20, 1949, last of the Arab states to end military action after the creation of modern Israel, demilitarized zones were set up on the eastern edge of Lake Huleh and the south-eastern shore of the Sea of Galilee, site of Israel's Ein Gev settlement.

After the Israeli-Arab war of June 1967 in which Israel occupied the Sinai Peninsula, the west bank of the Jordan and a small area of Syria, Israel indicated it would not consider returning these areas unless the Arab states negotiated peace treaties directly with Israel and unless the U.A.R. agreed Israel would have the same shipping rights as other nations in the Suez Canal.

Non-Jewish population: Moslem, 220,000; Christian, 59,000; Druse, 31,000.

The chief ports of Israel are Haifa, Tel Aviv-Jaffa, and Elath (on Red Sea). A new port, Ashdod, was constructed S of Tel Aviv and opened 1965.

Resources and Industries. Citrus fruit is the most valuable agricultural product. Other principal crops include wheat, barley, durra, olives, melons, grapes, figs, tomatoes, bananas, cotton. Since 1955 total cultivated area has been increased from 412,500 to more than 1,000,000 acres, of which 380,000 acres are under irrigation. Wine making is an extensive industry.

Israel has abundant deposits of some minerals including limestone, sandstone, gypsum, copper, iron, phosphates, magnesium, manganese, ceramic clays. The valley of Jordan and the Dead Sea yield rock salt, sulphur and potash.

Israel's over-all economy has grown rapidly since 1954 and industrialization is proceeding. Foreign investment rose from \$105,000,000 in 1960 to \$180,700,000 in 1965. Its economy has been aided by German reparations payments, U. S. aid, international loans and contributions. West Germany completed payment of \$860,000,000 in reparations (cash and goods) in 1965. The two countries also set up full diplomatic relations.

Gross national product in 1966 was \$3.9 billion compared with \$2.8 billion in 1964.

The Negev region in the South is Israel's primary development area, receiving nearly half of the immigrants. It has huge phosphate deposits, copper, oil, natural gas and potash.

A 150-mi. pipeline, major link in Israel's national water plan, was completed in June, 1964 and began carrying water from Lake Kinneret (Sea of Galilee) to the Negev. The project was opposed by neighboring Arab nations. Other water resources being explored include various desalination processes.

The Dead Sea gas pipeline, opened 1961, carries methane from the fields of Rosh Zohar and Kodod to the potash and bromine works on the shores of the sea.

In 1968 Israel began construction of a 160-mi., 42-inch, oil pipeline from Elath on the Gulf of Aqaba to Ascalon on the Mediterranean. Scheduled for completion in July 1969, it would provide an alternative to the Suez Canal.

Israel's first atomic reactor at Nahal Rubin began operations in July, 1960. The nation launched its first successful solid-fuel rocket 50

mi. into the atmosphere July 5, 1961, for meteorological study.

Israel's main exports are citrus fruits, polished diamonds, autos, textiles and fashion goods, building materials, tires and pharmaceutical products.

Tourism is second only to citrus products in earnings.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$812,000	\$477,000
1967	\$734,000	\$522,000

History and Government. The Jewish people lived in Israel from about 1200 B.C.; many were driven from the land by some of its various conquerors. The Judaic moral and ethical code and the Bible originated here. The modern Zionist movement for a homeland in Palestine, led by Dr. Chaim Weizmann (born in Motole, Russia, Nov. 27, 1874) caused the cabinet of Great Britain to give its support in the Balfour Declaration, Nov. 2, 1917. Under the Palestine Mandate, about four-fifths of historic Palestine was detached in 1922 to form Trans-Jordan, now the Kingdom of Jordan. When the Nazi persecutions began in Germany great numbers of Jews set out for Palestine. The UN General Assembly voted Nov. 29, 1947, to partition Palestine into two independent states by Oct. 1, 1948. The Arab state would have 4,500 sq. mi. A separate enclave of Jerusalem, area 289 sq. mi., was to be administered by a governor appointed by the UN. British troops were to be withdrawn and separate governments elected. Great Britain gave up its mandate May 15, 1948.

A new Zionist state, the Republic of Israel, was proclaimed May 14-15, 1948. Israel took charge of the New City in Jerusalem and Jordan held the Old City. The UN adopted a resolution to internationalize Jerusalem, but was unable to get support from the two states. Israel was elected to the UN May 11, 1949.

The Arab League opposed the creation of modern Israel and May 15, 1948, a few hours after Israel proclaimed its independence, the armies of Egypt, Jordan, Syria, Lebanon and Iraq, with Saudi Arabian contingents, crossed its frontiers at several points.

Separate armistices with the Arab nations were signed in 1949, but no general peace settlement was obtained. The Arab nations continued policies of economic boycott, blockade in the Suez Canal, political warfare and local incitement.

Most of the territory designated for the proposed Arab state was annexed by Egypt and Jordan and the future home of more than 1,000,000 displaced and nomadic Arabs remains uncertain. They receive UN aid.

An uneasy truce between Israel and the Arab countries, supervised by a United Nations Emergency Force, prevailed until May 19, 1967, when the UN force withdrew at the demand of Egypt's President Gamal Abdel Nasser. Egyptian forces rapidly reoccupied the Gaza Strip and closed the Gulf of Aqaba to Israeli shipping. In a full-scale 6-day war that started June 5, the Israelis took the Gaza Strip, occupied the Sinai Peninsula to the Suez Canal, and captured Old Jerusalem and other Jordanian and Syrian territory. The fighting was halted June 10 by UN-arranged cease-fire agreements.

Following the war, Arab guerrillas from Jordan continued raids into Israel and shooting incidents occurred repeatedly across the Jordan border and the Suez Canal. A reprisal raid by Israelis into Jordan brought a UN Security Council resolution condemning Israel and deploring all violence whether by Arabs or Israelis.

A UN mission, headed by Dr. Gunnar V. Jarling of Sweden, sought to get both sides to agree to a peace formula during 1968. The USSR and the Communist bloc, with the exception of Romania, supported the Arabs. In July 1968 UAR Pres. Nasser and Soviet Union leaders held talks and announced they had agreed on "further joint steps" in the Middle East.

Israel is a parliamentary democracy. The first constituent assembly (Knesset), was formed Feb. 14, 1949, with 120 members, including eight Arabs. The assembly elected Dr. Chaim Weizmann, who had been provisional President from the start, first President of Israel Feb. 17, 1949. His successor was Izhak Ben-Zvi, President from 1952 until his death April 24, 1963. President: Shneur Zalman Shazar, elected by Parliament May 21, 1963.

The Knesset (Parliament) members are elected by universal suffrage for 4-year terms by all citizens over 18, under proportional representation.

In general elections Aug. 15, 1961, Premier David Ben-Gurion's Mapai party was returned to power. He resigned June 16, 1963, and was succeeded by Levi Eshkol whose coalition was kept in power by elections Nov. 2, 1965.

Israel maintains formal diplomatic relations with 90 nations. About 800 specialists in many fields share their knowledge with those in less developed nations in Africa and elsewhere.

Education. Israel has compulsory education from ages 5 to 14, 1 year of kindergarten and 8 of elementary school, with high schools mostly private. Institutes of higher education are Hebrew, Tel Aviv and Bar-Ilan Univs. Elementary enrollment increased from 100,000 in 1948 to 650,000 in 1963. In 1963, 98% of Jewish children and 90% of Arab boys were in school. After elementary school, vocational training is provided. In 1961-62 about 10,000 boys and girls were studying carpentry, tool & die making, electronics, home economics, dress making, secretarial work. Agricultural training is given and 15,000 pupils are transported every week to work on farms. There is an apprenticeship program for 10 trades. In 1960-61, 6,100 were enrolled in 10 government teachers' colleges, including one for Arabs in Jaffa. Engineers, technicians and architects study at Technion (Israel Inst. of Technology, Haifa), staff 488, regular students, 3,317, extension courses 5,000. About 5,000 adults take vocational training annually; popular adult education reaches 50,000. The general labor federation, Histadrut, trains Arab apprentices. Israel has 296 schools for Arabs, with 1,615 teachers and 40,768 pupils; also 29 private schools, some Christian, with 10,830 pupils. Construction of new schools is continuing. The official languages are Hebrew and Arabic.

Defense. There is compulsory 26-month service for men 18 to 26 and 20 months for unmarried women 18 to 26. The Navy includes destroyers, frigates, submarines, minesweepers and others. The Air Force uses modern military aircraft, mainly of French types.

Italy

REPUBBLICA ITALIANA

Capital: Rome. **Area:** 116,303 sq. mi. **Population** (Govt. est. 1968): 53,648,000. **Monetary unit:** Lira, pt. lire (623.30 per U. S. \$1).

The Republic of Italy occupies a long peninsula shaped like a boot, extending SE from the Alps into the Mediterranean, with the island of Sicily separated from the mainland by the 2-mi. Strait of Messina at the toe of the boot. The country is about 760 mi. long and not over 220 mi. wide. Its area is about the same as Arizona's. Lying directly W of mid-Italy is the major island of Sardinia, slightly smaller than Sicily.

Sicily, 9,927 sq. mi., pop (1965), 4,721,000, is a triangular island 180 by 120 mi., seat of a Region that embraces the island of Pantelleria, 32 sq. mi., and the Lipari group, 44 sq. mi., pop. 14,000, including two with active volcanoes: Vulcano, 1,637 ft. and Stromboli, 3,038 ft. From prehistoric times Sicily has been settled by Mediterranean peoples; a strong Greek state had its capital at Syracuse, on Ortigia Is., off Catania, where Dionysius "the Tyrant" ruled Rome took Sicily from Carthage 215 B.C.

Mt. Etna, 10,705 ft. active volcano, is tallest peak. Sicily leads in citrus fruits, also produces wheat, grapes, wine, sulphur, salt, olives. Cattle, sheep, hogs and mules are raised.

Sardinia, 9,283 sq. mi., pop. (1965), 1,419,362, lies in the Mediterranean, 115 mi. W of Italy and 7½ mi. S of Corsica. Like Sicily, it is under a regional administration. It is 160 mi. long, 68 mi. wide, mountainous, with mining of coal, zinc, lead, copper; it raises grapes, olives, tobacco, also cattle and sheep. In 1720 Sardinia was added to the possessions of the Dukes of Savoy in Piedmont and Savoy to form the Kingdom of Sardinia. They fought in the Crimean War and the House of Savoy gave Italy its kings, 1861-1946. Giuseppe Garibaldi is buried on the nearby Isle of Capriera. **Capital:** Cagliari.

Elba, 87 sq. mi., pop. 30,000, 6 mi. west of Tuscany. Industries include fishing, iron mining, wine making. Napoleon I lived here in exile, 1814-1815.

Capri, 4 sq. mi., pop. c. 9,000, 20 mi. SW of Naples, is famous for its beauty and equable climate.

Italy's largest seaports are Genoa, Naples, Venice, Trieste, Ancona, Bari, Brindisi and Palermo.

The allure of historical monuments, great museums of painting and sculpture, imposing churches, as well as good living, brought 27,500,000 tourists in 1967. Florence, with its galleries; Rome with its religious associations and ancient relics, Venice, and the resorts of the Riviera are the principal objectives.

The 3.4-mi. Great St. Bernard tunnel, between Italy and Switzerland, first auto tunnel in the Alps, was opened Mar. 19, 1964. The longest highway tunnel in the world, the Mont Blanc tunnel, 7.25 mi., linking Italy and France, was opened July 16, 1965.

Resources and Industries. Chief farm crops are wheat, sugar beets, potatoes, corn, grapes and tomatoes.

Italy is adapting production of fruits, vegetables and other garden products to the needs of the European Common Market. Grapes lead but olives, oranges, lemons, apples, pears are produced in large quantities. Rice is grown in Piedmont and Lombardy. Cattle constitute the largest livestock item, followed by sheep, horses, mules and goats.

The wines of Italy have great variety. Chianti from Tuscany is popular, as are Asti Spumante, Orvieto, Capri.

White marble is quarried at Carrara, Volterra and Pisa; colored marble at Verona, Siena, Vicenza and Genoa. Alabaster comes chiefly from Volterra.

Natural gas is found in the valley of the Po, the Marches, Abruzzi, Apulia, Basilicata and Sicily. In Sicily oil is carried by pipeline to the port of Augusta on the Gulf of Catania. In 1966 crude oil production was 1,812,000 metric tons.

In 1966 Italy had more than 2,300 hydroelectric and 750 thermoelectric stations which produced a total of 87.4 billion kwh. High-tension cables distribute electrical energy from the Alps to Sicily, crossing the Straits of Messina on overhead cables. In 1964 Italy had two nuclear power plants completed and a third under construction. The electrical industry was nationalized in 1962.

Steel production was 16,300,000 metric tons in 1967, up 13%. Italy is a heavy producer of industrial and electrical machinery, automobiles, steel products, typewriters, shoes, textiles, synthetic fabrics, machine tools. Its chemical industry is expanding.

There are state monopolies in tobacco, salt and quinine. Tobacco returns the largest income with cigarettes about 85% of the total. Salt is produced from sea water.

Italy's merchant marine ranks high. On Dec. 31, 1965, it had 632 ships over 1,000 gross tons totaling 5,395,000 gross tons.

Tourism is important, bringing a record \$1.5 billion in 1966. The U. S. takes 5.9% of Italy's exports.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$8,571,000	\$8,031,000
1967	\$9,696,000	\$8,702,000

History and Government. Divided and dismembered for centuries, modern Italy began to develop after the war of 1859 when Lombardy came under the crown of King Victor Emmanuel II of Sardinia of the house of Savoy. By plebiscite in 1860, Parma, Modena, Romagna and Tuscany joined, followed by Sicily and Naples, and by the Marches and Umbria. The first Italian Parliament declared Victor Emmanuel King of Italy Mar. 17, 1861. Mantua and Venetia were added in 1866 as an outcome of the Austro-Prussian war. The Papal States were taken by Italian troops, Sept. 20, 1870, with the withdrawal of the French garrison after Napoleon III surrendered Sept. 2, 1870. The states were annexed to the kingdom by plebiscite. The King entered Rome July 2, 1871. Italy recognized the State of Vatican City as independent Feb. 11, 1929.

Fascism appeared in Italy Mar. 23, 1919 when the original Fascisti organized an association against Communism and Socialism under the guidance of Benito Mussolini. They took over the government at the invitation of the King Oct. 28, 1922. Mussolini acquired dictatorial powers and was called Duce (Leader). He made war on Ethiopia and proclaimed Victor Emmanuel III emperor; defied the sanctions of the League of Nations; joined the Berlin-Tokyo axis; sent troops to fight for Franco against the Republic of Spain; joined Germany in World War II with defeat of France. After Fascism was overthrown in 1943, Italy declared war on Germany and Japan and

contributed to the Allied victory. It surrendered conquered lands and lost colonies. Part of Venezia Giulia went to Yugoslavia and Trieste was made a free territory. Mussolini was put to death by a firing squad of Partisans near the village of Dongo on Lake Como, Apr. 28, 1945.

King Victor Emmanuel III abdicated May 9, 1946; his son, Humbert II, was king until June 10, when Italy became a republic after a referendum, June 2-3, in which the people voted 12,718,641 for a republic, 10,718,502 for a monarchy. King Humbert departed and Premier Alcide de Gaspari became head of the government. Victor Emmanuel went to Egypt where he died Dec. 28, 1947.

The Constituent Assembly elected Enrico de Nicola provisional Head of State. He was succeeded by Luigi Einaudi, first President of the Republic, 1948-1955.

The Senate has one member for each 160,000 pop. (currently 315), elected for 5-year terms, excepting 5 whom the President may appoint for life. Ex-Presidents are eligible for life membership. The Chamber of Deputies has one deputy for each 80,000 (currently 630), elected for 5 years. Titles of nobility are no longer recognized. Reorganization of the Fascist party is forbidden.

In May 1968 elections, the dominant, church-supported Christian Democratic party increased its seats in the Chamber of Deputies from 260 to 266. The Communist party also increased its seats from 166 to 177. The United Socialist party, which normally joins the Christian Democrats in coalition governments, lost 3 of its 94 seats. Other losers were several right-wing parties.

Trieste, part of which is now claimed as an Italian Department bounded E and S by Yugoslavia, was organized as a Free Territory by the Big Four in the peace treaty with Italy, Feb. 10, 1947, placed under jurisdiction of the UN Security Council, garrisoned by troops of the United States and Great Britain in the northern section (Zone A), and by Yugoslavia in the south (Zone B). It had about 320 sq. mi. Following prolonged negotiations an agreement was signed Oct. 5, 1954, by Italy and Yugoslavia which gave Italy provisional administration over the northern section and the seaport of Trieste, with 90 sq. mi. and about 300,000 pop., and Yugoslavia the Istrian peninsula it had occupied, 200 sq. mi. and 73,500 pop., and provision for emergency access to the port. The two areas are treated as parts of Italy and Yugoslavia.

Italy is a member of NATO, EEC and Council of Europe; admitted to the UN Dec. 14, 1955.

Education and Religion. Roman Catholicism is the state religion.

Italy has 29 state universities, including Bologna (founded 1088); Genoa (1243); Naples (1224); Padua (1222); Pisa (1338); Rome (1303); and Turin (1404). Education is compulsory between 6 and 14.

Defense. The Allied nations have largely rescinded the restriction placed on Italy's military establishment by the World War II peace treaty.

The Army has built an efficient training organization and constituted modern units, a large proportion of which is committed to NATO. The army has 2 armored divisions, 5 infantry divisions, 5 Alpine brigades, 5 infantry brigades, 1 paratroop brigade, 1 legion special force, 1 cavalry brigade and 1 missile brigade.

The Italian Navy cooperates with defense plans of NATO and pursues a long-term program of construction including 3 heavy missile cruisers, 2 light missile cruisers, 4 large missile carrier destroyers, 18 modern anti-submarine frigates, 6 submarines and other vessels; much of this program was completed in 1967.

The Air Force has been extensively built up in recent years. New air fields have been built and existing ones adapted for use of jets. It also has air defense squadrons with missiles of the Nike type.

Ivory Coast

COTE D'IVOIRE

Capital: Abidjan. **Area:** 127,520 sq. mi. **Population** (UN est. 1967): 4,010,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

The Republic of the Ivory Coast, a former French Overseas Territory in West Africa, is located on the northern coast of the Gulf of Guinea. Roughly square in shape and about the size of New Mexico, it is bounded by Liberia, Guinea, Mali, Upper Volta and Ghana. It has 340 mi. of

coastline on the Atlantic. Abidjan, the capital, is the chief port.

In accordance with provisions of the 1958 French constitution, Ivory Coast became fully independent Aug. 7, 1960; it became a member of the UN Sept. 20. Its present constitution was adopted Oct. 31, 1960. It elected to remain outside the French Community proper, but signed a bilateral agreement Apr. 24, 1961, retaining close ties with France. Ivory Coast is a member of a regional alliance called the Council of the Entente formed May 29, 1959, other members of which are Dahomey, Niger, Togo and Upper Volta.

Agriculture, forestry, stock raising and fishing occupy 90% of the population. Chief export crops are coffee, cocoa, tropical woods and bananas; cotton, rice, oil palms also are raised. Electric power, lumbering and industrialization are being promoted.

The Ivory Coast has been the most prosperous of West African nations. Exports in 1967 were valued at \$325,000,000, compared to \$310,000,000 in 1966. With imports valued at \$258,000,000 in 1967 and slightly less in 1966, the nation had a favorable balance of trade.

About 18% of the people are Catholics or Protestants; 20% are Moslems and the rest animists.

Jamaica

Capital: Kingston. **Area:** 4,411 sq. mi. **Population** (UN est. 1967): 1,876,000. **Monetary unit:** Pound (.4167 per U. S. \$1).

Jamaica is a mountainous island in the Caribbean Sea, 90 mi. south of Cuba. Its area is 12% less than that of Connecticut.

Temperatures range from 80 to 86 on the coast and down to 40 in the Blue Mtns. Montego Bay and Ocho Rios are among popular resort areas; most of 345,000 annual tourists are American.

Jamaica was discovered by Columbus, 1494, and ruled by Spanish (under whom native Arawak Indians died out) until captured by the English, 1655. The island figures largely in the history of the buccaneers of the West Indies before and during the time of Sir Henry Morgan, once its governor. Port Royal, old haunt of the pirate, at the entrance to Kingston harbor, was largely destroyed by earthquake, 1692.

Jamaica became independent within the Commonwealth Aug. 6, 1962, and joined the UN. Prime Min. is Hugh Lawson Shearer; Gov. Gen., Sir Clifford Campbell, representing Queen Elizabeth II; legislature is bicameral.

Principal exports are bauxite (world's largest production) and alumina. A 175,000,000 plant to be built by 7 U. S. companies will double alumina production (792,000 long tons in 1966). Other products include sugar cane, coffee, bananas, rum, coconuts, ginger, cocoa, pimento, citrus fruits and cigars. Gross national product, 1966, was \$945,-840,000.

Imports in 1967 (in U. S. dollars) totaled \$347,-000,000, compared to \$321,000,000 in 1966. Exports in 1967 were valued at \$232,000,000; in 1966, \$229,-000,000.

Japan

NIPPON—LAND OF THE RISING SUN

Capital: Tokyo. **Area:** 142,726 sq. mi. **Population** (Govt. est. 1967): 100,000,000. **Monetary unit:** Yen (362 per U. S. \$1).

Japan consists of four main islands: Honshu ("mainland"), 88,952 sq. mi.; Hokkaido, 30,304; Kyushu, 16,191; and Shikoku, 7,240. Total area is about twice that of Missouri. The islands lie in the North Pacific separated from the Soviet Union and Korea by the Sea of Japan and from China by the East China Sea.

By the terms ending World War II, Japan was forced to surrender captured lands, including Manchuria (Manchukuo), the southern half of Sakhalin Is., the Kurils, Korea, Taiwan, and the mandated islands in the Pacific, the Marshalls, the Carolines and the Marianas. (See Index for these; also for Okinawa and the Ryukyu Islands.)

The Japanese coast is deeply indented, measuring 16,654 mi. The northern islands are a continuation of the Sakhalin mountain chain running through Hokkaido and the main island. The continuation of the Kunlun mountain range of China appears in the southern islands, the ranges meeting in the Japanese Alps. In the vast transverse fissure crossing the main island from the Sea of Japan to the Pacific rises a group of volcanoes, mostly extinct or dormant, with Fuji-

San (Fujiyama), 60 mi. SW of Tokyo, lifting its white cone 12,388 ft.

Most important ports are Yokohama, Kobe, Nagoya, and Osaka. Tokyo, the capital, is one of the three largest cities of the world. It has a modern business section centering about the Ginza, a major avenue. The Imperial Palace, surrounded by a moat on a 250-acre site and the white-marble Diet building, erected in 1936, are also in Tokyo. Its International Airport is Asia's busiest.

Tokyo Tower is a 1,089-ft. steel structure built for radio-TV broadcasting and sightseeing.

At Kamakura, 30 mi. SW of Tokyo is the Great Buddha or Daibutsu, a bronze figure 42 ft. 6 in. tall with base, cast in 1252. The Hakone hot spring area is noted for the reflection in Lake Hakone of Fuji-San. Also famous is the Toshogu Shrine at Nikko, where a national park of 347,000 acres preserves the natural beauty of Japanese flora. Kyoto, for 1,000 years a capital city, with massive temples and colorful shrines, is a cultural center.

The 2.34-mi. Kanmon undersea highway tunnel connecting Shimonoseki, Honshu, and Miji, Kyushu, is the world's first double-deck tunnel, with one level for vehicles and one for pedestrians. Other projects to link the islands are under study.

Resources and Industries. More than half the arable land is used for growing rice, the chief food. Wheat, barley, sweet and white potatoes, tobacco, tea, beans, peaches, pears, apples, grapes, persimmons and mandarins are also produced. Minerals include gold, silver, copper, lead, zinc, chromite, white arsenic, coal, sulphur, salt and petroleum.

The principal industries are iron and steel products, transportation equipment, machinery, electronics, shipbuilding, precision instruments, chemicals, fertilizers, textiles (cotton, wool, silks, synthetics), ceramics, wood products, fisheries.

Japan has become the world's 2nd largest auto producer; 285,000 were exported in 1967.

The index of industrial production (1963=100) zoomed to 162 by 1967.

Japan's shipyards lead the world, especially in construction of super tankers and bulk carriers of over 300,000 tons. The yards can deliver more than 2,380,000 gross tons annually. Japan's own merchant fleet included over 1,400 ships of 1,000 or more gross tons, totaling over 13,400,000 gross tons.

Electric power capacity is est. at 154 billion kwh and annual consumption at 114.5 billion kwh, about half from hydroelectric plants. An atomic power station at Tokai, near Tokyo, began commercial distribution of electricity July 27, 1966.

Major exports are steel and related products, clothing, chemicals, motor vehicles, optical goods, ships, radio receivers, toys.

Tourism is an increasingly important source of foreign exchange—in 1967 476,753 visitors spent about \$100,000,000. A World's Fair will be held 1970 in Osaka.

The U. S. is Japan's biggest customer, taking 26-30% of all its exports.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$ 9,524,000	\$ 9,777,000
1967	\$11,663,000	\$10,442,000

History and Government. According to Japanese legend, the empire was founded by Emperor Jimmu 660 B.C. Temporal power was exercised by successive families of Shoguns (military dictators), 1192-1867, until recovered by the Emperor Meiji in 1868. The Portuguese and Dutch had minor trade with Japan in the 16th and 17th Centuries. Commodore Matthew C. Perry, USN, opened it to U. S. trade in a treaty ratified 1854. Japan acquired a constitution in 1889. It fought China, 1894-95, gaining Formosa. In war with Russia, 1904-05, both nations lost heavily at Mukden; Russia's fleet was wiped out at Tsushima; Russia ceded S half of Sakhalin and gave concessions in China. Japan annexed Korea, 1910. In first World War Japan ousted Germany from Shantung, took over German Pacific islands as mandates from the League of Nations. Japan took Manchuria, 1931, started war with China 1932, taking Peiping and Shanghai and bombing Nanking, Canton, Tientsin. Japan, frustrated in efforts to have a free hand in the East, started a war against the U. S. by attack on Pearl Harbor, Dec. 7, 1941. Japan surrendered Aug. 14, 1945, and Gen. Douglas MacArthur headed occupation of Japan as Supreme Commander for the Allied Powers.

In a new constitution adopted May 3, 1947, the Japanese people renounced the right to wage

war; the Emperor was acknowledged as hereditary symbol of the nation, but gave up claims to divinity; the Diet became the sole law-making authority. The House of Councilors has 250 members elected for 6 yr. terms and the House of Representatives 486 members, elected for 4 yrs., both by popular vote. The constitution separates church and state. Japan has granted suffrage to women, lowered the voting age to 20.

The Emperor is Hirohito, the 124th of his line, born April 29, 1901, succeeded to the throne Dec. 25, 1926; married Jan. 26, 1924, to Princess Nagako Kuni. The Crown Prince is Akihito Tsugu no Miya, born Dec. 23, 1933; married, Apr. 10, 1959, Michiko Shoda. (Issue: Prince Naruhito Hironomiya, born Feb. 23, 1960.) Other children are Princess Shigeko, born Dec. 6, 1925, died July 23, 1961; Princess Kazuko, born Sept. 30, 1929; Princess Atsuko, born Mar. 7, 1931; Prince Masahito, born Nov. 26, 1935; Princess Takako, born Mar. 2, 1939.

Japan was elected 80th member of the UN Dec. 19, 1956. It is a member of UNESCO, World Court, Econ. Comm. for Asia and the Far East, Colombo Plan, International Monetary Fund and GATT.

The United States and 48 other non-Communist nations signed a peace treaty and the U. S. a bilateral defense agreement with Japan, in San Francisco, Sept. 8, 1951; ratified by the Senate, March 20; signed by President Truman, April 15, restoring Japan's sovereignty April 28, 1952. The Senate, in approving the treaty, Feb. 5, advised repudiation of the section of the Yalta agreement that gave to the USSR South Sakhalin, the Kuril Islands and Habomai and Shikotan Islands. Under the treaty, Japan was reduced territorially to the four main islands, but it was to have an opportunity eventually to regain the Ryukyus and Bonin Islands. Japan signed separate treaties with Nationalist China, April 27, 1952; India, June 9, 1952; a declaration with USSR ending a technical state of war, Oct. 19, 1956; in Dec. 1965 Japan and South Korea agreed to resume diplomatic relations.

On June 26, 1968, the U. S. returned to Japanese control the Bonin Islands, the Volcano Islands (including Iwo Jima) and Marcus Island. It was agreed the U. S. would continue using Loran navigational stations on Iwo Jima and Marcus.

The Diet, following elections to the House of Councilors July 7, 1968, and to the House of Representatives, Jan. 29, 1967, comprised:

	Representatives	Councillors
Liberal-Democrats	277	137
Socialists	140	65
Democratic Socialists	30	10
Communists	5	7
Komei Party	25	24
Independents	9	2

Eisaku Sato became Premier Nov. 9, 1964.

Education and Religion. The principal forms of religion are Buddhism, with 12 sects, and Shintoism with 13. There are more than 100,000 Shinto shrines, 106,634 Buddhist temples and several thousand Christian churches. Roman Catholics have an archbishop and 3 suffragan bishops.

Nine years of education is compulsory, consisting of six years of elementary and three years of lower secondary education. There were 317 colleges and universities, including the seven main national universities, and 369 junior colleges in 1965. English is the language of commerce and required study in the high schools.

Defense. Legislation effective July 1, 1954, established a new national army, navy and air force.

The Ground Self-Defense Force has an authorized strength of 171,500 uniformed personnel and 24,000 reserves. It is divided into 5 armies with 13 divisions. The GSDF has 276 aircraft including 136 helicopters.

The Maritime Self-Defense Force has one fleet, 5 regional districts, a training squadron and an air training command. It has 35,941 uniformed personnel; 214 vessels including destroyers, escorts, subs, torpedo vessels and minesweepers; 194 anti-sub patrol aircraft and 46 helicopters.

The Air Self-Defense Force has 40,703 uniformed personnel and 1,104 aircraft, two-thirds of which are jets, including Lockheed F-104J Super Starfighters; the remaining third are transports and helicopters.

A mutual assistance pact with the U. S. was signed Mar. 8, 1954. A revised mutual security treaty signed Jan. 19, 1960, and ratified by Japan June 19 was designed to develop close cooperation for defense within the framework of the two nations' respective constitutions.

Jordan

AL-MAMLAKAH AL URDINIYAH AL HASHIMIYAH HASHEMITE KINGDOM OF JORDAN

Capitals: Amman, Jerusalem. **Area:** 34,820 sq. mi. **Population** (UN est. 1967): 2,145,000. **Monetary unit:** Dinar (.3571 per U. S. \$1).

Jordan is a constitutional monarchy in southwest Asia, formerly under the Palestine Mandate. The country's former name, Transjordan, was dropped Apr. 26, 1949, in favor of the constitutional name, Hashemite Kingdom of Jordan. Hashemite is a family name and honors the loyalty of the original holder, disciple of Mohammed and the Guardian of Mecca.

Two areas comprise the country: Western Jordan, fairly fertile; and Eastern Jordan (Amirate), part fertile, part arid steppe. In the extreme south is its only port, Aqaba, on the Gulf of Aqaba. It shares the Dead Sea (1,296 ft. below sea level) with Israel. Jordan is slightly larger than Indiana.

In 1961 there were 630,725 registered Arab Palestinian refugees.

Resources and Industries. The country is largely desert, but the fertile western portion has a high agricultural potential. Principal crops are tomatoes, vegetables, wheat, barley, olives, grapes, citrus fruits and bananas.

Construction was started May 1966 on the Mokebha Dam on the Yarmuk River, a tributary of the Jordan, to provide electric power and irrigation for 18,000 acres.

Industries include tobacco, flour milling, distilling, building materials, olive oil, soap, mother-of-pearl, textiles, plastics, cement, steel, batteries, leather. Airlines include Royal Jordan (ALYA).

Potash from the Dead Sea and phosphate rock are the main minerals. Phosphate is 30% of value of exports.

History and Government. Jordan was part of the Ottoman Empire from the 16th Century until World War I. It was set up within the Palestine Mandate Sept. 1, 1922, and gained its independence in 1946. Abdullah Ibn Al Hussein, born 1882, was proclaimed King, May 25, 1946; he was assassinated by an Arab extremist July 20, 1951. His eldest son was proclaimed King Talal I, Sept. 5, 1951.

Parliament removed King Talal on medical advice, installing his son King Hussein I (born Nov. 14, 1935), May 11, 1952. His first marriage to Sherifa Deena (a daughter, Princess Alya, was born 1956) was dissolved 1958. He married (May 25, 1961) Antoinette Avril Gardiner, of England, entitled Princess Muna. They have two sons. Prince Abdullah, b. 1962. Prince Faisal, b. 1964, and twin daughters, Zein and Aisha, born 1968, but in 1965 King Hussein designated one of his younger brothers, Hassan, to be Crown Prince and heir to the throne.

Legislature comprises a Senate of 30 nominated by the King and a lower house of 60 elected by manhood suffrage. Wasfi El-Tall became Prime Minister Feb. 13, 1965. Jordan is a member of the UN and Arab League.

A decision of the UN to partition former Palestine resulted in guerrilla warfare between Arabs and Jews. After May 15, 1948, Jordan and other members of the Arab League joined in military operations against Israel. Under the truce agreement with Israel, Jordan controlled the old city of Jerusalem.

During 1958 pro-Nasser and Communist groups attempted to undermine Hussein's authority. After King Faisal was killed in the Iraq revolt July 14, King Hussein called on Great Britain for help and British paratroopers were landed, coincident with the landing of United States Marines in Lebanon.

In the 6-day Israeli-Arab war in June 1967 Israel took control of the old city of Jerusalem and Jordanian territory west of the Jordan River.

Arab guerrillas based in Jordan continued raids on Israel during late 1967 and 1968. In Feb. 1968 King Hussein condemned the guerrillas for using Jordan as a base. In March, Israeli Army units attacked a terrorist base in Jordan. This brought a UN Security Council condemnation of Israel and a statement from King Hussein indicating he would not seek to restrain the guerrillas. In April the King ousted two officials who had opposed use of Jordan by terrorist raiders.

The U. S. gave Patton tanks to Jordan in 1965; in Feb. 1968 the U. S. announced resumption of arms shipments to Jordan.

Education and Religion. The population is chiefly Arab, of whom the majority are Arab Moslems, 180,000 Arab Christians, and 10,000 Moslem Circassians. The language is Arabic. Public school education is growing, with English and Arabic taught. The Jordanian Univ. was established in 1962 and offers 4-yr. courses in arts and sciences.

Kenya

Capital: Nairobi. **Area:** 224,960 sq. mi. **Population** (UN est. 1967): 9,948,000. **Monetary unit,** E. African shilling (7.143 per U. S. \$1).

Kenya, former British Colony and Protectorate which became independent in 1963, extends from its Indian Ocean coast NE to Somalia, N to Ethiopia, W to Uganda, and S to Tanzania. It has twice the area of New Mexico.

The northern three-fifths is arid. Most economic production is centered in the south, a low coastal area and a plateau varying from 3,000 to 10,000 ft. The main products are coffee, tea, cereals, cotton, sisal, dairy products, hides and skins, bark extract, timber and minerals. Kenya is the largest producer of tea in Africa.

In 1953 Kenya became the scene of terroristic activities of the Mau Mau, an oath-bound unit of some of the Kikuyu, Meru, Embu and other tribes which killed Africans and whites during an 8-year rebellion. More than 60,000 Africans were jailed during the rebellion.

Kenya won independence as a dominion within the Commonwealth Dec. 12, 1963, and joined the UN Dec. 16. Jomo Kenyatta, once imprisoned as a Mau Mau leader, became its first Prime Minister. It became a republic within the Commonwealth Dec. 12, 1964, and Kenyatta became its first Pres.

Since independence, Kenya's economy has continued to grow, including both agricultural and manufacturing. Tourism has boomed. Schools and health centers have increased.

On Dec. 1, 1967, Kenya, Uganda and Tanzania set up a 3-nation bloc as a move toward a common market. In Jan. 1968 Kenya and Somalia resumed diplomatic relations as efforts were made to end 4 years of skirmishes caused by "invasions" of nomadic Somali herders seeking grass and water.

In 1968, thousands of Indians, losing their jobs to Africans, emigrated from Kenya to Great Britain.

Republic of Korea

DAEHAN-MINKUK

Capital: Seoul. **Area** (South Korea): 38,004 sq. mi. **Population** (UN est. 1967): 29,784,000. **Monetary unit:** Won (274 per U. S. \$1).

Korea, Land of the Morning Calm, occupies a mountainous peninsula in northeast Asia separating the Yellow Sea from the Sea of Japan. South Korea is about the size of Indiana.

Resources and Industries. Chiefly an agricultural country, South Korea has a cultivated area of about 5,095,655 acres. The main crops are rice, barley, wheat, tobacco and beans, but the mountainous terrain, poor soil and cold winters limit agricultural potential.

Division of Korea in 1945 left the South with only light industry and about 10% of the power generating capacity. Large infusions of foreign aid have since helped to build an industrial base especially in mining of tungsten (supplies 13% of world's needs), coal, iron ore, bismuth, fluor spar, graphite and cement. Gold, silver, copper, zinc and petroleum are also present. The fishing, timber, rubber, glass, shipbuilding, electronics and silk industries are expanding rapidly.

The former UN Korean Reconstruction Agency helped develop textiles, steel, straw pulp, rayon, wire, dyes, and automotive equipment.

U. S. support in South Korea has been military, financial, technical and educational. Since 1954 it has totaled more than \$2.2 billion. Index of industrial production (1963=100) was 181 for 1967.

Foreign trade in U. S. dollars:

	Imports	Exports
1966	\$716,000,000	\$250,000,000
1967	\$999,000,000	\$320,000,000

History and Government. Korea, formerly the Hermit Kingdom, has a recorded history since the 1st Century B.C. and was united in a kingdom under the Silla Dynasty, 668 A.D. It was at times

associated with the Chinese empire and the treaty that concluded the Sino-Japanese war of 1894-95 recognized Korea's complete independence. After Russia obtained a lease-hold on Port Arthur and developed its big port in Vladivostok, conflicting interests helped bring on the Russo-Japanese war of 1904-1905. Japan occupied Korea; Russia recognized Japan's paramount interest there. In 1910 Japan forcibly annexed Korea as Chosun (Chosen).

At the Cairo conference, Nov. 1943, it was agreed that Korea should be "free and independent." At the Potsdam conference, July, 1945, the 38th parallel was designated as the line dividing the Soviet and the American occupation. Russian troops entered Korea Aug. 10, 1945. U. S. troops entered Sept. 8, 1945. The Soviet military organized Socialists and Communists and blocked efforts to let the Koreans unite their country. Although the Soviet Union, at a foreign ministers' conference in Moscow, Dec., 1945, agreed to a joint trusteeship for Korea, it thwarted efforts to put this into effect. A commission appointed by the UN to supervise elections in Korea in 1948 was denied admission to North Korea. (See *Index for Korean War*.)

The South Koreans formed the Republic of Korea in May, 1948, with Seoul as the capital. Dr. Syngman Rhee was chosen President July 20 and the republic was formally proclaimed Aug. 15, 1948. By June 29, 1949, the U. S. had withdrawn its troops, leaving behind a Korean constabulary. President Rhee was reelected to a third term May 15, 1956 and reelected for a fourth term, Mar. 15, 1960, when 85 years old. A national movement spearheaded by college students forced his resignation, Apr. 19, amid charges of corruption in his government and fraudulent elections. Huh Chung, Foreign Minister, became Acting Premier, Dr. Rhee died July 19, 1965, in exile in Hawaii.

A constitutional amendment passed June 15, 1960, replaced an autocratic presidential system with a cabinet system modeled on that of Britain. In stormy elections, July 29, 1960, the former regime's opposition, Dr. John M. Chang's Democratic party, won control of the National Assembly and House of Councillors.

Unrest stemming from failure of Premier Chang's government to oust corruption and stabilize the economy led to an army coup which seized control May 16, 1961. Premier Chang resigned. Gen. Chung Hee Park became chairman of the ruling junta and later acting President. He was formally elected President Oct. 15, 1963 and re-elected May 1967. A 175-seat National Assembly was elected June 4, 1967 and the fourth republic was inaugurated July 1, 1967.

In 1968, North Korean troops repeatedly staged raids into South Korea, attacking both U. S. and South Korean troops.

South Korea has sent about 50,000 troops to fight alongside the U. S. in South Vietnam.

Education and Religion. Christianity, Confucianism, Buddhism and Chondogyo are the principal religions. Christian missionaries established seminaries and institutions of higher learning.

Primary education is compulsory. Many new schools have been built since 1945. In 1965 there were 5,125 primary schools, 1,208 junior high schools, 701 high schools, 131 universities and colleges including 61 junior colleges.

Korea's 24-letter alphabet, a hybrid comprised of ancient Chinese with Tibetan consonants of Sanskrit derivation, is a practical phonetic system.

Defense. The South Korea Army numbers about 600,000, and it has a small Navy and Air Force. The U. S. Eighth Army has two combat divisions in Korea with 11,500 men in each. Its commander also is commander of the UN forces there.

North Korea

PEOPLE'S DEMOCRATIC REPUBLIC OF KOREA
CHOSON MINCHU-CHUI INMIN
KONGHWA-GUK

Capital: Pyongyang. **Area:** 46,540 sq. mi. **Population** (UN est. 1967): 12,700,000. **Monetary unit:** Won (1.2 per U. S. \$1).

The People's Democratic Republic of Korea was formed May 1, 1948. The U. S. did not recognize it.

North Korea has good mineral resources that are fairly well developed. The country ranks among the first 5 in the world in the output of tungsten, graphite and magnesite. Other products of significance include lead, zinc, pyrite, cement, iron ore, copper, gold, phosphate, salt and fluor spar. A well developed hydroelectric system and sizeable

reserves of coal provide power needs for industry. Mineral output was valued at \$440,000,000 in 1964.

North Korea is slightly larger than N. Y. State. The import and export trade is largely with Communist countries, particularly China and Russia.

The USSR signed a 10-year military aid treaty with North Korea July 6, 1961, pledging defense protection and financial help. A similar treaty was signed with Communist China. (See *Index for Korean War*.)

Soviet prestige declined in the early 1960s as North Korea sided with the Chinese in the Sino-Soviet dispute. In 1966 Pyongyang showed signs of trying to disengage from the dispute and maintain a more independent stand.

In March, 1967, North Korea and the Soviet Union signed a new defense agreement which was viewed as a further move to isolate the Chinese Communists.

North Korean patrol boats seized the U. S. Navy intelligence ship Pueblo on Jan. 23, 1968, charged it had entered North Korean territorial waters and held its crew captive. (See *Pueblo in Index*.)

Kuwait

AL-KUWAIT

Capital: Kuwait City. **Area:** 6,178 sq. mi. **Population** (1965 Census): 467,789. **Monetary unit:** Kuwaiti Dinar (.3571 per U. S. \$1).

Kuwait, a small Arab state formerly under British protection, became fully independent June 19, 1961. It extends along the northwest coast of the Persian (also called Arabian) Gulf; bordered by Iraq, Saudi Arabia and a Kuwaiti-Saudi neutral zone. Kuwait City is a principal Gulf port. In area it is slightly larger than Connecticut.

Resources and Industries. Petroleum, discovered in 1938 and first exported in 1946, is Kuwait's economic mainstay and the nation now is the world's 2nd largest exporter and 5th largest producer of crude oil. Reserves are estimated at more than 70 billion bbls., one-fourth of the free world's total. Crude oil production in 1967 was 824,000,000 bbls. Annual payments to the Kuwait government in royalties and taxes exceed \$560,000,000, some 98% of its income. Per capita income is estimated at over \$3,000, probably the world's highest.

Revenues from oil from the Kuwaiti-Saudi neutral zone are split 50-50 with Saudi Arabia.

History and Government. Kuwait traditionally is governed by members of the Al-Sabah dynasty founded in 1756. Under a treaty of 1899 Great Britain administered its foreign relations and guaranteed its territorial integrity until it became fully independent June 19, 1961, by mutual agreement. It joined the Arab League 1961, the UN 1963. The nation's first constitution was proclaimed in January, 1963, and the first general elections for a 50-member National Assembly were held.

The Emir Sabah Al-Salim Al-Sabah became ruler Nov. 27, 1965, after the death of his older brother, the Emir Abdulla Al-Salim Al-Sabah. Jaber Al-Ahmed became the new prime minister and crown prince.

Education and Religion. The government has utilized its enormous national income from petroleum to create a welfare state that guarantees free medical care, education and social security for all. A 200,000,000 dinar fund aids other Arab nations. There are no taxes except customs duties. Educational facilities are being rapidly expanded. There were, in 1966, 176 schools of all types, with 91,788 students and 5,936 teachers. The University of Kuwait was opened in Oct. 1966. Islam is the official religion, about three-fourths Sunni, the remainder Shia.

Defense: Kuwait's Army numbers approx. 2,400.

Laos

Capitals: Vientiane, Luang Prabang. **Area:** 91,429 sq. mi. **Population** (UN est. 1967): 2,770,000. **Monetary unit:** Kip (240 per U. S. \$1).

Laos is a constitutional monarchy of Thai origin in southeast Asia, one of the three former French Indo-Chinese states. It is bounded by Communist China, North and South Vietnam, Cambodia, Thailand and Burma. It is landlocked, smaller than Oregon, largely rugged jungle and mountains, with no railroads and only 3,540 mi. of roads.

Laos became a French protectorate in 1893 and a member of the Indo-Chinese Union in 1899. As in

Vietnam and Cambodia, nationalism aims grew in the 1940s, and the King promulgated a constitution May 11, 1947, providing for a constitutional monarchy under the Luang Prabang dynasty, and a parliamentary government.

Laos became an independent sovereign state by a treaty with France, July 19, 1949. The regime was recognized by the Communist forces in Indo-China in the cease-fire agreements with France, signed in Geneva, July 21, 1954, and by the U. S. and most members of the UN. It joined UN December, 1955.

The King is Sri Savang Vatthana, acceded Oct. 30, 1959, on the death of his father, King Sisavang Vong.

The National Assembly, elected for 5 years, may be dissolved by the King.

Conflicts among neutralist, Communist and anti-Communist factions created a chaotic political situation despite 1954 agreements. Although Laos was intended to be neutral, rivalry between the Communist Pathet Lao movement in the northern third of the country, led by Prince Souphanouvong, and right-wing and neutralist factions prevented integration of the Pathet Lao into the royalist army and government. Armed conflict has increased since 1960 with the arrival of Soviet arms and North Vietnamese technicians and troops. Western and neutral big power proposals have been rebuffed by the Communist bloc which threatened direct intervention.

The 3 Princes heading the 3 factions formed a coalition government in June 1962, with neutralist Prince Souvanna Phouma as Premier. The 14-nation conference that had begun in Geneva May 15, 1961, signed agreements July 23, 1962, guaranteeing neutrality and independence of Laos.

Cease-fire orders were issued several times between May, 1961, and mid-1963, but fighting between the Pathet Lao and neutralist forces intensified during 1963-66.

Early in 1965 there was an unsuccessful rightist coup. Both Laos and U. S. planes bombed Pathet Lao positions along the Ho Chi Minh trail, supply line from North Vietnam to Communist forces in north Laos and South Vietnam, with increasing frequency, 1965-67. A branch of the trail, crossing Laos from Cambodia and called the Sihandur Trail, was also under attack.

Chief products are tin, rice, maize, tobacco, cotton, opium, citrus fruits, benzoin, shellac, teakwood and coffee. The population comprises peoples of Thai-Indonesian and Chinese origin, mostly Buddhist. French and English are the most important languages. Buddhism is the state religion.

LATVIA

See Index for Latvian SSR

Lebanon

AL-JUMHOURIYA AL-LUBNANIYA

Capital: Beirut. Area: 4,015 sq. mi. Population (UN est. 1967): 2,520,000. Monetary unit: Lebanese pound (3.16 per U. S. \$1).

The Republic of Lebanon, in southwest Asia, occupies a strip along the Mediterranean coast about 120 mi. long and 30 to 35 mi. wide, extending from the Israeli frontier on the S to Syria on the E and N. It is smaller than Connecticut. There is a narrow coastal strip and two main mountain ranges running N and S with fertile land between. Beirut, with one-third of the country's population, is the chief seaport and has a jet airport.

Resources and Industries. Trade provides two-thirds of national income, agriculture 15%, industry 12%. Agriculture employs half the workers; chief crops are apples, citrus fruit, olives, tobacco, vegetables, cereals. Manufacturing is growing rapidly; important are food products, textiles, leather goods, cement, oil refining. Tripoli and Sidon are terminals of oil pipelines from Iraq and Saudi Arabia. Large hydroelectric and irrigation projects are being developed.

Lebanon has a free enterprise economy and banking secrecy laws. Fugitive capital from Arab Socialist states has poured into the country. Tourism is also a source of wealth. In 1966 many government officials were replaced in an "efficiency shakeup" aimed at spurring the nation's 5-year development program.

Principal exports are apples, citrus fruits, cereals, textiles, cement.

History and Government. Lebanon was formed from the five former Turkish Empire Sanjaks (districts) of North Lebanon, Mount Lebanon, South Lebanon, Beirut and Bekaa, and became, with

Syria, an independent state Sept. 1, 1920, administered under French Mandate 1920-1941. In 1944 France yielded its powers to the Syrian and Lebanese governments. Foreign troops were withdrawn in 1946.

Attempts by several factions to undermine the pro-western administration of Lebanon led to open revolt in May, 1958. Lebanon became the center of international controversy when the United States sent Marines in reply to President Chamoun's call for help and Great Britain supported the American position. The revolt dwindled and American forces were withdrawn in Oct., 1958.

The republic's constitution instituted a democratic parliamentary regime. There is a unicameral legislature (Chamber of Deputies) of 99, elected every four years.

The President normally is elected for a six-year term. The President must be a Christian, the Premier a Moslem. Lebanon is a member of the UN and Arab League.

Education and Religion. Christians number about half the population, Moslems of various sects most of the remainder. There are 8 universities and institutions of higher learning in Beirut: American, French, Lebanese, and the private Academy of Arts. Arabic is the official language.

Lesotho

(FORMER BRITISH BASUTOLAND)

Capital: Maseru. Area: 11,716 sq. mi. Population (UN est. 1967): 885,000. Monetary unit: South African Rand (.7143 per U. S. \$1).

The former British dependency, Basutoland, became independent as Lesotho Oct. 4, 1966. An African state without white settlers or landowners, it is about the size of Maryland and completely surrounded by the Republic of South Africa. It was admitted to the UN Oct. 17, 1966.

The land is arid and mountainous, altitudes ranging from 5,000 to 11,000 ft. One railroad connects the capital with South Africa; virtually no paved roads exist. Heavy erosion has hindered agriculture although maize, sorghum, barley, beans and peas are grown. The main industry is livestock raising which produces wool and mohair, the chief exports. The country suffered a severe drought in the early 1960s. About 40% of the men work in South Africa, many in the mines, earning about \$2,800,000 a year.

In 1868, Lesotho became a British protectorate upon the request of Moshesh, the Paramount Chieftain, who sought protection against the Boers of South Africa. The British granted a constitution for the area in 1959 providing for a universally elected Legislative Council. The government is headed by a King. There is also a Parliament of 60 elected members, a Cabinet and a Prime Minister.

Liberia

Capital: Monrovia. Area: 43,000 sq. mi. Population (UN est. 1967): 1,110,000. Monetary unit: U. S. dollar; also Liberian silver and copper coinage.

The independent Republic of Liberia lies on the southern side of the west African bulge adjacent to Sierra Leone, Guinea and the Ivory Coast and has an Atlantic coastline of about 350 mi. Much of the country is forest with valuable timber and mineral resources. It is slightly larger than Ohio.

Liberia has no natural harbors. The Free Port of Monrovia, built 1945-48 with U. S. funds, was turned over to the Liberian Government in 1964, with payments to be concluded by 1999. The country is served by several international airlines.

Resources and Industries. Iron ore and rubber are the main products; ore production boomed 1964-66.

Lower prices for exported iron ore and rubber, plus increasingly high payments on debts incurred during boom years, depressed the economy in 1967-68; an austerity program was launched.

With U. S. aid and investment by U. S., Sweden, Canada, West Germany, iron and rubber production increased in 1966. Monrovia got the country's first telephone system in 1965. A U. S. loan financed the 30,000-kw Mt. Coffee hydroelectric plant, completed in 1966.

Diamonds and gold are also mined; other products are fibers, palm kernels, rice, cassava, coffee, cocoa and sugar. U. S. aid is promoting schools, hospitals, and food production.

History and Government. The population is entirely of African descent. Liberia was founded in 1822 when a settlement was made at Monrovia by Negro freedmen from the U. S. with the assistance of American colonization societies. It was declared a republic July 26, 1847. Its constitution is modeled on that of the U. S. Only persons of African descent may acquire citizenship and only citizens may own real estate.

There is a President elected for one 8-year term (thereafter for 4-year terms); a Senate of 10 elected for 6 years and a House of Representatives of 39, elected for 4 years. The President is William V. S. Tubman, elected for 8 years, May 4, 1943, reelected to 4-year terms, May 1951, 1955, 1959, 1963. Liberia is a charter member of UN.

Education and Religion. Christianity predominates. There are nearly 4,000 schools, one university and two colleges. English is the official language.

Defense. All citizens between the ages of 16 and 45 are liable for service.

Libya

AL MAMLAKA AL LIBIYYA

Capital: Tripoli and Benghazi. **Area:** 679,358 sq. mi. **Population (UN est. 1967):** 1,738,000. **Monetary unit:** Libyan pound, 100 piastres (.3571 per U. S. \$1).

Libya, first country to receive independence fully under United Nations auspices, is a constitutional monarchy comprising 10 provinces in the former states of Tripolitania, Cyrenaica and Fezzan. Larger than Alaska, it is on the north African coast, bounded by the Mediterranean, UAR, Sudan, Chad, Niger, Algeria and Tunisia.

Resources and Industries. Discovery of major oil fields in the northern part of the country beginning in 1957 brought prosperity and an improved standard of living to the country.

Government revenues from taxes on oil companies were increased in 1967. It was estimated that in 1968 the country would be exporting 2,500,000 bbl. a day.

During 1964-66, several hundred schools were built, boosting enrollment from 40,000 to over 250,000. Homes, hospitals, roads and power stations were constructed. Per capita income rose from \$40 in 1951 to \$425 in 1965. Education and health services are provided free.

Libya is basically agricultural, producing dates, olives, lemons, almonds, figs, grapes and tobacco. Carpets, leather goods and embroidered fabrics are also produced.

The Government planned in 1966 to construct 100,000 homes in the next 5 years.

History and Government. Libya's strategic position has caused it to come under the domination successively of Carthage, Rome, the Vandals, the Ottoman Empire and Italy. After World War II Tripoli and Cyrenaica were placed under British administration, the Fezzan under French.

Emir Mohammed Idris El Senussi (born 1890), spiritual and temporal ruler of the Senussi tribesmen, was recognized by Great Britain as Emir of Cyrenaica, June, 1949. He promulgated a constitution and set up an interim government over internal affairs, Sept. 18, 1949. Libya, as a sovereign state, was approved by the UN, 1949, effective Jan. 2, 1952. A pre-independence constituent assembly chose the constitutional monarchy form of government and named the Emir as King of Libya, Dec. 3, 1950. A hereditary monarchy was proclaimed by King Idris I in Benghazi, Dec. 24, 1951.

Parliament consists of a senate of 42 members with 8-year terms, appointed by the King; and a House of 91, elected for 4-year terms.

Libya is a UN and Arab League member.

Education and Religion. Libya's population is mostly Arab Moslems; minority groups include Italians, Jews and others. About 40% are illiterate. There are public elementary and secondary schools, and private Koranic, Greek, Italian and Jewish schools. There are two universities.

Defense. Status quo agreements with Britain and the United States allow each to maintain military forces in Libya, including a large U. S. Air Force base at Wheelus, near Tripoli, but both plan to withdraw. In 1968 Libya launched an extensive renovation of its defense forces.

Liechtenstein

FURSTENTUM LIECHTENSTEIN

Capital: Vaduz. **Area:** 62 sq. mi. **Population (Govt. est. 1966):** 19,917. **Monetary unit:** Swiss franc (4.296 per U. S. \$1).

Liechtenstein is a principality on the Upper Rhine between Austria and Switzerland. It is slightly smaller than the District of Columbia. It received nominal independence in 1866 when the German Confederation dissolved but became practically a dependency of Austria until the Diet declared its complete independence, Nov. 7, 1918. By treaty with Switzerland (1920-23) that country administers its posts and telegraphs, customs and foreign interests. There is no army, only a police force of 26 with 24 auxiliaries.

Resources and Industries. The country is highly industrialized. Chief industries are machines and tools, cotton spinning and weaving, false teeth, ceramics and canned food. Finely engraved postage stamps are sold to philatelists around the world. Forty factories exported \$35,000,000 in goods in 1965. Thousands of foreign workers are employed in Liechtenstein and constitute about 30% of the resident population.

History and Government. Liechtenstein is an hereditary monarchy. Under the constitution, granted in 1921, legislative powers rest in a Diet of 15 members, elected for four years by direct vote, on a basis of male suffrage and proportional representation. The reigning prince is Franz Joseph II. He succeeded his uncle, Prince Franz I, on the latter's abdication March 30, 1938. The Head of Government is Gerald Batliner. Taxes are very low and consequently many international corporations have made their headquarters there.

It is a member of EFTA and the International Court of Justice.

Education and Religion. The country is predominantly Catholic. German is the language.

LITHUANIA

See Index for Lithuanian SSR

Luxembourg

GRAND-DUCHE DE LUXEMBOURG

Capital: Luxembourg. **Area:** 999 sq. mi. **Population (UN est. 1967):** 335,000. **Monetary unit:** Luxembourg franc (49.82 per U. S. \$1).

Luxembourg is a European Grand Duchy, bounded by Germany, Belgium and France. It measures only 55 mi. long by 34 mi. wide, smaller than R. I.

Resources and Industries. About 9,500 farmers cultivate 336,000 acres. The principal crops are oats, wheat, rye, barley and potatoes.

Luxembourg's iron ore deposits, in the south, are the basis for an important steel industry, using imported coke. It employs more than half the labor force, and accounts for 70% of total industrial production, 90% of value of exports. The country also produces chemicals, beer, tires, tobacco and metal products, cement, roses and dairy products.

History and Government. Luxembourg, founded about 963, passed under the domination of Burgundy, Spain, Austria and France from 1443 to 1815; regained autonomy under the Treaty of Vienna, 1815. It left the Germanic Confederation in 1866, its integrity and neutrality guaranteed by the Treaty of London, May 1, 1867. Overrun by Germany in two World Wars, Luxembourg abolished its unarmored neutrality in 1948. Customs union with Netherlands and Belgium was adopted Jan. 1, 1948, expanded to the Benelux Economic Union, Feb. 3, 1958. Luxembourg is a member of the UN, NATO, OECD, Council of Europe, European Coal & Steel Community, Western European Union, and in 1957 signed agreements establishing Euratom and European Common Market.

As a Grand Duchy, Luxembourg is a constitutional monarchy, governed under the Constitution of 1868, with modifications. Legislative power rests with a Council of State of 21, chosen for life, and a Chamber of Deputies, 56 in number, elected by universal suffrage with executive power delegated to a Minister of State and a Cabinet of at least 10 Ministers. The country is headed by Grand Duke Jean (b. Jan. 5, 1921) who became Chief of State Nov. 12, 1964, when his mother, Grand Duchess Charlotte, abdicated in his favor after a 45-year reign. On April 9, 1953, he married Princess Josephine-Charlotte of Belgium. They have 3 sons and 2 daughters; Prince Henri (b. April 16, 1955) is hereditary Grand Duke.

The population is almost entirely Roman Catholic. Education is compulsory. Official languages are French and German; national language is Letzeburgesch.

Malagasy Republic

REPOBLIKA MALAGASY

MADAGASCAR

Capital: Tananarive. Area: 228,000 sq. mi. Population (Govt. est. 1967): 6,350,000. Monetary unit: Malagasy franc (246.85 per U. S. \$1).

Formerly the French Overseas Territory of Madagascar, the Malagasy Republic is a large island off the SE coast of Africa, from which it is separated by the 240-mi. wide Mozambique Channel. It is about 980 mi. long and 360 mi. wide at its greatest breadth. It is a little smaller than Texas. There is a humid coastal strip on the E, fertile valleys in the mountainous center plateau region, and a wider coastal strip on the W.

The nation is officially called either Madagascar or the Malagasy Republic.

The population consists of many ethnic groups from succeeding waves of immigration, including peoples of SE Asian, Arab and African descent. They speak a language of Malayan origin. About 3,000,000 are animists; 2,000,000 are Christians, about equally divided between Catholics and Protestants.

Madagascar came under a French protectorate, 1885, and was declared a French colony in 1896. It proclaimed itself an autonomous republic Oct. 14, 1958, and was granted full sovereignty effective June 26, 1960. It is a member of the UN and French Community.

About 90% of the population is engaged in agriculture; the chief crops being vanilla (it produces half the world's supply), rice, manioc, beans, maize, sweet potatoes, corn, coffee, cloves, tobacco, sugar cane and cocoa.

The forests are rich in cabinet wood and tanning bark, raffia, resins, gums and beeswax. Water power is abundant. Minerals found include graphite, mica, precious and industrial stones, coal, nickel ore, phosphate, gold, bauxite, uranium and thorium. There are 10,000 head of cattle, most of them the humped Zebu type.

In 1966, the U. S. loaned Madagascar \$2,700,000 for the improvement of railroad service. In 1966-67 the government's "belly policy" improved agricultural production and thereby cut imports of rice.

Malawi

(FORMER NYASALAND)

Capital: Zomba. Area: 36,100 sq. mi. Population (UN est. 1967): 4,130,000. Monetary unit: Malawi pound (.4167 per U. S. \$1).

Malawi stretches more than 500 mi. north and south along the western and southern shores of Lake Nyasa (Lake Malawi) in southwest Africa. High mountains, dense forests and broad plains make it a scenic though landlocked country. It is about the size of N. Y. State.

Visited by Dr. David Livingstone in 1859, it became a British Protectorate in 1891. From 1953 to 1963 it was a member of the Federation of Rhodesia and Nyasaland. On Feb. 1, 1963, it became internally self-governing and, on July 6, 1964, achieved full independence from Britain. It became a republic within the Commonwealth July 6, 1966. It is a member of the UN. The President is Dr. H. Kamuzu Banda.

Malawi is almost entirely an agricultural country with only a few light industries. Four crops—tea, tobacco, peanuts and cotton—account for 90% of the exports. Other important products are sugar, rubber, soybeans and coffee. Farming improvements are being pressed in hopes of building exports. Illiteracy is high, but a program for universal primary education is underway; colleges are planned and the U. S. has promised \$1,000,000 to help build a technical college.

In 1967-68, factories were built for textiles, shoes, sugar, farm implements, and other products formerly imported. The Republic of South Africa, in May 1968, provided loans to build a rail line into Mozambique and to help construct a new capital for Malawi at Lilongwe.

Population is mostly African; there are about 12,000 Indians and 8,000 of European descent.

Malaysia

FEDERATION OF MALAYSIA

Capital: Kuala Lumpur, Selangor. Area: 128,430 sq. mi. Population (UN est. 1967): 10,071,000. Monetary unit: Malayan dollar (3.67 per U. S. \$1).

Occupying the southern part of the Malay Pen-

insula in SE Asia and the northern part of the island of Borneo, the Federation of Malaysia is the world's largest producer of rubber and tin. Total area is larger than Arizona.

The Federation was formed Sept. 16, 1963. It included the old Federation of Malaya (11 Malayan states which had become an independent constitutional monarchy and member of the Commonwealth Aug. 31, 1957), plus the formerly-British Singapore (an island and city off the southern tip of the Malay Peninsula), Sabah (former British North Borneo) and Sarawak (former British colony in NW Borneo). The British-protected Sultanate of Brunei in north Borneo did not join.

Indonesia harassed the new nation with guerrilla action 1963-65. After Indonesian Pres. Sukarno lost power, 1965-66, Malaysia and Indonesia agreed Aug. 11, 1966, to restore normal relations; full relations were restored Aug. 31, 1967.

On Aug. 9, 1965, the separation of Singapore from the Federation was announced under an agreement by Malaysia and Singapore officials that this was the best way to end tensions between the ethnic Chinese, largest group in Singapore and in the Federation as a whole, and the Malays, 2nd largest group, who were in control of the Federation government. (See *Index for Singapore*.)

Malaysia's population, before Singapore's separation, was composed of: Malays and closely related groups, 40%; Chinese, 42%; Indians and Pakistanis 10%; others, 8%. With Singapore's departure, the Malays became the numerical majority in Malaysia, with ethnic Chinese totaling over a third of the population.

The 11 Malay states and their capitals are: Johore (Johore Bahru), Kedah (Alor Star), Kelantan (Kota Bharu), Malacca (Malacca), Negri Sembilan (Seremban), Pahang (Kuantan), Penang (George Town), Perak (Ipoh), Perlis (Kangar), Selangor (Kuala Lumpur), Trengganu (Kuala Trengganu). Largest in area is Pahang, 13,820 sq. mi.; largest in population is Perak, 1,488,754 (1963).

With the exception of Malacca, Penang, Sabah and Sarawak, each of the states has a hereditary ruler; the above exceptions have governors, as did Singapore. Each state has its own flag, constitution and legislative assembly.

In 1966 the Government announced that Sabah and Sarawak would be known as East Malaysia and the 11 states as West Malaysia.

The monarch, known as the Yang di-Pertuan Agong (Paramount Ruler, ceremonial chief of state who has no political power) is elected by a council of hereditary rulers of the Malayan states.

Resources and Industries. Rubber, tin, iron ore, palm oil and copra are the main products. Rubber, much of it produced by new high-yield trees, accounts for 41% of exports; tin, of which Malaysia produces 33% of the world output, amounts to 13% of her exports.

Other agricultural products are rice, coconuts, tapioca, sugar, pepper, camphor. Rubber trees were originally introduced from Brazil. Small-scale industry includes rubber goods, pottery, cement, pewterware, furniture, bricks, tiles, soap.

A \$17,300,000 jet airport was opened at Kuala Lumpur in Aug. 1965.

Religion and Language. The Malays and some others are Moslems; other religions are Buddhist, Christian and Hindu. Malay is the national language; Malay and English are official languages.

Defense: Malaysia expanded its small Army, Navy and Air Force in 1963 in anticipation of the formation of the Federation of Malaysia and Britain agreed to extend its defense and mutual assistance treaty with the new nation. Malaysia also receives military aid from Australia. In 1966, after the peace agreement with Indonesia, it was announced British troops would leave Sabah and Sarawak.

SABAH

(Former British North Borneo)

Sabah, formerly North Borneo, occupies the northern part of Borneo, third largest island in the world, 400 mi. east of Malaya in the Pacific Ocean. It has an area of 29,388 sq. mi. and a population (1963) of 498,031, including 80,000 Chinese and a few Europeans. Included is the island of Labuan, area 35 sq. mi., which was united with North Borneo, July 15, 1946. Exports are mainly rubber, copra, timber, tobacco, firewood, cutch, fish and hemp. Capital: Jesselton. The Philippines also claims title to Sabah.

SARAWAK

Sarawak lies along the northwest coast of Borneo, between the mountains and the China

Sea. Its coast line is 450 mi. long and its area 48,250 sq. mi. Its population (1963) was 809,737. The capital is Kuching. The chief exports are sago, pepper, gold, plantation rubber. It refines petroleum from the Seria field in Brunei. Sarawak was freed from the Sultanate of Brunei in 1840 by James Brooke, an Englishman who was named Rajah in 1841. In 1946, after Japanese occupation, the 3rd Rajah ceded the country to Britain.

Maldive Islands

Capital: Malé. Area: 112 sq. mi. Population (1967 Census): 103,801. Monetary unit: Rupee (5.952 per U. S. \$1).

The Maldive Islands are a group of 19 atolls containing 1,087 islands, 210 of which are inhabited. Totalling about twice the area of the District of Columbia, they are in the Indian Ocean 300 mi. SW of the southern tip of India. The country obtained full independence from Great Britain on July 26, 1965, in an agreement under which Britain retained its RAF base on Gan Is. in Addu Atoll in the southern Maldives. The Maldives became a member of the UN Sept. 21, 1965.

The islands had been a British-protected state since 1887. The country became a republic in 1953 but returned to the status of a Sultanate by decision of its Assembly, Feb. 22, 1954. The Assembly elected Al Amir Mohammed Farid Didi as Sultan; Ibrahim Nasir is Prime Minister. Until the 1965 agreement, Britain was responsible for the islands' defense and foreign relations.

The people are Moslems and seafarers. Coconuts, fruit and millet are grown; the chief occupation is fishing. Production of processed fish, to be marketed in Ceylon, is the main industry. Also exported is coir, a coconut fiber.

Mali

REPUBLIC OF MALI

Capital: Bamako. Area: 464,000 sq. mi. Population (UN est. 1967): 4,745,000. Monetary unit: Franc (246.85 per U. S. \$1).

The Republic of Mali, formerly the Sudanese Republic (1959-60) and a one-time French Overseas Territory in West Africa, is a landlocked nation which is larger than Texas but smaller than Alaska.

Mali is mostly a vast plain in the upper basins of the Senegal and Niger Rivers, extending N into the Sahara.

From the 11th to 15th Centuries the area was part of the great Mali Empire which stretched from the western Sudan to the Atlantic; Timbuktu was a renowned center of Islamic learning.

Under provisions of the 1958 French constitution French Sudan became the Sudanese Republic, an autonomous republic within the French Community and formed with neighboring Senegal Jan. 17, 1959, the Mali Federation. Complete independence was proclaimed June 20, 1960. Senegal withdrew from the federation Aug. 20, 1960, and Sudan took the name of Republic of Mali Sept. 22. It became a UN member Sept. 28, 1960. Mali remained outside the French Community, but signed economic and cultural agreements with France. It joined Ghana and Guinea Apr. 29, 1961, in a Union of African States which did not become effective. On June 8, 1963, Mali and Senegal ended their differences with customs, trade and railway traffic agreements, and use of Senegalese harbors by Mali.

In 1968 Mali joined 8 other nations in forming the West African Regional Group, aimed at promoting joint economic benefits.

The President and ministers are responsible to the National Assembly, members of which are elected to five-year terms.

The country is mainly agricultural and pastoral. Millet, rice and peanuts are the chief crops. Cotton, rubber and river fishing are also important. Livestock raising is a major prop of the economy. Trade is primarily with neighboring countries.

Malta

Capital: Valletta. Area: 122 sq. mi. Population (1967 Census): 319,000. Monetary unit: Pound (4.167 per U. S. \$1).

Malta lies in the Mediterranean 58 mi. S of Sicily and 180 mi. from Africa. The island of Malta itself is 95 sq. mi.; the other two islands in the group are Gozo, 28 sq. mi., and Comino, one sq. mi. Total is twice the size of the District of Columbia.

For 35 centuries Malta was under successive rule

by Phoenicians, Carthaginians, Romans, Arabs, Normans, the Knights of Malta, France and Britain (which annexed Malta in 1814). It achieved limited self-government in 1887; home rule on Oct. 24, 1961. On Sept. 21, 1964, it became independent, with the British monarch as head of state, represented by a governor general, and agreed to permit British forces to maintain a base for 10 years. It is a member of the Commonwealth, Council of Europe and UN. A House of Representatives with 50 members is elected by universal suffrage; the Prime Minister and Cabinet are chosen from members of the House.

Once a vital British stronghold, it withstood Axis air attacks for 3 years during World War II, but is now used only as a supply base for the British Navy, with consequent loss of employment for Maltese. Population density in 1965 was 2,578 per sq. mi.; there is continuous migration, much of it to Australia, the United Kingdom and Canada.

The protection of NATO was extended to Malta in 1965.

A 5-year development program, started in 1964, offers attractions to new industries and encourages tourism through building of modern hotels.

Leading industries are ship repairing, food and beverages, textiles and tourism. Gross national product rose from \$142,500,000 in 1965 to \$156,500,000 in 1966. Visiting tourists rose from 23,000 in 1962 to 100,000 in 1967. Historic sites, a casino and village fetes are among the attractions.

Mauritania

ISLAMIC REPUBLIC OF MAURITANIA

Capital: Nouakchott. Area: 419,231 sq. mi. Population (UN est. 1967): 1,100,000. Monetary unit: CFA franc (246.85 per U. S. \$1).

The Islamic Republic of Mauritania, former French Overseas Territory in West Africa, is bounded by the Atlantic Ocean, the Rio de Oro (Spanish), Algeria, Mali and Senegal. Population is largely Moorish. Mauritania is about four-fifths the size of Alaska.

The economy has been agricultural and pastoral. Products include dates, grain, tobacco, fish. There are large herds of cattle, camels, sheep and goats and large deposits of iron and copper.

But a large new iron mine was opened in 1968 to add to the nation's annual production of 8,000,000 tons of iron ore; fishing, which produced 200,000 tons of fish in 1967, was being expanded; a copper mine was under construction; a new cattle slaughterhouse and freezing plant was opened, also in 1968.

In accordance with the provisions of the 1958 French constitution, Mauritania became an autonomous state Nov. 28, 1958, and became fully independent Nov. 28, 1960. It elected to remain outside the framework of the French Community, but has expressed its desire to retain close ties with France. Prime Minister Mokhtar Ould Daddah, appointed June 26, 1959, became President by popular vote in August, 1962. It is a member of the UN.

During the Israeli-Arab war of June, 1967, Mauritania was one of 7 Arab countries that severed diplomatic relations with the U. S.

Mauritius

Capital: Port Louis. Area: 720 sq. mi. Population (UN est. 1967): 774,000. Monetary unit: Rupee (11.1 per U. S. \$1).

Mauritius, an island in the Indian Ocean 550 mi. E of Malagasy (Madagascar), became an independent nation within the Commonwealth on Mar. 12, 1968, after 158 years of British rule. The Hindu majority favored independence, whereas Moslems, Creoles and whites, fearing oppression by the Hindu majority and loss of close economic ties with Britain, opposed it. The country became the 124th member of the UN Apr. 24, 1968.

Mauritius has one of the world's most complex racial, religious and political mixtures as well as one of the world's highest population densities. The people belong to five main groups: About 380,000 Hindus; 210,000 Creoles, Christians of mixed European and African descent; 125,000 Moslems; 25,000 Chinese and 25,000 whites. Although the official language is English, French is spoken by most of the educated and the whites; Creole, a French patois, is the lingua franca. Chinese and the Indian languages Hindi, Tamil and Telegu are also spoken.

The country has a nearly one-crop economy, sugar. Population has boomed in recent years and

unemployment runs about 25%. Commonwealth subsidies support sugar prices and aid the economy.

Mauritius was uninhabited until 1638 when the Dutch settled there and gave the island its present name in honor of Prince Maurice of Nassau. The French took over in 1721 and introduced sugar cane and African slaves. The British, who seized the island in 1810, brought Hindus and Moslems from India to work the sugar plantations.

Mauritius was the home of the famed dodo, a heavy, flightless bird which became extinct in the 17th Century.

Mexico

ESTADOS UNIDOS MEXICANOS

Capital: Mexico City. Area: 763,259 sq. mi. Population (Govt. est. 1967): 45,671,000. Monetary unit: Peso (12.49 per U. S. \$1).

Second most populous nation in Latin America and third largest in area, Mexico compiled an enviable record for orderly progress, social improvement and fiscal responsibility in the middle decades of the 20th Century.

With housing, health, farm and industrial programs, the nation has lifted itself and its people into the mainstream of the modern world; life expectancy, for example, has been raised from 39 years in 1940 to 67 years in 1968.

Ever-growing streams of foreign visitors (958,000 in 1962; 1,656,000 in 1967) find spectacular scenery, striking art and architecture, cosmopolitan and colonial cities and luxurious resorts. The mountainous topography provides a variety of climates, from temperate to tropical.

The Sierra Madre Occidental Mtns. run NW-SE near the west coast. The Sierra Madre Oriental Mtns., a continuation of the Rockies, run near the Gulf of Mexico coast nearly as far S as Veracruz.

Between the two ranges lies the central plateau of Mexico, altitude from 5,000 to 8,000 ft. with a delightful climate and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to subtropical in the foothills, with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed. Mexico is nearly 3 times the size of Texas.

Tampico and Veracruz, on the Gulf, are the busiest of Mexico's 49 ocean ports.

Mexico's population is composed of descendants of the Toltecs, Aztecs, Mayas and the Spaniards who conquered and colonized the country. Archeological remains of the early Indian civilizations are important tourist attractions.

The Summer Olympic Games were held at Mexico City in Oct. 1968.

Resources and Industries. Mexico is rich in minerals and timber. It is the second largest producer of silver; also important are gold, copper, lead, zinc, antimony, mercury, arsenic, amorphous graphite, molybdenum, sulphur, coal and opal. Petroleum production is large, reaching 140,000,000 bbl. in 1966. The industry is nationalized. Natural gas is supplied to the U. S. Electric power generated in 1966 was 18.5 billion kwh.

Farming, stock raising and fishing are important. The land is rich, but the rugged topography and lack of sufficient rainfall are major obstacles. Crops and farm prices are controlled, as are export and import. Large estates have been expropriated; since 1915 the government has distributed over 135,000,000 acres to small farmers through land-holding communities (ejidos). Major irrigation projects in Sonora and Sinaloa have increased production of cotton and wheat.

In 1966 the Lerma Plan, an attempt to improve production and living conditions among 8,000,000 people in western rural areas, was launched with the aid of a \$150,000,000 Bank for Inter-American Development loan.

Principal export crops are cotton, coffee, cane sugar, tomatoes, cattle, fresh and frozen meats.

Coffee is valued at more than \$100,000,000 annually; other major crops are corn, rice, tobacco, garbanzos, cocoa, sisal, bananas. About 50% of the world supply of sisal comes from Yucatan, in the S.

Mexican industry is producing products formerly imported, especially in iron and steel, chemicals, electric goods. Other products are cotton, wool and synthetic textiles, flour, beverages, soap, cigarettes and cigars, rubber, paper, rubber products, cement, shoes, glass, furniture and tiles. Mexico is famous for industrial and native handicraft in silver, pottery, leather, wood, fibers and textiles. The U. S. buys a large portion of Mexico's exports.

Index of industrial production (1963=100) was 119 in 1965, 142 in 1967. The estimated gross na-

tional product (in U. S. dollars) was \$21.7 billion for 1966, \$24.7 billion (est.) for 1968.

Tourism is an important revenue source. Gross earnings in 1967 totaled \$960,000,000.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,605,000	\$1,229,000
1967	\$1,748,000	\$1,191,000

History and Government. Mexico was the site of advanced Indian civilizations before the Spanish conquest. The Mayas, an agricultural people, moved up from Yucatan and built immense stone pyramids and invented a calendar. The Toltecs were overcome by the Aztecs, who founded Tenochtitlan 1325 A.D., now Mexico City. Hernando Cortes, Spanish conquistador, destroyed the Aztec empire, 1519-1521.

After 3 centuries of misrule the people rose, under Fr. Miguel Hidalgo y Costilla (a priest), 1810, Fr. Morelos y Paven (another priest), 1812, and Gen. Agustín Iturbide, who made independence effectual Sept. 27, 1821, but made himself emperor as Agustín I. A republic was chosen in 1823; Iturbide was executed 1824.

Mexican authority extended into the present American Southwest and California until Texas revolted and established a republic in 1836; the Mexican legislature refused recognition but was unable to enforce its authority there. After numerous clashes, the U.S.-Mexican War, 1846-48, resulted in the loss by Mexico of the lands north of the Rio Grande, about half its total area.

French arms supported an Austrian archduke on the throne of Mexico as Maximilian I, 1864-67, but pressure from the U. S. forced France to withdraw troops, and led to his defeat by Mexican patriots under Benito Juárez, and subsequent execution. A dictatorial rule by Porfirio Díaz, president 1877-80, 1884-1911, led to demands for economic amelioration and fighting by rival forces until the new constitution of Feb. 5, 1917, provided social reform. Since then Mexico has developed large-scale programs of social security, labor protection and school improvement. A constitutional provision requiring management to share profits with labor became effective Dec. 12, 1963.

Mexico is a federal democratic republic of 29 states, with President, legislature and judiciary elected by universal suffrage; two territories with governors appointed by the President, and a federal district containing Mexico City. The President is elected for 6 years and thereafter ineligible; 60 senators for 6 years and deputies for 3 years, ineligible for reelection until one term has intervened. The deputies are one to every 200,000 pop.

In 1967 congressional elections, the long-dominant Institutional Revolutionary party won 87% of the vote and all 178 contested seats in the Chamber of Deputies.

Education and Religion. Education is secular, with primary education free and compulsory up to 15 years of age. Vocational instruction particularly in agriculture is promoted and there are many technical schools. The National University of Mexico continues an educational foundation of 1551 A.D. Spanish is the language.

Most of the people are Roman Catholics. All church real estate is vested in the nation, but care of church buildings is the responsibility of the clergy.

Defense. Military training is compulsory; draft-ees serve one year, then form part of the reserves. The regular army is comprised of about 50 infantry battalions and other units. In addition Mexico has a conscript Army of approx. 250,000 organized into national service divisions, plus a small Navy and an Air Force. Mexico is a member of the UN and OAS.

Monaco

PRINCEPAUTE DE MONACO

Capital: Monaco. Area: 370 acres. Population (Govt. est. 1961): 22,297. Monetary unit: French franc (U. S. \$0.20¢).

Monaco is a small principality on the Mediterranean surrounded on all but the sea side by France. It is noted for an exceptionally mild climate and magnificent scenery.

There is a local police force of 200.

Resources and Industries. Monaco's fame as a tourist resort and international conference city is widespread. Its revenues derive from indirect taxation, a tobacco monopoly, postage and the gambling tables of the Monte Carlo Casino.

About a dozen subsidiaries of large drug manufacturers were established in Monaco and their drugs entered France free of duty. In October, 1962, when the customs union with France ex-

pired, France put up customs barriers pending imposition of taxes and ended domestic mail rates. By a 1963 agreement the customs barriers were eliminated in April and domestic mail rates restored. French citizens living in Monaco less than 5 years must pay income taxes to France. Drug laboratories became subject to French controls; this applied also to their products sold in France.

Monaco endeavored to cover possible revenue losses by enacting a profits tax on Monaco companies that do 25% of their business outside Monaco. The company tax rate is now 35%.

History and Government. An independent principality for over 300 years, Monaco has belonged to the House of Grimaldi except during the French Revolution. It was placed under the protectorate of Sardinia in 1815 (Treaty of Vienna), and under that of France, 1861. The Prince of Monaco was an absolute ruler until a constitution was promulgated in 1911.

A new constitution, proclaimed Dec. 17, 1962, provided for female suffrage and abolition of capital punishment, and established a supreme tribunal to guarantee fundamental liberties. The legislature (National Council) consists of 18 members elected for 5 years.

The ruler of Monaco is Prince Rainier III who succeeded his grandfather, Prince Louis II, who died May 9, 1949. He married Grace Kelly, American motion picture actress, Apr. 18, 1956. A daughter, Princess Caroline Louise Marguerite, was born Jan. 23, 1957. The heir apparent, Prince Albert Alexander Louis Pierre, was born Mar. 14, 1958. Princess Stephanie Marie Elizabeth was born Feb. 1, 1965.

During 1965 a feud developed between Prince Rainier and Aristotle S. Onassis, shipping magnate who owned 52% of the Societe des Bains de Mer, which owns the Casino, several hotels and night clubs. The Prince pressed a development plan to attract more middle-class vacationers. Onassis opposed the plan.

In March, 1967, the government bought out Onassis' holdings for \$8,000,000.

Mongolia

BUGHUT NAIKRAMDAKH MONGOL ARAT ULUS MONGOLIAN PEOPLE'S REPUBLIC

Capital: Ulan Bator (Urga). Area, 592,664 sq. mi. Population (UN est. 1967): 1,170,000. Monetary unit: Tugrik (4 official rate per U. S. \$1).

The Mongolian People's Republic comprises Outer Mongolia in northeastern Asia. It is bounded on the N by the Siberian provinces of USSR, and on 3 other sides by Communist China. It is larger than Alaska.

NW Mongolia is an elevated plateau, well watered by lakes and rivers; SE and Mongolia include part of the Gobi Desert. Travel and communication and building methods are being modernized, but the population remains nomadic.

Resources and Industries. Livestock raising is the principal industry, including cattle, sheep, camels and oxen. Other activities under the planned economy include food processing, wool-cleaning, tanning, shoe-making, and production of building materials. Mongolia mines fluor spar, gold, coal, tungsten, marble, and some uranium. Oil has been found.

History and Government. One of the world's oldest countries, Mongolia reached the zenith of its power in the 13th Century when Genghis Khan and his successors conquered all of China and extended their influence as far W as Hungary and Poland. In later centuries, the empire dissolved and Mongolia came under the suzerainty of China.

With the advent of the 1911 Chinese revolution, Mongolia, with Russian backing, declared its independence. The Mongolian People's Republic was proclaimed Mar. 13, 1921. China, however, continued to claim the country until 1945 when recognition of independence was given.

A Constitution of 1940, since amended, vested power in the Great People's Khural from which is drawn a 7-member Presidium.

Mongolia has sided with the Russians in the Sino-Soviet dispute and has received large amounts of Soviet aid for the development of mines and industry. A Mongolian-Soviet mutual assistance pact was signed Jan. 15, 1966.

In 1963, Great Britain became the first Western country to extend diplomatic relations to Mongolia.

Parts of Ulan Bator, the capital, were inundated by a severe flood July, 1966, causing loss of life and property. Mongolia is a UN member.

Education and Religion. There are primary, secondary and technical schools, and a university in Ulan Bator. An Academy of Sciences was

founded in 1953. Buddhist Lamaism is the leading religion.

Morocco

AL-MAHLAKA AL-MAGHREBIA

Capital: Rabat. Area: 172,834 sq. mi. Population (UN est. 1967): 14,140,000. Monetary unit: Dirham (5.06 per U. S. \$1).

The monarchy of Morocco lies on the NW tip of Africa separated from Europe by the 8-mile-wide Strait of Gibraltar. It is bounded by Algeria, Spanish Sahara, the Mediterranean and the Atlantic. Until 1956 it was a protectorate of France and Spain.

It consists of 5 natural regions: A series of mountain ranges (Rif, facing Gibraltar; Middle Atlas, extending NW of Marrakesh; Upper Atlas, and Anti-Atlas); a series of rich plains in the W; the alluvial plains of Haouz in the SW; the "meseta," a well-cultivated series of plateaus in the center; a pre-Saharan zone extending from S to E.

The inhabitants largely are a mixture of Arabs and the original Berbers.

Tangier, a seaport with pop. 1965 of 164,232, and surrounding territory in extreme NW corner on the Atlantic was internationalized during the French and Spanish protectorate. The Tangier Zone comprised 225 sq. mi. A provisional agreement in July 1956, provided for Tangier's incorporation into Morocco as a new province. International rule officially ended Oct. 29, 1956. Certain free zone provisions were restored in 1962.

Ifni, Spanish coastal enclave, comprises 740 sq. mi. and 49,889 population, mostly of the Alt Ba Amar tribe, which demands return of the enclave to Morocco.

Resources and Industries. Morocco is primarily agricultural and pastoral. Cereals rank 1st among agricultural products, including barley, wheat and corn. Fruit and vineyards are abundant and dates a regular crop. Carpets, leather goods, fezzes, woolen and silk stuffs are among the manufactures.

Morocco ranks 2nd to U. S. in production of phosphate rock and is 1st in phosphate exports. It produces 10% of the world's cobalt and 2% of manganese ore. Other minerals are antimony, zinc, lead ore, oil and anthracite.

Wheat is normally one of Morocco's food exports, but droughts have forced the country to import it in some years; in 1967 the U. S. gave Morocco 140,000 tons. In 1967 and 1968 construction was started on two river dams for irrigation projects.

Modern industrialization has expanded a number of industries. Casablanca handles heavy annual tonnages. Its 11,480-ft. jetty shelters 2½ mi. of piers.

Tourism attracts 500,000 visitors annually to see Morocco's casbahs, Roman ruins, old fortresses and oases.

History and Government. Morocco is a remnant of the Shereefan Empire founded by the Arabs at the close of the 7th Century which encompassed all NW Africa and most of the Iberian Peninsula.

It came under French influence because of its proximity to Algeria. A general uprising of tribes in 1910 culminated in the dispatch of a French expeditionary force that occupied Fez in 1911. Frequent uprisings continued for two decades until the exile of Abd-el-Krim in 1926 and the surrender of Sidi Ali Hociene in 1933.

The French section encompassed the whole of Morocco except for the Spanish-controlled Ifni enclave, the Cape Juby area in the SW, and the international Tangier area.

France ended its protectorate over Morocco by a joint declaration and protocols between the two countries, Mar. 2, 1956 which recognized Morocco's independence and suspended the protectorate treaty (Treaty of Fez, 1912). Spain signed similar agreements, Apr. 7, 1956, recognizing Morocco's independence. Spain agreed to relinquish its Southern Morocco Protectorate effective Apr. 10, 1958. French forces completed their withdrawal in Sept. 1961. The U. S. built 3 large Air Force bases but evacuated them under a 1957 agreement, keeping only a Navy air transport base at Kenitra on the Atlantic.

Sidi Mohammed Ben Youssef, third son of Moulay Youssef (reigned 1912-1927), was proclaimed Nov. 18, 1927, as Mohammed V. His eldest son, Moulay Hassan, was invested as Crown Prince and heir apparent July 9, 1957. On Aug. 11, 1957, the ruler's title of King (Melek) was ordered used instead of Sultan.

Mohammed V died Feb. 26, 1961, and the Crown Prince ascended the throne as King Hassan II.

Under a constitution approved by referendum Dec. 7, 1962, Morocco became a constitutional

monarchy. The first 144-seat Parliament was elected by universal vote May 17, 1963.

Morocco accepted U. S. and USSR military and economic aid on a basis of non-interference in its internal affairs. It has agreements with France on economic, technical and cultural cooperation. It is a member of the UN and Arab League.

Education and Religion. The native population is largely illiterate, but trade schools and agricultural training centers have been considerably developed. There are Koranic, Franco-Moslem and French schools. The most notable Islamic school is Kairoween University in Fez. Arabic is the official language. The population is Sunni Moslem.

Defense. Morocco's volunteer Army numbers approx. 40,000.

Muscat and Oman

SULTANAT MASQAT WA OMAN

Capital: Muscat. **Area:** 82,000 sq. mi. **Population** (est. 1964): 750,000. **Monetary unit:** Indian Rupee (7.579 per U. S. \$1).

The Sultanate of Muscat and Oman is an independent, absolute monarchy occupying the E corner of the Arabian Peninsula and including the tip of a nearby peninsula, Ruus-al-Jebel, to the N. The Sultanate has a coastline of 1,000 mi. along the Gulf of Oman to the NE and the Arabian Sea to the SE. Climate is generally hot and dry.

There is a narrow coastal plain up to 10 mi. wide, a range of barren mountains with Jebel Akhbar, the highest, reaching c. 9,900 ft., and a wide, stony, mostly warless plateau averaging 1,000 ft. altitude. The Sultanate is the size of Utah.

Exports are mainly dates and some dried fish, limes and pomegranates. Cultivated areas also produce bananas, grapes, wheat, vegetables, coconuts and frankincense.

Oil was discovered in 1964, giving promise of a boost to the sparse economy.

The people are predominantly Arab, but there are also Indians, Baluchi, Negroes and others. The language is Arabic, but Hindi, Urdu, Baluchi and others are also spoken. The religion is mainly the Ibadhi branch of the Moslem faith.

The area's history is a long one. Early Semitic tribes were conquered by the Persians about 550 B.C.; later conquerors were the Parthians, the Caliphs of Baghdad, Turks, Portuguese and Persians again. The present al-bu-Said dynasty threw off the last of Persian rule 1744.

The armed forces include two regiments, a small Air Force and other troops and a gendarmery regiment.

Nauru

Capital: Nauru. **Area:** 8 sq. mi. **Population** (UN est. 1966): 6,056. **Monetary unit:** Australian dollar (.9010 per U. S. \$1).

Nauru, one of the world's smallest nations, became independent Jan. 31, 1968, after 80 years of foreign rule. In the southwest Pacific about 30 mi. S of the Equator and 1,300 mi. NE of Australia, Nauru is comfortably affluent because of its high-grade phosphate deposits.

The native population of 3,100 (about 3,000 foreign residents work in the phosphate industry) receive about £1,700 (U. S. \$4,000) per capita a year in royalties from sale of phosphates, and with independence royalties were expected to increase. However, this bright economic picture is not without flaws; the deposits are expected to become depleted around 1990.

The island was discovered in 1798 by the British but was formally annexed to the German Empire in 1888. After World War I, Nauru became a League of Nations mandate administered by Australia. During World War II the Japanese occupied the island and shipped 1,200 Nauruans to the fortress island of Truk as slave laborers, including the nation's present Head Chief Hammer De Roburt.

In 1947 Nauru was made a UN trust territory, administered by Australia on behalf of the three trust powers—Australia, Great Britain and New Zealand. Because of its small size Nauru has not sought membership in the UN.

Nepal

Capital: Katmandu. **Area:** 54,362 sq. mi. **Population** (UN est. 1967): 10,500,000. **Monetary unit:** Nepalese rupee (10.125 per U. S. \$1).

Nepal is a constitutional monarchy in the Himalayas, bounded on the N by China (Tibet) and E, S and W by India. It is about the size of Arkansas.

There are many fertile valleys lying in the slopes of the lofty mountains, including Mt. Everest, on the Tibet border. The capital is in the fertile val-

ley of Katmandu, 15 mi. long and 20 wide, which supports 450,000 inhabitants and is noted for its many, lavishly decorated shrines.

Virtually closed to the outside world for centuries, Nepal is now linked to India and Pakistan by modern roads and air service.

A northern section called Mustang, at a mean altitude of 15,000 ft. and bordered on 3 sides by Tibet, is actually a district of Nepal although it has its own Rajah and a measure of internal autonomy.

Nepal has established a 500 sq. mi. game preserve for elephants, tigers, rhinoceroses, leopards, bears, crocodiles and over 500 species of birds.

Resources and Industries. Nepal has rich forests and quartz deposits. The country exports jute, rice, grain, cattle, hides, wheat and drugs, and imports textiles, sugar, salt, hardware, etc.

U. S. technical aid has made possible settlement of the fertile but once inaccessible Rapti Valley with a 53-mi., \$500,000 highway. Nepal also receives financial aid from India, Australia, Communist China and USSR. Its 2nd 5-year plan stresses hydroelectric power and roads.

History and Government. Nepal was originally divided into petty principalities, the inhabitants of one of which—the Gurkhas—became dominant about 1769. Maharajadhiraja Tribhubana Bir Bikram (born June 30, 1906), member of the Shah family, returned from exile, ended the system of rule by hereditary premiers of the Ranas family, Hindu Rajputs, 1848-1951, who kept the Kings virtual prisoners. He established a popular government Feb. 18, 1951.

King Tribhubana died Mar. 13, 1955, and was succeeded by his son, Mahendra Bir Bikram Shah Deva, officially crowned May 2, 1956.

King Mahendra promulgated a new constitution, Dec. 16, 1962, providing for a four-tier governmental system culminating in a National Assembly (Panchayat) of 125 elected members. There are no political parties.

Education and Religion. There are more than 2,400 English schools in addition to Sanskrit and Nepali schools and other institutions of learning. Buddha was born at Lumbini in South-Central Nepal. Hinduism and Buddhism are the main religions. Polygamy, child marriage and the caste system were abolished in 1963.

Defense. The Army consists of about 25,000 regular infantrymen. Nepal is a UN member.

Netherlands

KONINKRIJK DER NEDERLANDEN

Capital: Amsterdam. **Area** (land): 15,800 sq. mi. **Population** (UN est. 1967): 12,597,000. **Monetary unit:** Guilder (3.615 per U. S. \$1).

The Kingdom of the Netherlands, a constitutional monarchy in northwestern Europe, is bounded by Germany, Belgium, and the North Sea. Its surface is flat, with an average height above sea level of 37 ft., with much land below sea level, reclaimed and protected by dikes, of which there are 1,500 mi. The country is about the size of Vermont and Massachusetts combined.

Since the end of World War II the government has been draining the IJsselmeer, formerly Zuider Zee, and converting the reclaimed land into farms. The total will add over 550,000 acres. By 1968, 305,000 acres had been reclaimed.

The Hague is the seat of government, but Amsterdam is the sole capital of the kingdom and the inaugurations of sovereigns are held there.

Rotterdam, located along the principal mouth of the Rhine, handles the most cargo of any ocean port in the world. The heart of the city, destroyed by a Nazi air attack in 1940, has been completely restored. A subway line was opened in 1968.

A 3.125-mi. causeway bridge for autos, longest in Europe, was opened Dec. 15, 1965, in South Holland.

Resources and Industries. Forty percent of the land is given to pasture, farming takes 30%, forest 7%, horticulture 3%. Of the land 90% is in holdings of fewer than 50 acres and more than 50% of fewer than 10 acres. Cereals, potatoes, sugar beets and other crops are raised. Agriculture and fishing engage approx. 12% of the workers. Dairy products are an important industry; the cheese products are famous and the cattle high grade. Tulips and other flowering bulbs and roots are grown. The Dutch bulb is not indigenous to Holland but originated in Persia, whence it was taken to Holland several hundred years ago.

The most important industries are shipbuilding, the manufacture of machinery, textiles (including rayon), and chemical products; also brewing and distilling and flour milling. Amsterdam is famous

for diamond cutting; Delft for pottery, Eindhoven has electrical and radio factories. Coal, oil and salt are found. Natural gas reserves are large. Index of industrial production (1963=100) was 129 for 1967.

Canals, of which there are 4,203 mi., are important in transportation. The Rhine, Meuse and Schelde reach the sea through the Netherlands and carry enormous traffic.

Royal Dutch Airlines (KLM) is one of the world's largest international airlines, reaching 120 cities in 75 countries.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$8,018,000	\$6,750,000
1967	\$8,338,000	\$7,288,000

History and Government. After the empire of Charlemagne (d.814) fell apart, the Netherlands—Holland, Belgium, Flanders—split among counts, dukes and bishops, passed to Burgundy and thence to Charles V of Spain. His son, Philip II, sent the Duke of Alba as governor to check the Dutch drive toward political freedom and Protestantism (1568-1573). William the Silent, prince of Orange, led a confederation of the northern provinces, called Estates, in the Union of Utrecht, 1579. The Estates retained individual sovereignty, but were represented jointly in the States-General, a body that had control of foreign affairs and defense. In 1581 they repudiated allegiance to Spain. The rise of the Dutch republic to naval, economic and artistic eminence came in the 17th Century.

The United Dutch Republic ended 1795 when the French formed the Batavian Republic, ended 1798. Napoleon made his brother Louis King of Holland, 1806; Louis abdicated 1810 when Napoleon annexed Holland. In 1813 the French were expelled. In 1815 the Congress of Vienna formed a kingdom of the Netherlands, including Belgium, under William I, with Brussels and The Hague as alternative capitals. In August, 1830, the Belgians revolted and formed a separate kingdom, which was recognized by the European powers in November, 1831; later by Holland.

The constitution, promulgated 1814, and subsequently revised, assures a hereditary constitutional monarchy. Executive power rests exclusively in the Crown (the Queen and ministers). Legislative powers are exercised jointly by the Crown and Parliament (States-General) of two Chambers: First Chamber, 75 members, elected for six years (one half every third year) by the provincial legislatures, and the Second Chamber, 150 Deputies, elected for four years directly. Universal suffrage for citizens of both sexes over 23 years of age and proportional representation are in force. The sovereign exercises the executive authority through a Council of Ministers, the President thereof corresponding to a Prime Minister. There is a State Council named by the sovereign, of which she is president, to be consulted on all legislative and some executive matters.

The reigning sovereign is Queen Juliana Louise Emma Marie Wilhelmina, born April 30, 1909, only daughter of former Queen Wilhelmina. She succeeded to the throne, Sept. 6, 1948, on the abdication of her mother. Queen Juliana on Jan. 7, 1937, married Prince Bernhard of Lippe-Biesterfeld, born June 29, 1911, known as the Prince of the Netherlands since the accession of Juliana. They have 4 daughters, Princess Beatrix Wilhelmina Armgard, born Jan. 31, 1938, her presumptive, married Claus von Amsberg, West German diplomat, Mar. 10, 1966; Princess Irene Emma Elizabeth, born Aug. 5, 1939, married Prince Carlos Hugo, Bourbon-Parma, Apr. 29, 1964; Princess Margriet Francisca, born Jan. 19, 1943, in Ottawa, Canada, married Pieter van Vollenhoven, Jan. 10, 1967, and Princess Maria-Christine, born Feb. 18, 1947.

On Apr. 27, 1967, Princess Beatrix gave birth to a son, Willem-Alexander, Prince of Orange, first male heir to the throne in three generations.

Education and Religion. There is complete liberty of worship. The royal family belongs to the Netherlands Reformed Church (Prot.). The population is 38% Protestant; 40% Roman Catholic; others, including non-church members, 22%.

Education is obligatory from ages 6 to 15. Instruction is free or subject to a small fee, in both public and denominational schools and teachers are paid by the state. There are universities in Amsterdam (two), Utrecht, Leyden, Delft (Engineering), Groningen, Wageningen (Agriculture), Rotterdam (Commerce), Nijmegen, Eindhoven (Engineering) and Tilburg.

Defense. Army service is compulsory between the ages of 20 and 40. The Navy consists of one carrier,

two cruisers, 12 destroyers, 24 frigates, 6 submarines and minor miscellaneous craft. The Netherlands modern Air Force contributes to NATO's tactical air force.

The Netherlands is a member of the UN, NATO, EEC, Council of Europe and Benelux.

Sovereignty over the Netherlands East Indies was transferred to the Republic of Indonesia, excepting Netherlands New Guinea, Dec. 27, 1949. The latter was transferred to the UN, 1962, and then to Indonesia, 1963.

SURINAM AND NETHERLANDS ANTILLES

A revision of the Netherlands charter, promulgated Dec. 15, 1954, raised Surinam and the Netherlands Antilles to equality with the Netherlands homeland in the Kingdom of the Netherlands, with complete internal autonomy and a voice in government of the kingdom. The kingdom is represented in each by the governor who also is head of government for his respective county. Local governments comprise the governor, council, ministers, and representative bodies (Staten), the latter elected by universal suffrage.

Surinam, also known as Dutch Guiana, is on the N coast of South America, between French Guiana on the E and British Guiana on the W; forests and savannahs on the S stretch to the Tumuc Humac Mountains. The area is approximately 55,400 sq. mi. The population (est. 1964) is 325,000. Capital: Paramaribo.

The country is rich in minerals and hydroelectric power is being developed on a large scale. Oil was discovered, 1966. Exports include bauxite, alumina, lumber, sugar, rice, citrus, coffee, bananas and shrimp. The Surinam gulder (SFlorin) is 1.87 per U. S. \$1.

The Dutch by the Treaty of Breda, 1667, ceded New Netherland (New York) to England in exchange for Surinam.

The Netherlands Antilles consist of two groups of islands in the West Indies: Curacao, Aruba and Bonaire are near the South American coast; St. Eustatius, Saba and the southern part of St. Maarten are southeast of Puerto Rico. Northern two-thirds of St. Maarten belongs to French Guadeloupe; the French call the island St. Martin. Total area of the two groups is 393 sq. mi., including: Aruba 70, Bonaire 110, Curacao 180, St. Eustatius 12, Saba 5, St. Maarten (Dutch part) 16.

Tourism in recent years has been increasing, especially to the islands of Curacao and Aruba.

The Netherlands Antilles population (est. 1967) was 212,000. Willemstad is the capital. Chief products are corn, pulse, salt and phosphate; principal industry is the refining of oil. On Curacao the Royal Dutch Shell and on Aruba the Standard Oil Co. of New Jersey have large oil refineries, receiving crude oil from Venezuela.

New Zealand

Capital: Wellington. Area: 103,736 sq. mi. Population (UN est. 1967): 2,726,000. Monetary unit: New Zealand dollar (.8946 per U. S. \$1).

The main islands of New Zealand lie in the South Pacific about 1,200 mi. E of Australia. The total area is about that of Colorado. Including remote islands to the N and the Ross Dependency to the S, the reach of New Zealand is from the tropics to Antarctica.

Snow-topped mountains, smoking volcanoes, deep fjords, boiling geysers, golden beaches and the glow-worm caves of Waitomo are among the scenic attractions.

New Zealand comprises North Island, 44,281 sq. mi.; South Island, 58,093 sq. mi.; Stewart Island, 670 sq. mi.; Chatham Islands, 372 sq. mi. Both the North and South Islands slightly exceed 500 mi. in length. Cook Strait, separating the two islands, is only 16 mi. wide at its narrowest.

Included within the administrative boundaries of New Zealand are Campbell Island, Solander Island, the Three Kings, Kermadec Islands, Auckland, Antipodes, Bounty and Snare Islands, a total area of 320 sq. mi. Annexed to New Zealand are Niue Island, and Tokelau Islands in the Pacific totaling 104 sq. mi. with a population of 7,018 (1965). In 1965, the Cook Islands (pop. 1965 20,519, area 83 sq. mi.) became self-governing although New Zealand retains responsibility for defense and foreign affairs.

Wellington and Auckland, on North Is., are the chief ports. South Is. has the picturesque Southern Alps and Tasman, Fox and Franz Josef Glaciers. There are 15 named peaks over 10,000 ft., the highest being Mt. Cook, 12,349 ft. Christchurch and Dunedin are the main cities of South Is.

Resources and Industries. New Zealand is largely dependent on agricultural products for export in-

come; wool, meat and dairy products account for 91% of the total.

Exports in 1966 totaled \$1.08 billion (in U. S. dollars), in 1967 \$9.99 billion; imports in 1966 were \$1.09 billion, in 1967 \$9.6 billion.

Agriculture engages 13.5% of the population, manufacturing industries 26%. Private enterprise is basic in the economy, but state ownership or regulation affects many industries. Railroads are largely state-owned and operated.

Food processing is the largest industry with value added amounting to over \$200,000,000; forest products account for more than \$162,000,000.

The pulp and paper industry on North Is. is partly powered by natural steam from volcanic areas. Construction of the first iron and steel plant started 1966. Natural gas was discovered at Kapuni, North Is., 1967, and was to be piped to several towns. A large hydroelectric plant was under construction at Lake Manapouri, South Is., to provide power for a proposed aluminum smelter.

About 100,000 tourists visit New Zealand annually, about 17,000 of them from the U. S.

New Zealand changed its currency from pounds to dollars July 10, 1967; the old currency was also to continue in use until late 1968.

History and Government. New Zealand was discovered in 1642 by Abel Janszoon Tasman, a Dutch navigator, and its coasts were explored by Capt. James Cook, 1769-1770. British sovereignty was proclaimed in 1840, with organized settlement commencing in the same year. Representative institutions were granted in 1853. The Colony became a Dominion in 1907 and an independent member of the Commonwealth in 1947.

The native Maoris are Polynesians. Early in the 19th Century they numbered an est. 200,000; violence and European diseases cut them to 40,000 by the end of the century. Recently they have increased at 4% annually, twice the rate of other New Zealanders, and totaled 206,054 in Dec. 1966.

Government consists of a governor general, representing the British Crown; a House of Representatives whose members are elected by universal suffrage for a 3-year term; a Prime Minister and Cabinet who are members of the House and accountable to it.

New Zealand is a member of the UN, Commonwealth, SEATO and Colombo Plan.

In national elections Nov. 26, 1966, the 80 seats in the House of Representatives were distributed: National party 44, Labor 35, Social Credit 1.

New Zealand's tax rates reach a maximum of 67½ cents per dollar at the \$10,080 income level. "Cradle-to-grave" social security includes maternity, school, medical, hospital, medicine, pension and other benefits.

Education and Religion. Education is free and compulsory between the ages of 7 and 15. There are universities in Dunedin, Christchurch, Wellington, Auckland, Hamilton, and Palmerston North. The Anglican and Presbyterian Churches have the largest followings.

Defense. There are regular army, navy and air forces, supplemented by a Territorial Army and a Naval Reserve. A proportion of youths become eligible for military training at age 20. New Zealand had a force of 360 men in Vietnam in 1967.

Ross Dependency, administered by New Zealand since 1923, comprises Antarctic territory between the 160th meridian E. Long. and 150th W. Long. south of the 60th parallel of S. Lat., including Edward VII Land and portions of Victoria Land with total est. area of 160,000 sq. mi.

Nicaragua

REPUBLICA DE NICARAGUA

Capital: Managua. **Area:** 53,938 sq. mi. **Population** (UN est. 1967): 1,783,000. **Monetary unit:** Cordoba (7.026 per U. S. \$1).

Nicaragua, largest of the Central or Middle American States, lies between the Caribbean and the Pacific with more than 200 mi. of coastline on each. The country is bordered by Honduras on the N and Costa Rica on the S. The Cordillera range of mountains, including many volcanic peaks, runs NW-SE through the middle of the country. Between this range and a range of volcanic peaks to the W lie Lake Managua, 38 mi. by 15, and Lake Nicaragua, 100 mi. by 45, of great importance to the transport system. The government-owned Pacific railroad, Corinto to Leon and Managua to Granada, 171 mi., is the principal rail line. There is daily air service to the U. S. and South America.

Resources and Industries. The nation has valuable forests, some gold is mined. It is essentially an agricultural country, but industrialization, in-

cluding oil refining, is growing. On the broad tropical plains of the east coast, bananas, cotton, fruit and yuca are cultivated. Products of the western half include coffee, sugar cane, corn, beans, cocoa, rice, tobacco and wheat.

Foreign trade, 1967, was: exports \$146,000,000, imports \$204,000,000, both up from 1966.

History and Government. After gaining independence from Spain, 1821, Nicaragua was united for a short period with Mexico, then with the United Provinces of Central America, finally becoming an independent republic, 1838.

The constitution, revised in 1960, provides for a Congress of two chambers, a House of Deputies of 45 members and a Senate of 18 members, all elected by popular vote for 4 years. Ex-presidents also serve in the Senate and are appointed for life. The President is elected for 4 years and may not succeed himself.

Pres. Rene Schick Gutierrez, elected Feb. 3, 1963, died Aug. 3, 1966, and Congress elected Dr. Lorenzo Guerrero, a vice president, to fill out the unexpired term. Anastasio Somoza Debayle was elected president Feb. 5, 1967.

Nicaragua was one of the Central American nations visited in July 1968 by U. S. President Johnson and promised increased aid.

Education and Religion. Roman Catholicism is the prevailing religion.

A Central University of Nicaragua was established in 1941. The University of Leon, since 1947 called National University of Nicaragua, was founded in 1814. Spanish is the official language.

Nicaragua is a member of the UN and OAS.

Niger

REPUBLIC OF THE NIGER

Capital: Niamey. **Area:** 489,189 sq. mi. **Population** (UN est. 1967): 3,546,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

The Republic of the Niger, a former French Overseas Territory in the heart of West Africa, is bounded by Libya, the Algerian Saharan Department of Oases, Chad, Upper Volta, Dahomey, Federation of Nigeria, and Mali. Chief access to the country, a vast plateau, almost twice the size of Texas, is by air. The Niger River flows through the western corner.

Under provisions of the 1958 French constitution, Niger became fully independent Aug. 3, 1960, and joined the UN Sept. 20. It elected to remain outside the framework of the French Community proper, but signed a bilateral agreement Apr. 24, 1961, retaining close ties with France. It is a member of an economic alliance called the Council of the Entente formed May 29, 1959; other members are Dahomey, Ivory Coast, and Upper Volta.

Niger has limited resources and is an agricultural and pastoral land. Peanuts are the principal cash crop; livestock (cattle, sheep, camels, donkeys, goats) are second in importance. Cotton is being promoted.

In 1967 Niger signed an agreement with France for exploitation of large, high-grade uranium deposits in the north. Television is used to spread instruction to some village schools.

Nigeria

Capital: Lagos. **Area:** 356,669 sq. mi. **Population** (UN est. 1967): 61,450,000. **Monetary unit:** Pound (.3571 per U. S. \$1).

The Federation of Nigeria, Africa's most populous country, became independent in 1960. Larger than Texas and Oklahoma combined, it lies on the southern side of the West African bulge, between Dahomey and Cameroon, with Niger Republic to the N and Chad NE. It comprises nearly 250 tribal and linguistic groups, including the Hausas in the N, Ibos in the E, Yorubas in the W. Nigerians constitute almost one-fifth of the population of the African continent.

Nigeria was composed of four distinct autonomous regions each with its own administration: Northern, Western, Mid-Western and Eastern, plus the Federal Territory of Lagos. Included in Nigeria's territory is the northern portion of the former British Cameroons, a British UN trusteeship that ended in 1961.

Its rich natural resources include oil, coal, iron, limestone and natural gas. It produces 45% of the world's columbium ore (important in steel alloys).

Cocoa is the main crop. Production of oil has grown rapidly; in 1965 oil exports were valued at \$190,000,000, doubling the 1964 total and, for the 1st time, exceeding the value of cocoa exports. Other exports are tobacco, tin, palm oil, palm

kernels, cotton lint, hides and skins, lumber, rubber and peanuts.

Nigeria became a sovereign country Oct. 1, 1960, and a republic within the British Commonwealth Oct. 1, 1963. It is a member of the UN. Nigeria's first federal constitution guaranteed personal liberties and regional autonomy, and provided for a Parliament comprised of a 312-member House, directly elected, and a Senate, indirectly elected.

In 1966 there were two military coups and periods of interracial strife ending a long period of coalition governments of the majority Northern Region and other regions. On Jan. 15, junior Army officers seized control; Gen. Johnson Aguiyi-Ironsi, an easterner, made himself head of state, Prime Minister Abukabar Tafawa Balewa was assassinated. On Aug. 1, Col. Yakubu Gowon, a northerner, became head of state; Gen. Ironsi was assassinated.

On May 30, 1967 the Eastern Region seceded from Nigeria and proclaimed itself the Republic of Biafra. The move plunged the country into civil war.

The war went badly for the outnumbered 13-000,000 Ibos of Biafra. By mid-1968 at least 100,000 including women and children were reported facing starvation as supplies were blockaded by the Nigerian Government forces. Attempts by international groups to bring in aid were stymied, despite an urgent appeal, July 11, by U. S. President Johnson that food be allowed to reach the starving.

Islam is the principal religion of Northern Nigeria and among the Yorubas. English is the official language.

Norway

KONGERIKET NORGE

Capital: Oslo. Area: 125,181 sq. mi. Population (UN est. 1967): 3,784,000. Monetary unit: Krone, (N. kroner (7.15 per U. S. \$1)).

Norway occupies the W part of the Scandinavian Peninsula in NW Europe. It shares borders with Sweden, Finland and the USSR. The rocky W coast is cut deep by fjords of scenic grandeur. Norway is about the size of New Mexico.

The country's greatest length is 1,100 mi.; its width varies from 270 to only 4 mi. at the narrowest point. The coastline, including the fjords and largest of the 150,000 islands, is 12,500 mi. long. The climate is mild and moist on the W coast, but fairly cold and dry in the E.

The midnight sun is a phenomenon of the North Cape area. The sun does not set from the middle of May until the end of July, nor does it rise above the horizon from approximately Nov. 20 to Jan. 24. The Northern Lights are visible in winter.

Resources and Industries. More than 72% of the land is unproductive and only 4,300 sq. mi. are cultivated; rivers and lakes occupy 5,000; forests 29,455.

Forests supply a sizable wood-processing industry. Huge quantities of cod, herring, mackerel and salmon are caught. Mining is an important industry and the country yields copper, pyrites, nickel, iron, zinc, lead, aluminum.

Lacking oil or sufficient coal (only 442,000 tons of coal were produced in Spitsbergen in 1964), Norway has harnessed its waterfalls to provide power. Manufacturing, mainly processing of forest, fishing and mining products, consumes 65% of the hydroelectric output, which is over 48 billion kwh per year. Norway has the highest per capita consumption of electricity in the world.

Farm products include oats, rye, potatoes, dairy products and fruits.

Norway's merchant marine now ranks 3rd in the world, with 2,835 ships totalling 17,000,000 gross tons Jan. 1, 1967.

Unemployment is virtually non-existent.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$2,403,000	\$1,563,000
1967	\$2,746,000	\$1,736,000

History and Government. The first supreme ruler of Norway was Harald the Fairhaired who came to power in 872 A.D. Between 800 and 1000, the Vikings raided and occupied parts of Europe. Christianity was introduced 1030.

The country was united with Denmark 1381-1814, and with Sweden 1814-1905. The Swedish union was dissolved in 1905 and a Danish prince was named King Haakon VII of Norway. Nazi Germany attacked Norway Apr. 9, 1940 and held it until liberation May 8, 1945.

Norway is a constitutional monarchy.

The King of Norway is Olav V (born July 2,

(1903), son of Haakon VII. On the death of his father he became King Sept. 21, 1957. He married (Mar. 21, 1929) Princess Martha of Sweden (who died Apr. 5, 1954). The heir to the throne, Crown Prince Harald, was born Feb. 21, 1937. The King also has two daughters, Princess Ragnhild Alexandra (June 9, 1930) and Princess Astrid (Feb. 12, 1932). Both are married to commoners.

Legislative power is vested in the Storting, whose 150 members are elected for four years. The Labor party, dominant for 30 years, was swept from power by a coalition of non-Socialist parties Sept. 13-14, 1965.

Education and Religion. The Evangelical Lutheran religion is endowed by the state and its clergy are nominated by the King. All religions enjoy complete freedom of worship.

Since 1860, education has been free and compulsory from ages 7 to 14. The universities of Oslo (founded 1811) and Bergen are subsidized by the state, as are the Technological Institute (Trondheim) and the Agricultural College (Aas).

Defense. Military service is universal and compulsory. Conscripts are drafted at 20, serve 12-15 months. The Navy includes destroyers, frigates, submarines, etc. There is a small Air Force.

Norway is a member of UN, NATO, EFTA, Nordic Council and Council of Europe.

SPITSBERGEN

(Svalbard)

Spitsbergen is a group of mountainous islands in the Arctic Ocean, c. 23,957 sq. mi., pop. varying seasonally from 1,500 to 3,000. Incorporated in Norway as Svalbard. The largest, West Spitsbergen, c. 15,000 sq. mi., seat of the governor, is about 370 mi. N of Norway. Named Svalbard by Norse who discovered it in 1194, it was visited by Barents 1596 and became locale of whaling until 19th Century. By a treaty signed in Paris, February, 1920, major European powers recognized the sovereignty of Norway, which incorporated it 1925. Sealing, fishing are followed; rich coal deposits are worked by Norwegians and Russians. Mt. Newton (West Spitsbergen) is 5,633 ft. tall.

OTHER ISLAND POSSESSIONS

Jan Mayen, a desolate area of 147 sq. mi. in the Arctic Ocean between Greenland and Northern Norway used as a weather station.

Bouvet Island, area 22 sq. mi., is an uninhabited tract in the Southern Atlantic.

Peter I Island, with an area of 97 sq. mi., lies in the Antarctic and is uninhabited.

Norwegian Antarctic Dependency (Queen Maud Land), lying between the Falkland Islands dependency and the Australian Antarctic dependency, was placed under Norwegian sovereignty Jan. 14, 1939.

Pakistan

Capital: Islamabad. Area: 365,529 sq. mi. Population (UN est. 1967): 107,258,000. Monetary unit: Pakistan rupee (4.789 per U. S. \$1).

Pakistan became a sovereign nation Aug. 14, 1947, when what had been the British Empire of India achieved independence and was partitioned into two countries, Pakistan and India. At first a dominion, Pakistan declared itself a republic on Mar. 23, 1956. Its name means "Land of the Pure" in Urdu.

Pakistan is divided into two sections, West Pakistan and East Pakistan. The two areas lie nearly 1,000 mi. apart on opposite sides of India.

West Pakistan, larger than Texas, is 310,403 sq. mi. It adjoins Iran, Afghanistan, India and the Arabian Sea. To the NE lies the disputed Kashmir region.

East Pakistan, about the size of Arkansas, is 55,126 sq. mi. It is bordered by India, Burma and the Bay of Bengal.

West Pakistan is a land of rugged mountains and river valleys, where irrigation aids agriculture, the occupation of 80% of the people. The Indus flows for c. 1,000 mi. from the base of the Himalayas to the Arabian Sea and with its tributaries supplies reservoirs, canals and hydroelectric plants. In the W are the Hindu Kush Mts., with Tirich Mir 25,230 ft. In the N is Mt. K2 (Godwin Austen), 28,250 ft., 2nd highest in the world. The climate is mostly dry with little rainfall and summer temperatures up to 120° F.

East Pakistan has vast delta areas where the Ganges and the Brahmaputra-Jamuna reach the Bay of Bengal. It has a rainfall up to 100 in. in the monsoon season, July-September.

Islamabad, under construction for 6 years, became the official seat of government in 1967. Rawalpindi had been the interim capital since 1959 when it replaced Karachi as the capital. Ayub Nagar in East Pakistan serves as a 2nd capital.

Resources and Industries. Rice, wheat, cotton, olseeds, tea, tobacco, sugar, flour, wool, jute and fish are important products. Minerals include sulphur, gypsum, salt, chromite, cement, petroleum, gas, coal, asbestos, antimony, magnesite and silica. Pakistan has the world's largest jute production, 5-6,000,000 bales annually, constituting its largest export.

West Pakistan manufactures cotton textiles (its largest industry), wool, silk, rayon, cement, card and paper board, sugar, chemicals, dyes, synthetic fertilizers. East Pakistan manufactures burlap and other jute products, paper, fertilizers, cotton textiles and produces tea.

The Indus Basin irrigation project which Pakistan shares with India, a \$2 billion development aided by Western nations, is scheduled for completion in 1970. The multipurpose Karnafull Dam, largest U. S. aid-financed project in East Pakistan, was inaugurated in 1962.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$900,000	\$601,000
1967	\$1,101,000	\$604,000

History and Government. The land now called Pakistan shares the 5,000-year history of the India-Pakistan subcontinent. At the present day sites of Harappa and Mohenjo Daro, the Indus Valley Civilization, with large cities and elaborate irrigation systems, flourished c. 4000-2500 B.C.

Armies of Alexander the Great invaded regions which are now Pakistan c. 326 B.C.

A lasting influence on Pakistan was the arrival of Islam with the first Arab invasion of 711 A.D.

After World War I the Moslems of British India felt handicapped as a minority and began agitation for minority rights in elections and preservation of communal entities.

Mohammad Ali Jinnah (1876-1948) was the principal architect of the Pakistan state. A lawyer who studied in England, he was a leader of the Moslem League from 1916, and worked for constitutional reform and dominion status for India. Convinced Moslem-Hindu relations in government were irreconcilable, he first advocated a separate Moslem state in 1940.

When the British withdrew Aug. 14, 1947, the Islamic majority areas of India acquired self-government with dominion status in the Commonwealth and Jinnah became the first Governor General (1947-1948). He died in 1948.

After creation of a republic in 1956, President Iskander Mirza briefly took power with the aid of the army in Oct. 1958 but was supplanted that same month by Gen. Mohammad Ayub Khan.

A new 5-level political system was inaugurated June 13, 1959. As amended in 1967, it comprises a pyramidal series of councils called Basic Democracies. It puts Presidential elections in the hands of 120,000 representatives chosen by secret ballot in units of 700-800 voters each.

Gen. Ayub, who had become President in the 1958 coup, became the first elected President on Feb. 17, 1960, under the councils system.

Pakistan's 2nd constitution came into force June 8, 1962, providing for a stronger presidential government and a unicameral legislature, the National Assembly, comprised of 218 members including 8 reserved for women and 10 for "men of outstanding merit."

President Ayub was reelected Jan. 2, 1965. His sweeping land reform, started in 1959, abolished feudalism. Reforms in law and education were also launched.

(See article on India for disputes over Kashmir, Rann of Cutch, etc.)

Education and Religion. About 88% of the population are Moslem. Minorities include 10,000,000 Hindus, 700,000 Christians, and smaller groups of Parsees and Buddhists. Free and compulsory elementary education is a prime goal. There are 12 universities. Of the many languages spoken, Urdu and Bengali are national languages; English is official language.

Defense. Pakistan has an Army, Navy and Air Force, and civil defense units. Army service is voluntary.

Pakistan is a member of the UN, Commonwealth, SEATO and CENTO; has a regional defense agreement with Turkey (1954); mutual defense agreement with the U. S. (1954 and Mar. 5, 1959), and other agreements of trade, friendship, and cooperation with the U. S. By 1965, the U. S. had provided Pakistan with nearly \$4 billion in economic and military aid. Following border warfare between India and Communist China in 1962 and increase in U. S. aid to India, Pakistan made commercial and aid agreements with Communist China

and Indonesia. U. S. aid to both Pakistan and India was suspended during the 1966 war over Kashmir but both economic aid and "nonlethal" military aid were resumed in 1966.

PALESTINE

See Index for Israel, Jordan, United Arab Rep.

Panama

REPUBLICA DE PANAMA

Capital: Panama. Area: 29,298 sq. mi. Population (UN est. 1967): 1,329,000. Monetary unit: Balboa (1 per U. S. \$1).

The Republic of Panama occupies the isthmus of Panama, connecting Central and South America. It is smaller than South Carolina. It has a shoreline of 477 mi. on the Caribbean and a shoreline of 767 mi. on the Pacific. Its width varies from about 37 to 110 mi. It is bounded by Colombia and Costa Rica, and is bisected by the U. S. Canal Zone.

Resources and Industries. Panama has extensive forests, and exports mahogany. Only about half of the rich arable land is cultivated. Sufficient cement, clay and salt are produced for domestic needs. Bananas are the main export, rivaled by products of a large petroleum refinery (which imports crude oil). Also exported are pineapples, cocoa, coconuts, sugar, shrimp.

Due to easy shipping regulations and strictures in the U. S., merchant tonnage registered in Panama since World War II ranks high in size. Registered tonnage of ships 1,000 or more tons Jan. 1, 1967, was 4,574,000 gross tons.

History and Government. The coast of Panama was discovered by Rodrigo de Bastidas, sailing with Columbus for Spain in 1501, and was visited by Columbus in 1502. Vasco Nunez de Balboa crossed the isthmus and "discovered" the Pacific Ocean Sept. 13, 1513. Spanish colonies were ravaged by Francis Drake, 1572-95, and Henry Morgan, 1668-71. Morgan destroyed the old city of Panama which had been founded in 1519. Freed from Spain, Panama joined Colombia in 1821. Separatist forces in Panama sought to gain independence from Colombia several times.

Panama declared its independence from Colombia Nov. 3, 1903, with U. S. recognition. U. S. Naval forces discouraged action by Colombia. On Nov. 18, 1903, Panama granted use, occupation and control of the Canal Zone to the U. S. by treaty, ratified Feb. 26, 1904. (See also Canal Zone and Panama Canal.)

Panama adopted universal suffrage in 1945 and its third constitution in 1946. The National Assembly (one for every 15,000 pop.) is elected for four years. Panama is a member of UN and OAS.

Rioting began Jan. 9, 1964, in a dispute over the flying of the U. S. and Panamanian flags and terms of the 1903 treaty. A joint declaration by the two governments Apr. 3, 1964, called for action to pave the way for peaceful negotiations. The International Commission of Jurists in Geneva absolved the U. S. of violating human rights in the rioting which killed at least 21 Panamanians and three U. S. soldiers.

U. S. President Johnson proposed on Dec. 18, 1964, that the two nations negotiate new treaties. Panama President Marco Aurelio Robles hailed the proposal. In 1967 new treaties were negotiated under which the U. S. would give up sovereignty over the canal to a U. S.-Panamanian authority, the U. S. would provide military defense for the canal, and construction of an additional canal might be undertaken. In 1968 the treaties still awaited ratification by the two governments.

In a bitter election, May 12, 1968, Dr. Arnulfo Arias was elected President, defeating a candidate backed by President Robles. Both sides charged widespread fraud and the election results were not announced until May 30.

Education and Religion. The Roman Catholic religion prevails but other faiths have representation. Education is compulsory for all children between 7 and 15. The National and Santa Maria de Antigua Universities are in Panama City. Spanish is the official language and its use is compulsory.

Paraguay

REPUBLICA DEL PARAGUAY

Capital: Asuncion. Area: 157,047 sq. mi. Population (UN est. 1967): 2,161,000. Monetary unit: Guaraní (126 per U. S. \$1).

Paraguay, one of the two landlocked countries of South America, is bounded by Bolivia, Brazil, and Argentina. The extensive plains are excellent

for pasturage and agriculture, and the mountain slopes are covered with luxuriant forests. It is about the size of California and is one of the best watered countries in the world. The Paraguay River, the Republic's most important waterway, is 1,800 mi. long.

Resources and Industries. Timber resources are large. Iron, manganese, copper are largely unexploited. Most of the population is agricultural and pastoral, with cattle breeding the principal industry. Most important agricultural crops are corn, mandioca (starch), cotton, beans, peanuts, tobacco and citrus fruits.

Chief exports are beef and other food products: cotton, quebracho (hardwood), hides, tobacco, yerba mate (tea), vegetable oils.

Completion of roads in the western Chaco cattle country (1964) and to the Brazilian port of Paraguary (1965) helped boost exports, which rose from \$40,000,000 in 1963 to \$57,000,000 in 1965. Imports rose from \$33,000,000 in 1963 to \$48,000,000 in 1967.

History and Government. Visited by Sebastian Cabot, 1527; settled as a Spanish possession in 1535. Paraguay gained its independence from Spain in 1811, was governed by a dictator from 1815-1840. After fighting Brazil, Argentina and Uruguay (War of the Triple Alliance 1865-1870) it adopted in 1870 a democratic constitution.

A new constitution, adopted in Aug. 1967, provided for a President and a bicameral legislature, a Senate of 30 members and a House of Representatives of 60 members. The party polling the largest number of votes in Congressional elections receives two-thirds of the seats in the Senate and the House, the rest to be divided proportionately among other contending parties. There is a 3-man Supreme Court and lower courts.

In elections held Feb. 11, 1968, Gen. Alfredo Stroessner, who had ruled Paraguay since 1954, was reelected President.

Education and Religion. The Roman Catholic religion is established, but others are tolerated. Primary education is compulsory between the ages of 7 and 14. Spanish is the official language and Guarani, an ancient Indian tongue, is the national language.

Peru

REPUBLICA DEL PERU

Capital: Lima. **Area:** 496,222 sq. mi. **Population** (UN est. 1967): 12,385,000. **Monetary unit:** Sol (38.7 per U. S. \$1).

Peru, on the Pacific coast of South America, is bounded by Ecuador, Colombia, Brazil, Bolivia, Chile and the Pacific. It has a Pacific coastline of 1,410 mi. and an extreme width, from western coast to eastern jungle, of about 800 mi. It is about the size of Arizona, New Mexico and Texas combined.

Here the Andes reach 22,205 ft. (Mt. Huascarán); 7 peaks tower above 19,000 ft. The uplands of western slopes of the Andes are well watered as are the eastern slopes and lowlands reaching the Amazon basin, where the port of Iquitos loads ocean-going vessels for a 2,300 mi. trip down the Amazon through Peru and Brazil.

The coastal area on the west is almost rainless, but the soil is fertile and irrigation, using rivers pouring down from the Andes, has made the area highly productive.

Lima, the capital, is in the coastal region and is also the nation's commercial center. Callao, the chief seaport, is 7 mi. west of Lima.

Inca and earlier Chimu ruins make Peru a mecca for archeologists, notably at Cuzco, Chan Chan and the Andean city of Machu Picchu.

Resources and Industries. Agriculture and stock raising occupy 58% of the population and farm products comprise 47% of the value of exports.

The leading agricultural product is cotton. About 100,000 persons are engaged in the industry. Wool, hides, skins, sugar, coffee, rice, potatoes, beans, barley and tobacco also are produced. Corn, native to Peru, is a staple food among Indians, who also raise alfalfa. Peruvian bark is used for drugs.

Peru is the world's top fishing nation; of the 46,600,000 tons of fish caught by all nations in 1964, Peru took in 6,901,300 tons, mostly anchovies from the plankton-rich waters of the coastal Peru current. Most of the take is ground into fish meal for poultry and livestock feed. Guano, from birds which feed on offshore fish, is used for fertilizer.

The mountains are rich in minerals and many valuable mines, some dating back to the Incas, are being worked. The Toquepala copper mine

in the southern Andes, being worked by American companies, is one of the world's largest; another is at Cerro de Pasco. The steel industry is expanding. Petroleum production is growing; it reached over 23,000,000 bbl. in 1964.

Fishmeal is the largest export with copper 2nd. Other exports are cotton, sugar, iron ore, lead.

With its large fishing industry, Peru claims jurisdiction over Pacific waters 200 mi. offshore.

History and Government. The powerful Inca empire had its seat at Cuzco in the Andes (alt. 11,000 ft.) when Francisco Pizarro, Spanish conquistador, began raiding Peru for its wealth. In 1532 he had the ruling Inca, Atahualpa, fill a room with gold, then executed him and enslaved the natives. In 1535 he established Lima and in 1537 its port, Callao. War with Incas and rival Spaniards resulted in Pizarro's assassination, 1541, and the execution of his half-brother, Gonzalo, 1548.

Lima was the seat of Spanish viceroys until the Argentine liberator, Jose de San Martin, captured it in 1821; Spain was defeated by Simon Bolivar and Antonio J. de Sucre and recognized Peruvian independence, 1824. Chile defeated Peru and Bolivia, 1879-84, and took Tarapaca, Tacna and Arica; returned Tacna, 1929.

The constitution of 1933 provides for a president and two vice presidents, elected by direct suffrage for 6-yr. terms. Congress is composed of a chamber of deputies (members must be 25 or over) and a senate (members 35 or over), all native-born Peruvians, for 6-year terms.

Education and Religion. Religious liberty prevails but the Roman Catholic religion is protected.

About 47% of the population is Indian; most of the remainder are of Spanish descent, or mestizos (mixed), with small percentages of Negroes, Chinese and Japanese.

Education is free and compulsory between 7 and 14. The University of San Marcos (founded 1551) is one of the oldest in the western hemisphere. There are 8 other universities.

Spanish is the official language, but many Indians speak Quecha or Aymara.

Defense. Military service is compulsory with two years in the active army, 5 years in the first reserve, 5 in the second reserve and 20 years in the National Guard. Peru has a modern Navy and Air Force. It is a member of the UN and OAS.

Philippines

REPUBLIKA NG PILIPINAS

Capital: Quezon City (Luzon). **Area:** 115,707 sq. mi. **Population** (UN est. 1967): 34,656,000. **Monetary unit:** Peso (3.92 per U. S. \$1).

The Republic of the Philippines occupies an archipelago in the western Pacific, 500 mi. from the SE coast of Asia, 7,000 mi. from San Francisco. About 7,100 islands extend 1,150 mi. N to S, 682 E to W.

Eleven of the islands comprise the bulk of the area. Only 462 islands have areas of more than 1 sq. mi. The country is about the size of Arizona.

The archipelago has a coastline of 14,407 mi. Manila Bay, with an area of 770 sq. mi., and a circumference of 120 mi., is the finest harbor in the Far East.

There are 10 more or less active volcanoes. Mount Apo, 9,690 ft., in Mindanao, and Mayon Volcano, 7,943 ft. in Albay, are the best known.

Quezon City, near Manila, is the official capital, but pending completion many government offices remain in Manila.

Resources and Industries. Agriculture, livestock, mining, lumbering and fishing are the main activities. Forests, which cover 42% of the area, provide cabinet and construction lumber, also gums and resins, vegetable oils, rattan and bamboo, tan and dye barks, beeswax, charcoal, medicinal plants and orchids.

The islands are rich in mineral resources. Gold, silver, lead, zinc, nickel, copper, iron, coal, chromite, asbestos and manganese are mined, as well as clay, marble and salt.

The chief agricultural products are manila hemp from abaca, copra, sugar, rice, corn and tobacco.

Tourists numbered 116,000 in 1967.

In 1967 the nation scored significant growth in all fields, particularly in production of new "miracle" varieties of rice, achieving self-sufficiency in that staple for the first time in half a century.

History and Government. The archipelago was visited by Magellan 1521. The Spanish founded Manila 1571 and began their conquest. The islands, named for King Philip II of Spain, were ceded to

the U. S. by the Treaty of Paris (Dec. 10, 1898), following the Spanish-American War, the U. S. paying Spain \$20,000,000 for the territory.

Japan attacked the Philippines Dec. 8, 1941 (Far Eastern time). Gen. Douglas MacArthur was put in command of the U. S.-Filipino forces (15,000 Americans, 40,000 in Filipino army, 100,000 Filipino reservists). Japan conquered the islands in May, 1942, and was ousted by Sept. 1945.

On July 4, 1946, independence was proclaimed in accordance with the Tydings-McDuffie Act passed by the U. S. Congress in 1934, providing for Philippine independence in 1946.

The government is republican in form, founded on democratic principles. The constitution provides for a Congress consisting of a Senate of 24 members, elected at large to 6-year terms, and a House of Representatives apportioned among the 56 provinces according to population, with a maximum membership of 120, elected to 4-year terms.

The terms of the President and Vice President are 4 years, and the President may be re-elected only once.

All natural resources of the Philippines belong to the state and their exploitation is limited to citizens of the Philippines or corporations and associations of which 60% of the capital is owned by citizens. In 1946 the right to develop natural resources and to own and operate public utilities until 1974 was extended to U. S. citizens.

President Ferdinand E. Marcos visited the U. S. Sept. 1966; concluded pact reducing U. S. base leases from 99 to 25 years and was promised increased military and technical aid.

The Philippines maintains a contingent of troops, mostly engineers, in Vietnam.

Education and Religion. Primary and secondary education is free, instruction is in English. Institutions of higher education include the University of the Philippines, Far Eastern Univ., Univ. of Santo Tomas (founded 1611), and Silliman Univ.

The official national language is Filipino (Pilipino), based on Tagalog, a Malayan dialect. English and Spanish, also official, are commonly used in government and commerce.

About 83% of the inhabitants are Roman Catholics and about 10% belong to the Philippine Independent Church, organized by a Filipino priest, Fr. Gregorio Aglipay. Other Christians, Moslems, Buddhists are among minorities.

Defense. The Philippines and U. S. have treaties for U. S. military and naval bases and a 1951 Mutual Defense Treaty, pledging joint action against external attack. The Republic is a member of the UN and SEATO.

Poland

POLSKA RZECZPOSPOLITA LUDOWA

Capital: Warsaw. Area: 120,664 sq. mi. Population (UN est. 1967): 31,944,000. Monetary unit: Zloty (4 official rate per U. S. \$1).

Poland, Polish People's Republic, in Central Europe, is bounded by the Baltic Sea, USSR, Czechoslovakia and East Germany. It is about the size of New Mexico.

Its terrain consists largely of lowlands. Gdania, Gdansk (once Danzig), Szczecin, Swinoujscie and Kolobrzeg are the principal ports.

Resources and Industries. In 1966, 35.5% of the population engaged in agriculture. Chief crops are rye, wheat, barley, oats, potatoes, sugar beets, tobacco, flax. Coal mining, shipbuilding, textiles chemicals, woodworking and metal industries are important. New industries include automobiles, tractors, heavy machinery, aircraft. Key industries are nationalized and operate under a planned economy. Rate of industrial growth is estimated at 8% annually in recent years.

Poland possesses great mineral wealth. It produces 5% of world coal and zinc output. Other minerals are sulphur, cement, salt, calcium, iron, copper. Imported raw materials supply aluminum plants and oil refineries.

History and Government. Poland, whose history dates from 968, was a great power from the 14th to the 17th Centuries. In 3 partitions (1772, 1793, 1795) it was apportioned among Prussia, Russia and Austria, and in 1939 between Germany and the USSR. Overrun by the Austro-German armies in World War I, its independence, self-declared on Nov. 11, 1918, was recognized by the Treaty of Versailles, June 28, 1919, and the Treaty of Riga.

Nazi Germany and the Soviet Union invaded Poland Sept. 1-27, 1939, and divided the country. With Germany's defeat, a Polish government-in-exile in London was recognized by the U. S., but

the Soviet Union pressed the claims of a Lublin group, the Polish Committee of National Liberation, to which a few members of the London committee were admitted. The U. S. and Britain opposed it but compromised with Stalin when he agreed to free elections in Poland. However, he rejected international supervision and the election of 1947 was completely dominated by the Communists.

Before World War II, Poland's population was 34,775,698 and its area 150,470 sq. mi. In compensation for 69,860 sq. mi. ceded to the USSR, 1945, Poland received approx. 40,000 sq. mi. of German territory east of the Oder-Neisse line comprising Silesia, Pomerania, West Prussia and part of East Prussia. This has not been recognized by the West.

The 1952 constitution describes Poland as a people's republic with a Sejm (Parliament) elected for 4-year terms by direct ballot. The Sejm elects a Council of State and a Council of Ministers (cabinet). The office of president was abolished.

During 12 years of rule by Stalinist extremists large estates were abolished, industry was nationalized, schools secularized and some Roman Catholic prelates jailed. Farm production fell off. Harsh working conditions caused a riot by workmen in Poznan June 28-29, 1956, which was suppressed by troops with 44 dead, hundreds injured and 1,000 imprisoned.

A new Politburo, committed to development of Polish Communism independent of Russian control, was elected Oct. 1956, with Wladyslaw Gomulka as First Secretary of the Communist party.

Beginning in March 1968, following student unrest, a purge of many old-line party officials, including numerous Jews, was launched. It was believed led by a nationalist wing within the party. The "anti-Zionist" feature of the purge was denied; Gomulka sought to moderate the campaign.

Education and Religion. Education is free and compulsory. There are 74 institutions of higher learning. Leading universities are at Warsaw, Lodz, Torun, Poznan, Krakow, Lublin and Wroclaw (Breslau).

Roman Catholicism is the chief religion. A law promulgated Feb. 13, 1953, requires government consent to high church appointments. In October, 1956, Gomulka released Stefan Cardinal Wyszynski from prison and agreed to permit religion in the schools, religious liberty in public institutions and religious publications, provided the church kept out of politics. A large percentage of the people are said to attend services regularly.

In 1966 the Government celebrated 1,000 years of Polish nationhood and the Roman Catholic Church celebrated the 1,000th anniversary of the nation's conversion to Christianity. Cardinal Wyszynski led pilgrimages in several Polish cities, attended by hundreds of thousands of worshippers. The Government held rival demonstrations, also heavily attended. The Government staged a huge military review in Warsaw in July but barred a pilgrimage in the capital city in Aug. It also barred the Cardinal from visiting the Vatican, the U. S. and Canada.

Defense. Military age extends from 19 to 50. In 1950 the Army was reorganized along Soviet lines. Officers are required to learn Russian. Strength of the armed forces is estimated at 370,000. The Navy has one cruiser, 6 destroyers, 9 submarines and other craft. The Air Force has an est. 50,000 personnel and 1,000 aircraft.

Poland is a UN and Warsaw Pact member.

Portugal

REPUBLICA PORTUGUESA

Capital: Lisbon. Area: 35,510 sq. mi. Population (UN est. 1967): 9,440,000. Monetary unit: Escudo (28.84 per U. S. \$1).

Portugal occupies the W part of the Iberian Peninsula in SW Europe, and is bounded by Spain and the Atlantic. It is about the size of Indiana. The Azores Islands, in the Atlantic 740 mi. W of Portugal, have an area of 888 sq. mi. and population (1960) of 336,393. The Madeira Islands, 360 mi. off the NW coast of Africa, have an area of 308 sq. mi. and a population (1960) of 282,678. Other overseas areas in Africa, Asia and Oceania (see below) are provinces, having equal status with provinces of continental Portugal.

Portugal is mountainous. About two-thirds of the land is cultivated.

Resources and Industries. Wheat, corn, oats, barley, rye and rice are important crops. Wines, olive oil, sardines, anchovies, resins and fruits are major industries. Forests of pine, oak and chestnut cover 19% of the country, and the nation leads the world in cork production. Portugal

has lead, copper, tin, wolfram, kaolin, sulphur, iron, tungsten and cement. Textiles, pottery, chemical products, paper and glassware are principal manufactures.

The Salazar Bridge spanning the Tagus River in Lisbon, opened Aug. 5, 1966. The longest suspension bridge in Europe, it has a main span of 3,323 ft. and cost \$75,000,000.

History and Government. Portugal, an independent state since the 12th Century, was a kingdom until a revolution in 1910 drove out King Manoel II and a republic was proclaimed.

A new constitution adopted by a plebiscite in 1933 and several times amended, provides some features of a corporative state. Two assemblies of 120 members each were created—the first, the National Assembly, to exercise legislative powers, by direct election by heads of families regardless of sex for 4 years; the second, the Corporative Chamber, chosen through a system of guild or syndical representation. The Corporative Chamber deals with economic and social matters, and advises the National Assembly. The Assembly may override a Presidential veto by a two-thirds vote.

The President is elected for 7 years, the method of selection since 1959 being by an electoral college composed of members of the Assembly and Chamber and representatives from the various districts.

The government's National Union party has been in power since 1934. Antonio de Oliveira Salazar has been Premier since 1932.

The President is Rear Admiral Americo Rodrigues Thomaz, elected June 9, 1958, reelected June 25, 1965.

Education and Religion. The dominant religion is Roman Catholicism; there is freedom of worship. Primary education is compulsory. There are 5 universities, 3 university schools, 4 colleges of music, 43 lycées, a number of technical and art schools. Portugal went on year-long daylight saving time in 1966.

Defense. Military service is compulsory between the ages of 20 and 45. There is a small Navy, and an Air Force equipped with modern jet fighters. During World War II Portugal granted facilities in the Azores to U. S. and British Air Forces. A 1951 agreement gave the U. S. additional rights in the Azores for defense purposes and integrates the islands into the framework of NATO. Portugal is a member of NATO, UN and EFTA.

Faced with intermittent rebel attacks in its African provinces, Portugal has sought to convince Africans there that they enjoy greater economic progress than if independent, while developing school and health facilities.

The small Portuguese enclaves of Goa, Damão and Diu on the Indian sub-continent were seized by India Dec. 18, 1961.

PORTUGUESE OVERSEAS PROVINCES

Angola, Portuguese West Africa, has a 1,000 mi. coast line stretching S from the mouth of the Congo. It is governed by a Governor General and an elected Legislative Council. The Portuguese have owned it since 1575. Its area is 481,351 sq. mi., population (UN est. 1965), 5,154,000, including about 250,000 Europeans. The capital is Luanda.

In 1968 a pipeline was being laid to tap huge supplies of oil discovered in Angola's northern coastal area, Cabinda.

Chief products are coffee, fishmeal, corn, sisal, fish, sugar, cotton, coconuts, oilseeds, ivory, cattle, tobacco, rubber. There are deposits of diamonds, copper, iron, manganese, petroleum, mica, salt. Gold has been discovered. Manufacturing of alcohol, cotton goods, fish products, paper, footwear, soap, sugar, tobacco is growing. Metropolitan Portugal supplies nearly 50% of the imports. Lobito, an Atlantic seaport, is western terminal of a railroad reaching Beira in Mozambique.

Mozambique, Portuguese East Africa, faces the Indian Ocean and Mozambique Channel in SW Africa. More than 400 sq. mi. of former German E. Africa, the Klunga Triangle, was transferred to Mozambique in 1919.

Mozambique has 297,731 sq. mi., and a population (UN est. 1965) of 6,956,000. The capital is Lourenço Marques. Chief products are cement, flour, sugar, coconuts, cotton, copra, sisal, and beeswax. Minerals include tantalum, columbian, coal, copper, gold, asbestos.

The Cape Verde Islands in the North Atlantic, 280 mi. W of Dakar, Africa, are 15 in number. The total area is 1,557 sq. mi. and the population (UN est. 1964), 218,000. Chief products are coffee, medicinal products, hides, fruits and grain.

Portuguese Guinea, on the W coast of Africa between Senegal and Guinea, has an area of 13,948 sq. mi. and a population, 1962, of 549,000. Chief exports are wax, oils, ivory and hides.

The Islands of Sao Tome and Principe are about 125 mi. off the W coast of Africa on the Gulf of Guinea. The islands have an area of 372 sq. mi.; population 1960, 63,676. Chief products are cocoa, coffee, coconut, copra, palm oil and cinchona.

Macao, with an area of 6 sq. mi., is an enclave, a peninsula and two small islands, at the mouth of the Canton River in China. Population (UN est. 1965): 280,000.

Portuguese Timor occupies the E part of an island of that name N of Australia in the Timor Sea. Indonesia owns the W part. The area is 7,330 sq. mi. and the population, 1967, 870,000. Exports are coffee, sandalwood, sandal root, copra and wax. Capital, Dili.

Romania

REPUBLICA SOCIALISTA ROMANIA

Capital: Bucharest. **Area:** 91,699 sq. mi. **Population (Census 1968):** 19,540,000. **Monetary unit:** Leu (pl. lei) (6, official rate, per U. S. \$1).

Romania, a Balkan state in SE Europe, is almost the size of Oregon. It is bounded by the USSR, the Black Sea, Bulgaria, Yugoslavia and Hungary. The Danube flows along the southern border and through eastern Romania into the Black Sea. The Carpathian Mts. enclose the north-central Transylvanian plateau. There are wide plains S and E of the mountains.

Resources and Industries. Romania has become heavily industrialized, industry accounting for 51.3% of the total national product in 1967. Average annual growth of industrial output, 1951-1967, was 13.2%.

Main industries are iron-steel, other metallurgy, machinery, oil and chemicals, building materials, timber, textiles, footwear, food processing.

There is considerable mineral wealth: oil, natural gas, coal, salt, bauxite, manganese, lead, zinc, gold, silver. Annual production (1967) was 13,206,000 tons of crude oil, 15,019,000 tons of coal, 4,088,000 tons of steel.

Farm and forests contributed 29% of the national product, 1967. State farms and cooperatives own 96.4% of arable land. Romania is the world's 6th largest corn producer; also important are wheat, sugar beets, grapes and fruits.

In Jan. 1968 Romania had 14,300,000 sheep, 5,739,000 hogs and 5,331,000 cattle.

Exports in 1967 were valued at \$1.4 billion, imports at \$1.5 billion.

History and Government. Romania's earliest known people were merged with invading Proto-Thracians, preceding by centuries the Dacians. The Dacian kingdom was occupied by Rome 101 A.D.-271 A.D.; the people and language were Romanized. The principalities of Wallachia and Moldavia, dominated by Turkey, were united in 1859; became Romania in 1861. In 1866 the house of Hohenzollern-Sigmaringen placed a prince in control. In 1877 Romania proclaimed independence from Turkey, became an independent state by the Treaty of Berlin, 1870, and kingdom, 1881, under Carol I. In 1886 Romania became a constitutional monarchy with a bicameral legislature.

Romania's location on the border of warring states made it a frequent victim of strife. It helped Russia against Turkey, 1877-78. It was defeated by Germany and Austria-Hungary in World War I, 1914-15; later rejoined the Allies and won Bessarabia, Bukovina, Transylvania and Banat. In 1940 it ceded Bessarabia and Northern Bukovina to the USSR and part of Southern Dobruja to Bulgaria.

King Carol II made himself dictator in 1938, abdicated 1940 (died 1953). Michael I (born Oct. 25, 1921) became king 1940.

Marshal Ion Antonescu, leader of militarist movement, came to power and forced Romania to join Germany against the USSR in World War II in 1941. In 1944 Antonescu was overthrown by King Michael with Soviet help and Romania joined the Allies.

With occupation by Soviet troops the National Democratic Front, headed by the Communist party, displaced the National Peasant party. A People's Republic was proclaimed, Dec. 30, 1947, and Michael was forced to abdicate. Land owners were dispossessed and practically all banks, factories and transportation units were nationalized. A new constitution on the Soviet model was voted Sept. 24, 1952. A modification,

March 1961, replaced the Presidium with the State Council, elected by the Grand National Assembly from its own membership. The Assembly, supreme organ of state power, has 465 Deputies, elected for 4-year terms from one-list states.

On Aug. 22, 1965, a new Constitution proclaimed Romania a Socialist, rather than People's Republic. Since 1966, Romania has adopted an increasingly independent attitude toward the USSR and for greater control of their own armed forces within the Warsaw Pact.

Education and Religion. Education is compulsory for 10 years, all education is free. There are universities in Bucharest, Jassy, Cluj, Craiova and Timisoara.

The language has a Latin base, with traces of French, Greek, Slav and Turkish influences.

Romanian Orthodox clergy are paid by the state, other clergy receive subsidies but church and state are called separated. Roman Catholic orders have been abolished and the Greek Catholic Church has been absorbed by the Romanian Orthodox.

Defense. Military service is compulsory for 16 months. Romania has a small Navy and Air Force. It is a member of the UN and Warsaw Pact.

Rwanda

REPUBLIQUE RWANDAISE

Capital: Kigali. **Area:** 10,166 sq. mi. **Population** (Govt. est. 1967): 3,306,000. **Monetary unit:** Franc (100 per U. S. \$1).

The Republic of Rwanda, which became independent July 1, 1962, had been part of the former Belgian UN Trusteeship of Ruanda-Urundi. Rwanda lies in East Central Africa, bounded N by Uganda, E by Tanzania, W by the Democratic Republic of Congo and S by Burundi.

The source of the Nile River, long sought by explorers and geographers, has been located in the headwaters of the Kagera River, SW of Kigali; from there it is 4,145 mi. to where the Nile empties into the Mediterranean.

About the size of Maryland, Rwanda is the most densely populated country in Africa. The population includes the Bahutu (90% of population), the Batutsi (Watusi, 8%) and the Batwa (2%). For centuries the Batutsi (an extremely tall race) subjugated the Bahutu (average height) and the Batwa (pygmies). A civil war broke out in 1960 and Batutsi power was ended. See *Index for Burundi*.

A Legislative Council, organized in Oct. 1960, declared Rwanda a republic Jan. 28, 1961, and a referendum, Sept. 25, abolished the monarchic system. The new government was dominated by the Bahutu. President: Gregoire Kayibanda, elected Oct. 26, 1961. Rwanda is a member of the UN and OAU.

Coffee is the principal crop; cotton, tea, pyrethrum, tobacco, cattle and hides also are produced. Minerals include tin, gold, wolframite.

Kagera National Park, in the northeast, covers a tenth of the country; here the flora and fauna of East Central Africa are preserved intact. Lake Kivu, on the nation's western border with the Democratic Republic of Congo, is 4,788 ft. above sea level and considered one of Africa's most beautiful. Rwandans are noted for performances on massed drums, accompanied by singers and dancers.

San Marino

REPUBBLICA DI SAN MARINO

Area: 23.5 sq. mi. **Population** (est. 1966): 17,000.

San Marino, the world's smallest republic, lies on the slope of Mt. Titano in the Apennines near Rimini, in the heart of Italy. It is one-third the size of the District of Columbia.

Principal industries are printing postage stamps, tourism, woolen goods, paper, cement, industrial ceramics. There is no unemployment. Cradle-to-grave social security is provided. Italian and Vatican City money is used. A ceremonial army of 180 men is maintained.

History and Government. The Republic claims to be the oldest state in Europe and to have been founded in the 4th Century. It has had a treaty of friendship with Italy since 1862. It is a member of the International Court of Justice.

San Marino is governed by a Grand Council of 60 members elected by popular vote, two of whom are chosen to exercise executive power for a term of 6 months. Women were allowed to vote for the first time Sept. 13, 1964.

Saudi Arabia

AL-MAMLAKA AL-'ARABIYA AS-SA'UDIYA

Capital: Riyadh. **Area:** 870,000 sq. mi. **Population** (Govt. est. 1963): 8,000,000. **Monetary unit:** Riyal (4.5 per U. S. \$1).

Saudi Arabia occupies four-fifths of the Arabian Peninsula, with the Red Sea on most of its W coast and the Persian Gulf (also called Arabian Gulf) on the E. The highlands of the W, up to 9,000 ft., slope as an arid, barren desert to the Persian Gulf. Its neighbors are Jordan, Iraq, Kuwait, Muscat and Oman, Southern Yemen and Yemen. It is more than three times the size of Texas.

Saudi Arabia comprises four provinces: the former sultanate of Nejd, the kingdom of Hejaz, Asir and El Hasa (now known as the Eastern Province).

The Hejaz contains the holy cities of Islam—Medina where the Mosque of the Prophet enshrines the tomb of Mohammed, who died in the city June 7, 632, and Mecca, his birthplace, containing a great mosque sheltering the sacred shrine, the Kaaba, which holds the black stone given by Gabriel to Abraham. More than 300,000 Moslems visit Mecca annually.

Two major airports, Dhahran and Jidda, handle the bulk of international traffic. Jidda, on the Red Sea, is the main seaport. A 357-mi. railroad runs from Dammam on the Persian Gulf to Riyadh.

Resources and Industries. Saudi Arabia possesses one of the great oil reservoirs of the world second only to that of Kuwait in the Middle East. Production centers along the Persian Gulf at Ghawar, Abqaiq, Safaniya, Dammam, Qatif and Khursaniyah. Refineries and piers for tankers are at Ras Tanura, and a pipeline runs from Abqaiq to Saida on the Lebanese coast. Operations are in the hands of the Arabian American Oil Co. (Aramco), owned by several American companies; Getty Oil Co., and Arabian Oil Co., Ltd. (Japan). Production is valued at over \$1.1 billion a year and is about 7% of world output.

Income from oil royalties defrays many expenses of the state, the cost of internal improvements and free medical care for its citizens.

An agricultural country except for oil, and recently discovered gold, silver and rich iron ore, Saudi Arabia's products are dates, wheat, barley, fruit, hides, wool. Camels, horses, donkeys and sheep are raised. Some hides, wool and gum are exported. It receives UN technical assistance.

History and Government. Nejd, long an independent state and center of the Wahhabi sect, fell under Turkish rule in the 18th Century, but in 1913 Ibn Saud, founder of the Saudi dynasty, overthrew the Turks and captured the Turkish province of Hasa; took the Hejaz in 1925 and by 1926 most of Asir.

The form of government is a hereditary monarchy. King Saud Ibn Abdul Aziz (born 1902) who succeeded his father Nov. 9, 1953, was stripped of his powers after a family council, Mar. 28, 1964, but was allowed to retain his title. Crown Prince Faisal, the King's half-brother, assumed the title of Viceroy; on Nov. 2, he was named King in place of Saud.

Education and Religion. Elementary, secondary and higher education are free, but not compulsory.

Development of education is extensive, taking more than 10% of the government budget. The population is almost entirely Moslem.

Defense. Saudi Arabia's defense force consists of a regular Army and a military academy to train officers. It is a member of the UN and Arab League.

Saudi Arabia and the United Arab Republic opposed each other during 3 years of warfare in Yemen, with Saudi Arabia supplying arms and other aid to the royalists and Pres. Gamal Abdel Nasser providing troops to fight for the republicans. King Faisal and Pres. Nasser reached another in a series of cease-fire agreements Aug. 24, 1965, with negotiations continuing in 1966 and 1967. In 1968, King Faisal said he would resume aid to the royalists, charging Syria, Russia and Southern Yemen with intervention.

Senegal

Capital: Dakar. **Area:** 75,750 sq. mi. **Population** (UN est. 1967): 3,670,000. **Monetary unit:** CFA franc (246.85 per U. S. \$1).

A former French Overseas Territory on the Atlantic coast of western Africa, Senegal has for neighbors Mauritania, Mali, Guinea and Portuguese Guinea and it almost surrounds tiny Gambia on 3 sides. It is about as large as South Dakota.

Senegal became an autonomous state in 1958 and with the Sudanese Republic formed the Mali Federation Jan. 17 1959. The two members became completely independent June 20, 1960, but after political conflict arose Senegal withdrew from the federation Aug. 20, 1960. The Sudanese Republic assumed the name Mali. Senegal elected to remain within the French Community. It is a member of the UN.

About 85% of the population is engaged in agriculture and stock raising; peanuts are the mainstay of the economy. Dakar on Cape Verd, is an important seaport, handling 4,000 ships annually. There are important deposits of aluminum phosphate. Developing industries include food processing, chemicals, cement.

Efforts were pressed, 1967-68, to increase production of rice, the staple food, most of which had to be imported. A team of experts from Nationalist China was aiding the effort. Other crops were also being promoted.

Sierra Leone

Capital: Freetown. Area: 27,699 sq. mi. Population (UN est. 1967): 2,439,000. Monetary unit: Leone (.8333 per U. S. \$1).

Sierra Leone, former British Colony and Protectorate which became an independent state within the Commonwealth Apr. 27, 1961, is in the SE corner of the West African bulge. The coast line on the Atlantic is about 210 mi.; the country extends inland about 180 mi., between Guinea and Liberia. It is a bit smaller than South Carolina. Its name, meaning Mountain of the Lion, was applied by an early Portuguese mariner because of thunderstorms around its coastal peaks.

Freetown, the capital, was founded in 1787 by the British government as a home for destitute freed slaves. Their descendants, known as Creoles, number more than 50,000. The city has one of the finest seaports in West Africa.

Principal exports are industrial diamonds, iron ore, bauxite, cocoa, coffee, palm kernels, kola nuts, ginger, piasava (palm fiber). More than 80% are employed in agriculture.

Successive steps toward independence followed introduction of the first constitution in 1951. The Sierra Leone People's party was dominant until a military coup d'état Mar. 23, 1967.

The coup followed general elections in which the vote was almost equally divided between the People's party and the All People's Congress.

Col. A. T. Juxon-Smith, who led the coup, was himself ousted in another coup, Apr. 8, 1968, led by non-commissioned officers. The nation was returned to civilian rule with swearing-in of Siaka Stevens as Prime Minister, Apr. 26. Stevens, head of the All People's Congress party, had been Prime Minister for two hours at the time of the 1967 coup.

Sierra Leone is a member of the UN.

The Univ. College of Sierra Leone was founded in 1876 as Fourah Bay College. Njala Univ. was founded in 1964 with the aid of the Univ. of Illinois. English is the official language.

Singapore

MAJULAH SINGAPURA

Capital: Singapore. Area: 225 sq. mi. Population (Govt. est. 1967): 1,955,600. Monetary unit: Singapore dollar (3.07 per U. S. \$1).

Singapore is an independent island republic 27 mi. wide and 14 mi. long at the southern tip of the Malay Peninsula in SE Asia. About 3 times the size of the District of Columbia, the main island is linked to the mainland by a three-quarter mile-long causeway. The narrow Strait of Singapore separates it from several of its islets to the south.

Singapore, the capital, is the world's 4th largest port and the largest in SE Asia.

Founded in 1819 by Sir Thomas Stamford Raffles, Singapore was a British colony until 1959 when it became an internally autonomous state within the Commonwealth. On Sept. 16, 1963, it joined with Malaya, Sarawak and Sabah to form the Federation of Malaysia. The new state vested control in the Malays, although with Singapore, the Chinese formed the largest ethnic group in Malaysia's population. Racial and political tensions developed and both Singapore and Malaysian officials agreed that separation was the only way to solve the problem. Prime Minister Lee Kuan Yew, Aug. 9, 1965, in announcing the separation, stated that Singapore would continue its cooperation with Britain in defense matters but would

seek new understandings with Indonesia and Communist nations. Britain maintains its largest military base in the Far East at Singapore.

Singapore's population is 75% Chinese, 12% Malay and 13% Indians, Pakistanis, Ceylonese, Eurasians, etc. Industries include ship building, tin smelting, and food, rubber, copra and lumber processing.

Tourism is an important source of income; 204,852 visitors in 1967 (59% above 1966) spent an est. \$47,270,400 (U. S. dollars). Attractions include festivals, foods, Tiger Balm Gardens, some 500 Chinese temples, the harbor with its junks and sampans and Malay sea villages.

Primary education for 6 years is free but not compulsory. There are two main units: Singapore and Nanyang. A small army of 4 infantry battalions is maintained in addition to the police force of over 7,000. Singapore is a member of the Commonwealth and the UN.

Somalia

SOMALI REPUBLIC

Capital: Mogadishu. Area: 246,201 sq. mi. Population (UN est. 1967): 2,660,000. Monetary unit: Somali shilling (7.143 per U. S. \$1).

The Somali Republic is comprised of the former protectorate of British Somaliland and the former Italian UN trusteeship of Somalia in eastern Africa. It is bordered by the Gulf of Aden, Indian Ocean, Kenya, Ethiopia and French Somaliland. It is about the size of Texas. Chief ports are Berbera, Mogadishu, and Kismayu.

Resources and Industries. Somalia has a weak economy of its own and depends on outside aid, part of which is being received from the United States, Italy, Great Britain and the USSR. Principal occupations are livestock raising and agriculture. Products include incense, sugar, bananas, durra (sorghum), corn, gum, hides, kapok.

Its mineral resources, largely undeveloped, include iron, tin, gypsum, sandstone, bauxite, meerschau, titanium and others. In 1968 the Government announced discovery of large uranium deposits.

History and Government. Many of the Somali peoples are nomadic and include, in addition to those in French Somaliland, some 20,000 in Kenya and 1,500,000 in Ethiopia. The Italian UN Trusteeship of Somalia, 194,000 sq. mi., population (est.), 2,000,000, extended along the Indian Ocean from the Gulf of Aden to the Juba River. It was proclaimed a protectorate by Italy, 1889. The UN General Assembly, Nov. 21, 1949, approved creation of Somalia as a sovereign state and on April 1, 1950, Italy took over the trusteeship held by Great Britain during World War II.

Former British Somaliland Protectorate, with 68,000 sq. mi., and 640,000 population with Ethiopia to the S and W and Somalia to the E, was freed June 26, 1960, to enable it to unite with Somalia.

The Republic was proclaimed July 1, 1960. The National Assembly has 123 Deputies. The President must be a Moslem. Somalia is a member of the UN.

In 1965-66 tribesmen carried on sporadic strife on the Kenya and Ethiopia borders. A settlement of these disputes was reached in 1967-68.

Republic of South Africa

REPUBLIEK VAN SUID-AFRIKA

Capitals: Pretoria and Cape Town. Area: 472,359 sq. mi. Population (UN est. 1967): 18,735,000. Monetary unit: Rand (.719 per U. S. \$1).

The Republic of South Africa occupies the southern portion of the continent and includes the former colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State. It is about the size of Texas, Oklahoma and New Mexico.

Province	Sq. mi.	Pop., 1963	Capital
Transvaal	110,450	6,273,477	Pretoria
C. of Good Hope	278,465	5,362,853	Cape Town
Orange Fr. State	49,866	1,386,547	Bloemfontein
Natal	33,578	2,979,920	Pietermaritzburg

Population growth of government-designated racial groups, in terms of 1963 and 1967 estimates, was: Bantu, 11,007,000, 12,750,000; White, 3,106,000, 3,563,000; Colored (mixed) 1,522,000, 1,859,000; Asiatics, 487,000, 561,000.

Cape Town, seat of Parliament, is the legislative capital and Pretoria the administrative capital.

Largest cities are Johannesburg and Cape Town. Kruger National Park, an 8,000-sq. mi. wild game preserve; Cape Peninsula, and the Drakensberg Mtns., are among numerous tourist attractions.

Resources and Industries. Corn, cotton, wool, wheat, tobacco, sugar cane, citrus fruits, butter and cheese are major agricultural products.

With vast mineral resources, South Africa leads the world in production of gold, gem diamonds, platinum and antimony; is 2nd in chrome, vanadium, vermiculite; third in uranium, manganese and asbestos. Coal and iron resources are unlimited. Annual production of more than 50 minerals is est. at \$1.5 billion.

South Africa has enjoyed an industrial boom. Index numbers of industrial production (1963=100) were 138 in 1967 for manufacturing and 117 for mining.

Air service is provided by 19 international lines. Railroads are state-controlled.

Foreign trade (in thousands of U. S. dollars):

	Imports	Exports
1966	\$2,300,000	\$1,688,000
1967	\$2,687,000	\$1,908,000

History and Government. The Union was formed by act of the British Parliament, effective May 31, 1910, 8 years after the British defeated the independent republics of the Transvaal and the Orange Free State in the Boer War (1899-1902). The nation was settled by emigrants from Cape Colony, mostly of Dutch extraction in the Great Trek of 1831 and later. After gold was discovered in 1886 the Boers faced repeated difficulties from the Uitlanders (Outlanders) and the wildcat Jameson raid against the gold-bearing ridge, the Witwatersrand, at Johannesburg in 1896 increased the tension. The Boer War made a national hero of Paul Kruger ("Oom Paul"), Pres. of the Transvaal, who died in exile, 1904.

With the election victory of Daniel Malan's Nationalist party in 1948, white supremacy became official policy in the form of *apartheid*, which calls for separate development of the non-white population groups—Indians, the mixed group called Coloreds, and the Bantu.

In 1959 the Nationalists passed the Bantu Self-Government act which recognized the principle of separate residential areas and social development. In white South Africa, Bantus may be employed but have no civil rights.

The Union became a Republic May 31, 1961. Prime Minister Hendrik F. Verwoerd had withdrawn his application for South Africa's readmission to the Commonwealth in March, in the face of opposition of the other Commonwealth heads of government to his country's *apartheid* policy. South Africa is a member of the UN.

Under the Republic's constitution, there is a State President, chosen by an electoral college composed of members of the Senate and Assembly for a 7-year term and not ordinarily eligible for reelection. The Senate of 54 members and Assembly of 160 are elected for 5-year terms. An elective Provincial Council meets in each of the four provinces.

Education and Religion. There are 16 universities, including 11 for white students, average enrollment exceeding 45,000 students. Primary education is free to all citizens and compulsory for white children over 7 years of age. There are 5 universities for non-whites.

Dutch Protestant churches predominate, with Anglicans and Methodists next among whites. English and Afrikaans are official languages.

Defense. The defense system makes every white citizen between 17 and 60 eligible for military duty in time of war. Those between 17 and 25 are obligated to undergo training in the Active Citizen Force with its Army, Air Force and Naval components, or as a Rifle Commando over a period of 4 years.

The Navy includes destroyers, frigates, mine-sweepers, anti-submarine frigates, and coastal defense ships. The Air Force is modern.

SOUTH-WEST AFRICA NAMIBIA

South-West Africa, a sparsely populated land twice the size of California, became the object of international dispute in 1966. Made a German protectorate in 1884, it was surrendered to South Africa in 1915 and was administered by that country under an old League of Nations mandate. South Africa refused to accept UN authority over

the mandate as other nations did with their mandates.

Other African nations charged South Africa imposed *apartheid*, built military bases and exploited S-W Africa; Ethiopia and Liberia lost, on a technicality, a suit against South Africa in the International Court of Justice; 36 African states called on the UN to take over the mandate.

The UN General Assembly in May 1968 created an 11-nation council to take over administration of South-West Africa and lead it to independence. In April 1968 the council charged that South Africa had blocked its effort to visit South-West Africa.

On June 12, 1968, the UN General Assembly by 96 to 2 vote urgently called on the Security Council to secure the area's independence. The resolution also gave South-West Africa the name Namibia.

Most of S-W Africa is a plateau, 3,600 ft. high, with plains in the N, Kalahari Desert to the E, Orange River on the S, the Atlantic on the W. Area is 317,887 sq. mi.; population (UN est. 1967) 594,000, including over 75,000 of European descent; capital, Windhoek. There is a South African administrator; voters choose 18 members of a Legislative Assembly and send 6 members to the South African Assembly; 4 are appointed to the South African Senate.

Products include cattle, sheep, diamonds, lead, zinc, vanadium, fish. People include Namas (Hottentots), Ovambos (Bantus), Bushmen and others.

Southern Yemen

Capital: Medina as-Shaab. **Area:** 112,000 sq. mi. **Population** (Govt. est. 1967): 1,500,000. **Monetary unit:** Dinar (.4195 per U. S. \$1).

Southern Yemen became independent Nov. 30, 1967, after more than a century of British rule. It consists of the port city of Aden, 17 states of the former South Arabian Federation, 3 small sheikdoms, 3 larger sultanates, Quaiti, Kathiri and Mahri, which made up the Eastern Aden Protectorate, and Socotra, the largest island in the Arabian Sea.

One of the cities mentioned in the Bible, Aden has been a port for the trade in incense, spices and silk between the East and West for two millennia. British rule began in 1839 when the British East India Co. seized control to put an end to the piracy threatening trade with India. Aden provided Britain with a controlling position at the southern entrance to the Red Sea and became a strategic outpost of the Empire in the East.

With only 1% of the land fertile and few mineral deposits, the Port of Aden has been Southern Yemen's most valuable natural resource. The port is 10 mi. across, well-sheltered and deep. In 1966 more than 6,000 ships put in at Aden for refueling, servicing and transshipment of goods, bringing over 227,000 visitors and \$22,000,000.

But, since the closing of the Suez Canal as a result of the Israeli-Arab War in June 1967, the port has been paralyzed and the economy depressed.

Loss of spending by the British military forces, which withdrew in 1967, amounted to \$50,000,000 a year. Joblessness in Aden was est. at 35,000 in 1968.

Southern Yemen is a member of the UN. The struggle for independence began in earnest in Dec. 1963, when two nationalist groups, the National Liberation Front (NLF) and the UAR-supported Front for the Liberation of Occupied South Yemen (FLOSY), waged a guerrilla war against the British and local dynastic rulers. The two groups vied with each other for political control. The NLF succeeded in naming the first President, Qahtan al-Shaabi.

Spain

ESTADO ESPANOL

Capital: Madrid. **Area:** 194,883 sq. mi. **Population** (UN est. 1967): 32,140,000. **Monetary unit:** Peseta (69.8 per U. S. \$1).

Spain, a nominal monarchy, occupies the entire Iberian peninsula in Western Europe, except for Portugal. It is separated from France by the Pyrenees.

The interior is a high arid plateau traversed E and W by mountain ranges. Spain is twice the size of Wyoming.

The Balearic Islands in the western Mediterranean, 1,935 sq. mi., pop. (1961), 443,327, are a

province of Spain; they include Majorca (Mallorca), with the capital, Palma; Minorca, Cabrera, Ibiza and Formentera. The Canary Islands, 2,807 sq. mi., in the Atlantic W of Morocco, pop. (1961), 944,448, also are provinces and include the islands of Tenerife, Palma, Gomera, Hierro, Grand Canary, Fuerteventura and Lanzarote with Las Palmas and Santa Cruz thriving ports. Ceuta, in Africa opposite Gibraltar, and Melilla, on the Riff coast, are part of Metropolitan Spain.

Resources and Industries. Only about 40% of the land is cultivable, the remainder is arid or mountainous. Farm mechanization and irrigation are increasing.

The principal agricultural products are wheat, barley, oats, rye, olives, grapes, lemons, oranges and other fruit, onions, almonds, esparto, flax, hemp, pulse and cork. Tobacco, cotton, and rice are also grown. Wine-making is a large and ancient industry. Spain possesses an abundance of minerals, including lead, iron, copper, zinc, coal, cobalt, mercury, silver, sulphur and phosphates.

Manufacturing includes cotton and woolen goods, paper, automobiles, cork and cement. Sardines, tuna fish and cod are most important fish catches. Coal production is more than 15,000,000 tons annually.

The index of general industrial production showed a large rise from 100 in 1963 to 144 in 1967. Electric power output rose from 37.7 billion kwh in 1966 to 41 billion in 1967; steel production from 3,800,000 tons to 4,400,000 tons; motor vehicles from 257,910 units to 290,000.

More than 18,000,000 tourists spend \$1.3 billion a year in Spain.

History and Government. Since Roman times Spain has had a major part in the political, religious and cultural fortunes of Europe. It was settled by Iberians, Basques and Celts, partly overrun by Carthaginian armies, conquered by Rome under Scipio Africanus c. 200 B.C. The Germanic Visigoths, in power by the 5th Century A.D., adopted Christianity but by 711 A.D. lost to the Islamic invasion from Africa. The Christian reconquest from the N led to a Spanish nationalist movement. Foremost Christian leader was the Cid Campeador (Lord Champion), d. 1099 A.D. In 1469 the kingdoms of Aragon and Castile were united by the marriage of Ferdinand II and Isabella I, and the last Moorish power broken by the fall of the kingdom of Granada, 1492. Spain became a bulwark of Roman Catholicism and the Inquisition, under which non-believers were slain, converted or exiled, came into power.

Spain obtained a great colonial empire with the discovery of America by Columbus, 1492, the conquest of Mexico by Cortes and Peru by Pizarro. It also controlled the Netherlands and parts of Italy and Germany. Charles I (Charles V, Holy Roman emperor), 1519-1556, attempted to halt Luther's Reformation and reestablish religious unity. Philip II, 1556-1598, tried to uproot heresy. The Spanish Armada failed to subdue England, 1588. Napoleon seized control of Portugal and Spain, 1808, made his brother Joseph King of Spain and precipitated the Peninsular War. Spain lost Mexico, Peru and other American colonies in the 1820s. It lost Cuba, the Philippines and Puerto Rico during the Spanish-American War, 1898. It gained concessions in Morocco by 1912, where it had to suppress a Moorish uprising led by Abd-el-Krim.

Primo de Rivera became dictator in 1923. King Alfonso XIII revoked the dictatorship, 1930, but was forced to leave the country Apr. 14, 1931. A republic was proclaimed which disestablished the church, curtailed its privileges and secularized education. A conservative reaction to these measures occurred 1933 but was followed by a Popular Front (1936-1939) composed of socialists, communists, republicans, and anarchists.

Army officers in Morocco headed a revolt against the government July 18, 1936, under Francisco Franco (b. Dec. 14, 1892). They established a provisional gov. at Burgos. In a destructive 3-yr. war, in which 1,000,000 are said to have died, Franco received help from Italy and Germany, while the Soviet Union, France and Mexico were active on behalf of the republic. About 600 Americans served in the Abraham Lincoln brigade for the republic. War ended when Madrid fell to Franco Mar. 28, 1939.

Franco was named caudillo, or leader of the nation, Chief of State, Commander in Chief, Prime Minister and head of the Falange party. The Cortes was reestablished July 1942, with elected, appointed and ex-officio members.

Spain was neutral in World War II but its relations with fascist countries and support for repressive measures caused its exclusion from UN in 1946. It was admitted in 1955.

Dec. 14, 1966, a new constitution, called the "Organic Law," was approved by the people in a plebiscite. The new law implied a liberalization of government policy in the areas of religion, the press, trade unions and other social and political aspects of Spanish life.

Education and Religion. Franco reestablished Catholicism as the state religion. The clergy are paid by the state. Primary education is compulsory and free. There are 13 universities. More than two-thirds speak Castilian; Basque is spoken in the N; Galician in the NW, and Catalan in the NE.

Defense. Service in the Army is compulsory for two years. Under a 10-year defense agreement with the U. S. signed Sept. 26, 1953, renewed 1963 for 5 years, Spain receives military and economic aid; in turn it permits use of air and naval bases on Spanish soil.

SPANISH OVERSEAS PROVINCES

Aside from Ceuta and Melilla on the North African Coast, which are considered parts of the motherland and the Canary Islands, which are provinces, Spain has several provinces in Western Africa:

EQUATORIAL GUINEA

(Spanish Guinea)

Equatorial Guinea was a Spanish province which was promised independence during 1968.

It is composed of the island of **Fernando Po** and smaller islands in the **Gulf of Guinea**, known as **Insular Guinea**, and **Rio Muni**, called **Continental Guinea**, a larger area on the nearby mainland coast.

Products include cocoa, gold, coffee, wood and wool. Capital: Santa Isabel (on Fernando Po). Area: 10,852 sq. mi. Population (est. 1963): 250,000.

Spanish Sahara, Africa, extending from Cape Blanco to a line south of Cape Ifni, includes the zones of **Rio de Oro**, 73,362 sq. mi., and **Sequia el Hamra**, 33,047 sq. mi. Population (est.): 23,700.

Ifni, an enclave on Morocco's Atlantic coast, comprises 44 sq. mi. with pop. (est. 1960) of 49,889, claimed as a perpetual possession under an 1860 agreement.

Sudan

JAMHURIYAT EL-SUDAN REPUBLIC OF THE SUDAN

Capital: Khartoum. Area: 967,500 sq. mi. Population (UN est. 1967): 14,355,000. Monetary unit: Sudanese pound (.3482 per U. S. \$1).

Sudan, a former Anglo-Egyptian condominium in Africa, proclaimed itself a republic Jan. 1, 1956. It is bounded by the United Arab Republic, the Red Sea, Ethiopia, Uganda, Kenya, the Democratic Republic of the Congo, the Central African Republic, Chad and Libya. It is about the size of Texas, Alaska and New Mexico combined.

The northern zone consists of the Libyan Desert, on the W, and the mountainous Nubian Desert, extending to the Red Sea on the E, separated by the narrow valley of the Nile; the central zone contains large fertile areas, including the rainlands of Kassala and Tokar, the Gezira plain and the pastures and gum forests of Kordofan; and the southern equatorial belt where the soil is richest and watered by tropical rains.

The White Nile flows N through the center of the country; the Blue Nile, rising in the mountains of Ethiopia, joins the White at Khartoum; the combined river flows N in a huge S curve to enter the UAR north of Wadi Halfa.

Resources and Industries. The Sudan is the world's principal source of gum arabic. Chief grain crop is durra (sorghum), the country's staple food. Cotton is the principal export; American and extra-long staple cottons are grown in the fertile Gezira, between the White and Blue Niles. Other important products are sesame, senna, peanuts, rice, coffee, sugar cane, tobacco, dates, hides, mahogany, beans, corn, mother of pearl, shea nuts, salt, ivory.

The Sudan has small scale production of gold, iron ore, gypsum, chromite, cement.

History and Government. In the 1820s Egypt took over the Sudan, defeating the last of earlier empires, including the Fung. In the 1880s a revolution was led by Mohammed Ahmed who called himself the Mahdi (leader of the faithful) and

his followers, the dervishes. British Gen. Charles Gordon (called Chinese Gordon for his exploits in China), who had earlier put down the slave trade in the Sudan, was sent by Egypt to evacuate its troops; he was besieged and finally slain at Khartoum Jan. 26, 1885.

In 1898 Horatio Kitchener (later titled Lord Kitchener of Khartoum) led an Anglo-Egyptian force which crushed the successors of the Mahdi at Omdurman Sept. 2.

In October, 1951, the Egyptian Parliament abrogated its 1899 and 1936 treaties with Great Britain, and amended the constitution, Oct. 16, to provide for a separate Sudanese constitution.

Sudan voted for complete independence effective Jan. 1, 1956. A five-member Supreme Commission (Council of State) and a Cabinet were sworn in.

On Nov. 17, 1958, Gen. Ibrahim Abboud ousted Premier Abdullah Khalil of the Umma party, head of a coalition government. Abboud resigned under pressure Nov. 15, 1964; a new Constituent Assembly was elected April 21-May 8, 1965, and approved a coalition government headed by Premier Mohammed Ahmed Mahgoub. Only 5 northern provinces took part in the election; the 3 southern provinces did not. A large part of the southern provinces, a pagan and Christian Negro area, was swept by guerrilla warfare, 1963-68, against the forces of the predominantly Arab-Muslim north, which controls the government.

During the Israeli-Arab war of June, 1967, Sudan broke off diplomatic relations with the U. S. in response to charges that U. S. warplanes were assisting the Israelis.

Sudan is a member of the UN and Arab League.

Education and Religion. Sudanese inhabitants are Arabs, Negroes and Nubians of mixed Arab and Negro blood; the Arabs and Nubians are Mohammedans. The educational system in the South, formerly largely administered by Christian missions, now also is in hands of the government. Higher education is available at Khartoum Univ. (formerly Gordon College). Arabic is the national language.

Swaziland

Capital: Mbabane. **Area:** 6,704 sq. mi. **Population** (UN est. 1967): 385,000. **Monetary unit:** Rand (7.190 per U. S. \$1).

Swaziland is in SE Africa, almost completely surrounded by the Republic of South Africa except for part of the E border which adjoins Mozambique (Portuguese East Africa). The Swazis came under British rule in the late 18th Century as a means of gaining protection from their traditional enemies, the warlike Zulus.

The example of neighboring former British territories Bechuanaland and Basutoland, which became the independent nations of Botswana and Lesotho in 1966, encouraged the drive for Swazi independence; Swaziland was economically the most healthy of the 3. On Apr. 25, 1967, it achieved full internal self-government under a constitution and on Sept. 6, 1968, it became completely independent and the 28th member of the Commonwealth, leaving rebel Rhodesia as Britain's last colonial "possession" in Africa.

The constitution provided for an elected Parliament, and the former Paramount Chief, Sobhuza II, became King Sobhuza, a constitutional head of state. The Royal house of Swaziland traces back 400 years, and remains one of Africa's last ruling dynasties. The King was reputed to have 90 wives, but to avoid dissension, none of them was named queen. Instead, an aged aunt was named the official Queen Mother Regent. To avoid a succession conflict among the many princes, the next king was to be chosen by a royal advisory body.

Polygamy has been the common marital status. Women have the right to vote. Many Swazi women dye their hair bright orange or soak it with soap and pile it up like a beehive.

About 97% of the residents are Swazi, a group that broke off from the Bantu tribe about 1750. South African whites constitute a small but powerful minority. English is the official language but Swazi is spoken by the vast majority of people.

The country is rich in mineral resources, including one of the world's 5 largest asbestos mines, the Havelock Mine, and iron ore resources estimated at some 47,000,000 tons in the Ngwenya Mines. In addition, there are gold, tin, silver, mica and other minerals.

In recent years Swaziland developed a multi-million-dollar timber and pulp industry, a railway link out of the landlocked country to ports in

Mozambique, hydro-electric power and tarred roads. Exports rose from \$16,800,000 in 1965 to over \$45,000,000 by 1968. The first quarter of 1968 saw Swaziland's exports to Britain alone mount to more than the entire budget figure of Lesotho. The major export items are asbestos, iron ore, citrus fruits and sugar.

The land is fertile and has abundant water, producing such other crops as corn, cotton, rice, pineapples and cattle.

About 10,000 Swazis hold jobs in South Africa and the currency is the South African rand. Most of the population, however, is agricultural, living in grass huts and maintaining old tribal customs.

Sweden

KONUNGARIKET SVERIGE

Capital: Stockholm. **Area:** 173,378 sq. mi. **Population** (Govt. est. 1967): 7,847,395. **Monetary unit:** Krona; pl. kronor (5.168 per U. S. \$1).

Sweden occupies the eastern and largest part of the Scandinavian peninsula in NW Europe. Its greatest N-S length is 977 mi.; greatest width 311 mi. The country is larger than Calif. but smaller than Texas. Sweden is separated from Norway on the W by the Kölen (or Kjölen) mountain range, and from Finland on the E by the Baltic Sea except in the N where the two meet along the Tornea River.

Stockholm and Goteborg are the largest ports.

Resources and Industries. Although the topography is mountainous, Sweden contains much productive land, well watered, on which the Swedes have attained high efficiency in agriculture. Of Sweden's total land area, 8% is cultivated, 2.5% pasture, and 55% forests. About one-third is unclaimable. Chief agricultural products are cheese, butter, beef, pork, wheat, rye, potatoes, sugar beets and vegetable oils.

Many industries flourish in Sweden, whose main natural resources are forests, iron ore and water power. Coal and oil have to be imported; oil constitutes 10% of all imports. Industry employs 45% of the work population, agriculture 8%. Swedish steel is of special value for tool making. Other metals produced are: lead, copper, zinc, gold and silver. In 1966, 51 billion kwh. were produced. The Stornorrforsen hydroelectric plant on the Ume River is the largest in Western Europe.

Although over 95% of the economy is in private hands, the government holds a large interest in water power production and the railroads are operated by a public agency.

Consumer cooperatives are in extensive operation, with 250,000 members served by about 5,000 stores. Cooperatives also are important in agriculture and housing.

Shipping is privately operated and not subsidized. The merchant marine totaled approx. 4,470,000 gross-tons on Dec. 31, 1966. Swedish shipbuilders account for about 10% of the world's output of commercial tonnage. In 1966 their shipyards launched 65 ships totaling 1,160,000 gross tons.

Sweden is one of the leading exporters of iron ore and cellulose. About one-fourth of the exports come from pulp, lumber, paper and other forestry products. Other important products are steel, automobiles, ships, airplanes, ball bearings, textiles, electrical goods, petrochemicals.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$4,576,000	\$4,264,000
1967	\$4,705,000	\$4,534,000

History and Government. Sweden is a parliamentary democracy with a King as head of state and a prime minister as political chief executive. The Riksdag (Parliament) has two chambers, the first of 151 members elected for 8 years, and the second of 233 members, elected for 4. All over 20 are entitled to vote.

The first peaceful consolidation of Sweden with other Scandinavian countries was the union of Kalmar, 1397. Sweden revolted 1434-1523. Reformation was introduced 1527; Lutheranism dominated from about 1600.

The King is Gustav VI Adolf (born Nov. 11, 1882), who succeeded on the death of his father, Gustav V, Oct. 29, 1950 (reigned since Dec. 8, 1907). The King married (June 15, 1905) Princess Margaret (died May 1, 1920). He has three living sons, two of them commoners through marriage, and one daughter, Queen Ingrid of Denmark. One son, Gustaf Adolf, was killed in an airplane accident Jan. 26, 1947 and his son, Prince Carl Gustaf (born 1946), became heir apparent. The

King's second wife (married Nov. 3, 1923) was Lady Louise Mountbatten, who died Mar. 7, 1965.

About 14% of the national income is redistributed through the social welfare system which includes compulsory health insurance. Unemployment during 1966 was about 1%.

Sweden is a member with Denmark, Norway and Iceland of the Nordic Council, estab. Feb., 1953, and of the UN, EFTA and GATT.

Education and Religion. The population is very homogenous, being of the Scandinavian branch of the Germanic family, except about 30,000 Finns and 10,000 Lapps. Approx. 95% of the people are Lutheran, which is the state religion. Education is compulsory and illiteracy is non-existent. There are state universities at Uppsala (founded 1477), Lund, Stockholm, Göteborg and Umea.

Defense. Service in the Army is compulsory between 19 and 47. A first 10-month training period is followed by 5 refresher of 25 days each. There is an Army of approximately 600,000, plus a voluntary Home Guard of 125,000. The Air Force has 15 wings of about 45 combat squadrons totaling 600 planes, mostly Swedish-built jets. The Navy has one cruiser, 8 destroyers, 8 frigates, 20 submarines, 38 motor torpedo boats and 35 minesweepers and other units.

The coast artillery is largely dug into atom-bomb-proof rock shelters along nearly 700 mi. of coastline.

Switzerland

SCHWEIZ—SUISSE—SVIZZERA

Capital: Berne. **Area:** 15,941 sq. mi. **Population** (Govt. est. 1967): 6,071,000. **Monetary unit:** Franc (3.82 per U. S. \$1).

Switzerland, a federal republic in Central Europe, is bounded by France, Germany, Austria, Liechtenstein and Italy. It is twice the size of New Jersey.

Switzerland is the most mountainous of all European countries. The Alps cover 61% of land area, the Jura 12%; running between them, NE to SW, are the midlands, about 27%. Highest peak is Monte Rosa, 15,203 ft.; the Matterhorn is 14,690 ft.; more than 70 are over 10,000 ft. Lakes famous for their beauty include Maggiore, Lucerne, Geneva, Neuchatel, Constance, Thun, Brienz. The Rhine, Rhone and feeders of the Danube and Po originate in Switzerland.

Resources and Industries. Switzerland's abundant water power is exploited by 431 major hydroelectric plants. Salt is the principal mineral. Watches (50% of world's watch trade), machinery, and precision instruments are important manufactures; also silk, wool and cotton articles; iron and steel and electrical products; industrial chemicals, clothing, perfumes, and pharmaceuticals. Dairy products, especially cheese, lead agriculture, followed by cattle, pigs, fruit, poultry, tobacco, wheat, rye, oats, potatoes and wine. Machine making employs 26% of all factory workers and accounts for 28% of exports. Included are textile machinery, machine tools, dynamo-electric plants, transformers and diesels.

Switzerland is one of the world's greatest banking centers. Stability of its currency brings funds there from many quarters. Tourism is a vital part of the economy. Nearly 6,000,000 foreign tourists visited Switzerland in 1967.

History and Government. Switzerland, the Helvetia of ancient times, is a confederation of 22 cantons, three of which once (1291) were members of a defensive league and later were joined by other districts. In 1648 the Swiss Confederation obtained its independence from the Holy Roman Empire. The cantons were joined under a Federal Constitution in 1848, with large powers of local control retained by each canton. Legislative authority vests in a parliament of two chambers, a Ständerat or State Council to which each canton sends two members; and a lower house, Nationalrat or National Council, with 200 members.

Executive power is vested in the Bundesrat (Federal Council) of 7 members.

The President is selected from membership of the Federal Council, serves for one year and customarily is succeeded by the Vice President.

Switzerland enters into no military alliance and is not a member of UN or NATO. It is however a member of various international agencies of the UN, such as the International Labor Org., World Health Org., UNESCO, FAO and others. It also is a member of EFTA.

Geneva is the seat of a number of UN organiza-

tions, International Committee of the Red Cross, League of Red Cross Societies and Int'l Union for Telecommunications. The Universal Postal Union is in Berne.

Education and Religion. Primary education has been free and compulsory since 1874. There are 7 universities; the oldest is Basel, founded in 1460. Swiss German dialects are spoken by a majority of the people in 16 of the cantons; other languages are French, Italian, and Romansch.

There is complete freedom of worship. Of the population 52.7% are Reformed Protestant, 45.4% Roman Catholics.

Defense. Service in the national militia is compulsory; liability extends from 20 to 50 years. Its 12 easily mobilized divisions comprise more than 700,000 men.

Syria

SOURIYA

SYRIAN ARAB REPUBLIC

Capital: Damascus. **Area:** 72,234 sq. mi. **Population** (Govt. est. 1967): 5,761,349. **Monetary unit:** Syrian pound (4.2 per U. S. \$1).

A land of Middle East contrasts, the Syrian Arab Republic has a short coastline on the Mediterranean, then stretches east and south with fertile valleys and plains alternating with mountainous and desert areas. The main rivers are the Euphrates and Orontes. Chief seaport is Latakia. The nation is about the size of South Dakota.

Resources and Industries. Mineral wealth is small except for oil deposits. Actual oil production is limited, but the Iraq Petroleum Co. pays for oil pipelines transit and terminal rights. Agriculture and stock raising are chief occupations. Main crops are cotton, wheat, barley, tobacco, citrus fruits, olives, grapes and sorghum. Industries include flour, oils, soap, textiles, cement, tanning, tobacco, knitwear, glassware, sugar, hosiery, footwear and brassware. Raw cotton and textiles followed by tobacco are the principal exports.

Syria's gross national product rose from \$935,656,000 for 1963 to \$1.04 billion for 1964. Receipts from tourism increased from \$10,418,000 for 1963 to \$13,080,000 for 1966.

History and Government. One of the world's ancient inhabited lands, the state (later republic) of Syria was formed from former Turkish Empire Sanjaks (districts). Syria was made a separate entity by the Treaty of Sevres, Aug. 10, 1920, and divided into the states of Syria and Greater Lebanon Sept. 1, 1920. Both were administered under a French mandate 1920-1941.

Syria was proclaimed a republic by the occupying French authorities Sept. 16, 1941, and exercised full power effective Jan. 1, 1944. French troops left by April 17, 1946.

Syria joined with Egypt in Feb. 1958 in the United Arab Republic but seceded Sept. 30, 1961. The Socialist Baath party and military leaders seized power in March 1963, led by Lt. Gen. Amin el-Hafez. The Baath, an international Arab organization, became the only legal party.

The Baath regime in 1965 nationalized most industries.

Over the years there had been intermittent border clashes with Israel and in the Israeli-Arab war of June, 1967, Israel occupied heights 12 mi. inside Syria from which Israeli border settlements in northern Galilee had been shelled for years.

Syria severed diplomatic relations with the U. S. as a result of the war. It is a member of the UN.

Education and Religion. The population is composed mainly of Sunni Moslems but there are many Christians, Arabic is the official language. Syria has universities in Damascus and Aleppo.

Tanzania

(Formerly Tanganyika and Zanzibar)

Capital: Dar es Salaam. **Area:** 363,708 sq. mi. **Population** (Govt. est. 1967): 12,231,342. **Monetary unit:** Tanzanian shilling (7.143 per U. S. \$1).

The republic of Tanganyika in E Africa and the republic of Zanzibar, a large island in the Indian Ocean off the coast of Tanganyika, joined in a single republic Apr. 26, 1964. The new central government at Dar es Salaam (Haven of Peace), an important port and capital of Tanganyika, was given jurisdiction over defense, foreign affairs and public services.

Julius K. Nyerere, Tanganyika's President, became President of the new nation; Abeid Amani Karume, Zanzibar's President, became Vice President.

At first the combined nation was called the United Republic of Tanganyika and Zanzibar. In Oct. 1964 the name was changed to Tanzania.

A member of the UN and the Commonwealth, Tanganyika has received aid from Communist China, the USSR, the U. S. and Canada.

In 1967 the government nationalized all banks, including some in which U. S. banks held a part interest, and many industries; some of the latter were taken over completely, in others the government took a part interest. The government also ordered that Swahili, not English, be used in all official business.

TANGANYIKA

Tanganyika stretches from the Indian Ocean on the E to 3 of Africa's Great Lakes; Victoria, Tanganyika and Nyasa (now also called Malawi). Its area is 362,688 sq. mi., larger than Texas and Oklahoma combined; pop. (Govt. est. 1965) 10,178,100. Most of the people are Bantus and speak Swahili.

Snow-capped Mt. Kilimanjaro, tallest in Africa, rises majestically in the N. Nearby are the famed Serengeti Plains, teeming with vast herds of wild animals, protected in one of Tanzania's several large national park game preserves. Safaris, sport fishing and mountain climbing are among attractions. In Olduvai Gorge, prehistoric manlike remains, over a million years old, were discovered by Dr. and Mrs. Louis Leakey.

Principal products are sisal, cotton, coffee, tea, tobacco and hides. Both gem and industrial diamonds are mined, as are gold, salt, tin and mica. Diamonds account for 77% of the mineral income, gold for 12%.

Arab colonization began in the 8th Century A.D.; Portuguese sailors explored the coast by about 1500. Other Europeans followed and it was under a mango tree at Ujiji on Lake Tanganyika that Henry M. Stanley found David Livingstone Nov. 10, 1871.

In 1885 Germany established German East Africa of which Tanganyika formed the bulk. After World War I it was taken and administered by Britain as a League of Nations mandate and since 1946 as a UN trust territory.

Constitutional changes gave it internal autonomy in Sept. 1960. It became fully independent Dec. 9, 1961, and was proclaimed a republic within the Commonwealth a year later.

ZANZIBAR

Zanzibar, the Isle of Cloves, lies 23 mi. off the coast of Tanganyika; its area is 640 sq. mi. The island of Pemba, 25 mi. to the NW, area 380 sq. mi., is included in the administration. The population is chiefly Moslem. The total area of the two islands is about the size of Rhode Island; population (Govt. est. 1967): 354,360.

Attractions include numerous public gardens and ancient palaces.

Chief industry is the production of cloves and clove oil of which Zanzibar and Pemba produce the bulk of the world's supply. Coconuts and copra also are exported. Pottery, coir fiber, rope, soap, oil, jewelry and mats are manufactured.

Portugal ruled Zanzibar for two centuries until ousted by Arabs around 1700. Zanzibar became an independent Sultanate in 1856 and a British Protectorate in 1890 by agreement with Germany and France.

Independence within the Commonwealth was attained Dec. 10, 1963. Rebel forces overthrew Sultan Seyyid Jamshid bin Abdullah bin Khalifa Jan. 12, 1964. The revolutionary government ousted American and British diplomats and newsmen and nationalized farms. Union with Tanganyika followed, 1964.

Thailand (Siam)

PRADES THAI; MUANG-THAI

Capital: Bangkok. Area: 200,148 sq. mi. Population (UN est. 1967): 23,680,000. Monetary unit: Baht (20.75 per U. S. \$1).

Thailand is a constitutional monarchy in SE Asia bordered by Burma, Laos, Cambodia, the Gulf of Thailand (or Siam) and Malaysia. It is a country of rolling hills, about twice the size of Colorado with large areas under irrigation.

Bangkok, the capital, is a modern city. Its Don Muang airfield is one of the largest and most modern in Southeast Asia, served by 24 international airlines. An important port, Bangkok is 25 mi. in from the sea in the Menam delta. There is an extensive inland waterway system and network of modern roads.

Resources and Industries. There are many large forests, teakwood being an important article of export. Agriculture occupies 91% of the population.

Thailand is the world's 3rd largest producer of tin ore; other minerals are coal, iron, manganese, tungsten, antimony and fluor spar.

The chief crop is rice, the staple food of the people and heavily exported, accounting for a third of foreign exchange earnings. Other important exports are tin, rubber, teak and tungsten. Coconuts, tobacco, pepper, tapioca flour, corn, peanuts, beans and cotton are produced in quantity.

Foreign investment in industry is encouraged—auto assembly plants, pharmaceuticals, textiles, electrical goods.

History and Government. Thailand, an ancient monarchy, noted for picturesque architecture and pageantry, is the only country in SE Asia never taken over by a colonial power, thanks to King Mongkut and his son King Chulalongkorn who ruled from 1851 to 1910, modernized the country and signed trade treaties with both Britain and France.

Thailand underwent a bloodless revolution in 1932. King Prajadhipok, a liberal, signed a new constitution, establishing a limited monarchy, but he refused to sign a measure abdicating the royal power of life and death and resigned. He was succeeded by his nephew, Prince Ananda, who was found dead of a bullet wound, June 9, 1946, and the legislature named his brother, Prince Phumiphon Aduldet (Bhumibol Adulyadej) (born 1927), to succeed him. King Phumiphon formally took the throne May 5, 1950, as Rama IX.

Since World War II there have been several military coups and changes in government. On June 21, 1968, a new constitution was promulgated, providing for an elected Assembly which would have limited powers.

There was sporadic Communist terrorism in the NE and far S in 1968 and earlier.

About 40,000 U. S. servicemen, two thirds of them Air Force, were stationed in Thailand in 1967. Air strikes against North Vietnam and the Ho Chi Minh trail in Laos were conducted from air bases constructed by the U. S. in Thailand. About 2,000 Thai combat troops served with South Vietnam in the latter country.

Education and Religion. Education is compulsory between 8 and 15. There are 7 universities, 31 training colleges and many vocational schools. The language is Thai, derived from Pali and Sanskrit. There is much official use of English. About 93% of the people are Buddhists; others are Moslems, Christians, etc.

Defense. Of Thailand's total armed forces of 85,000, the militarized police force comprises 40,000; army about 30,000; air force 4,000. The Navy has five frigates and many small craft, with 18,000 personnel. Thailand is a member of the UN and SEATO.

Togo

REPUBLIQUE TOGOLAISE

Capital Lomé. Area: 20,400 sq. mi. Population (UN est. 1967): 1,724,000. Monetary unit: CFA franc (246.85 per U. S. \$1).

The republic of Togo (Togoland) which became independent April 27, 1960, is comprised of part of the one-time German colony of Togoland, surrendered in 1914, and administered by France as a UN trusteeship, 1946-1960.

Togo is a thin sliver of land, about twice the size of Vermont, facing the Atlantic on the southern edge of the West African bulge. It is bounded by Upper Volta, Dahomey, the Atlantic and Ghana.

In 1958 France received UN approval to end its trusteeship and the republic was proclaimed Apr. 27, 1960. It chose to remain outside the French Community. It is a member of the UN.

A draft constitution on the U. S. model was published Mar. 20, 1961. It provided for a President and a 46-member unicameral Parliament. First President, Sylvanus Olympio, elected Apr. 9, 1961, was assassinated by a military junta Jan. 13, 1963. His successor was Nicolas Grunitzky,

elected May 5, 1963. Grunitzky resigned Jan. 13, 1967, and was replaced by Etienne Eyadema, head of the armed forces.

A friendship and commercial treaty with the U. S. was agreed on in 1968.

Principal products: coffee, cocoa, palm kernels, copra, cotton, kapok, manioc and peanuts.

Trinidad and Tobago

Capital: Port of Spain. Area: 1,979 sq. mi. Population (UN est. 1967): 1,016,000. Monetary unit: Trinidad and Tobago Dollar (2 per U. S. \$1).

Trinidad, area 1,864 sq. mi., is the most southerly of the West Indies lying off the NE coast of South America approx. 7 mi. from Venezuela. It was discovered by Columbus in 1498. Tobago, 116 sq. mi. lies 20 mi to the NE of Trinidad.

Second largest of the old British West Indies and a British possession since 1802, Trinidad and Tobago won independence Aug. 31, 1962. A Governor General represents the British Sovereign. Parliament consists of a 24-member Senate appointed by the Gov. Gen. and a 36-member House of Representatives elected by universal suffrage. The country is a member of the UN, the Commonwealth and the OAS.

Chaguaramas, a promontory near Port of Spain, was an important U. S. naval air base and a link in the anti-submarine defense of the Caribbean. The base was acquired by the U. S. under a lease at start of World War II, but June 9, 1967, was formally returned by the U. S., 73 years ahead of schedule.

Import trade is heaviest with England, export trade with the U. S. Exports are mostly petroleum, sugar, asphalt, rum, cocoa, coffee, citrus, bananas, cement, bitters. Pitch Lake, 114 acres, is world's largest supply of asphalt.

The economic picture in the nation, one of the most prosperous in the West Indies, improved during 1967. The total national product rose 4%; exports were increased and imports decreased sufficiently to give the country a favorable balance of trade; the Government's family planning program cut the birth rate from 3.1% to 2.4%; the unemployment rate, still high, was cut from 20% to 15%.

Trinidad claims to have originated the steel band (instrument fashioned from oil drums), calypso songs and the limbo dance. Tourism is an important source of revenue.

The population is mixed: Negro 44%, East Indian (descended from immigrants from India) 36%, Lebanese, Syrian, white and Chinese comprise the rest. Religions include Roman Catholic 36%, Protestant 34%, Hindu 23%, Moslem 6%.

Public primary and secondary education is free to age 18. Some units of Univ. of West Indies are in Trinidad, some in Jamaica. There are two technical institutes.

Tunisia

AL-JOUMHOURIA ATTUNUSIA

Capital: Tunis. Area: 58,000 sq. mi. Population (UN est. 1967): 4,560,000. Monetary Unit: Dinar (.525 per U. S. \$1).

Tunisia is a former French protectorate which was proclaimed a republic in 1957. It is on the Mediterranean coast of Africa wedged between Algeria and Libya. It is about the size of Florida. The people are mostly Arabs and Berbers.

Resources and Industries. The chief industry is agriculture and the fertile soil produces an abundance of wheat, barley, oats, dates, olives, apricots, almonds, figs, peaches, vegetables, alfalfa grass. Livestock is extensively raised. Phosphates, iron, lead and zinc are leading minerals.

Industries include canning, fertilizers, carpets, blankets, shoes, and building materials. Principal exports are olive oil, wine, iron ore, lead, phosphates and grains. A 10-year economic development program was begun in 1962.

Oil was discovered in 1965 at El Borma in the S in sufficient quantity to meet domestic needs.

Tourism is growing and attractions include numerous well-preserved Roman ruins, excellent beaches, and resorts on Djerba Is., reputed home of the Lotus Eaters of the Odyssey.

The tourist industry earned \$26,000,000 in 1967. Irrigation has aided agriculture. Fish and textile industries have boosted exports. Other new industries include steel and auto-assembly plants, a paper mill and sugar refinery.

History and Government. A former Barbary state under the suzerainty of Turkey, Tunisia became a protectorate of France under a treaty signed May 12, 1881, after France sent a military force to combat the raiding Khroumer tribes. After receiving increasing measures of self-government since 1947, a constituent assembly, elected Mar. 25, 1956, chose a government headed by Habib Bourguiba, of the dominant Neo-Destour party, named Premier Apr. 10. The basic law, adopted by the assembly, Apr. 13, vested sovereignty in the people, ignoring the titular ruler, Mohammed el Amim, Bey of Tunis. The assembly unanimously voted July 25, 1957, to end the monarchy. It deposed the Bey and proclaimed a republic, electing Premier Bourguiba interim President.

Under a U. S.-style constitution adopted June 1, 1959, the President is elected for 5 years, limited to 3 consecutive terms. The National Assembly of 90 also is elected for 5-year terms. In national elections Nov. 8, 1959, the National Front won all the seats. Women have equal rights, but in 1966 miniskirts were banned by the government.

President: Habib Bourguiba, elected 1959, 1964.

A law passed May 11, 1964, nationalized all farmland still owned by foreigners, providing for compensation in return. A system of cooperative farms was started.

Tunisia is a member of the UN and Arab League but in April 1965 Pres. Bourguiba proposed negotiations to reach settlement of the Arab-Israel dispute. He was denounced by other Arab League countries. In May he did not attend an Arab-League heads-of-state meeting and assailed UAR Pres. Nasser for trying to force Tunisia to take an anti-U. S. stand. On Oct. 3, 1966, he broke diplomatic relations with the UAR, which were not resumed until after the outbreak of the Israeli-Arab war June 5, 1967. In Aug. he urged Arab nations to end their state of belligerency with Israel.

Education and Religion. The majority of the population is Moslem. Europeans number about 120,000, Jews 65,000. Fifty percent are under age 20; estimated birth rate: 40 per 1,000; death rate, 15 per 1,000. Arabic is the national and official language. In 1966 Pres. Bourguiba said that in 10 years Tunisia had raised the number of primary school students from 200,000 to 734,000, secondary from 15,500 to 80,000 and higher education from 1,350 to 5,000. The former Moslem University of Zitouna and the Institute of Advanced Studies are incorporated in the new University of Tunis, due for completion in 1968.

Defense. A National Army was created in 1956; it consists of about 20,000 officers and men. Nuclear of a Navy and an Air Force have been formed.

Turkey

TURKIYE CUMHURİYETİ

Capital: Ankara. Area: 296,500 sq. mi. Population (UN est. 1967): 32,710,000. Monetary unit: Lira (9.08 per U. S. \$1).

About 90% of Turkey's population lives in the Asian portion of the country on the Anatolian Peninsula—an area of 287,500 sq. mi. The remainder live in the European part which is bordered by Bulgaria and Greece. A republic since 1923, Turkey is a little larger than Texas and has extensive coastlines on the Black Sea, the Mediterranean and the Aegean. Its Asian neighbors are the USSR, Syria, Iraq and Iran.

Central Turkey is a great plateau, with hot dry summers and cold winters with snow remaining until May. High mountains ring the plateau on all but the W side. More than 20 peaks top 10,000 ft.

Izmir (ancient Smyrna) is the principal export outlet.

Resources and Industries. Approx. 75% of the labor force is engaged in agriculture, the products including tobacco (more than 250,000,000 lbs. annually), cereal, cotton, olive oil, wool, silk, figs, nuts, fruits, sugar, opium for medicinal purposes, and gums. About 20,000,000 acres are in forests.

There are large deposits of antimony, borate, copper, and chrome (of which Turkey is the world's largest producer). Other minerals include manganese, lead, zinc, coal, iron, oil, silver, mercury, sulphur, molybdenum, magnesite and asbestos.

Turkey manufactures silk, cotton and woolen yarn and cloth, steel, foundry products, sugar, footwear, office furniture, cement, paper, glass-

ware and appliances. The country has the largest arms industry in the Middle East. About 23% of trade is with the U. S.

Foreign trade, in thousands of U.S. dollars:

	Imports	Exports
1966	\$725,000	\$491,000
1967	\$691,000	\$522,000

History and Government. Up to World War I, Turkey, or the Ottoman Empire, included European Turkey, Anatolia, Syria, Lebanon, Iraq, Jordan, Palestine, Arabia, Yemen and islands in the Aegean Sea.

Turkey joined Germany and Austria in World War I and its defeat resulted in loss of much territory and fall of the sultanate. A republic was declared Oct. 29, 1923, with Mustafa Kemal Ataturk first President. The Caliphate (spiritual leadership of Islam) was renounced 1924. Turkey was permitted (1936) to refortify the Dardanelles and Bosphorus, to close them if threatened, but to permit free passage of merchant vessels in peace or war. The USSR has proposed joint control of the straits but Turkey has refused.

But in 1968 Turkey and the USSR agreed on a \$200,000,000 loan from the Soviet to build factories in Turkey which would be paid for in Turkish products.

The present constitution, adopted July 9, 1961, provides for a civilian parliamentary government, protection of human rights, guards against abuses of executive power, and provides for a bicameral legislature composed of a Senate of 185 and a National Assembly of 450 deputies. The President is elected by Parliament to a 7-year term and is ineligible for reelection.

Turkey is a member of the UN, CENTO, NATO, Council of Europe. Communism is outlawed.

For years Turkey and Greece have been involved in a controversy over Cyprus (see Cyprus).

Education and Religion. Church and State are separated. About 98% of the Turkish population is Moslem.

Education is compulsory, free and secular between the ages of 7 and 12, and optional, but free, through the university. There are universities in Istanbul, Ankara, Izmir and Erzurum. Robert College, 1865, is oldest American college abroad.

Defense. Military service is compulsory. Turkey supplies a large ground force to NATO.

Turkey is a member, with Greece and Yugoslavia, of the Balkan defense group by a treaty signed in Ankara, Feb. 27, 1953, and a 20-year military aid pact, Aug. 9, 1954. It also concluded pacts with Pakistan in 1954, and has a defense pact with the U. S. signed Mar. 5, 1959.

Uganda

Capital: Kampala. **Area:** 91,134 sq. mi. **Population** (UN est. 1967): 7,934,000. **Monetary unit:** Uganda shilling (7.143 per U. S. \$1).

Uganda, a former British protectorate, is in central Africa with Kenya to the E, Lake Victoria and Tanzania to the S, Lakes Albert and Edward and Democratic Republic of Congo to the W, Sudan to the N. It is about the size of Minnesota.

Uganda is the largest coffee producer in the Commonwealth. Cotton, tea, maize, peanuts, sisal, oil seeds, tobacco, sugar, are also produced. Copper and tin are important mineral exports.

The nation has made steady economic progress.

In 1966-67 uninhabited areas in western Uganda which had been infested with tsetse flies, carriers of sleeping sickness, were transformed into cattle ranches, thanks to eradication of the tsetse with the aid of a U. S. loan.

Uganda became independent within the Commonwealth Oct. 9, 1962, a republic Oct. 9, 1963.

President is Milton Obote. Uganda is a member of the UN and the Commonwealth.

A long-standing political feud erupted Feb. 22, 1966, when Obote, then Prime Minister, seized full power and on Mar. 2 ousted President Edward Mutesa (who was also the Kabaka, or King, of Buganda). On May 24 army troops shelled and destroyed the king's palace but the king escaped the country.

Lake Victoria, 26,828 sq. mi., is Africa's largest lake. It is 3,720 ft. above sea level and over 200 mi. long. It was explored in 1875 by Henry M. Stanley.

It lies partly in Tanzania and Kenya and lake steamers connect their ports and Uganda. At Owen Falls on the Victoria Nile, outlet of Lake Victoria, a major dam and hydroelectric project has been constructed.

Further N on the Victoria Nile is Murchison Falls, 130 ft., in the heart of one of Uganda's national parks. On the W border with the Democratic Republic of the Congo, the Ruwenzori Range, identified with the legendary "Mountains of the Moon," rises over 16,000 ft. Pygmy tribes live in the nearby forests. In the SW there are several volcanoes over 11,000 ft. high; on their slopes is a gorilla sanctuary.

Union of Soviet Socialist Republics

SOYUZ SOVYETSKIKH
SOTSIALISTICHESKIKH RESPUBLIK
(Formerly Russian Empire)

Capital: Moscow. **Area:** 8,647,172 sq. mi. **Population** (Govt. est. 1968): 236,700,000. **Monetary unit:** Ruble (.90 official rate per U. S. \$1).

The Union of Soviet Socialist Republics—in area the largest country in the world—stretches across two continents from the North Pacific to the Baltic Sea. It occupies the northern part of Asia and the eastern half of Europe. Its western borders brush against Finland, the Baltic, Poland, Czechoslovakia, Hungary and Romania. On the S it is bounded by Romania, the Black Sea, Turkey, Iran, Afghanistan, China, Mongolian Peoples Republic and North Korea. In the far NE, Bering Strait separates it from Alaska.

The vast territory of the USSR, one-sixth of the earth's land surface, contains every phase of climate, except the distinctly tropical, and a varied topography. The European portion is a vast low plain with the Ural Mtns. on its eastern edge, the Caucasus Mtns. and others on the S. The Urals, separating the European from the Asiatic portions of the country, stretch N and S for 2,500 mi. The Asiatic portion also consists largely of an immense plain, with mountain ranges on its E and S.

There are some 150,000 rivers and 250,000 lakes. The larger European rivers include the Dnieper, flowing into the Black Sea, the Volga and the Ural into the Caspian Sea, the Don into the Sea of Azov, the Western Dvina into the Baltic and the Northern Dvina into the White Sea. The Asiatic section is drained by the Ob, the Yenisei and the Lena, each over 2,000 mi. long, which flow into the Arctic Ocean, and the Amur, which flows into the Pacific.

In the European section there is an 88,000-mi. inland waterway system in which canals link rivers (Moscow-Volga, 80 mi.; Dnieper-Bug, 58 mi.; Volga-Balt, 700 mi.; Volga-Don, 64 mi.), leading to 5 seas: Caspian, Azov, Black, Baltic and White.

The Caspian Sea, of which only the S end is in Iran, is the world's largest lake (143,560 sq. mi.). Other lakes are the Aral Sea (25,300 sq. mi.), Lake Baykal (11,780 sq. mi.), Lake Balkhash (6,720 sq. mi.), Lake Ladoga (6,835 sq. mi.).

In Moscow, the Kremlin, ancient citadel of the Czars, forms the nerve center of the federated republics. Leningrad (formerly St. Petersburg and Petrograd), in the delta of the Neva River, is the 2nd largest city. Kiev, the 1,000-year-old capital of the Ukrainian SSR, is the industrial center of the south. The Crimea and the eastern shore of the Black Sea, beneath the towering Caucasus Mtns., are a modern vacationland.

Beginning in 1939 the USSR by means of military action and negotiation overran contiguous territory and independent republics. Transfer of part of East Germany was approved at the Potsdam Conference. The Yalta Agreement conceded Soviet claims to Japanese territory in the Kurile islands and southern half of Sakhalin.

POLITICAL ORGANIZATION

The USSR is a federation consisting of 15 Union Republics, within certain of which are further subdivisions, such as Autonomous Soviet Socialist Republics, Autonomous Regions and National Districts. Four of the Union Republics contain 20 Autonomous Soviet Socialist Republics and 8 Autonomous Regions; the largest Union Republic, the Russian Soviet Federal Socialist Republic,

has also 10 National Districts. The Union Republics are:

Republic	Area sq. miles	Population (Est. 1968)
Russian RSFSR.....	6,593,391	127,911,000
Ukrainian SSR.....	232,046	46,381,000
Kazakh SSR.....	1,064,092	12,678,000
Uzbek SSR.....	158,069	11,266,000
Byelorussian SSR.....	80,154	8,820,000
Azerbaijan SSR.....	33,436	4,917,000
Georgian SSR.....	26,811	4,650,000
Moldavian SSR.....	13,012	3,484,000
Lithuanian SSR.....	26,173	3,064,000
Kirghiz SSR.....	76,642	2,836,000
Tadzhik SSR.....	54,019	2,736,000
Armenian SSR.....	11,306	2,306,000
Latvian SSR.....	24,695	2,298,000
Turkmen SSR.....	188,417	2,029,000
Estonian SSR.....	17,413	1,304,000

The 1959 census, first since 1939, reported 208,826,000 population, an increase of approx. 38,226,000 over the census of 1939, or about 19.5%. Sex ratio in 1959 was 45% male, 55% female. Marriage rate per year per 1,000 pop. is 12. In 1965 urban population was est. 54%; rural, 46%. Births (1965), 18.4 per 1,000; deaths 7.3 per 1,000; natural increase (excess of births over deaths), 11.1 per 1,000.

The Russian Soviet Federal Socialist Republic (Soviet Russia proper), contains over 50% of the population of the Soviet Union and includes 76% of its territory. Its territories stretch from the Estonian, Latvian and Finnish borders and the Byelorussian and Ukrainian lines on the W, to the shores of the Pacific, and from the Arctic on the N to the Black and Caspian Seas and the borders of Kazakh SSR, Mongolia and Manchuria on the S. Siberia (Sibir), divided into a number of administrative units, encompasses a large part of the RSFSR area. Capital: Moscow.

In 1966 the USSR incorporated the Karelo-Finnish Republic as an autonomous republic within the RSFSR, reducing the federation by one to 15. It comprises territory ceded by Finland after World War II. The capital, Petrozavodsk, was founded in the 18th century by Peter the Great. Forests cover two-thirds of the area and the underground wealth includes non-ferrous metal and mineral deposits.

Eastern and Western Siberia of the RSFSR have been transformed by steel mills, huge dams, oil and gas industries, electric railroads and new highways.

Ukrainian Soviet Socialist Republic is the most densely populated of the constituent republics. It borders on the Black Sea, with Poland, Czechoslovakia, Hungary and Romania on the W and SW. The population is 80% Ukrainian. Capital: Kiev. Northern Bukovina was added to the Ukrainian SSR from Romania in 1940. The Crimea was transferred to the Ukraine, 1954.

The Ukraine contains the arable black soil belt, the chief wheat-producing section of the Soviet Union. Sugar beets and oil seeds are important crops and livestock breeding is rapidly advancing.

The Donets Basin has a huge storage of coal iron and other metals. Here are produced 34% of the coal mined in the country, 50% of the pig iron, 40% of the steel and 35% of the manganese. There are chemical and dye industries and salt mines.

Byelorussian Soviet Socialist Republic (White Russia), situated on the western border of the USSR, suffered greatly under the Czars from periodical pogroms and from inter-racial struggles. Between 1914 and 1920 it was a field for military operations. Minsk is the capital.

Chief industries include machinery, tools, appliances, tractors, clocks, cameras, steel, cement, textiles, paper, leather, glass. Main crops are grain, flax, potatoes.

Azerbaijan SSR boasts near Baku, the capital, oil fields which produced 9% of the national total in 1965. Its natural wealth includes deposits of iron ore, barite, fossil copal, zinc, silver, gold, copper, tin, vanadium and molybdenum. Irrigation has boosted cotton production. A high-yield winter wheat also is grown. It produces iron, steel, cement, fertilizers, synthetic rubber, electrical and chemical equipment.

Georgian SSR, which lies in the western part of Transcaucasia, contains the largest manganese mines in the world. There are rich timber resources. Large coal deposits have been discovered. Basic industries are food, textiles, iron, steel. Grain, tea, tobacco, grapes are grown. The capital is Tbilisi (Tiflis).

Armenian SSR is mountainous, sub-tropical,

extensively irrigated with a wide range of crops. Copper, iron, marble are mined. Capital is Erevan.

Uzbek Soviet Socialist Republic, most important economically of the Central Asia republics, produced in 1966 68% of USSR cotton, 50% of silk. 34% of astrakhan, 85% of hemp. Industries include iron, steel, cars, tractors, TV and radio sets, textiles, food. Mineral wealth includes coal, sulphur, copper and oil. Capital: Tashkent, shaken by more than 600 earthquakes in 1966.

Turkmen SSR in Central Asia, produces cotton, grain, carpets, Turkoman horses. Mineral wealth includes oil, coal, sulphur, barite, lime, gypsum. The Kara Kum desert occupies four-fifths of the territory. Capital: Ashkhabad.

Tadzhik SSR (Tadzhikistan), formed from the former regions of Bokhara and Turkestan, was admitted as a constituent republic on Dec. 5, 1929. Three-quarters of the population are Tadzhiks, mostly Sunnis, speaking an Iranian dialect. Chief occupations are farming and cattle breeding. Cotton, grain, rice and a variety of fruits are grown. Heavy industry, based on rich mineral deposits, coal and hydroelectric power, has replaced handicrafts. Dushanbe is the capital.

Kazakh Soviet Socialist Republic extends from the lower reaches of the Volga in Europe to the Altai Mtns. on the Chinese border. It has vast deposits of coal, oil, iron, tin, copper, etc., and large quantities of non-ferrous metals. Fish for its canning industry are caught in Lake Balkhash and the Caspian and Aral Seas. The capital, Alma-Ata, produces movies. Karaganda Temir-Tau, Tselinograd, Balkhash, Aktyubinsk, Pavlodar, Semipalatinsk and Chirchik are large new centers.

Kirghiz Soviet Socialist Republic is in the eastern part of Soviet Central Asia, on the frontier of Sinkiang (Western China). The people, once nomadic, breed cattle and horses and grow tobacco, cotton, rice, sugar beets. New industries include machine and instrument making, chemistry. Capital: Frunze.

Moldavian Soviet Socialist Republic, in the SW part of the USSR, is a fertile black earth plain bordering Romania, and includes Bessarabia. It is an agricultural region that grows grains, fruits, vegetables and tobacco. Textiles, wine, food and electrical equipment industries have been developed. Capital: Kishinev.

Lithuanian Soviet Socialist Republic, on the Baltic, produces cattle, hogs, electric motors and appliances. The capital is Vilnius (Vilna).

The Latvian Soviet Socialist Republic on the Baltic and the Gulf of Riga, has timber and peat resources estimated at 3,000,000,000 tons. In addition to agricultural products it produces rubber goods, dyes, fertilizers, glassware, telephone apparatus, TV, and radio sets, railroad cars. The capital is Riga, on the Western Dvina River.

The Estonian Soviet Socialist Republic, also on the Baltic, has textiles, shipbuilding, road-making and mining equipment industries and its shale refining industry is large. Tallinn is the capital.

The 3 Baltic states were provinces of imperial Russia before World War I, were independent nations between World Wars I and II, and became SSRs, within the USSR, in 1940. They were occupied by Germany 1941-44. The U. S. has never formally recognized the incorporation of Lithuania, Latvia and Estonia into the USSR.

ECONOMICS AND PRODUCTION

The economic foundation of the USSR is the socialist ownership of the instruments and means of production. Socialist property exists in two forms: (1) State property; (2) Cooperative and collective farm property. State property includes the land, minerals, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large agricultural enterprises, municipal enterprises and the bulk of dwellings.

The common enterprises of collective farms and cooperative organizations, their output and common buildings constitute their socialized property. Members may use small plots of land attached to their dwellings.

"Backyard" farms, from which farmers may sell produce and keep the profit, swelled in size and number in the 1960s.

Cultivated land in 1965 was est. at 496,320,000 acres. There were 37,100 collective farms and 12,196 state farms. In 1968 there were 97,100,000 cattle, 51,000,000 hogs and 138,300,000 sheep, all up from a year earlier.

In 1963-5-6 the USSR was forced to make huge purchases of wheat in Canada and other countries,

but a record surplus harvest was produced in 1966.

The USSR is incalculably rich in natural resources. It claims to possess 57% of the world's coal deposits, 58% of its oil, 41% of iron ore, 88% of manganese, 54% of potassium salts, 30% of phosphates, and 25% of all timber land. Gold production is est. at from 12,000,000 to 15,000,000 fine oz. annually, about half exported.

The USSR produces about 25% of world iron ore output, 19.5% of steel, 20% of coal.

The index of industrial production (1963=100) was 139 for 1967.

A new 5-year plan, prepared in 1966, set goals of a 40% rise in national income, 50% in industrial output, 25% in farm production. Premier Kosygin urged continued emphasis on consumer goods, adjustment of wholesale prices (last revised in 1955) to permit all enterprises to operate profitably without subsidies, wage incentives, and reduced central controls to stimulate production. Early in 1966 many major factories were put on an incentive profit-sharing system. In mid-1966 a system of bonuses to farms and farm works (called "Socialist competition") was introduced to spur food production.

The industrial output rose by 10% in 1967. Poor weather hurt agriculture.

ELECTRIC POWER

Electric power output under a 15-year plan is projected to reach 900-1,000 billion kwh by 1970.

Of many large hydroelectric developments, the world's largest is at Bratsk on the Angara River, capable of producing 22 billion kwh annually. Its dam rises 400 ft. above the river, forming a reservoir 350 mi. long containing 145,000,000 acre-ft. of water.

Atomic power stations have been built and others are under construction.

FOREIGN TRADE

Exports include petroleum and its products, iron and steel, rolled non-ferrous metals, industrial plant equipment, lumber, cotton, asbestos, gold, manganese and others. Most of its trade is with Socialist nations, but trade with others is increasing. East Germany presently is the Soviet Union's biggest customer.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports -
1966	\$7,913,000	\$8,841,000
1967	\$8,536,000	\$9,649,000

In the USSR budget for 1968, as announced by the Soviet government, the defense budget was increased by \$2.4 billion. Output of consumer goods was scheduled to rise by 8.6%, a greater rate than that for heavy industry, 7.9%.

(The defense budget for 1968 totaled \$18.7 billion, but Western experts said it actually might have been twice that figure, with some military spending concealed in other items.)

EARLY HISTORY

The first Russian state centered on Kiev in the 9th Century. In the 13th Century the Mongols overran the country. It recovered under the grand-dukes and princes of Muscovy, or Moscow, and by 1480 freed itself from the Mongols. Ivan IV, the Terrible, was the first to be formally proclaimed Czar (1547). Peter the Great (1682-1725), extended the domain and in 1721 founded the Russian empire.

REVOLUTION OF 1917

The abortive Revolution of 1905 demonstrated the insecurity of the czarist regime and led to mild concessions. The 1917 Revolution began in March with a series of sporadic strikes for higher wages by factory workers. A provisional democratic government under Prince Georgi Lvov was established but was quickly followed in May by the second provisional government, led by Alexander Kerensky. The Kerensky government was overthrown in a Communist coup led by Vladimir Ilyich (Nikolai) Lenin Nov. 7.

Lenin's death Jan. 21, 1924, resulted in an internal power struggle from which Joseph Stalin eventually emerged the absolute ruler of Russia. Stalin secured his position at first by exiling opponents such as Leon Trotsky. But in the 1930s he resorted to a series of "purge" trials in which virtually all opposition was directly eliminated.

RECENT EVENTS

After Premier Stalin died, Mar. 5, 1953, Nikita Khrushchev was elected First Secretary of the Central Committee for 5 years; reelected 1956, 1959, 1961. In 1956 he condemned Stalin and his

tyrannical methods before the Soviet Communist Party Congress in Moscow, said Stalin cultivated a "cult of personality" and subverted Communist aims. Khrushchev lifted some restrictions, extended barter and trade policies. The names of Stalin, Molotov, Malenkov and other supporters of Stalin were eliminated from regions, cities and other sites in 1961-62 after Stalin's body was removed from the Lenin-Stalin tomb in Moscow.

Khrushchev was elected Premier by the Supreme Soviet, Mar. 27, 1958, succeeding Marshal Bulganin. He was reelected Apr. 24, 1962.

Under Khrushchev the open antagonism of Poland and Hungary against domination by Moscow was brutally suppressed in 1956. He advocated peaceful co-existence with the capitalist countries, but continued arming the USSR with nuclear weapons, promised aid to all "suppressed peoples" and so-called wars of liberation, delayed a final peace treaty with all Germany. He warned the Western nations against intervention in Laos and Vietnam and aided the Cuban revolution under Fidel Castro but withdrew Soviet missiles from Cuba during confrontation by U. S. President Kennedy, Sept.-Oct. 1962.

The USSR, the U. S. and Great Britain initiated a joint treaty July 25, 1963, which would ban all except underground nuclear tests.

The policy of co-existence alienated the leaders of Albania and Communist China. The latter continued to preach world revolution and denounced the Khrushchev methods as deviating from true Communism.

Khrushchev was suddenly deposed, Oct. 14-15, 1964, and replaced as party First Secretary by Leonid I. Brezhnev, 57, and as Premier by Aleksei N. Kosygin, 60. An editorial in Pravda, Communist party newspaper, indicated Khrushchev had been accused of "hare-brained scheming, bragging and phrase-mongering." (Brezhnev's title was changed in 1966 to General Secretary, and Khrushchev's de-Stalinization policy was relaxed.)

Communist China's Premier Chou En-lai visited the new USSR chiefs in Nov. 1964 but the visit failed to heal the growing rift between the two Communist powers. In 1965-67 the public squabble between the two increased with the questions of aid to North Vietnam and the anti-USSR activity of Communist China's Red Guards the major issues.

There were several significant developments on the international scene in 1967 as President Johnson in March signed a consular treaty which was the first bilateral treaty with the Russians since the 1917 Revolution.

Soviet Premier Aleksei N. Kosygin and President Johnson met for the first time in Glassboro, N. J., in June after the Russian leader came to the U. S. to attend a meeting of the UN which was dealing with the Israeli-Arab crisis.

In April Svetlana Alliluyeva, only daughter and last surviving child of the late Soviet dictator Joseph Stalin, arrived in New York after defecting from the Soviet Union.

In July 1968 the U. S. and the USSR agreed to open talks on cutting both offensive nuclear weapons and defensive anti-missile systems. They also joined 59 other nations in signing a treaty to bar spread of nuclear weapons.

GOVERNMENT

The first Soviet constitution was adopted in 1918 for the RSFSR. The USSR was formed in Dec., 1922, and the first Union constitution adopted in 1923. The current constitution, adopted in 1936, provides for universal direct suffrage with secret ballot. It was modified, 1944, to give each of the constituent republics the right to have separate commissions for defense and foreign affairs. Voting age is 18; candidates for election must have reached 23. Each Union republic is organized similarly to the central gov't.

The highest legislative authority is the Supreme Soviet consisting of two chambers, the Soviet of the Union and the Soviet of Nationalities. The first house is elected on the basis of one deputy for every 300,000 population; the second on the basis of 25 deputies from each Union republic, 11 from each autonomous republic, 5 from each autonomous region, and one from each national district. The Supreme Soviet normally meets twice a year, serves for a four-year term. It elects a 33-member Presidium which serves between sessions.

Titular chief of state, Chairman of the Presidium (President) of the Supreme Soviet, is Nikolai V. Podgorny, chosen Dec. 9, 1965, succeeding the aging Anastas I. Mikoyan.

In general elections June 12, 1966, the single slate of approved candidates for the Soviet of the Union and Soviet of Nationalities was elected by 99.8% of the voters. Of 144,000,000 registered voters, 99.94% cast ballots. Fewer than 5% availed themselves of the right to vote against a candidate by striking out his name—the only choice offered voters.

On Aug. 2, 1966, the new Supreme Soviet convened and unanimously re-elected Aleksei N. Kosygin Premier.

The highest judicial organ is the Supreme Court, whose members are elected by the Supreme Soviet for five-year terms. Other courts are elected within the constituent republics. Since Feb. 1957, the Supreme Court has been restricted to appellate functions.

The highest executive and administrative organ of state power is the Council of Ministers (Premier and deputies) appointed by and theoretically responsible to the Supreme Soviet.

The Communist party of the USSR is the only legal party. Its highest organ is the Party Congress of about 1,500 elected representatives which normally meets once every 4 years. It elects a Central Committee, the party's directive body, and other committees. The Central Committee elects from its number a Politburo (until 1966 was called Presidium) which makes party policy between Central Committee meetings; and a Secretariat, the party's chief executive body.

The Communist party Politburo normally consists of 12 full members and 6 alternates. In 1967 full members were: Party General Secretary Leonid Brezhnev, Premier Aleksei Kosygin, G. I. Voronov, A. P. Kirilenko, Arvio J. Pelshe, N. V. Podgorny, D. S. Polyansky, Mikhail A. Suslov, A. N. Sholepin, K. T. Mazurov, P. E. Shelest.

Membership in the Communist party in 1966 was reported at over 12,000,000.

EDUCATION

Universal compulsory education was introduced in 1930; education is free. Under reforms introduced in 1959-60, the primary education of 7 years is being extended into an 8-year course that will embrace polytechnical training in industry or agriculture. Students may then go on to a 3-year secondary school to prepare for entrance to a technical institute, university or art school.

In 1966-67 there were 210,000 primary, secondary and technical schools with enrollment of 48,168,000, 3,969 technical colleges with 3,979,000 students; 23,893 schools providing a 10-year secondary education for 4,835,000 workers who already had begun to earn a living, and 767 universities and other places of higher learning with 4,123,000 students. The USSR annually graduates more than 432,000 from higher education establishments, including an est. 239,700 engineers and other scientists. Illiteracy has been reduced to 1.5%.

SOCIAL BENEFITS

All workers are entitled to free public health services, paid vacations, sickness insurance, pensions for men at 60 and women at 55 (extended to collective farm members 1965). There are lower pension requirements for those in hazardous or difficult occupations. State payments are made to mothers on the birth of the 3rd and successive children. Social benefits paid in 1966 totaled 40.5 billion rubles, up 6% from 1965.

RELIGION

Separation of church and state was effected in 1918. Nine branches of Christianity are represented, led by the Orthodox Church, which in 1956 had 22,000 congregations. Islam has the second largest following. Jewish and Buddhist faiths are also present.

Marriages must be registered and divorce is discouraged.

DEFENSE

In 1964 Western authorities believed Soviet forces to total approx. 3,300,000. The Army had 2,300,000 in about 150 first-line divisions, plus 40 (est.) artillery and anti-aircraft artillery divisions, comprising about 10,000 men apiece, and missile and specialized units. Approx. 100 divisions were stationed in Europe. Total manpower of the Communist bloc, including China, was est. at 7,500,000.

The Navy in 1964 was believed to include upward of 35 cruisers, 180 destroyers and escort vessels, 465 modern long-range submarines, 1,900 torpedo boats, and patrol vessels, minesweepers and auxiliaries. Navy personnel is estimated at 750,000.

In 1966 a squadron of nuclear-powered Soviet

missile submarines made a 6-week round-the-world voyage.

The Air Force was est. to have 20,000 first-line planes, including a possible 200-300 heavy bombers and 500 medium bombers, in addition to another 20,000 second-line, cargo and training aircraft. The bomber force was equipped with Myasischev 4-jet planes and Tupolev 4-turboprop and twin-jet bombers with intercontinental range. Other equipment includes several thousand Il-38 jet bombers, MIG jet fighters, Yak-25s, several new supersonic bombers and interceptors, and Sukhoi delta-wing and swept-wing fighters.

While the USSR was believed to possess only 270 intercontinental ballistic missiles in 1965, the U. S. Defense Dept. confirmed in 1968 that the Soviet was expected to catch up with the U. S. force of slightly over 1,000 ICBMs by mid-1969. Both nations were believed planning to produce missiles with multiple, separately aimable, warheads.

The USSR and the United States signed an agreement June 20, 1963, establishing an instantaneous teletype-and-radio communications system between Moscow and Washington, known as the "hot line," designed for emergency communications and as a safeguard against accidental war.

The USSR is a member of the UN and Warsaw Pact.

United Arab Republic

AL-JUMHURIA AL-ARABIA AL-MUTTAHIDA

Egypt (Misr)

Capital: Cairo. Area: 386,100 sq. mi. Population (UN est. 1967): 30,907,000. Monetary unit: Egyptian pound (.4348 official rate per U. S. \$1).

The United Arab Republic, a name adopted by Egypt and Syria during their brief union, Feb. 1, 1958, to Sept. 30, 1961, comprised only Egypt after Syria withdrew from the merger.

Egypt, itself a republic since 1953, occupies the NE corner of Africa on the Mediterranean. On the E lie Israel and 1,200 mi. of Red Sea separating Egypt from Saudi Arabia. Libya is to the W and Sudan to the S. Egypt's Sinai Peninsula extends into the Red Sea, with the Gulf of Aqaba on the E. The Gulf of Suez and the Suez Canal (connecting the Gulf with the Mediterranean) are in Egypt. Jurisdiction over a 23-mi. wide strip of Asia Minor west of Israel, including Gaza, was given Egypt by an armistice agreement, 1949, as a refuge for displaced Palestinian Arabs.

Alexandria, founded 332 B.C., is the chief port. Cairo, largest city, is rich in archeological treasures, cafes, bazaars. Tourist attractions include the pyramids, Sphinx, temple ruins at Karnak and Luxor, and other ancient monuments.

In 1966 removal of the Abu Simbel temples of Ramses II and his wife, Nefertari, from the path of rising waters behind the Aswan High Dam was completed. The U. S. gave over \$12,000,000 toward removal costs.

In July 1968 the UAR shipped a smaller monument, the 2,000-year-old Temple of Dendera, to the U. S. as a gift in gratitude for American aid to the Abu Simbel project. The temple was dismantled and its 661 huge stones, weighing some 800 tons, were to be reassembled outside the Metropolitan Museum of Art in N. Y.

Resources and Industries. Productive acreage lies in the Valley of the Nile and in its delta, or Lower Egypt, north of Cairo. The Nile flows through 960 mi. in Egypt and covers 2,850 sq. mi. with waters and marshes. About 13,000 sq. mi. are cultivated for cereals, vegetables, cotton and sugar cane, and 1,900 sq. mi. have canals and fruit plantations. The Nile rises in June and reaches its peak by August, regulated by dams and networks of canals. Fruit is plentiful and includes grapes, dates, figs, pomegranates, peaches, apricots, oranges, lemons, bananas and olives. Egypt is one of the world's top producers of cotton.

The dams conserving Nile waters are among the largest in the world. Aswan, at the First Cataract, is 176 ft. high, creating a reservoir 230 mi. long. Gabel Awila dam is over 3 mi. long. The Aswan High Dam project in southern Egypt, begun in 1960, was to add 2,000,000 acres of arable land. Deep artesian wells, drilled in the Western Desert, reclaimed 43,000 acres for cultivation, 1960-66.

A variety of minerals is found in Egypt; petroleum is most important, providing 90% of total mineral production value. Others are phosphate rock, salt, coal (found in Sinai in 1963), iron, manganese, cement, gold, gypsum, kaolin, titanium.

A series of decrees in July, 1961, nationalized about 90% of industry and reduced land holdings from 200 to 100 acres.

Egypt has textile plants, yarn factories, cement and fertilizer factories, and a film industry supplying the Middle East, Africa and Asia.

Principal exports are cotton, rice, mineral products, textiles, refrigerators, tires, cement, electrical instruments.

History and Government. Archeological records of ancient empires in Egypt go back to 4000 B.C. A high civilization of rulers and priests dominated the lowly serfs. Assyrians, Persians, Greeks (Alexander of Macedon), Romans, Saracens, Turks, French (Napoleon) and British invaded Egypt. Under Turkish sultans the khedive as hereditary viceroy had wide authority but repeated insolvency led to regulation by European powers. Britain, which supervised the administration after 1882, made Egypt a protectorate 1914-1922. Britain then recognized Egypt as a sovereign state but reserved defense, security of British communications, and the Sudan.

The sultan became King Fouad I in 1922 and a constitution was adopted in 1923. King Fouad I died in 1936 and was succeeded by his son, Farouk I. Farouk abdicated in 1952 and left the country. His son was named nominal ruler under a regency council, Aug. 5, 1952, but the crown was abolished when Egypt was declared a republic, June 18, 1953.

In 1936 an Anglo-Egyptian treaty of alliance revised the conditions of association. Britain agreed to a condominium over the Sudan, with British and Egyptian troops cooperating, and obtained the right to retain 10,000 soldiers and 400 airmen to defend the Suez Canal for 20 years until Egypt would take over, and also held naval bases in Alexandria and Port Said.

Egypt became a charter member of the UN and in 1944 led in organizing the Arab League. In 1947 Egypt brought before the UN Security Council a demand for unification of Egypt and Sudan and evacuation of all British troops from the Suez. In Oct. 1951 Egypt abrogated its 1936 treaty with Britain. The Sudan, with UN support, became independent in 1956.

Delays in reforms, corruption in public office and royal extravagance led to an uprising July 23, 1952, led by the Society of Free Officers which named Maj. Gen. Mohammed Naguib commander in chief and forced Farouk to abdicate. Naguib became Premier Sept. 7, 1952. When the republic was proclaimed June 18, 1953, Naguib became its first President and Premier. Lt. Col. Gamal Abdel Nasser, the principal influence behind the revolt, removed Naguib and succeeded him as Premier on Apr. 18, 1954.

On June 23, 1956, voters elected Col. Nasser President (99.9% of total votes) and adopted a constitution providing for freedom of worship, press, speech, assembly and private ownership, and election of a national assembly. The constitution proclaimed Egypt to be an Arab state under a republican and democratic form of government.

In July, 1956, the United States, Great Britain and the International Bank withdrew support from loans to start the Aswan High Dam. President Nasser nationalized the Suez Canal and seized control of the assets of the Canal company. Later he obtained credits and technicians from the USSR, which began to build the dam. First stage was opened May 14, 1964.

When the state of Israel was proclaimed in 1948, Egypt joined other Arab nations invading Israel and was defeated. No peace treaties were made and Egypt later denied Israeli shipping the use of the Suez Canal.

Border hostilities with Israel heightened and on Oct. 29, 1956, Israeli forces invaded Egypt's Sinai Peninsula. Egypt rejected a cease-fire demand by Britain and France; on Oct. 31 the two nations dropped bombs and on Nov. 5-6 landed forces. Egypt and Israel accepted a UN cease-fire,

followed by Britain and France; fighting ended Nov. 7.

A UN Emergency Force guarded the 117-mile long border between Egypt and Israel until May 19, 1967, when it was withdrawn at Nasser's demand. The Egyptians quickly reoccupied the Gaza Strip and the heights at Sharm el Sheikh and three days later closed the Strait of Tiran leading into the Gulf of Aqaba to all Israeli shipping. Full-scale war broke out June 5 and before it ended under a UN cease-fire five days later, Israel had captured Gaza and the Sinai Peninsula, controlled the east bank of the Suez Canal and reopened the gulf.

In 1962-65 the UAR supported a campaign to destroy royalist guerrilla forces in Yemen after the Imam's regime had been deposed in a military coup. Saudi Arabia had been supplying royalist supporters of the Imam. The latest in a number of cease-fire agreements was reached by Pres. Nasser and Saudi Arabia's King Faisal Aug. 31, 1967.

The UAR was accused in 1965-66 of inspiring guerrilla attacks from Yemen into Aden, which in 1967 became independent as Southern Yemen.

Education and Religion. Three distinct ethnic elements are represented: the Fellahin, basic Egyptian group; the Bedouin, nomadic Arabs; Nubians, a mixed group. Moslems form over 91% of the population and Christians about 7%.

Education is compulsory for all children beginning at age 7 and free through high school. There is a famous seat of Moslem learning in the University of Al-Azhar in Cairo, founded about 969 A.D. Four modern universities are Cairo, Alexandria, Ein-Shams and Assiut. Arabic is the official language. American schools, managed by Egyptians since 1956, include American University, Cairo; Cairo American College; American Mission, Heliopolis.

Defense. After the 1967 defeat by Israel, the UAR rapidly rebuilt its armed forces with equipment supplied by the USSR.

Cairo was the original site of the Arab League, formed in 1945 to foster the cause of the Arab nations.

THE SUEZ CANAL

The Suez Canal, 103 mi. long, links the Mediterranean and the Red Sea. Its minimum width is 196 ft., 10 in., and maximum draft for vessels 38 ft. It was begun April 25, 1859, by a French corporation under Ferdinand de Lesseps and opened Nov. 17, 1869. Benj. Disraeli, British prime minister, obtained control for Britain Nov. 24, 1875, by buying 176,752 shares from the Khedive Ismail of Egypt for £3,976,582 (nearly \$20,000,000). Prolonged agitation led to an agreement July 27, 1954, by which Britain agreed to withdraw all troops (est. 80,000) within 20 mos. after signing pact on Oct. 19, 1954. The 74-year British military occupation ended June 13, 1956. On July 26, Pres. Nasser proclaimed nationalization of the canal, seizing it from its French and British stockholders.

Egypt on Apr. 24, 1957, promised to abide by the Constantinople Convention of 1888, and to accept the jurisdiction of the International Court in differences arising from its interpretation. Citing Item 10 of the Convention, it has continued to bar Israeli shipping and cargoes destined for Israel. Item 10 provides that freedom of passage "shall not interfere with measures Egypt might find necessary to take to secure the defense of Egypt."

A final agreement between the UAR and the Universal Suez Canal Co., signed July 13, 1958, called for payments to stockholders of \$64,400,000. Final payments were made Jan. 1, 1963.

Since nationalization, the UAR has widened and deepened the canal. In the year before the seizure, the canal handled 14,666 ships, max. draft 35 ft., max. loaded capacity 30,000 tons, gross revenue \$75,000,000. For the year ended June 30, 1966, the figures were 20,285 ships, 38 ft., 60,000 tons, \$197,000,000.

The canal was closed to all shipping by Cairo at the height of the Israeli-Arab War June 6, 1967. A year later the canal was still closed, with 14 ships still trapped in it by sunken vessels.

The United Kingdom of Great Britain and Northern Ireland

Capital: London. Area: 94,209 sq. mi. Population (Govt. est. 1967): 55,068,000. Monetary unit: Pound (U. S. \$ 2.394).

The United Kingdom of Great Britain and Northern Ireland comprises England, Wales, Scotland and Northern Ireland.

The term British Isles is applied to these divisions and to the separately-governed island de-

pendencies, Isle of Man and the Channel Islands. The Isle of Man lies in the Irish Sea and the Channel Islands lie off the coast of France. The whole British Isles lie off the NW corner of Europe, with the North Atlantic on the N and W; separating England from the mainland are the North Sea on the E, the Strait of Dover on the SE and the English Channel on the S. The Thames,

BUDGETS OF GREAT BRITAIN

Fiscal year ends March 31

1955.....	4,738,000	4,305,000	1963.....	6,794,000	6,441,000	1989 (est.)	12,875,000	11,489,000

210 mi. from its source to the North Sea, is England's longest river.

England has an area of 50,331 sq. mi. and a population of 45,680,870; Wales, 8,016 sq. mi., 2,709,930; Scotland, 30,411 sq. mi., 5,187,000; Northern Ireland, 5,451 sq. mi., 1,491,000. (All populations by Govt. est., mid-1967.)

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent because of the Gulf Stream modifying the temperature, which has a mean of 48°. Rainfall averages 41 inches annually, and fogs are frequent.

On Apr. 1, 1965, new boundaries and a new government system for Greater London went into effect. The boundaries cut the size from 692 to 620 sq. mi. and the population from 8,176,810 (est. 1963) to 7,880,760 (est. 1967). A new Greater London Council administers most citywide services; local councils for 32 boroughs, formed from 100 former areas, conduct local services; the old City of London (675 acres), financial capital of the Commonwealth, retains independent status plus powers as a new borough and continues to provide the Lord Mayor of London.

QUEEN AND ROYAL FAMILY. The ruling sovereign is Elizabeth II of the House of Windsor, the former Princess Elizabeth Alexandra Mary, born April 21, 1926, eldest daughter of King George VI and Queen Elizabeth. She succeeded to the throne Feb. 6, 1952, and was crowned June 2, 1953. Her title in the United Kingdom and the Colonies is: "Elizabeth II, by the Grace of God of the United Kingdom of Great Britain and Northern Ireland and of her other realms and territories, Queen, Head of the Commonwealth, Defender of the Faith." The title varies in other countries of the Commonwealth. The Queen is a great-great-granddaughter of Queen Victoria.

The Queen, as Princess Elizabeth, was married Nov. 20, 1947 to Lt. Philip Mountbatten, born June 10, 1921, former Prince of Greece. He was created Duke of Edinburgh Nov. 19, 1947. H.R.H. Prince Philip Nov. 20, 1947, and given the title Prince of the United Kingdom Feb. 22, 1957. He is a son of late Prince Andrew of Greece and Princess Alice, sister of Earl Mountbatten (former Governor-General of India); his grandfather, Prince Louis of Battenberg, became admiral in Royal Navy and changed the family name to Mountbatten; the Duke is great-grandson of Christian IX of Denmark and great-great-grandson of Queen Victoria.

They have four children: (1) Prince Charles Philip Arthur George, born Nov. 14, 1948, named Prince of Wales, July 26, 1958, (2) Princess Anne Elizabeth Alice Louise, born Aug. 15, 1950, (3) Prince Andrew Albert Christian Edward, born Feb. 19, 1960; (4) Prince Edward Antony Richard Louis, born Mar. 10, 1964, third in line for the throne. Prince Charles is the heir apparent.

The Queen has one sister, Princess Margaret Rose, born Aug. 21, 1930; married Antony Armstrong-Jones, a commoner, May 6, 1960. He received an Earldom as the Earl of Snowdon Oct. 3, 1961. Issue: David Albert Charles, Viscount Linley, born Nov. 3, 1961, sixth in line for the throne, and a daughter, Sarah Frances Elizabeth (known as Lady Sarah Armstrong-Jones), born May 1, 1964.

The late King George VI was born Dec. 14, 1895, son of King George V (died Jan. 20, 1936), and Queen Mary (died March 24, 1953). He succeeded to the throne on the abdication of his brother, Edward VIII, Dec. 11, 1936. As Prince Albert Duke of York, he married April 26, 1923, Lady Elizabeth Bowes-Lyon (born Aug. 4, 1900). He died Feb. 6, 1952.

His widow became Queen Mother Elizabeth. Two brothers and a sister also survived George VI.

They were H.R.H. Prince Edward Albert (born June 23, 1894) Prince of Wales; proclaimed King Edward VIII, acceded Jan. 20, 1936 but never crowned, abdicated Dec. 10, 1936; created Duke of Windsor (Dec. 12, 1936) married (June 3, 1937) Mrs. Wallis Warfield; appointed Governor

of the Bahamas July 9, 1940, resigned Mar. 15, 1945; H.R.H. Prince Henry William (born March 31, 1900), created Baron Culloden, Earl of Ulster and Duke of Gloucester (March 31, 1928), married (Nov. 6, 1935), Lady Alice Montagu-Douglas-Scott (born Dec. 25, 1901), daughter of the Duke and Duchess of Buccleuch and Queensbury—issue: William Henry Andrew Frederick (born Dec. 18, 1941), Richard Alexander Walter George (born Aug. 26, 1944); Princess (Victoria Alexandra Alice) Mary, Princess Royal (born April 25, 1897, died Mar. 28, 1965), married (Feb. 28, 1922) Viscount Lascelles, later Earl of Harewood (died May 24, 1947)—issue: George Henry Hubert, Earl of Harewood (born Feb. 7, 1923), Gerald David (born Aug. 21, 1924).

A third brother, the Duke of Kent, was killed in an airplane accident in Scotland (Aug. 25, 1942). He was H.R.H. Prince George (born Dec. 20, 1902), married (Nov. 29, 1934) Princess Marina of Greece (born Nov. 30, 1906)—issue: Edward George Nicholas Patrick, Duke of Kent (born Oct. 9, 1935), married (June 8, 1961) Katharine Worsley; Alexandra Helen Elizabeth Olga Christabel (born Dec. 25, 1936) married Hon. Angus Ogilvy (April 1963); Michael George Charles Franklin (born July 4, 1942).

Queen Elizabeth announced Feb. 8, 1960, that her descendants, except princes and princesses of the royal family, would bear the surname Mountbatten-Windsor.

The Queen receives from Parliament an annuity of £475,000 (\$1,140,000), comprising her privy purse of £60,000 (\$144,000), and the rest for her household salaries and expenses. The Civil List grants Prince Philip £40,000 (\$96,000), Queen Mother Elizabeth £70,000 (\$168,000); the Duke of Gloucester £35,000 (\$84,000); Prince Charles £30,000 (\$72,000), Princess Margaret £15,000 (\$36,000).

PARLIAMENT is the legislative governing body for the United Kingdom, with certain powers over dependent units but none over the independent states. It consists of two Houses. The House of Lords is divided into (1) the Lords Temporal, consisting of hereditary peers and peeresses who have not disclaimed their titles, life peers created by the Crown, and Lords of Appeal; and (2) the Lords Spiritual who are the Archbishops of Canterbury and York and 24 diocesan bishops of the Church of England. Full membership of the House of Lords is over 1,000 but actual average voting strength is approx. 90-120.

Women became eligible to sit in the House of Lords for the first time, July 23, 1958. Previously, women had been eligible to sit only in Commons.

The House of Commons has 630 members, who are elected by direct ballot and divided as follows: England, 511; Wales and Monmouth, 36; Scotland 71; Northern Ireland, 12.

Clergymen of the Church of England, ministers of the Church in Scotland and Roman Catholic clergymen are disqualified from sitting as members, also certain government officers, and sheriffs. Women have had the right to vote since 1918.

Members of Parliament are paid £3,250 (\$7,800). Most cabinet Ministers are paid £8,500 (\$20,400). Ministers in the House of Commons draw an additional allowance of £1,250 (\$3,000) from their pay as M.P.s.

The Labor party ended 13 years of Conservative party rule by winning a close verdict in general parliamentary elections Oct. 15, 1964. Labor party leader Harold Wilson became Prime Minister, succeeding Conservative Sir Alec Douglas-Home. Election Mar. 31, 1966, gave Labor an over-all majority of 97 seats. The popular vote was: Labor, 13,064,951 (47.9%); Conservatives, 11,418,433 (41.9%); Liberals, 2,327,533 (8.6%); others, 452,689 (1.6%).

As of May 1968 the parties had the following number of seats in Commons: Labor, 348; Conservatives and Associates, 260; Liberal, 12; others, 6, vacancies, 4.

The Labor Government, on July 27, 1965, announced a wide variety of austerity moves aimed to speed deflation and strengthen the pound. In 1966 it took further action, raising taxes, cutting expenditures and imposing a wage and price freeze. In 1967 the freeze was slightly relaxed. The unemployment rate had risen from 1.3% in July 1966 to 2.3% in July 1967.

By Feb. 15, 1971, Britain will have completed a changeover to a system of decimal currency, continuing the same pound but dividing it into 100 new pence. In 1968, two of the new coins, a 5 pence equal to an old shilling and a 10 pence equal to the old two-shilling piece, were introduced. All 4 coins were in circulation but the shillings (worth 20 to the pound) were due to be retired and would not be a part of the new system. New pence (p) would entirely replace old pence (d) by 1971.

Also in 1968, Parliament approved a bill adopting a new British Standard Time for year-round use, keeping its clocks, during a 3-year test, one hour ahead of Greenwich Mean Time. This would make British time 5 hours ahead of New York in summer and 6 hours ahead in winter.

RESOURCES AND INDUSTRIES. Great Britain's major occupations are manufacturing and trade. Metals and metal-using industries contribute more than 50% of the exports. Agriculture provides wheat, barley, oats, sugar beets, rye and garden truck. Of about 60,000,000 acres of land in England, Wales and Scotland, 49,000,000 are farmed, of which 18,000,000 are arable, the rest pastures.

The country is rich in mineral resources. There are huge deposits of coal, the annual output approximates \$2 billion in value. Limestone, igneous rock and iron ore are valuable products. Other important minerals, in the order of their value, are gravel and sand, clay and shale, slate, sandstone, salt, China clay, fireclay, chalk, gypsum, oil shale, lead ore, tin ore and silica.

The railway systems, approx. 47,000 mi. of tracks, have been nationalized since 1948.

There are approx. 175 airports for civil use in Great Britain. There are two state-owned airlines, British European Airways and British Overseas Airways Corp.

Telephone service is a part of the postal system. Telephones number more than 11,400,000.

Broadcast receiving licenses in 1967 totaled 2,583,000 for radio only (including car radios) and 14,910,000 for both radio and TV.

The government, on July 28, 1967, took ownership of 14 steel companies which comprised 90% of the nation's steelmaking industry, paying shareholders in the companies more than \$1.4 billion in government securities. The new British Steel Corp. became Britain's largest industrial enterprise.

Tourism ranks high in earnings. Visitors from abroad average more than 2,500,000 annually, of whom about 650,000 are from the U. S.

Index of industrial production (1963=100) has been: 1964, 108; 1965, 111; 1966, 112; 1967, 112.

Industrial production:

	1964	1966	1967
Coal (million tons)	185.4	174.6	172.2
Crude steel (million tons) . . .	26.2	24.3	23.9
Automobiles (thousands) . . .	1,867.6	1,603.7	1,552.0
Trucks, etc. (thousands) . . .	467.8	438.7	385.2

The merchant marine totaled 21,530,264 gross registered tons on June 30, 1965, comprising about 13.3% of active world shipping. British shipyards have an estimated annual capacity of 1,300,000 tons.

The world's first power station using atomic energy to create electricity for civilian use began operation Oct. 17, 1956, at Calder Hall in Cumberland.

The largest aluminum rolling mill in Europe is the Alcan Industries' works at Rogerstone, Wales, with a capacity est. at 70,000 tons annually.

Britain's aid to less developed countries has more than doubled since 1956, totaling over \$2.5 billion and amounting to \$492,000,000 in 1967-68.

The United Kingdom is a member of the UN, Commonwealth, NATO, SEATO, CENTO, EFTA, Council of Europe. In 1967 the Government decided to reapply for membership in the European Common Market but France vetoed the application.

Britain imports all of its oil, cotton, rubber, sulphur, four-fifths of its wool, half of its food and iron ore, also certain amounts of paper, tobacco, chemicals. Manufactured goods made from these basic materials have been exported since the industrial age began.

Gross national product for 1967 was \$81.4 billion. Main exports are machinery, chemicals, woolen and synthetic textiles, autos and trucks, iron and

steel, locomotives, jet aircraft, farm machinery, drugs, radio, TV, radar and navigation equipment, whisky.

British imports and exports account for 8.1% of total world trade.

Britain devalued the pound in Nov. 1967, from a value of \$2.80 to \$2.40. In March 1968 it raised taxes by \$2.2 billion a year, and took other measures designed to improve exports and cut imports.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1968	\$16,107,000	\$14,132,000
1967	\$17,207,000	\$13,862,000

RELIGION AND CHURCHES. The Church of England is Protestant Episcopal. The Queen is supreme governor, with rights of appointment to archbishops, bishops and other offices. There are two provinces, Canterbury and York. The 100th Archbishop of Canterbury and Primate of All England is the Most Rev. Arthur Michael Ramsey (b. Nov. 14, 1904) whose seat is Lambeth Palace, London. Annual salary \$7,500 (\$18,000). Dean is the Very Rev. Ian White-Thomson. The 114th Bishop of London is the Rt. Rev. Robert W. Stopford, \$5,500 (\$13,200). The Dean of Westminster is the Very Rev. Eric Symes Abbott, £3,000 (\$7,200).

The 93rd Archbishop of York and Primate of England is the Most Rev. Donald Coggan, Bishop-thorpe, York; £6,000 (\$14,400).

The Church of England has an est. 27,750,000 members. In 1967 there were some 14,400 parishes. Most famous church is Westminster Abbey (1050-1760), site of coronations; tombs of Elizabeth I, Mary of Scots, kings, poets and of the Unknown Warrior. St. Paul's Cathedral, London, 365 ft. to top of cross, has American War Memorial Chapel. Altogether, the Anglican Commission in the UK and overseas has over 40,000,000 members.

The Roman Catholic Church—Archbishop of Westminster, John Cardinal Heenan. Membership in England and Wales, 1965, 4,000,690. In Scotland, 809,000; in Northern Ireland, 498,000.

The Methodist Church—The Pres. of the Conference (governing body) is the Rev. Dr. I. Morgan (1967-68). There were 14,287 churches and 690,000 members in 1968.

Others. There are an est. 450,000 Jews in the British Isles, 80% orthodox, over half in the London area. There are over 290,000 Baptists and more than 198,000 Congregationalists. The Calvinistic Methodist (Presbyterian) Church of Wales has over 122,600 communicants. The Unitarians have 330 chapels. The Presbyterian Church of England has 318 congregations, 68,000 members. The Society of Friends has 433 meeting houses, an est. 21,000 members. The Church of Christ, Scientist, has 330 branches in Great Britain and Ireland. There are some 250,000 Moslems in Britain.

The Church of Scotland is Presbyterian. It is presided over by a Moderator, chosen annually. Churches, 2,016; members, 1,233,800.

The Church of Ireland (Episcopalian) was established in 1869. The Primate is the Archbishop of Armagh, St. Patrick's Cathedral, Armagh.

Education. Primary and secondary education is free and compulsory from 5 to 15.

The most celebrated of British universities are Oxford and Cambridge, each with colleges founded in the 13th Century. There are 42 other universities in England, Scotland, Wales and Northern Ireland.

SOCIAL WELFARE, TAXES. Under the Ministry of Social Security, National Insurance provides for virtually universal compulsory insurance covering sickness, maternity, unemployment and industrial accidents, and death benefits and pensions for widows, orphans and the aged. The National Health Service provides free medical, dental and nursing care and makes minimum charges for certain appliances and prescriptions. Under the Family Allowance Act the government pays 8 shillings a week for each child of compulsory school age, after the first, and 10 shillings each for the third or more.

Supplementary Benefits provide for those not fully protected by National Insurance. Contributions are made by purchase of National Insurance stamps, the amounts varying according to sex and classification (employed, self-employed, non-employed). In the case of employed, the employer pays nearly one-half.

Standard income tax rate, 1967-68, was 41¼%, after allowances. Allowances, in addition to earned income credit: single persons, £220; married, £340,

plus £115 to £165 for each child according to age. Rate, including surtax, reaches 91¼% on largest incomes. A capital gains tax was instituted in 1962.

DEFENSE: In 1964, a new ministry headed by the Secretary of State for Defense was formed. It absorbed the Admiralty, War Office and Air Ministry, but the government said the separate identities of the three forces would be maintained.

The government announced in 1963 it would cut British forces abroad sharply; those in Singapore and Malaysia would be completely withdrawn by the end of 1971.

Total strength of the armed forces in 1968 was over 400,000, comprised of the Army, 190,600; Navy, 94,900; RAF, 120,900.

The Territorial Army corresponds to the National Guard in the United States, is voluntary, and serves only at home in peacetime. The women's services are integrated into the three branches of the armed forces.

In 1967-68 there were 167 ships in the operational fleet, including 2 aircraft carriers, 2 commando ships, 6 guided-missile destroyers, 11 other destroyers, 55 frigates, 33 subs, 57 minesweepers, etc. The Resolution, Britain's 1st Polaris-firing submarine, was launched in 1966.

Britain exploded its 1st atomic bomb in 1952 and has a stockpile of these weapons. The Air Force is equipped with Blue Steel air-to-surface nuclear missiles.

WALES

The Principality of Wales and Monmouthshire in western Britain has an area of 8,016 sq. mi. and a population (est. 1967) of 2,709,930.

England and Wales are administered as a unit and Wales does not have a separate local government act, as has Scotland. Approximately 600,000 people, less than one-fourth of its total, speak both English and Welsh and under 50,000 speak Welsh solely. Welsh nationalism is advocated by a small segment.

Early Anglo-Saxon invaders drove certain Celtic peoples into the mountains of Wales, terming them Waelisc (Welsh, or foreign). There they developed a distinct nationality and culture. Members of the ruling house of Gwynedd in the 13th Century fought England for sovereignty but were crushed, 1282-1283. Edward of Caernarvon, son of Edward I of England, was created Prince of Wales Feb. 7, 1301.

SCOTLAND

Scotland, a kingdom now united with England and Wales in Great Britain, occupies the northern 37% of the main British island, and the Hebrides, Orkney, Shetland and smaller islands. The Atlantic lies N and W; the North Sea, E. Length, 275 mi., breadth approx. 150 mi., area, 30,411 sq. mi., population (est. 1967) 5,187,000. Principal rivers are the Clyde, 106 mi.; the Tay, 117 mi., and the Tweed, 96 mi.

The Lowlands, a belt of land approximately 60 miles wide from the Firth of Clyde to the Firth of Forth, divide the farming region of the Southern Uplands from the granite Highlands of the north. Only one-tenth of the land area, the Lowlands contain three-quarters of the population and most of the industry. The Highlands, famous for hunting and fishing, have been opened to industry by many hydroelectric power stations.

Edinburgh, pop. (1967) 467,986, is the capital. It lies on the Firth of Forth in Midlothian County, 42 mi. from Glasgow, and has notable memorials of its royal and cultural history.

Glasgow, pop. (1967) 960,527, is the largest city, third largest in Britain, and Britain's greatest industrial center. It is a shipbuilding complex on the Clyde and an ocean port. Prestwick International Airport is a major transatlantic stop.

Aberdeen, pop. (1967) 182,117, 95 mi. NE of Edinburgh, is a major North Sea port, center of granite industry and fish processing.

Dundee, pop. (1967) 182,284, 40 mi. NE of Edinburgh, is an industrial and fish processing center on the Firth of Tay.

Scotland was called Caledonia by the Romans who battled early Picts and Scots and Celtic tribes and occupied southern areas from the 1st to the 4th Centuries. The Romans supposedly called one group Picti because they painted their bodies. The Scots were an Irish tribe from Scotia (an early name for Ireland). Missionaries from Britain introduced Christianity in the 4th Century; St. Columba, an Irish monk, converted most of Scotland to Christianity in the 6th Century.

The Kingdom of Scotland was established in the 11th Century. William Wallace, patriot leader, defeated an invading English army at Stirling Bridge, 1297, and Robert Bruce defeated another at Bannockburn, 1314.

In 1603 James VI of Scotland, son of Mary, Queen of Scots, succeeded Queen Elizabeth I on the throne of England as James I, and effected the Union of the Crowns. In 1707 Scotland received representation in the British Parliament, resulting from the union of former separate Parliaments. Its executive in the British cabinet is the Secretary of State for Scotland. John Knox led the Scottish church Reformation in the 16th Century. There is a small but growing Scottish Nationalist party which urges independence for Scotland.

There are 8 universities, at Aberdeen, Edinburgh, Glasgow, St. Andrews, Dundee and Stirling. Education receives some support from trusts, founded by Andrew Carnegie. St. Andrews is the birthplace of golf.

Historic sites and literary associations, where memorials of Robert Burns, Sir Walter Scott, John Knox, Mary, Queen of Scots, are preserved, draw many tourists, as do the beauties of the Trossachs, Loch Katrine, Loch Lomond and abbey ruins that are now state property.

Engineering products are the most important industry, with growing emphasis on lighter products such as office machinery, autos, electronics and other consumer goods and less dependence on locomotives, boilers, pumps, valves and other industrial machinery. Scotland contributes over a third of all British shipbuilding.

Scotland produces fine woolsens, worsteds, tweeds; silk textiles at Paisley and Glasgow; fine linens and jute. It is known for its Ayrshire, Aberdeen-Angus, Galloway, Belted Galloway, Highland and Scottish Shorthorn cattle. It raises Shetland, Highland and Cheviot sheep, Shetland ponies and Clydesdale draft horses. Fisheries have large hauls of herring, cod, whiting. Whisky remains the biggest export product.

Atomic projects to produce plutonium and electrical energy are at Dounreay, Dumfriesshire, Chapel Cross and Hunterston.

The Hebrides are a group of c. 500 islands, 100 inhabited, off the W coast. The Inner Hebrides include Skye, Mull and Iona, the last famous for the arrival of St. Columba, 563 A.D. The Outer Hebrides include St. Kilda and Harris. Industries include sheep raising and weaving (Harris tweeds).

The Orkney Islands, c. 90, are separated from Scotland by the Pentland Firth. The capital is Kirkwall, on Pomona Is. Fish curing, sheep raising and weaving are occupations. Northeast of the Orkneys are the 200 Shetland Islands, 24 inhabited, home of the Shetland pony.

NORTHERN IRELAND

Descriptive. Six of the 9 counties of Ulster, the NE corner of Ireland, constitute Northern Ireland, with the parliamentary boroughs of Belfast and Londonderry; they are Antrim, Armagh, Down, Londonderry, Fermanagh and Tyrone. The country has an area of 5,451 sq. mi. and a population (est. 1967) of 1,491,000. Belfast is the capital and chief industrial center.

The finest scenery in Northern Ireland is to be found on or close to the coast line. From Belfast northward the Antrim road takes the visitor to the famous Giant's Causeway, which consists of a perfect honeycomb of stone columns, 40,000 in all. Lough Erne, studded with islands, is one of the most famous of lakes, and Lough Neagh the largest in the British Isles.

Resources and Industries. Agriculture is the main industry; 68,000 small farms produce fat cattle, sheep, eggs, poultry, potatoes and milk. Much of the milk is shipped to England. Butter and cheese are produced, as well as many canned foods. Four-fifths of Northern Ireland's whisky is exported.

Annual estimated agricultural output is valued at \$317,800,000. There are 466,000 cattle, 887,000 sheep, and 2,010,000 hogs.

Linens and ships are the chief manufacturing products. Belfast shipyards launch more than 100,000 tons annually and the city is Ireland's largest port, with 10 mi. of wharves. Ropes and twines, rayon, clothing, aircraft, engineering products, hosiery and underwear are also made.

Government. An act of the British parliament, 1920, divided Northern from Southern Ireland, each with a parliament and government. When Ireland became a dominion, 1921, and later a republic, Northern Ireland elected to remain a part of the United Kingdom.

Parliament consists of a Senate of 26, and House of Commons of 52, both elected with power to legislate in local matters except such as are reserved to the British Parliament; Northern Ireland elects 12 members of the British House of Commons.

The government has outlawed the Irish Republican Army and other extremists and in 1956 banned the Sinn Féin party.

Education and Religion. Northern Ireland is preponderantly Protestant. Elementary education is compulsory to age 15. Queens Univ. of Belfast (1908) had a 1968 enrolment of 5,527. The new Univ. of Ulster was opened in 1968.

Northern Ireland closely followed Britain in systems of social insurance, industrial accident and disability benefits, family allowances and pensions.

Dependencies

CHANNEL ISLANDS

The Channel Islands, area 75 sq. mi., pop., 1967 110,644, off the NW coast of France, the only parts of the one-time Dukedom of Normandy belonging to England, are Jersey, Guernsey and the dependencies of Guernsey—Alderney, Brechou, Great Sark, Little Sark, Herm, Jethou and Lihou. Jersey has a separate legal existence and a lt. gov. named by the Crown. The islands are not bound by acts of Parliament unless named in the legislation. The islands were the only British soil occupied by German troops in World War II.

ISLE OF MAN

The Isle of Man, area 227 sq. mi., est. 1966 pop. 50,423, is in the Irish Sea, 20 mi. from Scotland, 30 mi. from Cumberland. It is rich in lead and iron. The island has its own laws and a lt. gov. who has wide constitutional powers, appointed by the Crown. The Tynwald (legislature) consists of the Legislative Council, partly elected, the House of Keys, elected. The island is not bound by acts of Parliament unless named in the legislation. Capital: Douglas.

Farming, tourism and fishing are chief occupations. The mild climate is popular with tourists. Ronaldsway Airport handles 250,000 passengers a year. Herring (kippers) and scallops top fishing trade. Man is famous for the Manx tailless cat.

Mediterranean Possession

GIBRALTAR

Gibraltar, a colony southeast of Spain, guards the entrance to the Mediterranean. The width of the strait dividing Europe from Africa varies from 7.75 mi. at the narrowest part to 23.75 at the widest. The Rock has been in British possession since 1713. There is a large harbor and as a naval base its position is of the greatest strategic importance. The Rock is 2 $\frac{3}{4}$ mi. long, $\frac{3}{4}$ of a mi. wide and 1,396 ft. in height; a narrow isthmus connects it with the mainland. The population, 1965 est., was 24,485.

In 1966 Spain called on Britain to give "substantial sovereignty" of Gibraltar to Spain and imposed a partial blockade of the isthmus. On Sept. 10, 1967, in a referendum sponsored by Britain despite Spain's objection, the residents voted 12,138 for remaining under British rule against 44 for returning to Spain.

British West Indies and Other American Possessions

WEST INDIES

Swinging in a vast arc from the coast of Venezuela northeast, then north and northwest toward Puerto Rico are the Windward and Leeward Islands, forming a coral and volcanic barrier sheltering the Caribbean from the open Atlantic. Most of the islands are British possessions which have internal self-government. Universal suffrage was instituted 1951-4; ministerial systems of government were set up 1956-1960.

Moving northward from the southern end of the arc lie the Windward Islands, starting with Grenada (1964 pop. est. 91,967, area 133 sq. mi., capital St. George's), St. Vincent (1965 pop. 88,451, area 150 sq. mi., capital Kingstown), St. Lucia (1966 pop. 110,142, area 238 sq. mi., capital Castries) and Dominica (1966 pop. 68,501, area 290 sq. mi., capital Roseau).

Further north, in the Leeward Islands, are Montserrat (1966 pop. 14,056, area 33 sq. mi., capital Plymouth), Antigua (1963 pop. 61,664, area 171 sq. mi., capital St. John's) and St. Christopher-

Nevis-Anguilla, three islands also referred to as St. Kitts (1965 pop. 59,476, area 138 sq. mi., capital Basseterre on St. Christopher). Nearby are the small British Virgin Islands.

Britain granted self-government to 5 of these islands and island groups in 1967; each became an Associated State, with Britain retaining responsibility for the foreign affairs and defense of each. These 5 were Antigua, Dominica, Grenada, St. Lucia and the St. Christopher-Nevis-Anguilla Federation. Similar status was offered St. Vincent, but action was delayed.

Anguilla, however, announced its independence from both the Federation and Britain June 16, 1967, and said it would like to become a U. S. Territory. On July 12, voters in Anguilla, which is a 35-sq.-mi. coral island with a pop. of 6,000, voted 1,813 to 4 in favor of independence and also approved a 15-man council of government. Anguilla rejoined the Federation on Dec. 22, 1967, after agreement for appointment of a British Administrator to be stationed on Anguilla and represent the island's interests. The islanders make a bare existence by exporting lobsters and salt.

Sugar is the major crop of Antigua and St. Kitts; bananas are the main product of the Windwards; Dominica and Grenada produce cocoa; Antigua, Montserrat, St. Kitts and St. Vincent have Sea Island cotton; St. Vincent and Grenada have arrowroot; Grenada grows spices, and Dominica citrus fruits. Many of these products are exported; imports include other foods, clothing, machinery. Tourism is of mounting importance.

The three Cayman Islands, a colony formerly under administration of Jamaica, lie S of Cuba, NW of Jamaica. Population is 9,374, most of it on Grand Cayman, about 1,000 on Cayman Brac, about two dozen on Little Cayman. It is a free port; inhabitants are exempt from British taxes. Fishing and tourism are the main industries. Total area: over 100 sq. mi. Capital: Georgetown.

The Turks and Caicos Islands, at the SE end of the Bahama Islands, are a separate British possession. There are about 30 islands, only 6 inhabited, 1964 pop. 6,770, area 166 sq. mi., capital Grand Turk. Salt, crayfish and conch shells are the main exports.

BERMUDA

Bermuda (or the Bermuda Islands) is a British possession governed by a royal governor and a representative legislature, the oldest legislative body among British dependencies.

It is a group of 360 small islands of coral formation, 20 inhabited, comprising 21 sq. mi. in the western Atlantic, 677 mi. SE of New York, 580 mi. E of North Carolina. Population, est. 1966, was 49,448 (about 30,000 of African or mixed descent, the rest of European descent).

It was named for Juan de Bermudez, Spanish explorer, and settled by Virginia-bound British colonists under Sir George Somers who were wrecked in the islands, 1609. Its capital is Hamilton.

Bermuda's Parliament dates from 1620. In general elections May 22, 1968, the first on the basis of full universal adult suffrage without property qualifications, the predominantly white United Bermuda party won 30 of the 40 Assembly seats.

The predominantly Negro Progressive Labor party won the other 10. Negroes make up about 63% of the population; many of them voted for the United Bermuda party.

The British-appointed governor controls foreign and defense affairs and internal security. The Assembly, its members elected for 5-year terms, controls all local affairs; a Prime Minister was chosen for the first time in 1968.

The United States maintains air and naval bases in the Bermudas, under long-term lease, and a NASA tracking station.

Bermuda levies no taxes on real estate, incomes or inheritance, but raises revenue by excise, postal, transportation, stamp taxes and duties. Cruise ships and airlines bring large numbers of tourists; there are many modern resort hotels.

Bermuda exports Easter lilies, drugs, essences, beauty preparations.

BAHAMAS

The Bahamas comprise nearly 700 islands (30 inhabited) and over 2,000 rocks in the Atlantic, extending NW to SE from a point near Florida toward Haiti. Nassau, on the island of New Providence, near the Florida coast, is the capital and a popular tourist resort. The land area of the group

is 4,404 sq. mi.; population, 1967 UN est., was 144,000 (84% Negro).

A new constitution, effective Jan. 7, 1964, replacing a 235-year-old charter, granted the islands internal self-government. In 1966 the government adopted a 7-shilling dollar, replacing the old 20-shilling pound, to facilitate business with the U. S. and tourists.

Elections in Jan. 1967 to the Assembly resulted in the selection of Lynden O. Pindling as the Bahamas' first Negro Prime Minister. Mr. Pindling launched an inquiry into alleged underworld control of gambling, one of the islands' many tourist attractions.

Prime Minister Pindling's all-Negro Government won 29 of the 38 seats in the Assembly in elections Apr. 10, 1968. He indicated more independence would be sought, particularly control of the police forces, still held by the Governor.

Principal exports are salt, crayfish, pulpwood and cucumbers.

BRITISH HONDURAS

British Honduras is in Middle America facing the Caribbean to the E, with Mexico on the N and Guatemala on the W. Population (UN est. 1966) 109,000, area 8,867 sq. mi., capital Belize.

Internal self-government was granted by Britain in 1964.

The country had long been claimed by Guatemala, but also was promised independence by Britain. In Apr. 1968, U. S. lawyer Bethuel Webster, serving as mediator, proposed that British Honduras be made independent by the end of 1970, but have close association with Guatemala, consulting with it on foreign affairs of mutual concern.

Main export is sugar, along with citrus fruits, mahogany and other hardwoods, chicle, lobsters and fish.

British Antarctica

Falkland Islands and Dependencies, a Colony, lies 300 mi. E. of the Strait of Magellan at the southern end of South America.

The Falklands or Islas Malvinas include about 200 islands with an area of 4,618 sq. mi and pop., est. 1966, of 2,170. Sheep-grazing is the main industry; wool is the principal export. The islands are also claimed by Argentina. South Georgia, area 1,450 sq. mi., and pop. 439, and the uninhabited South Sandwich Islands are dependencies of the Falklands.

Britain and Argentina discussed Argentine claims to the Falklands, but in Mar. 1968 officials of the islands declared their opposition to being ceded to Argentina.

British Antarctic Territory, south of 60° S lat., was made a separate Colony in 1962 and comprises mainly the South Shetland Islands, the South Orkneys and Graham's Land. A chain of meteorological stations is maintained.

Although Great Britain has held possession of the Islands since 1834, Argentina and Chile also claim ownership.

Atlantic Ocean Possessions

St. Helena, an island 1,200 mi. off the W coast of Africa and 1,800 E of South America, has 47 sq. mi. and population 1965, of 4,702. Flax, lace and rope making are the chief industries. After Napoleon Bonaparte was defeated at Waterloo the British exiled him to St. Helena, where he lived from Oct. 16, 1815, to his death, May 5, 1821. He was buried there until 1840, when his remains were transferred to Paris.

Tristan da Cunha is the principal of a group of islands of volcanic origin, total area 40 sq. mi., half way between the Cape of Good Hope and South America, which form one of the loneliest places on the globe. The other islands are inaccessible, Gough (or Diego Alvarez) and the 3 Nightingale Islands. An ancient volcanic peak 6,760 ft. high erupted in Oct. 1961, and ruined the settlement. The 262 inhabitants were removed to England for resettlement, but most returned in 1963. The islands are administered as dependencies of St. Helena.

Ascension is an island of volcanic origin, 34 sq. mi. in area, 700 mi. NW of St. Helena, through which it is administered. It lies midway between Africa and South America and is an important communications relay center for Britain and has a U. S. satellite tracking center. Est. pop., 1965, was

1,217, about half of them communications workers. The island is noted for its sea turtles.

Former African Possessions

For various former British possessions in southern Africa which have recently become independent countries with changed names, see index for Botswana (Bechuanaland), Malawi (Nyasaland), Lesotho (Basutoland), Zambia (Northern Rhodesia). See also Swaziland.

RHODESIA

Rhodesia is a self-governing country (formerly a British colony) which declared its independence Nov. 11, 1965, but to which Britain has refused to grant independence unless its white-dominated government broadens voting rights to include eventually its vast majority of native Africans.

Rhodesia (formerly Southern Rhodesia) lies in the east central part of southern Africa with the Zambesi River and Zambia (formerly Northern Rhodesia) to the N, Mozambique (Port. East Africa) to the E, Republic of South Africa to the S and Botswana to the W. Area, 150,333 sq. mi., almost the size of California; population, 1967 UN est., 4,530,000 including about 220,000 of European descent.

Victoria Falls on the Zambezi, partly in Zambia, are a tremendous spectacle, 355 ft. high, 5,580 ft. wide, dropping into a deep, narrow gorge. The falls were discovered by Dr. David Livingstone in 1855.

The country is rich in mineral wealth and farming is profitable. Tobacco is the largest crop and is normally by far the leading export along with asbestos, sugar, copper, pig iron, chrome, coal, ferro-chrome and tin, in that order. Also important are corn, cobalt, lead, zinc and gold.

When Rhodesian Prime Minister Ian D. Smith announced his country's unilateral declaration of independence the British government termed the act illegal, and imposed sanctions, including embargoes on oil shipments to Rhodesia, which were backed by most nations, including the U. S. Some oil and gasoline reportedly reached the country by truck from South Africa and Mozambique. Some African nations denounced Britain for failing to use force against the Rhodesian government. U. S. President Johnson denounced Rhodesia's white supremacy policies.

In Mar. 1968, Rhodesia condemned 3 black Africans to death on murder charges. British Queen Elizabeth commuted their sentences to life imprisonment. Rhodesia defied the commutations and executed the 3.

In May 1968 the UN Security Council ordered a complete trade and travel blockade against Rhodesia, but provided no punishment for nations continuing to trade with it.

British Asiatic States

For Aden and South Arabia, see index for Southern Yemen.

BAHRAIN, QATAR, TRUCIAL STATES

These are British Protected States on the Persian Gulf which have treaties giving Britain responsibility for their foreign relations.

Britain has announced plans to withdraw its military forces from the Persian Gulf area by 1971. In July 1968, the rulers of Bahrain, Qatar and the 7 Trucial Sheikdoms agreed on forming a federation which would have a common currency, postal system, flag and anthem, a High Council of sheiks and a Federal Council of notables to be named by the sheiks.

Bahrain is an Arab sheikdom consisting of the island of Bahrain, 250 sq. mi., and several smaller islands, halfway down the Persian Gulf 20 mi. off Arabia's NE coast, under British protection since 1861. Formerly known for pearl fishing, it is now being developed for oil found in the central plateau of Bahrain Is., mostly by American corporations. Population, UN est. 1967, 195,000, chiefly Moslem. Manama is the capital. It has international air service. Fruit raising, shrimp fishing, boat building, weaving and modern light industries are among occupations.

Qatar, also an Arab sheikdom, occupies the Qatar peninsula on the Persian Gulf on Arabia's NE coast. Area (est.), 8,000 sq. mi.; population est., 1965, 55,000. Capital: Doha. It is rich in oil.

The seven Trucial Sheikdoms, semi-independent, occupy approx. 32,300 sq. mi. along a 400-mile strip from Sha'am to Khor el Odeid at SE end of

Qatar peninsula. Population is est. 86,000. Dubai is the main port. Fishing and pearling are industries. The states are Abu Dhabi, Ajman, Dubai, Fujairah, Ras al Khaima, Sharjah, Umm al Quwain.

BRUNEI

Brunei has been since 1888 a protected sultanate on the north side of the Island of Borneo, between the Malaysian states of Sarawak and Sabah. Its area is about 2,226 sq. mi., the size of Delaware, with population (1967 UN est.) 107,000, two-thirds Malay and indigenous races, one-third of Chinese descent.

A 1959 constitution was amended, 1965, to provide for general elections to the Legislative Council, some members of which are appointed. There is a Sultan and a British High Commissioner.

Brunei's rich Seria oilfield provides tax revenues well in excess of government expenditures. Rubber is also exported. In recent years, some of the surplus has been spent on a growing program of school building and social services.

HONG KONG

Hong Kong is a Crown Colony at the mouth of the Canton River in China, 90 mi. south of Canton. Its nucleus is Hong Kong Island, 35½ sq. mi., acquired from China 1841, on which is located Victoria, the colonial capital. Opposite is Kowloon peninsula, 3 sq. mi., and Stonecutters Island, ¼ sq. mi., added to the colony by convention of Peking, 1860. An additional 355 sq. mi. known as the New Territories, comprised of an adjacent mainland area and numerous islands, were leased from China, 1898, for 99 years. Total area of the colony is 391 sq. mi., with a population, est. in 1967, of 3,877,700, including many refugees from Communist China and fewer than 20,000 British. From 1949 to 1962 Hong Kong absorbed more than 1,000,000 refugees from the mainland.

Hong Kong harbor, one of the finest in the East, is an important British naval station and one of the world's greatest trans-shipment ports. It is served by many international airlines.

Principal industries are shipbuilding and textiles; also iron and steel, agriculture, fishing, cement, and small manufactures. American tourists spend an est. \$29,000,000 annually.

Since 1945 Hong Kong industry has zoomed from a few hundred factories to over 5,000. Its spinning mills, among the best in the world, and low wages compete with textiles elsewhere and have resulted in protective measures in some countries. It also has a booming electronics industry. The U. S. is the largest market for Hong Kong products.

During 1967 Communist China launched a campaign against British authority in Hong Kong, including demonstrations, strikes, riots, bombings, border incidents and slowdowns in supplying food from the mainland, accompanied by charges the British were mistreating Chinese residents.

Indian Ocean Possessions, Etc.

For the former British possession, Mauritius, see Index.

Seychelles and Dependencies are a group of islands N of Madagascar, area 69 sq. mi., population 1965 over 45,000. The capital is Victoria, on Mahe, a port with a coaling station. Coconuts are the chief product, followed by cinnamon, patchouli, mangrove bark, vanilla and tortoise shell. Copra is the chief export.

British Indian Ocean Territory was formed Nov. 1965, embracing islands formerly dependencies of Mauritius or Seychelles; the Chagos Archipelago (including Diego Garcia), Aldabra, Farquhar and Des Roches. Population 1966 was 1,500.

British Pacific Islands

FIJI ISLANDS

The Fiji Islands, a Colony, number 844 (106 inhabited), with an area of 7,055 sq. mi., in the South Pacific, E of Northern Australia. Population, UN est. 1966 was 478,000, including 228,000 of Indian descent and 11,000 of European descent.

The larger islands are mountainous; the highest peak, Mt. Victoria, is 4,341 ft. The southern islands contain dense forests with many valuable woods. The islands are very fertile and well watered. The climate is comparatively cool for the tropics, the temperature seldom rises above 90°.

The capital is Suva, on Viti Levu, largest of the islands (area 4,010 sq. mi.). Sugar is the principal export, accounting for 49% of total. Other

products are coconuts, gold, manganese, bananas. Britain holds 83% of the land in trust for the Fijis.

There is a British Governor and a Legislative Council with 36 of its 40 members elected by universal adult suffrage under a 1966 constitution.

TONGA ISLANDS

The Tonga, or Friendly Islands, an internally self-governing Polynesian kingdom of some 150 small islands E of Fiji, is a British Protected State, with an area of 269 sq. mi. and a population, 1968, of 77,500. Main exports are copra and bananas. There is a British Commissioner; a native King, Taufa'ahau Tupou IV, and a partly-elected Legislative Assembly. The capital is Nukualofa on Tongatapu.

PITCAIRN ISLAND

Pitcairn Island is in the Pacific, halfway between South America and Australia. The island was discovered in 1767 by Carteret but was not inhabited until 23 years later when the mutineers of the Bounty landed there. The area is less than two sq. mi. and population, 1967, was about 90. It is a British Colony and is administered by the British Governor of Fiji and a local Council. The uninhabited islands of Henderson, Ducie and Oeno are in the Pitcairn group.

Principal island groups administered by the British High Commissioner for the Western Pacific Islands, seated at Honiara, Guadalcanal, include the British Solomon Islands and the Gilbert and Ellice Islands:

BRITISH SOLOMON ISLANDS

The British Solomon Islands, a Protectorate, number 10 large islands and four groups of small islands with a total area of 11,500 sq. mi. and population, est. 1967, of 139,730, mostly Melanesians. The Solomons lie E of New Guinea. The chief islands in the group are Guadalcanal, Malaita, San Cristobal, New Georgia, Santa Ysabel, Choiseul, Shortland, Mono or Treasury, Vella Lavella, Ganongga, Gizo, Rendova, Russell, Florida and Rennell. Among the groups of islands are the Lord Howe, Santa Cruz, Tucupia, Mitre, Duff or Wilson, and Reef. Some of the Solomons, including Bougainville, are an Australian UN Trusteeship. Exports: copra, timber, nuts, and trochus shell.

GILBERT AND ELLICE ISLANDS

Gilbert and Ellice Islands Colony. The group of islands in the Crown Colony was proclaimed a Protectorate in 1892 and, at the request of the native governments, was annexed Nov. 10, 1915, as the Gilbert and Ellice Islands Colony. The Colony includes the Gilbert Islands (16), Ellice Islands (9), Phoenix Islands, Ocean Island, Line Islands, composed of Fanning, Washington and Christmas Islands, the last the largest atoll in the Pacific (also claimed by the United States). The total area is 375 sq. mi. and the population, 1966 est., 53,450. Exports: chiefly copra and phosphates.

NEW HEBRIDES

New Hebrides, a Condominium jointly administered since 1906 by Great Britain and France, is a group of 11 main islands and about 69 islets lying 500 mi. W of Fiji, with an aggregate area of approx. 5,700 sq. mi. Population, est. 1964, over 65,000, mostly Melanesian. Chief products are copra, cotton, cocoa, fish and coffee.

British and French Resident Commissioners are joint heads of the administration.

Banks (309 sq. mi.) and Torres (40 sq. mi.) Islands, with pop. of 2,640, are attached to the New Hebrides for administration.

United States

(See Index for listings)

Upper Volta

REPUBLIC OF THE UPPER VOLTA

Capital: Ouagadougou. Area: 105,869 sq. mi. Population (UN est. 1967): 5,054,000. Monetary unit: CFA franc (246.85 per U. S. \$1).

The Republic of the Upper Volta, one-time French Overseas Territory, is an inland plateau region in west Africa, bounded by Mali, Niger, the Ivory Coast, Ghana, Togo and Dahomey. It is the size of Colorado.

More than 90% of the people are subsistence farmers. Greatest wealth is in livestock, mostly cattle and sheep, accounting for 55% of exports.

Principal market crops are cotton, rice, peanuts and karite. Climate is extremely dry but irrigation efforts, using water from the Black Volta, White Volta and pumped from underground, have been started with aid from the UN Special Fund.

In accordance with provisions of the 1958 French constitution, Upper Volta became an autonomous state Dec. 11, 1958. It became fully independent Aug. 5, 1960, and a member of the UN Sept. 20. It elected to remain outside the French Community proper, but signed a bilateral agreement Apr. 24, 1961, maintaining close ties with France.

The constitution, adopted Nov. 27, 1960, provides for a presidential form of government and a unicameral National Assembly. On Jan. 3, 1966, the army chief of staff, Lt. Col. Sangoule Lamizana, took control of the Presidency during demonstrations against austerity measures and at the request of the labor unions set up a provisional government of 7 officers and 5 civilians, promising elections.

Uruguay

REPÚBLICA ORIENTAL DEL URUGUAY

Capital: Montevideo. Area: 72,172 sq. mi. Population (Govt. fig. 1967): 2,845,734. Monetary unit: Peso (250 per U. S. \$).

Uruguay is one of the smallest but most advanced republics in South America. Slightly larger than Missouri, it is a country of rich, rolling, grassy plains on the South Atlantic coast. Brazil and Argentina are its neighbors, with the Uruguay River forming the boundary line with Argentina. The Uruguay is navigable from the mouth of the Río de la Plata, its estuary, to Salto, 200 mi. north.

Resources and Industries. Some 85% of Uruguay's area is devoted to stock raising; 9.6% to agriculture; 3.5% woods and forests; 1.8% is unproductive. The chief products are meat, wool, hides, corn, wheat, citrus fruits, rice, oats and linseed. The meat packing, metallurgical, textile and wine making industries are important.

More than one-third of the country's population lives in one city, Montevideo. More than one-third of the nation's workers are employed by the Government. The state owns the power, telephone, railroad, cement, oil-refining and other industries.

Uruguay's standard of living has been one of the highest in South America. Inflation, plus floods, drought and a cold wave in 1967 and a general strike in 1968 brought attempts by the Government to strengthen the economy through another in a series of devaluations of the peso, rationing of electricity and wage and price controls.

History and Government. Uruguay, once a part of the Spanish Viceroyalty of Río de la Plata and later a province of Brazil, declared its independence, Aug. 25, 1825, which was confirmed by a treaty with Brazil and Argentina, Aug. 27, 1828. The first constitution was adopted July 18, 1830. The constitution provides for a Chamber of Deputies and a Senate elected for 4-year terms. Suffrage is universal, with proportional representation.

In late 1966 the nation approved a proposal to strengthen the powers of the President's office, permitting a President to serve 5 years.

Uruguay has one of the world's most extensive social welfare programs with old age pensions, child welfare, etc.

Education and Religion. Church and state are separate and there is complete religious tolerance. The preponderant religion is Roman Catholic. Education, including college is free; primary education is compulsory. Univ. of Montevideo was founded in 1849. The language is Spanish.

Defense. The Army is composed of hired volunteers between the ages of 18 and 45. Uruguay has a small Air Force and Navy. It is a member of the UN and OAS.

State of Vatican City

STATO DELLA CITTA DEL VATICANO

Area: 108.7 acres. Population: over 1,000.

The Popes for many centuries, with some slight interruptions, held temporal sovereignty over mid-Italy (the so-called Papal States), comprising an area of some 16,000 sq. mi., with a population in the 19th Century of more than 3,000,000. This territory in the reign of Pius IX, was incorporated in the Kingdom of Italy, the sovereignty of the Pope being confined to the palaces of the Vatican and the Lateran in Rome and the villa of Castel Gandolfo, by an Italian law, May 13, 1871. This law also guaranteed to the Pope and his successors in

the chair of St. Peter a yearly indemnity of 3,225,000 lire (\$622,425 at par of exchange), which allowance, however, remained unclaimed.

Final settlement of the Roman question came when the Treaty of Conciliation, the Concordat and a financial convention were signed in the Lateran Palace, Feb. 11, 1929, by Cardinal Gasparri and Premier Mussolini. The Treaty and Concordat established the independent state of Vatican City, and gave the Catholic religion special status in Italy. The treaty (Lateran Agreement) was duly ratified by the Pope and by the Italian Parliament, May 14 and 25, and signed by the King, May 27, and became effective June 7 by exchange of ratification at the Vatican.

The Lateran Agreement was made an integral part of the Constitution of Italy (Article 7) March 26, 1947.

Vatican City includes St. Peter's, the Vatican Palace and Museum covering more than 13 acres, the Vatican gardens, and neighboring buildings between Viale Vaticano and the Church. Thirteen buildings in Rome, although outside the boundaries, enjoy extra-territorial rights; these include buildings housing the congregations or officers necessary for the administration of the Holy See.

The legal system is based on the code of canon law, the apostolic constitutions and the laws especially promulgated for the Vatican City by the Sovereign Pontiff or those to whom he may delegate legislative power. In all cases not covered the Italian law of Rome applies. The Secretariat of State represents the Holy See in its diplomatic relations. By the Treaty of Conciliation the Pope is pledged to a perpetual neutrality unless his mediation is specifically requested by both parties in political disputes. This, however, does not prevent the defense of the Church whenever it is persecuted. A total of 56 nations maintain diplomatic representatives in Vatican City. The United States is not represented.

Police duties are carried out by the Pontifical Armed Corps comprised of the Noble Guards, the Swiss Guards, the Palatine Guards of Honor and the Pontifical Gendarmery. The state has its own railway station, postal facilities, radio.

The present sovereign of the State of Vatican City is the Supreme Pontiff, Paul VI, Giovanni Battista Montini, born in Concesio, Italy, Sept. 26, 1897, elected Pope June 21, 1963, in succession to Angelo Giuseppe Roncalli, John XXIII, who died June 3, 1963.

Venezuela

REPÚBLICA DE VENEZUELA

Capital: Caracas. Area: 352,148 sq. mi. Population (Govt. est. 1967): 9,600,000. Monetary unit: Bolivar (4.5 per U. S. \$).

Venezuela, a land of wide plains and lofty mountains, lies within the Torrid Zone in northern South America, with a 1,750-mi. coastline on the Caribbean and the Atlantic. Its neighbors are Guyana, Brazil and Colombia. It includes 72 islands totaling 14,650 sq. mi., the largest being Margarita, 40 mi. by 20, which is one of Venezuela's 20 states and an important pearl center. Venezuela is more than twice the size of California.

The Orinoco River with its tributaries, drains about four-fifths of the country. About 1,700 mi. in length and 13½ mi. across at its widest point, it is the 2nd largest river system in South America, and is navigable for about 700 mi. Its headwaters near the Parima Sierra and the Venezuelan-Brazilian border were located in 1951.

Angel Falls, said to be the tallest in the world, 3,212 ft. in all, with one drop of 2,648 ft., was found on the Churun, a branch of the Caroní River by Jimmy Angel, American aviator, in 1937.

Caracas, the capital, is 12 mi. inland from its port, La Guaira. It has an international airport and airlines reach cities in the interior. It is noted for its modern architecture and luxury hotels. In its Pantheon are enshrined the ashes of Simón Bolívar, South American liberator (1783-1830).

Resources and Industries. Mining, agriculture, fishing and stock raising are the chief industries. Venezuela in 1967 was the world's 3rd largest oil producer, behind U. S. and USSR, and largest oil exporter. Lake Maracaibo is the largest oil field in South America. In 1967, production was 3,511,300 bbls. per day, up 5% from 1966. Concessions are held by foreign interests, with 60% of the revenue going to the government. Other minerals are iron, gold, copper, coal, salt, tin, manganese, asbestos, diamonds and mica. Iron ore production is more than 15,000,000 tons annually and supplies

a high percentage of total U. S. iron imports. Coffee is the major agricultural product and is 2nd only to petroleum in export value. Exports also include fish, cocoa, rubber, sisal, balata and tonka beans. Industries include steel, petrochemicals, textiles, containers, tobacco products, paper and tires.

Tourists increased from 95,000 in 1965 to 152,515 in 1967. Attractions include resorts on Margarita Is., Merida in the Andes with its cable car to snow-capped Mirror Peak, 15,000 ft.; beaches near Caracas.

Construction is booming, including a 30-story skyscraper in Caracas; a new, \$3.8 billion city, Ciudad Guyana, 300 mi. SE of Caracas, and a 4,175-ft. suspension bridge across the Orinoco which was opened in 1967 and is South America's largest.

Oil profits help finance the extensive industrial development. The gross national product rose from \$7.9 billion in 1966 to \$8.3 billion in 1967.

Foreign trade, in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,188,000	\$2,713,000
1967	\$1,400,000	\$3,000,000

History and Government. Columbus first set foot on the South American continent on the peninsula of Paria, Aug. 1498; on the same voyage he found the mouth of the Orinoco. Alonso de Ojeda, 1499, found Lake Maracaibo, called the land Venezuela, or Little Venice, because natives had houses on stilts. Vespucci was in Ojeda's expedition. Venezuela was under Spanish domination until about 1821. The republic was formed after secession from the Colombian Federation in 1830.

The 1961 Constitution provided for a strong central government; a President, Senate and Chamber of Deputies elected for 5 years by direct universal vote, and a Supreme Court appointed by the Congress. Member: UN, OAS.

Education and Religion. The language is Spanish and Roman Catholic is the religion of the majority of the people, but religious freedom is guaranteed. All education, including college, is free. Primary education is compulsory.

Defense. Military service is obligatory for all men, 18 to 45. The Navy consists of 9 destroyers, 4 frigates, one submarine and other craft.

Vietnam

Total area: 127,241 sq. mi. Population (UN est. 1967): 37,073,000. Vietnam is split between two hostile governments, the Republic of Vietnam, which controls the southern half, and the Communist regime of North Vietnam.

Vietnam, one of 3 former French Indo-Chinese Associated States, is in SE Asia, bounded on the N by China, on the E and S by the South China Sea, and on the W by Cambodia and Laos. It consists of the former French protectorates of Tonkin and Annam, and former colony of Cochinchina. Principal cities are Saigon, Hanoi, Haiphong, Hue and Danang.

Resources and Industries. Chief products are rice, principal food staple; rubber; and coal. Peacetime exports included rubber, rice, fish, coal, lumber, pepper, cattle and hides, corn, zinc and tin. Tea, coffee and quinine are grown in the South. Rice and coal are chief products of the North; also coffee, tea, maize, sweet potatoes, tobacco, sugar cane and shellac.

History and Government. Vietnam's recorded history began in Tonkin before the Christian era; settled by the Viets who emigrated from central China. It was held by China, 111-939 A.D., and was a vassal state during many subsequent periods. Vietnam defeated the armies of Kublai Khan at Bach Dang Giang, 1288. The French and Portuguese came in the late 16th Century. Piecemeal conquest by France began in 1858 and ended in 1884 with acceptance of a French protectorate.

In 1940 Vietnam was occupied by Japan and used as a base for the invasion of Malaya. During the occupation nationalist aims gathered force. A number of groups formed the Vietminh (Independence) League, headed by Ho Chi Minh, Communist guerrilla leader. In August, 1945, the Vietminh forced out Bao Dai, former Emperor of Annam, head of a short-lived regime sponsored by Japan. France, seeking to reestablish colonial control, battled Communist and nationalist forces, 1946-1954, incurring huge losses and was finally defeated at Dienbienphu, May 8, 1954. Meanwhile, on July 1, 1949, Bao Dai had formed a State of Vietnam, with its capital at Saigon and himself

as Chief of State, with French approval. Communist China backed Ho Chi Minh.

A cease-fire accord signed in Geneva July 21, 1954, divided Vietnam along the Ben Hai River. It provided for a buffer zone, withdrawal of French troops from Northern Vietnam and elections to determine the country's future. Under the agreement the Communists gained control of the territory north of the 17 parallel, 22 provinces with an area of approx. 62,000 sq. mi. and 13,000,000 pop. (est.), with its capital at Hanoi, and Ho Chi Minh as President. South Vietnam was to comprise the 39 southern provinces with an area of 65,000 sq. mi. and pop. of 12,000,000 (est.). Approx. 800,000 North Vietnamese fled to South Vietnam. Neither South Vietnam nor the U. S. signed the agreement.

Republic of Vietnam VIET NAM CONG HOA

Capital: Saigon. Area: 65,948 sq. mi. Population (UN est. 1967): 16,973,000. Monetary unit: Piastre (117.5 per U. S. \$1).

On Oct. 26, 1955, Ngo Dinh Diem, Premier of the interim government of South Vietnam, proclaimed the Southern Zone a republic and became its first President under a provisional constitution act, following a referendum Oct. 23 which ousted Bao Dai as Chief of State. Pres. Diem was re-elected for a second 5-year term, Apr. 9, 1961.

Guerrilla fighting has persisted since 1956, with the Communist Vietcong, aided by North Vietnam, pressing a spreading war, and South Vietnam receiving increasing U. S. aid and, since June 1965, active U. S. combat participation.

A serious political conflict arose in 1963 when Buddhist groups charged the government with authoritarianism and brutality. This and government delays in reforms paved the way for a military coup Nov. 1-2, 1963, which overthrew the Diem regime and resulted in the deaths of Pres. Diem and his brother and political adviser, Ngo Dinh Nhu. A third brother, Ngo Dinh Can, was executed May 9, 1964.

A military triumvirate headed by Maj. Gen. Duong Van Minh formed the nucleus of a 23-member interim junta which was overthrown Jan. 30, 1964, in a bloodless coup led by Maj. Gen. Nguyen Khanh. Other governments followed; Air Force Commander Nguyen Cao Ky became Premier, on June 19, 1965, of the 9th regime since the fall of Pres. Ngo Dinh Diem.

On Sept. 11, 1966, South Vietnamese voters chose members of an assembly which was to draft a new constitution for a civilian government early in 1967. Despite anti-election Vietcong terrorism, 80% of eligible voters took part in the election.

In elections Sept. 3, 1967, Chief of State Nguyen Van Thieu was chosen Pres. and Premier Ky, Vice Pres. A 60-member Senate was also elected Sept. 3 and 137-member House on Oct. 22.

Despite U. S. aid, the Saigon regime failed to halt the growing Communist Vietcong guerrilla war. Following attacks on two U. S. destroyers by North Vietnamese PT boats in the Gulf of Tonkin Aug. 2-4, 1964, the U. S. retaliated with heavy air strikes against North Vietnamese torpedo bases and oil storage depots, and increased its fleet.

In 1965-67 the war accelerated as the U. S. stepped up bombing raids on the North and increased the number of Americans fighting in the country from 23,000 at the start of 1965 to a projected total of 525,000 by June 1968.

On Mar. 31, 1968, U. S. President Johnson announced the unilateral halting of bombing of North Vietnam, except for the southernmost area, and urged North Vietnam to join in peace talks. Hanoi agreed Apr. 3 to preliminary talks which began May 10 in Paris. Meanwhile, U. S. casualties continued rising to new weekly highs; as early as mid-March they had exceeded U. S. casualties in the Korean War in numbers of wounded and soon were approaching the earlier war's total of dead. In June 1968 South Vietnam ordered a general draft making males 18-38 eligible for military duty for the duration.

(For details of war and of peace negotiations during 1968 see Vietnam in Index.)

Most Vietnamese practice parts of several religions or mixtures of Confucianism, Taoism, Buddhism, ancestor worship and animism. About 20% practice Buddhism and about 12% Roman Catholicism. New indigenous religions include Cao Dai (1919) and Hoa Hao (1939).

There is a National Univ. in Saigon, others at Hue, Dalat and Cantho.

Democratic Republic of Vietnam VIET NAM DAN CHU CONG HOA

Capital: Hanoi. Area: 61,293 sq. mi. Population (UN est. 1967): 20,100,000. Monetary unit: Dong (2.94 per U. S. \$1.).

A Vietnam constitution, adopted Dec. 31, 1959, is based on Communist principles and calls for reunification of all Vietnam. It provides for a President elected by Parliament and a Prime Minister appointed by the President. President Ho Chi Minh, reelected July 15, 1960, by unanimous vote of the National Assembly, has held office since 1945. Prime Minister since 1959: Pham Van Dong.

United States and South Vietnamese forces began air attacks against military bases in North Vietnam in February, 1965, in retaliation against what the White House called "provocations ordered and directed by the Hanoi regime," including infiltration from North Vietnam into South Vietnam.

North Vietnam maintained that the U. S. was waging an "aggressive war" in Vietnam.

Western Samoa

Capital: Apia. Area: 1,130 sq. mi. Population (UN est. 1967): 135,000. Monetary unit: Tala (.7143 per U. S. \$1.).

Western Samoa, which became an independent nation Jan. 1, 1962, comprises 4 inhabited islands of a group in the South Pacific Ocean lying about 2,600 mi. SW of Hawaii. Largest of the islands are Savaii and Upolu. Eastern Samoa, the smaller portion of the group with its capital at Pago Pago, remains a dependency of the U. S.

Western Samoa was a German colony, 1899 to 1914, when New Zealand landed troops and took over. It became a New Zealand mandate under the League of Nations and, in 1945, a New Zealand UN Trusteeship.

An elected local government took office in Oct. 1959 and the country became fully independent in 1962. New Zealand has continued economic aid and educational assistance. Western Samoa changed from pounds to decimal currency July 10, 1967.

The population is composed almost solely of Polynesians. The islands are fertile and life is leisurely. Chief products are fish, copra, cocoa, coconuts, bananas, taro, coffee, bark cloth (tapa) and mats.

Robert Louis Stevenson's grave is on a hill near Apia.

Yemen

Capital: Sana. Area: 75,289 sq. mi. Population (Govt. est. 1967): 5,000,000. Monetary unit: Yemeni rial (official rate 1.071 per U. S. \$1.).

Yemen is an ancient, mountainous country, near the southern tip of the Arabian Peninsula on the Red Sea. Its neighbors are Southern Yemen (formerly Aden) and Saudi Arabia. It is about the size of Nebraska.

Hodeida, with its deep-water facilities at Ahmedi, is a major port on the Red Sea; others are Mocha and Lohelya. Marib and Sana are archeological sites.

Resources and Industries. On the plateau of El Jebel, the most fertile section of Arabia, coffee, barley and grain are grown. Mocha coffee, hides, dates, charcoal, sesame, herbs, fruits and precious stones are exported. It has granted several oil concessions to American companies, with half the revenues to go to the government.

History and Government. Yemen's territory once was part of the ancient kingdom of Sheba, or Saba, a prosperous link in trade between Africa and India. A Biblical reference speaks of its gold, spices and precious stones as gifts borne by the Queen of Sheba to King Solomon.

Yemen was described as a democratic Islamic monarchy during the regime of the Imam Ahmed, who had ruled 1948-1962. The King was reported assassinated Sept. 26, 1962, and a revolutionary group headed by Brig. Gen. Abdullah al-Salal declared the country a republic. He became Pres.

The Imam Ahmed's heir, the Imam Mohamed al-Badr, fled to the mountains where tribesmen joined royalist forces; internal warfare continued into 1967. UAR Pres. Nasser sent 70,000 troops to aid the republicans; Saudi Arabia supported the royalists with military aid.

A cease-fire was agreed on by Pres. Nasser and Saudi Arabia's King Faisal Aug. 24, 1965; the UAR was to pull out its troops and a plebiscite on the form of government was to be held, with a care-

taker government set up temporarily. In 1967 the UAR was accused of dropping poison gas or villages in royalist-held territory.

The agreement, like others before it, collapsed. During 1966 UAR planes from Yemen bombed towns in Saudi Arabia near the Yemen border.

In Oct. 1966 Premier Hassan al-Amri was ousted, one of his ministers and 7 other officials were shot, and several hundred persons were arrested by the pro-UAR government of Pres. al-Salal.

After the UAR defeat in the June 1967 Israeli-Arab war, the UAR announced it would withdraw its troops from Yemen; the last of them left Nov. 29, 1967, and Saudi Arabia said it would stop aiding the royalists.

Fighting continued between the Republican and royalist forces; troops from Southern Yemen aided those of the Republicans in 1968. Saudi Arabia announced in Feb. 1968 it was renewing its aid to the royalists, charging that both Soviet Russia and Syria, as well as Southern Yemen, were aiding the Republicans. Russian MIG planes had been delivered to the Republicans and a Russian pilot had been shot down by royalists.

Yemen is a member of the UN and Arab League.

Yugoslavia

SOЦИЈАЛИСТИЧКА ФЕДЕРАТИВНА РЕПУБЛИКА ЈУГОСЛАВИЈА

Capital: Belgrade. Area: 98,766 sq. mi. Population (UN est. 1967): 19,938,000. Monetary unit: Dinar (official rate, 1966 dinar, 12.5 per U. S. \$1.).

The Socialist Federal Republic of Yugoslavia is a rugged mountainous land, densely forested, which rises from the eastern shore of the Adriatic Sea. Its neighbors are Italy, Austria, Hungary, Romania, Bulgaria, Greece and Albania. It is about the size of Wyoming.

The federation comprises 6 republics: Serbia, Croatia, Slovenia, Montenegro, Bosnia-Herzegovina and Macedonia.

Rijeka, on the northern Adriatic, formerly Italian Fiume, is the largest port.

Resources and Industries. Chief crops are cereals, maize, wheat, barley, rye, tobacco, oats, hops and fruits. The principal minerals are coal, iron, copper, chrome ore, antimony, manganese, lead, mercury, salt and bauxite.

Because of its intensive program of industrialization the country is gradually losing its predominantly agricultural character. Most industry is socialized and private enterprise is limited to small-scale production. Central planning guides the economy and the free play of the market is limited. Since 1952 workers are guaranteed a basic wage and a share in cooperative profits. Management of industrial enterprises is handled by some 220,000 members of workers' councils. The commune is the basic territorial and administrative unit, with autonomy in local government, workers' affairs and social management.

A 7-year development plan, 1964-1970, emphasizes all branches of the economy and living standards.

The index for industrial production (1963=100) was 130 in 1967.

Foreign trade in thousands of U. S. dollars:

	Imports	Exports
1966	\$1,570,000	\$1,221,000
1967	\$1,707,000	\$1,252,000

History and Government. Serbia, which had since the Battle of Kosovo (1389), been a vassal principality of Turkey, was established as an independent kingdom by the Treaty of Berlin, 1878. After the Balkan wars its boundaries were enlarged by the annexation of Old Serbia and Macedonia, 1913. When the Austrian Archduke Francis Ferdinand and wife were assassinated at Sarajevo June 28, 1914, the Austrian government forced war on Serbia, the onset of World War I, 1914-1918.

When the Austro-Hungarian empire collapsed the Kingdom of the Serbs, Croats and Slovenes was formed from the former provinces of Croatia, Dalmatia, Bosnia, Herzegovina, Slovenia, Vojvodina and the independent state of Montenegro, with Peter I of Serbia as king. The name was later changed to Yugoslavia. Peter (d. 1921) was succeeded by his son Alexander I (assassinated at Marseille Oct. 9, 1934), after which Prince Paul became regent. He was overthrown in Mar. 1941 and Crown Prince Peter, born Sept. 6, 1923, was proclaimed king. Germany invaded April, 1941, and King Peter II fled to London.

But many Yugoslav troops continued to fight the Nazis from their mountainous strongholds. Foremost among these guerrilla forces were the chetniks led by Draža Mihailovich. Mihailovich became involved in open warfare with other partisan forces led by Josip Broz, known as Marshal Tito, for control of the resistance movement. Tito, backed by the USSR and Great Britain, won and by the time the Germans had been driven from Yugoslavia in 1944, was in control. Mihailovich was captured and executed in Belgrade July 17, 1946, by the Tito regime.

The constituent assembly proclaimed Yugoslavia a republic Nov. 29, 1945. It became a federated republic Jan. 31, 1946, and Marshal Tito, a Communist, became head of the government. By terms of a treaty with Italy the greater part of Venezia-Giulia, Zara, Pelagosa and adjacent islands were ceded to Yugoslavia.

The Stalin policy of dictating the Communist line to all Communist nations was rejected by Marshal Tito. He accepted economic aid and military equipment from the U. S., and received aid in foreign trade also from France and Great Britain.

In 1968 Pres. Tito supported the liberalization of government of Czechoslovakia.

Yugoslavia is governed by the President, a cabinet (Federal Executive Council), and a parliament (Federal Assembly), from which cabinet members are drawn. The Assembly is composed of five chambers which deal with economic, political, health and cultural matters.

A new constitution was approved by Parliament, Apr. 7, 1963, replacing that in force since 1946. It made the country's official name the Socialist Federal Republic of Yugoslavia, limited political parties to the Communists and the Communist-dominated Socialist Alliance of Working People, and provided that future presidents be elected by parliament and restricted to two consecutive 4-year terms. A new office of vice president was created. The ballot is secret and freedom of worship is guaranteed. Tito was reelected President for 4 more years in May, 1967.

In 1966, Pres. Tito ousted Vice Pres. Aleksandar Rankovic after a hidden microphone was found in Pres. Tito's home; Rankovic had been in charge of the secret police. Writer Mihajlo Mihajlov was sentenced to a year in prison for writings published abroad. In a reorganization of the Communist party, Pres. Tito, 74, added a new title Pres. of the League of Communists, in place of General Secretary.

Education and Religion. All education is free; elementary training is compulsory to age 14. There are universities in Belgrade, Zagreb, Ljubljana, Skopje and Sarajevo. Principal languages are Slovene, Macedonian, Serbo-Croat. All religions are recognized and enjoy equal rights. Serbia-Orthodox comprises 42%, Roman Catholic 32%, Moslem 12%.

Complete free social security is in force, including unemployment, medical, maternity benefits.

Defense. Army service is compulsory for men over 18. The air force comprises two corps, equipped with more than 500 first-line planes. The navy comprises 3 destroyers, 4 escorts, 68 torpedo

boats, 2 submarines, a minelayer, numerous sweepers, patrol vessels and others.

Yugoslavia is a member of the UN and, with Greece and Turkey, of a Balkan defense group under a treaty signed in Ankara, Turkey, Feb. 27, 1953, and a 20-year military aid pact, Aug. 9, 1954.

Zambia

REPUBLIC OF ZAMBIA (Former Northern Rhodesia)

Capital: Lusaka. **Area:** 288,130 sq. mi. **Population:** (est. 1967): 3,947,000. **Monetary unit:** Kwacha (.7143 per U. S. \$1).

The Republic of Zambia is the former British Protectorate of Northern Rhodesia. It is a landlocked country located in South Central Africa. Bordering nations are the Democratic Republic of the Congo, Tanzania, Malawi, Mozambique, Rhodesia, Botswana, South-West Africa and Angola. It is slightly larger than Texas.

The terrain is mostly high plateau covered with thin forest and suitable for both farming and grazing. The country is rich in minerals, including copper, zinc, cobalt, gold, vanadium, manganese, and coal. Zambia's wealth is mainly its copper; it is the world's 3rd largest copper producer.

Victoria Falls on the Zambesi River, the border with Rhodesia, is 3 times the width and more than twice the height of Niagara. Further down the river, the Kariba Dam, completed 1961, created Lake Kariba, 175 mi. long.

As Northern Rhodesia, the country was under the administration of the South Africa Company, 1889 until 1924 when the office of governor was established, with an executive council and, subsequently, a legislature.

A new constitution, announced in 1963, granted internal self-government with a prime minister and cabinet, effective Jan. 22, 1964. The United National Independence party won the first elections Jan. 21 and its leader, Kenneth D. Kaunda, became the country's first Prime Minister. He was elected President and, on Oct. 24, 1964, Zambia became an independent republic within the Commonwealth. It has a National Assembly of 75 elected members and 5 nominated by the President. It is a member of the UN and the OAU.

After the white government of Rhodesia declared its independence from Britain Nov. 17, 1965, relations between Zambia and Rhodesia became increasingly strained and use of their jointly owned railroad was disputed.

Britain gave Zambia an extra \$12,000,000 in 1966 after imposing an oil embargo on Rhodesia, and Zambia bought cargo planes from the Lockheed Aircraft Corp. of the U. S. to carry copper out from its mines and gasoline in. In Aug. 1968 a 1,958-mi. pipeline was completed, bringing oil from Dar es Salaam, Tanzania.

In Apr. 1968 Pres. Kaunda announced plans for nationalizing some major industries; he said studies of economies in both East and West countries had convinced him none were completely capitalist or completely state-controlled.

The "Wealth" of Nations

Some of the world's peoples have, since time immemorial, measured their wealth in terms of how many cattle or other livestock they own. While this is not true of most nations in the 20th Century, nevertheless large numbers of livestock are still an important source of wealth for many countries.

Figures gathered by the U. S. Department of Agriculture show that in 1968 the total number of cattle in the world was 1.15 billion, up a little less than 1% from 1967.

The world's sheep totaled 1.008 billion, also up a little less than 1%. But hogs, totaling just over half a billion, had increased 2%.

The leading cattle raiser was the U. S., which had 108,813,000 head. The USSR was 2nd with 97,100,000; Brazil was 3rd with 91,093,000; Argentina ranked 4th although figures were not available for that country.

The No. 1 sheep-raising nation was Australia with 165,000,000. Soviet Russia ranked 2nd in

sheep, as in cattle, with 138,300,000. Next came New Zealand, its sheep estimated at something over 60,000,000, followed by Argentina, about 48,000,000. The U. S. ranked 5th with 22,122,000, Brazil 6th with 22,000,000, the United Kingdom 7th with 20,446,000.

Tops in hogs was Brazil, 63,000,000; the U. S. was 2nd with 54,263,000. Soviet Russia was 3rd with 51,000,000 and West Germany 4th with 19,032,000.

Another measure of wealth could be a nation's mineral production. Among the more widely used metals, the U. S. and Canada are tops. While the U. S., according to the Bureau of Mines, ranked 1st in 1967 in coal, copper, magnesium, petroleum and uranium, Canada was the leader in asbestos, nickel, silver and zinc.

Other leaders were: Jamaica, bauxite; Democratic Republic of Congo, industrial diamonds; South Africa, gold; Spain, mercury; USSR, platinum; Malaysia, tin.

Cost of Living in Various Cities of the World

This comparison of the cost of living in various cities in 1968 was drawn up by the UN Statistical Bureau, based on prices for goods, services and housing for international officials stationed in these cities. Figures show relative costs, based on about 120 items. New York City was assigned the index figure 100. Thus, while expenditure for these items might be \$1,000 in New York, it would be \$950 for them in Copenhagen and \$1,040 in Caracas. Figures with an asterisk (*) omit cost of housing (rent, utilities and domestic service) in cities where they were furnished at nominal cost by governments.

Index	City	Index	City

The Monroe Doctrine; Its Origin and Meaning

President James Monroe, in his annual message to Congress on Dec. 2, 1823, made the statement of policy since known as the Monroe Doctrine. Its major assertion is that the United States would consider as dangerous to its peace and safety any attempt of the European powers to extend their political system to any portion of the western hemisphere.

Balancing this statement in the same message is Monroe's declaration that in regard to Europe it is the policy of the United States "not to interfere in the internal concerns of any of its powers, to consider the government *de facto* as the legitimate (one) for us . . ."

Statesmen besides Monroe associated in the development of the Doctrine were John Quincy Adams, Secretary of State; Richard Rush, American Minister in London, and George Canning, British Secretary for Foreign Affairs. Consulted were Thomas Jefferson, John C. Calhoun, Secretary of War, and William Wirt, Attorney General.

History of Its Origin. The message grew out of two complications. The first was the decree of Russia reserving exclusively to Russian subjects the whole of the northwest coast of North America, from the Bering Straits to 51° N. Lat. and from the Aleutians to Siberia, for commerce, whaling, fishery and other industries, and prohibiting any foreign ship from approaching within 100 miles, on penalty of seizure. Secretary Adams rejected this, and after negotiations Russia re-

versed itself. In the message President Monroe said the American continents, "by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for colonization by any European power."

The other part originated in the threat of foreign encroachment on Latin-American states, the independence of which had been recognized by the United States. George Canning, British Foreign Secretary, on Aug. 20, 1823, suggested to Rush, the American Minister, that the British and American governments declare "in the face of the world" their attitude toward the Spanish-American countries. He believed the two governments entertained similar views, and cited that the British conceived the recovery of the colonies by Spain to be hopeless; thought recognition of them as independent states to be a matter "of time and circumstances"; would not interfere with amicable negotiation between them and their mother country (Spain); did not wish to possess any portion of them or see it go to any other power with indifference.

Canning thought such a declaration might forestall any military attempts to coerce Latin America. When the United States did not act by October he addressed a similar statement to the French ambassador in London Prince de Polignac, and received the assurance that France did not intend to take any of the Spanish colonies in America.

Secretary Adams, writing to Minister Rush Nov. 29, 1823, endorsed Canning's views but urged as indispensable the recognition of the independence of the new governments by Britain. He thought a unilateral statement better, and the joint declaration was never issued.

UNITED NATIONS

History, Membership, Organization and Purpose

The 23rd regular session of the United Nations General Assembly opened Sept. 1968. See *Chronology for developments at UN sessions during 1968*.

The resumed twenty-second session of the General Assembly, which began on Apr. 24, 1968, adjourned on June 12 after adopting a resolution commending the Treaty on the Non-Proliferation of Nuclear Weapons and another resolution on Namibia, formerly called South West Africa, declaring that the situation in the territory was "a grave threat to international peace and security," and calling on all States to help the Namibian people in their struggle for independence and to assist the United Nations Council for Namibia in ending South Africa's illegal occupation of the territory.

The membership of the UN rose to 124 states during the 22nd regular session of the General Assembly. This resulted from the admission of 2 new nations—Southern Yemen and Mauritius.

Foundations of the United Nations were laid at the Dumbarton Oaks Conference in Washington between the United States, the United Kingdom and the Soviet Union, Aug. 21-Sept. 28, 1944, and between the United States, the United Kingdom and the Republic of China (Nationalist) Sept. 29-Oct. 7, 1944. Proposals to establish

an organization of nations for maintenance of world peace led to the United Nations Conference on International Organization at San Francisco, Apr. 25-June 26, 1945, where the charter of the United Nations was drawn up. It was signed June 26 by 50 nations, and by Poland, one of the original 51, on Oct. 15, 1945. The charter came into effect Oct. 24, 1945, when the requisite ratification by the 5 permanent members of the Security Council, China, France, Soviet Union, United Kingdom and United States, and a majority of other signatories had been completed.

United Nations headquarters are located in New York, N. Y., between First Ave. and Roosevelt Drive and E. 42nd St. and E. 48th St. The General Assembly Bldg. (opened 1952), Secretariat, Conference and Library bldgs. are interconnected. The Dag Hammarskjöld Library, built by a \$6,200,000 grant from the Ford Foundation, was dedicated Nov. 16, 1961. It has room for 400,000 vols. To build the headquarters the U. S. Government advanced an interest-free loan of \$65,000,000, payable in annual instalments until 1982. John D. Rockefeller, Jr., contributed \$8,000,000 for land and the City of New York contributed an est. \$26,500,000 for adapting the site. United Nations has a post office originating its own stamps. See *Postal Information*.

Roster of the United Nations

(As of August, 1968)

The 124 Members of the United Nations, with the dates on which they became Members.

¹The Federation of Malaya joined the UN on Sept. 17, 1957. On Sept. 16, 1963, its name changed to Malaysia, following the admission to the new federation of Singapore. Sabah (North Borneo) and Sarawak, Singapore became an independent State Aug. 9, 1965 and a Member of the UN Sept. 21.

²Egypt and Syria were original Members of the United Nations from Oct. 24, 1945. Following a plebiscite held on Feb. 21, 1958, the United Arab Republic was established by a union of Egypt and Syria and continued as a single Member of the United Nations. On Oct. 13, 1961, Syria, having resumed its status as an independent State, resumed its separate membership in the Organization.

³Tanganyika was a Member of the United Nations from Dec. 14, 1961 and Zanzibar was a Member from Dec. 16, 1963. Following the ratification, on Apr. 26, 1964, of Articles of Union between Tanganyika and Zanzibar, the United Republic of Tanganyika and Zanzibar continued as a single Member of the United Nations, later changing its name to United Republic of Tanzania.

Operations of the United Nations Under Its Charter

The following article describes both the powers of the United Nations and its present organization. It is based on the provisions of the charter of the United Nations, and on an official report furnished by the Secretariat. The text of the Charter may be obtained from the Office of Public Information, United Nations, N. Y.

GENERAL ASSEMBLY

Officers and Committees 22nd (1967-68) Regular session:

President—Corneliu Manescu, Romania.
Vice Presidents—Australia, China, Dahomey, Dominican Republic, Ecuador, France, Iceland, Jordan, Laos, Libya, Nepal, Nicaragua, Sudan, Union of Soviet Socialist Republics, United Kingdom, United Republic of Tanzania, United States.
Committee Chairmen: First Committee (Political and Security)—Ismail Fahmy, United Arab Republic. Special Political Committee—Humberto Lopez Villamil, Honduras. Second Committee (Economic and Financial)—Jorge Pablo Fernandini, Peru. Third Committee (Social, Humanitarian and Cultural)—Mrs. Mara Radić, Yugoslavia. Fourth Committee (Trust and Non-Self-Governing Territories)—George J. Tomeh, Syria. Fifth Committee (Administrative and Budgetary)—Harry L. Morris, Liberia. Sixth Committee (Legal)—Edvard Hambro, Norway.

The General Assembly is composed of representatives of all the member nations. Each nation may send not more than five representatives to each session. Each nation is entitled to one vote.

The General Assembly meets in regular annual sessions and in special session when necessary. Special sessions are convoked by the Secretary General at the request of the Security Council or of a majority of the members of the UN.

Any matter within the scope of the charter may be brought before the General Assembly, which may make recommendations on all except issues on the agenda of the Security Council. However, the General Assembly in November, 1950, decided that if the Security Council, because of lack of unanimity of the permanent members, fails to exercise its primary responsibility for the maintenance of international peace and security, in any case where there appears to be a threat to the peace, breach of the peace or act of aggression, the Assembly may consider it and recommend collective measures, including, in the case of a breach of the peace or act of aggression, the use of armed forces to maintain or restore peace. In such cases, the General Assembly may be convened within 24 hours in an emergency special session.

On important questions a two-thirds majority of members present and voting is required; on other questions a simple majority is sufficient. Questions that require a two-thirds majority include: recommendations on maintenance of international peace and security, election of non-permanent members of the Security Council, election of members of the Economic and Social Council, election of members of the UN that are to designate the members of the Trusteeship Council, admission of members to the UN, suspension and expulsion of members, trusteeship questions and budgetary matters.

The General Assembly must approve the budget and apportion expenses among members. A member in arrears will have no vote if the amount of arrears equals or exceeds the amount of the contributions due for the preceding two full years. The General Assembly may permit such a member to vote if it is satisfied that the failure is due to conditions beyond control.

A general or steering committee co-ordinates the proceedings of the Assembly and is composed of 26 members—the president of the Assembly, the 18 vice-presidents, and the chairmen of the seven main committees.

SECURITY COUNCIL

The Security Council consists of 15 members, 5 with permanent seats. The remaining 10 are elected for 2-year terms by the General Assembly; they are not eligible for immediate re-election.

Permanent members of the Council: China, France, USSR, United Kingdom, United States.

Non-permanent members are Algeria, Brazil, Canada, Denmark, Ethiopia, Hungary, India, Pakistan, Paraguay, Senegal.

The Presidency of the Council is held monthly in turn by the member states in English alphabetical order.

The Security Council has the primary responsibility for maintaining international peace and security and members agree to carry out its de-

cisions. The Council may investigate any dispute that threatens international peace and security. When the Security Council is handling a dispute or situation the General Assembly requests it. The Secretary General notifies the General Assembly what matters are being dealt with, and if the G.A. is not in session he so notifies the members of the UN. The Security Council makes full reports to the G.A.

The Security Council functions continuously, each member being represented at all times. It may change its place of meeting. Any member of UN may participate in its discussions even if without a vote and a nation not a member of UN may appear if it is a party to a dispute.

Decisions on procedural questions are made by an affirmative vote of 9 members. On all other matters the affirmative vote of 9 members must include the concurring votes of all permanent members; it is this clause which gives rise to the so-called "veto." A party to a dispute must refrain from voting.

Reporting to the Security Council are: the Military Staff Committee, which advises the Council on military requirements for maintaining peace; and the Disarmament Commission which is concerned with the regulation and reduction of armaments and the control of nuclear weapons. The latter also reports to the General Assembly.

The Security Council may decide to enforce its decisions without the use of arms. Such measures include interruption of economic relations, break in transportation and communications, and severance of diplomatic relations. If such measures fail the Council may call on UN members to furnish armed forces, assistance and facilities, based on agreements made by the Council with the states and subject to ratification by the members of the UN "in accordance with their constitutional processes."

The right of individual or collective self-defense is not prohibited by membership in the UN, and if a member nation is attacked it may do what is necessary, reporting this to the Security Council, which may take independent action. However, the Council encourages regional arrangements or agencies by means of which local disputes can be settled without getting as far as the Council, after the Council has approved this method.

In the event of a conflict between the obligations of members to the UN and to other international bodies of which they may be members then obligations to the UN are paramount.

ECONOMIC AND SOCIAL COUNCIL

The Economic and Social Council consists of 27 members elected by the General Assembly for 3-year terms of office. The council is responsible under the General Assembly for carrying out the functions of the United Nations with regard to international economic, social, cultural, educational, health and related matters. The council meets usually twice a year.

Membership of the Council

Until Dec. 31, 1968—Czechoslovakia, Iran, Morocco, Panama, Philippines, Sweden, Union of Soviet Socialist Republics, United Kingdom, Venezuela.

Until Dec. 31, 1969—Belgium, France, Guatemala, Kuwait, Libya, Mexico, Sierra Leone, Turkey, Tanzania.

Until Dec. 31, 1970—Argentina, Bulgaria, Chad, Congo (Brazzaville), India, Ireland, Japan, United States, Upper Volta.

The President for 1968 was Manuel Perez Guerrero, Venezuela. The Economic and Social Council had the following commissions in 1967:

Functional Commissions

Statistical; Population; Social; Narcotic Drugs; Human Rights (and its Sub-Commission on the Prevention of discrimination and the protection of minorities); Status of Women.

Regional Economic Commissions

Economic Commission for Europe.

Economic Commission for Asia and the Far East.

Economic Commission for Latin America.

Economic Commission for Africa.

Also reporting to the Economic and Social Council are the Permanent Central Opium Board and the Drug Supervisory Body, the United Nations Children's Fund (UNICEF), the Council of the United Nations Development Program (UNDP) and the United Nations Special Fund, established to assist the economy of less-developed countries.

The Economic & Social Council may make recommendations for the purpose of promoting respect for, and observance of, human rights and fundamental freedoms for all.

It may call international conferences on matters falling within its competence.

TRUST AND NON-SELF GOVERNING TERRITORIES

The work of the United Nations in the field of dependent territories falls into two categories: (1) the duties and functions of the Trusteeship Council with respect to those territories placed under the International Trusteeship System; and (2) the responsibility of the Organization in connection with information on non-self-governing territories other than Trust territories. The objectives of trusteeship are to further international peace and security; promote the political, economic, social and educational advancement of the inhabitants and their progressive development toward self-government or independence. Also to encourage respect for human rights and fundamental freedoms without distinction as to race, sex, language or religion, and to encourage recognition of the interdependence of all peoples; to insure equal treatment in social, economic and commercial matters for all members of the United Nations and their nationals, and also equal treatment for the latter in the administration of justice.

TRUSTEESHIP COUNCIL

The administration of Trust territories is subject to the supervision of the United Nations. Administering authorities are required to render an account of their stewardship to the Trusteeship Council. The Council may entertain petitions from private persons or organizations regarding conditions in the Trust territories and may dispatch missions to study conditions there.

The membership of the Council is made up of (1) countries which administer trust territories (Australia, the United Kingdom and the United States); (2) countries which are permanent members of the Security Council but which do not administer trust territories (China, France, USSR); and (3) as many other countries as may be necessary to ensure equal representation in the Council between administering and non-administering members. Those in the last named category are elected by the General Assembly for 3-year terms and are eligible for immediate reelection.

The Council usually meets once a year, in the spring. The President of the 35th session (1968) was Mrs. Eugene M. Anderson, United States.

The trust territories and the members administering them are: New Guinea (Australia), Pacific Islands (United States). New Zealand is no longer a member of the Council. Its membership ceased as a result of the accession to independence of Nauru, in January 1968, which Australia had administered on behalf of herself, New Zealand and the United Kingdom. A former trust territory, Togoland (United Kingdom) became independent in 1957, joining the Gold Coast, formerly a British colony, to become the new State of Ghana. In April 1960 the former trust territories, Camerouns and Togoland (France), gained their independence and formed the Republics of Cameroon and Togo. In July 1960 the former trust territory of Somaliland (Italy) became together with British Somaliland, the Republic of Somalia. After plebiscites held in the Camerouns (United Kingdom) in 1961, the Northern section joined Nigeria, and the southern section joined the Republic of Cameroon. Tanganyika (United Kingdom), gained independence in December 1961, Western Samoa (New Zealand), became independent in January 1962, and Ruanda-Urundi (Belgium), in July 1962, separated into two independent countries, the Kingdom of Burundi and the Republic of Rwanda.

NON-SELF-GOVERNING TERRITORIES

Members of the United Nations responsible for the administration of non-self-governing territories not under trusteeships recognize the principle that the interests of the inhabitants are paramount and promote their welfare. They are bound by the charter to transmit to the Secretary-General technical information concerning economic, social and educational conditions in the territories. This information is summarized, analyzed and classified by the Secretariat. Since 1961 a committee has been studying the implementation of the 1960 general assembly declaration on the granting of independence to colonial countries and peoples. This committee also receives the reports on non self-governing territories.

INTERNATIONAL COURT OF JUSTICE

The International Court of Justice is the principal judicial organ of the United Nations. All members are *ipso facto* parties to the statute of the Court. Other states may become parties to the Court's statute on conditions determined in each case by the General Assembly on the recommendation of the Security Council.

The jurisdiction of the Court comprises cases which the parties submit to it and matters especially provided for in the charter or in treaties. The Court gives advisory opinions and renders judgments. Its decisions, which are final, are only binding between the parties concerned and in respect of a particular dispute. Of any party to a case fails to heed a judgment of the Court, the other party may have recourse to the Security Council, which may decide what is to be done.

The Court consists of 15 judges elected for 9-year terms by the General Assembly and the Security Council voting independently. No two of the judges may be nationals of the same state. Retiring judges are eligible for re-election. The Court remains permanently in session, except during the judicial vacations. A quorum of 9 judges suffices to constitute the Court. All questions are decided by majority. In the event of a tie, the President of the Court or the judge who acts in his place casts the deciding vote.

Judges

Nine-year term of office ending on Feb. 5, 1976:

Sture Petren, Sweden
Cesar Bengzon, Philippines
Fouad Ammoun, Lebanon
Manfred Lachs, Poland
Charles D. Onyeama, Nigeria

Nine-year term of office ending on Feb. 5, 1973:

Sir Gerald Fitzmaurice, United Kingdom
Isaac Forster, Senegal
Andre Gros, France
Luis Padilla Nervo, Mexico
Muhammad Zafrulla Khan, Pakistan

Nine-year term of office ending on Feb. 5, 1970:

Jose Luis Bustamante y Rivero, Peru
Philip C. Jessup, United States
Vladimir M. Koretsky, USSR
Gaetano Morelli, Italy
Kotaro Tanaka, Japan

AGENCIES RELATED TO THE UNITED NATIONS

Working in partnership with the United Nations in various economic, social, scientific and technical fields is a group of intergovernmental organizations related to the United Nations by special agreements. Among these agencies (with their headquarters) are:

International Atomic Energy Agency (IAEA) aims to promote the peaceful uses of atomic energy. (Vienna)

International Labor Org. (ILO) aims to promote social justice; improve labor conditions and living standards; and promote economic stability. (Geneva)

Food & Agriculture Org. (FAO) aims to raise nutrition levels and living standards; secure improvements in production and distribution of food and agricultural products. (Rome)

United Nations Educational, Scientific & Cultural Org. (UNESCO) aims to promote collabora-

tion among nations through education, science and culture in order to further human rights and freedoms without distinction of race, sex, language or religion. (Paris)

World Health Org. (WHO) aims to aid the attainment of the highest possible level of health. (Geneva)

International Bank for Reconstruction & Development (World Bank) aims to help in reconstruction and development of territories of members by facilitating investment of capital; promote foreign investment and supplement private investment by providing loans for productive purposes out of its capital, funds raised by it and its other resources; and to promote growth of international trade and equilibrium in balance of payments. (Washington, D. C.)

International Development Assn. (IDA) aims to further economic development of members by financing on terms bearing less heavily on balance of payments than those of conventional loans. (Washington, D. C.)

International Finance Corp. (IFC) aims to further economic development by encouraging productive private enterprise, particularly in less developed areas. It is empowered to invest in private enterprises in association with private investors, and without government guarantee of repayment in cases where sufficient private capital is not available on reasonable terms; and to bring together private capital and management. (Washington, D. C.)

International Monetary Fund (Fund) aims to promote international monetary co-operation and expansion of international trade; to promote exchange stability and avoid competitive exchange depreciations; to assist in the establishment of a multilateral system of payments between members and in the elimination of foreign restrictions. (Washington, D. C.)

International Civil Aviation Org. (ICAO) promotes international standards and regulations. (Montreal)

Universal Postal Union (UPU) aims to perfect postal services and promote development of international collaboration. To this end, member countries are united in a single postal territory for reciprocal exchange of mail. (Berne)

International Telecommunication Union (ITU) sets up international regulations for radio, telegraph and telephone services and studies means to lower costs on international services. (Geneva)

World Meteorological Org. (WMO) aims to co-ordinate, standardize and improve world meteorological work. (Geneva)

Intergovernmental Maritime Consultative Org. (IMCO) aims to promote co-operation in technical problems of international shipping and to encourage the removal of discriminatory action by governments and restrictive practices by shippers. (London)

General Agreement on Tariffs and Trade (GATT) was drafted in 1946. Its functions are to ease trade barriers and establish rules of fair trade. In recent years, GATT has made special efforts to develop international trade and also has given particular emphasis to increasing the export trade of developing countries. (Geneva)

United Nation's Children's Fund (UNICEF) helps requesting countries meet the urgent needs of their children. Supported entirely by voluntary contributions from governments and individuals, UNICEF is currently helping 112 countries, mainly in the developing areas of the world. It is governed by a thirty-nation executive board. (New York)

SECRETARIAT

The Secretariat is composed of a Secretary-General appointed by the General Assembly upon the recommendation of the Security Council and such staff as the organization may require.

The Secretary General is the chief administrative officer of the UN. He may bring to the attention of the Security Council any matter that

threatens international peace. He reports to the General Assembly.

Secretary General—U Thant (Burma).

An international staff assists the Secretary-General. Its members are recruited on a wide geographical basis and are appointed by him. The Secretary General and staff may not receive instructions from outside authorities or be influenced by the UN members.

The principal officers as of August 1, 1968 were: Officials of the rank of under-Secretary-General at Headquarters:

Conference Services—Jiri Nosek (Czech.).

Economic and Social Affairs—Philippe de Seynes (France).

General Assembly Affairs and Chef de Cabinet—C. V. Narasimhan (India).

Political and Security Council Affairs—Leonid N. Kutakov (USSR).

Special Political Affairs—José Rolz-Bennett (Guatemala), Ralph J. Bunche (U. S.).

Trusteeship and Non-Self-Governing Territories—Issoufou S. Djermakoye (Niger).

Officials of the rank of Assistant-Secretary-General at Headquarters:

Controller—Bruce Turner (New Zealand).

General Services—David Vaughn (U. S.).

Legal Counsel—Constantin A. Stavropoulos (Greece).

Personnel—William W. Cox (U. S.).

Public Information—Agha Abdul Hamid (Pakistan).

Technical co-operation—Victor Hoo (China).

UN Children's Fund—Henry R. Labouisse (U. S.).

UN Development Program—Paul G. Hoffman (U. S.), David Owen (U. K.), Roberto Heurtematte (Panama).

UN Institute for Training and Research—Chief S. O. Adebisi (Nigeria).

Offices Overseas

Africa—Robert K. A. Gardiner (Addis-Ababa).

Asia and Far East—U Nyun (Bangkok).

Europe—Janez Stanovnik (Geneva).

Geneva—Vittorio W. Guicciardi (Geneva).

Latin America—Carlos Quintana (Santiago).

Industrial Development Organization—Ibrahim Helmi Abdel-Rahman (Vienna).

Conference on Trade and Development—Raül Prebisch (Geneva).

In charge of Missions, or Special Assignments: Chief of Staff, UNTSO—General Odd Bull (Jerusalem).

UN Relief and Works Agency for Palestine Refugees in the Near East—Laurence V. Michelmore (Beirut).

Refugees—Prince Sadruddin Aga Khan (Geneva).

Commander, UN Force in Cyprus—General I. A. E. Martola (Nicosia).

Special Representative of Secretary-General in Cyprus—B. F. Osorio-Tafall (Nicosia).

Chief Officer UN India-Pakistan Observation Mission—Dr. F. Graham (New York).

UNITED NATIONS BUDGET

The General Assembly voted a gross budget of \$140,430,950 for 1968—\$10,116,720 higher than the gross budget for 1967. It also approved estimates of income totalling \$23,635,000, thus bringing the net budget for 1968 to \$116,795,950.

Major International Organizations

(See also United Nations)

THE COMMONWEALTH, originally called the British Commonwealth of Nations, is an association of nations and dependencies loosely joined by a common interest based on having been parts of the old British Empire. The British monarch is the symbolic head of the Commonwealth. By tacit agreement, the name British Commonwealth of Nations has been shortened to the Commonwealth.

There are 28 self-governing independent nations which are full members of the Commonwealth, plus some 50 colonies, protectorates and trust territories which are dependencies of the United Kingdom, Australia or New Zealand and which are thus part of the Commonwealth.

The 28 members, as of Aug. 1968 were the United Kingdom of Great Britain and Northern Ireland and 12 other nations recognizing the British monarch, represented by a governor-general, as their head of state: Australia, Barbados, Canada, Ceylon, Gambia, Guyana, Jamaica, Malta, Mauritius, Sierra Leone, Trinidad and Tobago, New Zealand; and 15 countries with their own heads of state: Botswana, Cyprus, Ghana, India, Kenya, Lesotho, Malawi, Malaysia, Nigeria, Pakistan, Singapore, Swaziland, Tanzania, Uganda, Zambia.

The Commonwealth is an evolving organization. Many of its members have obtained independence from Britain and became full members since 1945. Members may secede; Ireland left in 1949, the Republic of South Africa left in 1961. Nations which have won independence since 1945 and did not join the Commonwealth are Burma (1948), Sudan (1956), Somaliland (1960), Southern Cameroons (1961), Maldivé Islands (1965), Southern Yemen (1967).

The Commonwealth facilitates consultation among member states through meetings of prime ministers and finance ministers; economic, scientific and educational standing committees provide information and other services. Population (est. 1966) was 737,300,000 in member nations and 12,000,000 in dependencies.

THE FRENCH COMMUNITY was created in the 1958 French Constitution and modified by later amendment. It is an association of France, its Overseas Departments and Territories, 6 African republics (former possessions) and one Condominium (New Hebrides). France aids members in construction of roads, railroads, etc., and in improvement of agricultural production, health and education. France and the 6 African republics have cultural, economic, financial and technical cooperation agreements. Nine other African republics have bilateral agreements of cooperation with France. There are also economic, customs and monetary unions to which various African states belong. (See *France for Community members.*)

NORTH ATLANTIC TREATY ORG. (NATO) was created April 4, 1949, in a treaty signed in Washington, effective Aug. 24, by Belgium, Canada, Denmark, France, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, the United Kingdom and the U. S. Greece, Turkey and West Germany have joined since. The members agreed to settle disputes by peaceful means; to develop their individual and collective capacity to resist armed attack; to regard an attack on one as an attack on all and to take necessary action to repel it under Art. 51 of the UN Charter.

NATO Council meetings may consist of heads of government, cabinet ministers, or permanent NATO representatives, who hold the rank of ambassadors. The Military Committee is composed of the Chiefs-of-Staff of the member countries and permanent representatives.

Armed forces of NATO members include forces assigned to NATO commands, forces earmarked for NATO commands and forces under national command. There is a Supreme Allied Commander Europe (SACEUR); a Supreme Allied Commander Atlantic (SACLANT); a Channel Committee and Allied Command Channel (covering the English Channel and southern North Sea); a Canada-U. S. Regional Planning Group.

Following announcement in 1966 of nearly total French withdrawal from the military affairs of NATO, the Council moved its hq. in 1967 from Paris to Evere, near Brussels, and SACEUR's hq. (SHAPE) to Casteau, Belgium; a subordinate command, Allied Forces Central Europe, was to go to Maastricht, Netherlands; the Military Committee's Standing Group (the U. K., U. S. and France) was abolished.

EUROPEAN ECONOMIC COMMUNITY (EEC) generally called the Common Market (or "Inner Six"), came into effect Jan. 1, 1958, after Belgium, France, Italy, Luxembourg, the Netherlands and West Germany signed a treaty in Rome in March, 1957, to work toward a customs union and free flow of goods and services. Britain's applications for admission were vetoed by France in 1963 and 1967. Other nations have become associate members.

ORGANIZATION OF AMERICAN STATES (OAS) grew out of the Pan American Union, which, with hq. in Washington, is its general secretariat. OAS (formed at Bogota, Colombia, 1948) has a Council, to which each of the member nations sends a representative. The Council can call meetings of ministers of foreign affairs to make decisions under the *Inter-American Treaty of Reciprocal Assistance*, formed in Rio de Janeiro 1947, to which most countries of the western hemisphere belong. There are 23 members, each with one vote on the Council and other organizations: Argentina, Barbados, Bolivia, Brazil, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Trinidad-Tobago, U. S., Uruguay, Venezuela. In 1962, the OAS excluded Cuba "from participation in the inter-American system," a step motivated by Cuba's "alignment with the Communist bloc" and designed to exclude it from OAS activities but not to deprive it of OAS membership.

CENTRAL TREATY ORG. OF THE MIDDLE EAST (CENTO) was formed 1959 by Iran, Turkey, Pakistan and the United Kingdom to continue the mutual security and economic development objectives of the 1955 Baghdad Pact from which Iraq had withdrawn. The U. S. is represented on some of its committees and signed bilateral defense agreements with Iran, Turkey and Pakistan. Funds of the 4 members and the U. S. have been used in economic programs. Rail, road and radio links, harbors and schools are included.

EUROPEAN FREE TRADE ASSOCIATION (EFTA), consisting of Austria, Denmark, Norway, Portugal, Sweden, Switzerland and the United Kingdom (sometimes called the "Outer Seven"), was created by treaty Jan. 4, 1960, effective May 3, to gradually reduce customs duties and quantitative restrictions between members on industrial (but not agricultural) products. By Dec. 31, 1966, tariffs and restrictions had been eliminated. Finland became an associate member in 1961.

WARSAW TREATY ORGANIZATION (WARSAW PACT) was created May 14, 1955, as a 20-year mutual defense alliance by Albania, Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania and the USSR. However, Albania was excluded from the group's meetings in 1962. It provides for a unified military command with headquarters in Moscow; if one member is attacked, the others will aid it with all necessary steps including armed force; joint maneuvers are held; there is a Political Consultative Committee and economic cooperation is advanced.

SOUTHEAST ASIA TREATY ORGANIZATION (SEATO) was established Sept. 8, 1954, by Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the U. S. to provide for collective defense and economic cooperation in SE Asia. France boycotted the 1967 annual ministers' meeting. Bangkok is hq.

LEAGUE OF ARAB STATES (THE ARAB LEAGUE) was created March 22, 1945, by Egypt (United Arab Republic), Iraq, Jordan, Lebanon, Saudi Arabia, Syria and Yemen. Joining later were Algeria, Kuwait, Libya, Morocco, Southern Yemen, Sudan and Tunisia. Cairo is headquarters for the Secretary-General. The League has created Arab Postal and Telecommunications Unions. The League has maintained a boycott of Israel.

ORGANIZATION OF AFRICAN UNITY (OAU) was formed May 25, 1963, by 30 African countries to coordinate cultural, political, scientific and economic policies; to end colonialism in Africa; to promote a common defense of members' independence. It holds conferences of heads of government, has a council of foreign ministers, a secretary-general and a mediation-arbitration commission. Hq. is in Addis Ababa, Ethiopia.

International Bank for Reconstruction and Development

Robert S. McNamara, President

Address, 1818 H St., N.W., Washington, D. C. 20433. European Office, Paris

The Articles of Agreement of the International Bank for Reconstruction and Development, also known as the World Bank, were drawn up by representatives of 44 nations at the United Nations Monetary and Financial Conference, Bretton Woods, N. H., July 1-12, 1944. Its official existence dates from December 27, 1945, when the articles were signed by 28 nations in Washington. By June 30, 1968, 107 countries were members.

The purposes of the Bank are: to assist the economic development of member countries by facilitating investment of capital for productive purposes, and thereby promote growth of international trade and improvement of standards of living; to promote participation in loans and investments made by private investors, and to make loans for productive purposes when private capital is not easily available.

The Bank's chief sources of funds for loans are derived from paid-in capital subscriptions and from the sale of its own bonds and by other borrowing in the capital markets. By June 30, 1968, the subscribed capital was \$22,941,900,000. Of this \$2,294,190,000 was paid-in capital, the greater part of which has been made available for loans; \$20,647,710,000 was on call and serves as a guarantee fund for the Bank's bonds and other obligations. The Bank's funded debt at that time amounted to \$3,289,568,000 which included obligations in U. S. dollars, Canadian dollars, Belgian francs, Netherlands guilders, pounds sterling, Swedish kronor, Swiss francs, Deutsche marks and Italian lire. The Bank's funds for loans also are replenished through sales of parts of Bank loans to outside investors. Funds from this source amounted to \$2,142,637,000.

By June 30, 1968, the Bank had made 552 loans totaling over \$11,246,854,000 in 85 countries or territories. Where the government itself was not the borrower the government guaranteed the loan. Disbursements on loans approximated \$8,820,919,000.

Net income for the fiscal year ended June 30, 1968, was \$169,124,000. Loan commissions were \$595,000. Commissions were added to the Special Reserve, raising it to \$291,017,000. After the close of the fiscal year ended June 30, 1968, the Executive Directors of the Bank allocated \$96,124,000 from net income for 1967-68 to Supplemental Reserve, increasing it to \$963,108,000, and recommended to the Board of Governors that the balance of \$75,000,000 of that year's net income be transferred to the International Development Association (IDA), an affiliate of the Bank, as a grant.

There was a further expansion in the Bank's technical assistance services. It assisted member countries in preparing development projects and programs of high priority. It also acted as executing agency for a number of pre-investment studies financed by the United Nations Development Programme. Members of the Bank's Development Advisory Service worked with several countries on planning and development policy.

International Development Assn. (IDA) provides finance on terms more flexible and bearing less heavily on the balance of payments of recipient countries than those of conventional loans. IDA's funds are kept separate from those of the Bank. Membership is open to the Bank's members. By June 30, 1968, 98 countries had become members with initial subscriptions amounting to \$1,000,222,000. Its supplementary resources amounted to \$1,004,230,000, including \$49,495,000 additional

contributions by Sweden and \$210,000,000 transfers from the Bank. It has also borrowed \$12,100,000 from the Swiss Confederation. \$1,829,100,000 of usable funds had been available for commitment as of June 30, 1968. IDA had extended 127 development credits totaling \$1,788,400,000 in 40 countries; 21 in Africa, 8 in Asia and the Middle East, 10 in the Western Hemisphere, and one in Europe.

These credits are on identical terms: each is for 50 years, free of interest. Repayment is due in foreign exchange; amortization is to begin after a ten-year period; thereafter, 1% of the principal is repayable annually for 10 years and 3% annually for the final 30 years. A service charge of 3/4 of 1% per annum, payable on the amounts withdrawn and outstanding is made to meet IDA's costs.

International Finance Corporation

The International Finance Corporation (IFC) was established by member governments in July 1956, as an affiliate of the International Bank for Reconstruction and Development (World Bank). Its objective is to assist less developed member countries by helping to promote the growth of productive private enterprise.

At June 30, 1968, IFC's share capital was \$101,368,000, subscribed by 86 countries. IFC is empowered to increase its lending resources by borrowing up to approximately \$400,000,000 from the World Bank. The first use of this line of credit, a \$100,000,000 drawing, was approved in October 1966.

IFC provides risk capital for productive private enterprises, in association with private investors and management. It encourages the development of local capital markets and it seeks to stimulate the international flow of private capital. The Corporation makes investments in the form of share subscriptions and long-term loans. It carries out standby and underwriting arrangements and it provides financial and technical assistance to privately controlled development finance companies. It neither seeks nor accepts government guarantees.

IFC is responsible for the technical and financial appraisal and supervision of all industrial, mining and development finance company projects submitted to the World Bank Group (the World Bank, the International Development Assn. and IFC).

In the year ended June 30, 1968, IFC's commitments rose to a record annual level of \$50,700,000 from \$49,100,000 in the previous year. This brought the cumulative total of gross commitments to \$271,800,000, representing 154 transactions in 39 countries.

IFC expanded its geographic scope in the 1967/68 fiscal year by making its first investment in Korea, Mauritania and Nicaragua. This brought to 39 the number of countries in which IFC has operated.

Net income of IFC in 1967/68 rose to \$6,200,000 from \$6,000,000 in the previous year. The reserve against losses increased to \$41,000,000 from \$34,700,000. Sales of portions of IFC commitments to other investors came to \$18,600,000. These items, together with subscriptions from three new members—Vietnam, Mauritania and Indonesia—and loan repayment, raised the cumulative total of funds available to the IFC to \$340,000,000.

Robert S. McNamara, President of the World Bank, is Chairman and President of IFC. Martin M. Rosen is Executive Vice President. The address of IFC is 1818 H Street, N.W., Washington, D. C. 20433.

International Monetary Fund

Pierre-Paul Schweitzer, Managing Director and Ch. of Executive Board
1914 and H Sts., NW, Washington, D. C.

The International Monetary Fund, with over \$21 billion in gold and national currencies, is the world's largest source of quickly available international credit. By April 30, 1968, the 107-nation Fund had provided \$14.6 billion in short-term financial assistance to 64 of its member countries. Its activities reached a record level in 1961 when 22 members drew the equivalent of \$2,478.5 million. The Fund was established in terms of Articles of Agreement formulated at the Bretton Woods Conference, July, 1944, effective Dec. 27, 1945.

The purposes of the Fund are: (1) to promote international monetary cooperation through a permanent institution which provides machinery for consultation and collaboration on international

monetary problems, and, more specifically, (2) to promote exchange stability and avoid competitive exchange depreciation, (3) to assist in the establishment of a multilateral system of payments in respect of current transactions, which means the eventual elimination of restrictions on the making of payments and transfers for current international transactions and the avoidance of discriminatory currency arrangements or multiple currency practices, and (4) to permit members, under appropriate conditions, to draw upon the resources of the Fund with a view to shortening the duration and lessening the degree of any disequilibrium which may from time to time arise in their balances of payments.

The Fund obtains its resources from the payment by members of quotas, the size of which was agreed for original members at Bretton Woods. Each member pays in gold either 25% of its quota or 10% of its net official holdings of gold and convertible currency, as of a certain date, and the remainder in the member's own currency. The aggregate of members' quotas as of April 30, 1968 was equivalent to \$21,119,400,000. The total subscriptions paid on that date amounted to the equivalent of \$20,350,400,000, of which \$4,908,200,000 was received in gold.

Members are under an obligation, once the foreign exchange values of their currencies have

been agreed with the Fund, to make no change in their exchange rates without consultation with the Fund. The Fund, however, is not entitled to object if the proposed change does not exceed 10% of the original par value. By the end of April 30, 1968, 76 countries had effective par value agreed with the Fund. From the commencement of operations on Mar. 1, 1947, through April 30, 1968, exchange drawings on the Fund amounted to the equivalent of U. S. \$14,630,600,000. On that date repurchases amounted to \$7,439,500,000 in gold and currencies. Sales of members' currencies and other items reduced the net amount due to \$4,549,900,000.

Inter-American Development Bank

Felipe Herrera, President, 808 17th St., N.W., Washington, D. C. 20577

The Inter-American Development Bank was created Dec. 30, 1959, to foster the individual and collective development of its member countries, which are:

Argentina	Ecuador	Paraguay
Bolivia	El Salvador	Peru
Brazil	Guatemala	Trinidad &
Chile	Haiti	Tobago
Colombia	Honduras	United States
Costa Rica	Mexico	Uruguay
Dominican Republic	Nicaragua	Venezuela
	Panama	

The Bank was set up with two completely separate funds: the ordinary capital resources, currently authorized at \$3.15 billion, and a Fund for Special Operations totaling \$2,321,436,000.

The authorized ordinary resources include \$475,000,000 in "paid in" capital and \$2,675,000,000 in "callable" capital. A total of \$383,650,000 of the paid in portion has been subscribed by the member countries and another \$91,350,000 is available for subscription by countries which might join the Bank in the future. Of the callable portion, \$2,356,710,000 has been subscribed and \$318,290,000 is available for subscription by present or future members. The callable capital, in effect, constitutes a guarantee of the Bank's securities and thus enables the Bank to borrow funds in the world's capital markets. As of June 30, 1968, the Bank's outstanding borrowings amounted to \$540 million.

With its ordinary resources, the Bank makes "hard" loans for development projects on conventional terms, including repayment in the currencies lent, and interest rates which reflect the cost to the Bank of borrowing funds in the world's capital markets.

The Fund for Special Operations is used to make "soft" loans, on terms and conditions which are more flexible than those applied to loans made from the ordinary capital resources, which are made primarily for economic or infrastructure projects.

In addition to its own resources, the Bank also administers other funds. Since 1961 it has been the Administrator of the Social Progress Trust Fund, which the United States Government established to promote social development in Latin America as part of the Alliance for Progress program. The U. S. has contributed \$525,000,000 to this Fund.

It also administers resources totaling \$52,000,000 entrusted to it by Canada, Sweden and the United Kingdom for economic development projects in Latin America.

As of June 30, 1968, the Bank had authorized 466 loans totaling \$2.5 billion in Latin America for projects whose total cost is estimated at \$6.6 billion. Of this amount, 158 loans totaling \$926 million were authorized from the ordinary capital resources, 177 loans totaling \$1,046 million from the Fund for Special Operations, 117 loans totaling \$501 million from the Social Progress Trust Fund and 14 loans totaling \$27 million from the resources it administers for non-member countries.

The distribution of the loans by fields of investment was: Industry and mining \$500 million; Agriculture \$577 million; Water supply and Sewage systems \$413 million; Transportation \$256 million; Electric power \$257 million; Housing \$300 million; Advanced education \$108 million; Pre-investment \$60 million; and Credit to finance export of capital goods \$29 million.

The Voice of America and Other World-Wide Broadcasting

VOICE OF AMERICA, a division of the United States Information Agency (USIA), furnishes countries all over the globe with news of American events and policies, analyses of current issues and programs about life in the United States. It broadcasts some 800 hours weekly in 36 languages over 102 medium and shortwave transmitters, 61 overseas and 41 in the U. S. About 40% of these broadcasts are directed toward Communist countries. These had about 2,000 transmitters that in the past have tried to jam the American stations. In mid-1963 the USSR ceased jamming and some of the other communist countries did likewise, but a certain amount of jamming has continued.

It is estimated that 42,000,000 listeners hear the programs during an average week with many more in times of crisis. Estimate based on mail received (over 200,000 letters annually), surveys, etc.

USIA also has 213 posts in 101 countries (where they are known as the U. S. Information Service or USIS). The Motion Picture and Television Service of USIA annually produces films and television programs, illustrating various facets of American life. These are shipped in several language versions to USIS posts which arrange for commercial and private showings, as well as telecasts on foreign TV stations. The Press and Publications Service radioteletypes a daily 12,000-word compilation of major addresses and statements of general interest by American leaders to USIS posts for placement in foreign newspapers and periodicals. It also publishes magazines such as *America Illustrated*, which is distributed and sold in two editions in USSR and Poland. The cultural aspects

of USIA's programs are carried out by the above services and information centers, libraries, reading rooms and binational centers in more than 80 countries. USIA director is Leonard H. Marks.

RADIO FREE EUROPE is the major division of Free Europe, Inc., 2 Park Ave., New York. William P. Durkee is president, Ralph E. Walter, director, is based at RFE headquarters in Munich, West Germany. RFE is a privately operated network of 5 radio stations that broadcasts to the 84,000,000 people of Communist-ruled Bulgaria, Czechoslovakia, Hungary, Poland and Romania in their native languages. It operates 32 transmitters, located in West Germany and Portugal, with a total power of 2,260,000 watts. RFE is on the air 536 hours a week, broadcasting news and information about the free world and the countries under Communist domination, as well as programs of music, political comment, entertainment, sports and religion beamed at all age groups. Surveys indicate RFE has a regular audience exceeding 25,000,000.

RADIO LIBERTY speaks to the peoples of the Soviet Union as the free voice of their fellow countrymen abroad. It is supported by the Radio Liberty Committee, Inc., a private, non-profit organization with headquarters at 30 East 42nd Street, New York, N. Y. Howland H. Sargeant, President. In its transmission to the Soviet Union, Radio Liberty uses 17 languages of that country. Radio Liberty broadcasts 24 hours a day, 7 days a week. Fourteen transmitters in Spain and Western Germany and 3 transmitters on Taiwan broadcast a total of 235-315 transmitter hours daily. Total transmitting power is 1,840,000 watts.

Heads of States and Prime Ministers

Data to Aug. 15, 1968

Country	Head of State, Title	Born	Acceded or Elected	Premier or Prime Minister
Afghanistan	Mohammad Zahir Shah, King	Oct. 15, 1914	Nov. 8, 1933	Noor Ahmad Etemadi
Albania	Maj.-Gen. Haxhi Lleshi, Pres.		July 1953	Maj.-Gen. Mehmet Shehu
Algeria	Col. Houari Boumedienne, Pres.	1925	June 19, 1965	
Andorra	Pres. of France & Spanish Bishop of Urgel			
Argentina	Lt. Gen. Juan Carlos Onganía, Pres.	May 17, 1914	June 28, 1966	
Australia (C)	Lord Richard G. Casey, Gov. Gen. (*)	Aug. 29, 1890	Sept. 22, 1965	John G. Gorton
Austria	Franz Jonas, Pres.	Oct. 4, 1899	June 9, 1965	Josef Klaus
Barbados (C)	Dr. A. W. Scott, Gov. Gen. (*)	Mar. 17, 1900	May 18, 1967	E. W. Barrow
Belgium	Baudouin I, King	Sept. 7, 1930	July 17, 1951	Gaston Eyskens
Bhutan	Maharajah Jigme Dorji Wangchuk	1929	Oct. 27, 1952	Lhendup Dorji
Bolivia	Gen. Rene Barrientos, Pres.	May 30, 1918	Aug. 6, 1966	
Botswana (C)	Sir Seretse Khama, Pres.	1921	Oct. 1, 1966	
Brazil	Arthur da Costa e Silva, Pres.	Oct. 3, 1902	Mar. 15, 1967	
Bulgaria	Georgi Traikov, Pres.	1898	Apr. 23, 1964	Todor Zhivkov
Burma				Gen. Ne Win
Burundi	Michael Micombero	1939	Nov. 28, 1966	
Cambodia	Prince Norodom Sihanouk, Chief of State	Oct. 31, 1932	June 20, 1960	Son Sann
Cameroon	Ahmadou Ahidjo, Pres.		1960	Charles Assale
Canada (C)	Roland Michener, Gov.-Gen. (*)	Apr. 19, 1900	Apr. 5, 1967	Pierre E. Trudeau
Central African Rep. (F)	Col. Jean Bedel Bokassa		Jan. 1, 1966	
Ceylon (C)	William Gopallawa, Gov. Gen. (*)	1898	Mar. 2, 1962	Dudley Senanayake
Chad Rep. (F)	Francois Tombalbaye, Pres.	1918	Aug. 11, 1960	
Chile	Eduardo Frei Montalva, Pres.	June 16, 1911	Sept. 4, 1964	
China, People's Republic	Liu Shao-chi	c. 1898	Apr. 27, 1959	Chou En-Lai
China (Taiwan)	Gen. Iissimo, Chiang Kai-shek, President	1887	Apr. 1948	C. K. Yen
Colombia	Dr. Carlos Lleras Restrepo, Pres.	Apr. 12, 1908	Aug. 7, 1966	
Congo—Brazzaville (F)	Alphonse Massamba—Debat, Pres.		Aug. 10, 1963	Alphonse Massamba—Debat
Congo, Dem. Rep.	Lt. Gen. Joseph Mobutu, Pres.	Oct. 30, 1930	Nov. 25, 1965	Brig. Gen. Leonard Mulamba
Costa Rica	Jose Joaquin Trejos, Pres.	Apr. 18, 1916	May 8, 1966	
Cuba	Dr. Osvaldo Dorticos Torrado	1919	July 17, 1959	Fidel Castro
Cyprus (C)	Archbishop Makarios, Pres.	Aug. 13, 1913	Dec. 14, 1959	
Czechoslovakia	Ludvik Svoboda, Pres.	Nov. 25, 1895	Mar. 30, 1968	Oldrich Cernik
Dahomey Rep.	Emile Derlin Zinsou, Pres.	1918	June 27, 1968	
Denmark	Frederick IX, King	Mar. 11, 1899	Apr. 20, 1947	Hilmar Baunsgaard
Dominican Rep.	Dr. Joaquin Balaguer	1907	July 1, 1966	
Ecuador	Jose Maria Velasco Ibarra, Pres.	1893	June 3, 1968	
El Salvador	Col. F. Sanchez Hernandez, Pres.	1918	July 1, 1967	
Ethiopia	Haile Selassie I, Emperor	July 23, 1892	Nov. 2, 1930	Aklilu Abde Wold
Finland	Dr. Urho Kekkonen, Pres.	Mar. 9, 1900	Feb. 15, 1956	Mauno Koivisto
France (F)	Gen. Charles A. de Gaulle, Pres.	Nov. 22, 1890	Dec. 21, 1958	Maurice Couve de Murville

U. S. Aid to Foreign Countries

Source: Office of Business Economics, U. S. Department of Commerce

For security reasons data by country do not include the military aid furnished principally under the mutual security program. Data shown include credits which have been extended to private entities in the country specified.

Grants are largely outright gifts for which no payment is expected or which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective.

Credits are loans or other agreements which give rise to specific obligations to repay, over a period of years, usually with interest.

Net grants and credits take into account all known returns to the U. S. Government, including reverse grants, returns of grants and payments of principal. A minus sign indicates that the total of these returns to the U. S. is greater than the total of grants or credits.

Other assistance represents the transfer of U. S. farm products in exchange for foreign currencies, less the Government's disbursement of the currencies as grants, credits, or for purchases. The net acquisitions of currencies represents net transfers of resources to foreign currencies, in addition to those classified as grants or credits.

Amounts do not include investments in international financial institutions as follows: Asian Development Bank (ADB) \$10,000,000; Inter-American Development Bank (IDB), \$65,000,000; International Development Association (IDA) \$119,000,000.

(In millions of dollars or equivalent) (*Less than \$500,000)

Major U. S. Foreign Aid, by Type

Source: Office of Business Economics, U. S. Department of Commerce

Grants and credits are generally goods delivered or shipped by services rendered by, or funds disbursed by U. S. Government to or for account of a foreign government. Reverse grants and returns, and principal collections, are comprised of goods, services, and funds received by U. S. Government. Assistance through net accumulation of foreign currency claims represents transfer of U. S. farm products in exchange for foreign currencies, less U. S. disbursements of the currencies as grants, credits, or for purchases.

Type—Post-war period (a)	1945-1967 (In millions)	Type—Post-war period (a)	1945-1967 (In millions)
Total	\$111,874	Gross grants	51,924
Investment in 5 international financial institutions (b)	1,384	Less: Reverse grants and returns	1,877
Under assistance programs, net	110,490	Net new credits (c)	19,373
Military grants (supplies and services), net	37,611	New credits	33,354
Gross grants	38,095	Less: Principal collections	13,981
Less: Reverse grants and returns	484	Other assistance (through net accumulation of foreign currency claims), net	3,259
Other aid, net	72,879	Farm products sales (claims acquired (d))	14,115
Net, new grants (c)	50,247	Less: Currency disbursed	10,855

(a) July 1, 1945, through Dec. 31, 1967. all lend-lease from V-J Day (Sept. 2, 1945) (b) Asian Development Bank, Inter-American Development Bank, International Bank for Reconstruction & Development, International Development Ass'n., and International Finance Corp. (c) Net new grants have not been adjusted for postwar relief and other grants under agreements. Net new credits exclude prior grants converted into credits totaling \$2.74 billion. Repayments on these settlements are included in net new credits. (d) Includes foreign currencies acquired through second stage operations under farm sales legislation, such as principal and interest amounting to \$548,000,000.

WEIGHTS AND MEASURES

Source: National Bureau of Standards, Department of Commerce

Tables of United States Customary Weights and Measures

LINEAR MEASURE

12 inches (in.)	= 1 foot (ft)
3 feet	= 1 yard (yd)
5½ yards	= 1 rod (rd), pole, or perch (16½ ft)
40 rods	= 1 furlong (fur.) = 220 yards = 660 feet
8 furlongs	= 1 statute mile (mi) = 1,760 yards = 5,280 feet
3 miles	= 1 league = 5,280 yards = 15,840 feet
6,076.11549 feet	= 1 International Nautical Mile

AREA MEASURE

Squares and cubes of units are sometimes abbreviated by using "superior" figures. For example, ft² means square foot, and ft³ means cube foot.

144 square inches	= 1 square foot (ft ²)
9 square feet	= 1 square yard (yd ²) = 1,296 square inches
30¼ square yards	= 1 square rod (rd ²) = 272¼ square feet
160 square rods	= 1 acre = 4,840 square yards = 43,560 square feet
640 acres	= 1 square mile (mi ²)
1 mile square	= 1 section (of land)
6 miles square	= 1 township = 36 sections = 36 square miles

CUBIC MEASURE

1,728 cubic inches (in ³)	= 1 cubic foot (ft ³)
27 cubic feet	= 1 cubic yard (yd ³)

GUNTER'S OR SURVEYOR'S CHAIN MEASURE

7.92 inches (in.)	= 1 link
100 links	= 1 chain (ch) = 4 rods = 66 feet
80 chains	= 1 statute mile (mi) = 320 rods = 5,280 feet.

LIQUID MEASURE

When necessary to distinguish the liquid pint or quart from the dry pint or quart, the word "liquid" or the abbreviation "liq" should be used in combination with the name or abbreviation of the liquid unit.

4 gills	= 1 pint (pt) (= 28.875 cubic inches)
2 pints	= 1 quart (qt) (= 57.75 cubic inches)
4 quarts	= 1 gallon (gal) (= 231 cubic inches) = 8 pints = 32 gills

DRY MEASURE

When necessary to distinguish the dry pint or quart from the liquid pint or quart, the word "dry" should be used in combination with the name or abbreviation of the dry unit.

2 pints (pt)	= 1 quart (qt) (= 67.200 6 cub. o inches)
8 quarts	= 1 peck (pk) (= 537.605 cublo inches) = 16 pints
4 pecks	= 1 bushel (bu) (= 2,150.42 cublo inches) = 32 quarts

AVOIRDUPOIS WEIGHT

When necessary to distinguish the avoirdupois ounce or pound from the troy ounce or pound, the word "avoirdupois" or the abbreviation "avdp" should be used in combination with the name or abbreviation of the avoirdupois unit.

(The "grain" is the same in avoirdupois and troy weight.)
